
OLR Bill Analysis

sHB 5336

AN ACT CONCERNING ADVANCED NUCLEAR ENERGY.

SUMMARY

This bill requires the Connecticut Council for Advancing Nuclear Energy Development, within available appropriations, to study the demand for skilled labor in the advanced nuclear energy industry, including the development of nuclear power technologies such as small modular reactors, micro-reactors, or reactors that use cooling sources such as molten salt, liquid metal, or high temperature gas.

In connection with the study, the bill allows the council to recommend legislation or regulations needed to support the development, expansion, and operations of advanced nuclear energy technologies in the state. These include recommendations about:

1. ways to meet the need for skilled trades workers and other providers of services or labor;
2. creating opportunities for state agencies to collaborate with federal agencies, higher education institutions, businesses, nonprofits, and other stakeholders with an interest in the advanced nuclear energy industry; and
3. any other strategies to promote development of a skilled labor workforce to meet the industry's needs.

The bill requires the council to submit a progress report, including any relevant recommendations, to the Commerce and Energy and Technology committees by February 15, 2027. Then, it must submit the full report on its findings and recommendations to those committees by February 1, 2028.

EFFECTIVE DATE: July 1, 2026
