---

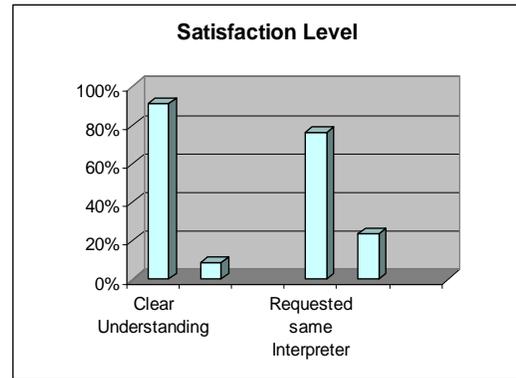

**Performance Measure 1:** The number of Interpreters receiving good to excellent overall rating.

**Story behind the baseline:** This measurement refers to survey given to college students who received interpreting services. The graph indicates a 97% of the interpreting services received a good or above rating.

**Proposed actions to turn the curve:** Include more consumers in the survey to see the results from a larger cross section of the community

**Performance Measure 2:** The level of satisfaction students achieved

**Story behind the baseline:** The number of students who were satisfied with interpreting services were 91%

**Proposed actions to turn the curve:** take into account the satisfaction level of students prior to the next semester scheduling
