III. Proposed Expenditures by Program Categories22

1. Overview of the Substance Use Prevention, Treatment and Recovery Services Block Grant A. Purpose

The Substance Abuse Prevention and Treatment Block Grant (SAPTBG) has been officially renamed the Substance Use Prevention, Treatment and Recovery Services Block Grant (SUPTRSBG). The SUPTRSBG is administered by the United States Department of Health and Human Services (HHS) through its administrative agency, the Substance Abuse and Mental Health Services Administration (SAMHSA). The Connecticut Department of Mental Health and Addiction Services (DMHAS) is designated as the principal agency for the allocation and administration of the SUPTRSBG within the State of Connecticut.

The SUPTRSBG provides grants to states to plan, establish, maintain, coordinate, and evaluate projects for the development of effective alcohol, tobacco, and other drug use prevention, treatment, and recovery services. Funds can be used for alcohol and other drug use prevention and treatment programs, and services for identifiable populations.

B. Major Use of Funds

Services provided through this Block Grant include the major categories of:

Community Treatment, Residential Treatment, and Recovery Support Services – Substance use treatment and recovery supports provide a range of services designed to meet the client's individual needs. Services provided through the SUPTRSBG include residential withdrawal management; intensive, intermediate, and long-term residential care; outpatient treatment; and medication assisted treatment. A variety of community support services including case management, vocational support, transportation, and outreach to specific populations in need of treatment are also funded.

Prevention and Health Promotion Services – Funds are applied to programs and strategies that have proven effective in serving the needs of diverse populations with different levels of risk for developing substance use disorder. Resources are allocated according to Institute of Medicine population classifications. These include **Universal** targeting for the general public; **Selective** targeting for individuals or a population subgroup at risk of developing a substance use disorder; and **Indicated** targeting for individuals in high- risk environments who may be pre-disposed to substance use. The following six strategies of activities prescribed by the Center for Substance Abuse Prevention (CSAP) include:

- Information Dissemination characterized by one-way communication from the source to the audience.
- Education characterized by two-way communication involving interaction between the educator/facilitator and participants. Education aims to affect critical life and social skills, including decision-making, refusal skills, critical analysis, and systematic judgment abilities.
- Alternatives alternative constructive and healthy activities that can offset the attraction to or otherwise meet the needs usually filled by the use of alcohol, tobacco, and other drugs.
- **Problem Identification and Referral** strategies that aim to identify those who have indulged in illegal and/or age-inappropriate alcohol or tobacco use or who have indulged in illicit drug use

for the first time. The goal is to assess if the behavior of the target group can be reversed through education.

- **Community-Based Processes** processes which aim to help the community provide alcohol, tobacco, and other drug use prevention and treatment services more effectively.
- Environmental Strategies –strategies that seek to establish or change community standards, codes, and attitudes that influence the incidence and prevalence of alcohol, tobacco, and other drug use in the general population. There are two categories of environmental strategies: legal and regulatory initiatives and service and action-oriented initiatives.

The SUPTRSBG requires that states set aside no less than 20% of their SUPTRSBG allotment for substance use primary prevention strategies. These strategies are directed at individuals not identified to be in need of treatment. The SUPTRSBG also requires states to maintain expenditures for substance use treatment and prevention services at a level that is not less than the average level of expenditures for the two-year period preceding the fiscal year for which the state is applying for the grant.

C. Federal Allotment Process

The allotment of the SUPTRSBG to states is determined by three factors, as outlined in federal statute: the Population at Risk, the Cost of Services Index, and the Fiscal Capacity Index:

- 1) The <u>Population at Risk Index</u> represents the relative risk of substance use problems in a state.
- 2) The <u>Cost of Services Index</u> represents the relative cost of providing substance use prevention, treatment and recovery services in a state.
- 3) The <u>Fiscal Capacity Index</u> represents the relative ability of the state to pay for substance use related services.

The product of these three factors determines the need for a given state.

D. Estimated Federal Funding

The FFY 2024 SUPTRSBG Allocation Plan is based on the FFY 2023 funding level of (\$20,463,616). Historically, the allocation plan for the SUPTRSBG is based on the President's proposed budget for the upcoming federal fiscal year, with the anticipated funding level remaining relatively stable year-overyear. However, the President's proposed budget for FFY 2024 includes an unprecedented 42% increase to Connecticut's SUPTRSBG award (\$29,045,529). A similar proposal by the president to dramatically increase the SUPTRSBG in last year's budget failed to be enacted. The United States Congress will not vote on the President's proposed FFY 2024 budget until later in FFY 2024. Therefore, this Allocation Plan has been based on the FFY 2023 SUPTRSBG funding level and contingencies have been contemplated should the final amount be significantly changed.

E. Total Available and Estimated Expenditures

The total SUPTRSBG funds available for FFY 2024 are \$22,164,759. This is based on the actual FFY 2023 SUPTRSBG award of \$20,463,616, plus the DMHAS carry forward funds of \$1,701,143. Of this amount, \$19,323,465 is proposed to be expended for FFY 2024.

F. Proposed Allocation Changes from Last Year

In last year's allocation plan, \$198,608 in SUPTRSBG was allocated to the 988 Crisis Hotline under the Community Treatment Services category. Since this time, other recently released federal funding has been identified to support the 988 Crisis Hotline and DMHAS does not plan to use SUPTRSBG funds for the hotline in this year's allocation plan. This does not reflect a reduction in funding for the 988 Crisis Hotline but rather a shift in funding sources for the hotline.

Funding has been added for Methadone Maintenance (\$150,000), under the Community Treatment Services category, to provide Medication for Opioid Use Disorder (MOUD) to individuals with an opioid-used disorder residing within skilled nursing facilities.

Funding has been added for Ancillary Services (\$101,941), under the Recovery Support Services category, to support statewide coordination of recovery activities and services including recovery-oriented trainings for treatment staff and individuals in the recovery community.

Funding has been added to Primary Prevention (\$112,500), under the Prevention and Health Promotion category, to support new alcohol compliance inspections and to support improvements to the regional prioritization process used to identify prevention, treatment, and recovery priorities throughout the state.

G. Contingency Plan

As previously stated, this Allocation Plan was prepared assuming that the FFY 2024 SUPTRSBG for Connecticut will be the same as the FFY 2023 SUPTRSBG amount: \$20,463,616. In the event that the FFY 2024 federal award amount is less than \$20,463,616, DMHAS will review their programs for utilization, quality, and efficiency and based on the findings, reductions in the allocations would be assessed to prioritize those programs deemed most critical to public health and safety.

Any increase beyond the assumed \$20,463,616 will ensure that the original identified priorities for the FFY 2024 budget plan would be maintained at current or enhanced levels. Currently, DMHAS' obligations depend, in part, on funding carried forward from previous years. Therefore:

- Funding increases would first be reviewed in light of sustaining the level of services currently procured through the annual, ongoing award.
- In case of a significant increase that allowed for expansion of DMHAS' service capacity, the Department would review recently enacted legislation that requires funding to implement. including:
 - Expanding the peer navigator program to five regions
 - Public Act 23-97 Implementing a Harm Reduction Center

DMHAS would also review any unmet needs for substance use prevention and treatment services identified through its internal and external planning processes and prioritize the allocation of additional block grant resources.

In accordance with section 4-28b of the Connecticut General Statutes, after recommended allocations have been approved or modified, any proposed transfer to or from any specific allocation of a sum or sums of over fifty thousand dollars or ten per cent of any such specific allocation, notification of such transfers shall be sent to the joint standing committee of the General Assembly having cognizance of matters relating to appropriations and the budgets of state agencies and to the committee or committees of cognizance, through the Office of Fiscal Analysis.

H. State Allocation Planning Process

The allocations and services that are planned for the SUPTRSBG are based upon input from and feedback of the Adult Behavioral Health Advisory Council (BHPC). The BHPC is a federally required body which reviews and provides feedback on a state's plan and application for the SUPTRSBG. In Connecticut, this council is made up of individuals with lived experience in Connecticut's behavioral health system and their family members, community providers, advocacy agencies, state agency representatives, and leadership from the state's Regional Behavioral Health Action Organizations (RBHAOs).

To provide DMHAS leadership and the BHPC with requisite information to inform the allocation planning process, DMHAS utilizes both internal and external sources to assess the need, demand, and access to substance use treatment and recovery services. Various methods to determine the deployment of substance use services are utilized, including: surveys of key informants, development of estimates derived from valid primary surveys and other analytic methods, analysis of service data from DMHAS' management information system, and input from regional and statewide advisory bodies.

Assessment of Prevention and Treatment Need

DMHAS continues to demonstrate success in being awarded federal funds for prevention, treatment and recovery services. Often a component of the award is set aside for evaluating the prevention or intervention activities. Hence, the need for and effectiveness of substance use prevention, recovery, and treatment services are continuously assessed.

The DMHAS Prevention and Health Promotion Division oversees a statewide system of services and resources designed to provide an array of evidence-based, universal, selected, and indicated (based on Institute of Medicine Classification) programs to promote increased service capacity and infrastructure improvements to address gaps in prevention.

The Division works with the five Regional Behavioral Health Action Organizations (RBHAOs) to determine or identify:

- 1) the prevalence of substance use within their sub-regions,
- 2) the substance use service continuum's current resource capacity to address problems and needs,
- 3) gaps in the substance use service continuum, and
- 4) changes to the community environment that will reduce substance use.

Within their communities, the RBHAOs work with diverse stakeholder groups to contribute additional data and information, assist in interpreting available data, and participate in the priority setting process.

DMHAS conducts ongoing analysis of the treatment system through its internal data management information system – the Enterprise Data Warehouse (EDW). It is comprised of the Web Infrastructure for Treatment Services (WITS) for state-operated services and the DMHAS Data Performance DDaP system for DMHAS-funded services. These systems contain information on all licensed and stateoperated substance use services providers within the state. Client data obtained at admission, during the course of treatment, and at discharge are analyzed to determine shifts in drug use patterns by demographics, geographic areas, client outcomes, and service system performance. Provider and program level data are made available quarterly on the Department's website in a "report card" format. These reports can be found at: <u>EQMI-Provider Quality Reports Info (ct.gov</u>). Additionally, statewide data from the system is organized into an Annual Statistical Report, which is available for the most recent state fiscal year (2022) at: <u>https://portal.ct.gov/-/media/DMHAS/EQMI/AnnualReports/DMHAS-Annual-Statistical-Report-FY22.pdf.</u>

The DMHAS Research Division, through a unique arrangement with the University of Connecticut, has investigated issues of policy concern in behavioral health and conducted extensive program evaluation studies. Additional academic partners have included Yale University, Dartmouth College, Brandeis University, Duke University, Mount Sinai and others. Research and inquiry have encompassed areas such as supportive housing, criminal justice diversion, co-occurring mental health and substance use disorders, recovery-oriented approaches, trauma-informed care, substance use treatment outcomes, the needs of veterans, the concerns of young adults, cost analyses, and implementation science. The results inform decision-makers at both local and national levels about the effectiveness of treatment, prevention, and community-based interventions.

State Epidemiological Outcomes Workgroup (SEOW)

DMHAS funds the Center for Prevention Evaluation and Statistics (CPES) at the University of Connecticut Health Center which coordinates the multi-agency State Epidemiological Outcomes Workgroup (SEOW). The SEOW collects, analyzes and publishes data related to behavioral health issues and makes recommendations regarding the state's priorities for substance use prevention and mental health promotion. This data can be found by visiting: http://preventionportal.ctdata.org/.

Regional Behavioral Health Action Organizations (RBHAOs) and the Priority Setting Process

DMHAS is committed to supporting a comprehensive and unified planning process across its stateoperated and funded mental health and substance use services at local, regional, and state levels. The purpose of this planning process is to develop an integrated and ongoing methodology to: 1) determine unmet mental health and substance use treatment and prevention needs; 2) gain broad stakeholder (persons with lived experience, advocates, family members, providers, and others) input on service priorities and needs; and 3) monitor ongoing efforts that result in better decision-making, service delivery, and policy-making.

RBHAOs are charged with identifying strengths, needs and gaps in mental health, substance use and

problem gambling services across the lifespan on an annual basis. The process results in regional reports which identify priorities for each of the DMHAS service regions. Based on the rankings from these five regions during the 2022/2023 priority setting process, which take into account the magnitude and impact of the substance use as well as the capacity of the region to respond, the top three substances identified as needing priority attention were, in order, heroin/fentanyl, alcohol, and electronic nicotine delivery systems (also called electronic cigarettes or vaping devices).

Triennial Report

While DMHAS functions as the lead state agency for substance use services, other state agencies, including the Departments of Children and Families, Public Health, Consumer Protection, Education, Veterans Affairs, Social Services, Correction and the Judicial Department's Court Support Services Division share in state efforts to address substance use issues. These efforts are reflected in the legislatively mandated Triennial Report. The most recent version of the Triennial Report, completed in 2022, is available at: https://portal.ct.gov/-/media/DMHAS/EQMI/2022-Triennial-Report-FINAL.pdf. This Triennial Report contains the state substance use plan, including goals, strategies, and initiatives to direct the focus for 2022-2024.

Alcohol and Drug Policy Council

The Alcohol and Drug Policy Council (ADPC), co-chaired by the Commissioners of DMHAS and DCF, is the lead entity in the state working on the opioid crisis response. The ADPC currently has four working subcommittees addressing prevention, treatment, recovery and criminal justice with a focus on the current opioid epidemic: Alcohol and Drug Policy Council (ct.gov). The current statewide plan to address the opioid epidemic was developed by Yale University (Connecticut Opioid Response Initiative report) at the Governor's request and is in alignment with the efforts of the ADPC: https://portal.ct.gov/-/media/DMHAS/ADPC/COREInitiative10616pdf.pdf. DMHAS is currently working with Yale to update this plan and its findings will guide future statewide activities to address the opioid epidemic.

I. Grant Provisions

The following requirements must be met by the state in the use of Block Grant funds:

- Obligate and expend each year's SUPTRSBG allocation within two federal fiscal years
- Maintain aggregate state expenditures for authorized activities that are no less than the average level of expenditures for the preceding two state fiscal years
- Expend not less than 20% of the allocated funds for programs providing primary prevention activities
- Expend not less than 2%, but up to 5%, of the allocated funds for existing treatment programs to provide early HIV intervention services including: a) pre/post-test counseling; b) testing for the AIDS virus; and c) referral to therapeutic services if the state has an HIV rate greater than 10 new cases per 100,000 people. Since CY 2018, Connecticut's HIV infection rate has been below this threshold. As of the most recently available data (2020), Connecticut's HIV infection rate was 4.8 new cases per 100,000. As a result, Connecticut is not permitted to expend SUPTRSBG

funds on HIV early intervention services until the state's HIV rate is greater than 10 new cases per 100,000.

- Maintain the availability of treatment services for pregnant and parenting women, spending 10% of the Block Grant award above the FFY 1992 level
- Make available tuberculosis services to each individual receiving treatment for substance use
- Make available prenatal care and childcare to pregnant women and women with dependent children who are receiving treatment services in specialized women and children's programs
- Assure that preferential access to treatment is given to pregnant women who use substances
- Require that pregnant women who use substances that are denied access to substance use treatment services are provided with interim services, including TB and HIV education and counseling, referral to TB and HIV treatment if necessary, and referral to prenatal care
- Establish a management capacity program that includes notification of programs serving people who inject drugs (PWID) upon reaching 90% capacity
- Require that those individuals on waiting lists who are people who inject drugs be provided interim services, including TB and HIV education, counseling and testing, if so indicated
- Ensure that programs funded to treat people who inject drugs conduct outreach to encourage such persons to enter treatment
- Submit an assessment of statewide and locality-specific need for authorized SUPTRSBG activities
- Coordinate with other appropriate services, such as primary health care, mental health, criminal justice, etc.
- Have in place a system to protect patient records from inappropriate disclosure
- Provide for an independent peer review system that assesses the quality, appropriateness, and efficacy of SUPTRSBG-funded treatment services
- Require SUPTRSBG-funded programs to make continuing education available to their staff
- Enforce the state law prohibiting the sale of tobacco products to minors through random, unannounced inspections, in order to decrease the accessibility of tobacco products to those individuals under the age of 21.

As noted previously, while not a formal limitation, SAMHSA has indicated that block grant funds should not be used for services that are otherwise reimbursable.

SAMHSA, in response to Congressional interest, established National Outcome Measures (NOMs). The NOMs include a wide range of both prevention and treatment measures designed to determine the impact of services on preventing or the treatment of substance use. The mandatory NOMs that must be collected include:

- Employment status clients employed (full-time or part-time) during the prior 30 days at admission vs. discharge
- Homelessness client housing status during the prior 30 days at admission vs. discharge
- Arrests clients arrested on any charge during the prior 30 days at admission vs. discharge
- Alcohol abstinence clients with no alcohol use during the prior 30 days, regardless of primary substance at admission vs. discharge

- Drug abstinence clients with no drug use during the prior 30 days, regardless of primary substance at admission vs. discharge
- Social support of recovery client participation in self-help groups, support groups (e.g., AA, NA) during the prior 30 days at admission vs. discharge

TOTAL FUNDS AVAILABLE	\$19,504,858	\$20,618,253	\$22,164,759	7.50%

*DMHAS is retaining a larger carry forward in FFY 24 compared to previous years, to prepare for the end of various federal grants that were received during the Pandemic. DMHAS is assessing how carry forward funds may be able to be used to sustain specific programs and services that are currently funded through these pandemic related grants.

TOTAL EXPENDITURES	\$2,332,869	\$2,534,528	\$2,484,528	-1.97%

In last year's allocation plan, \$198,608 in SUPTRSBG was allocated to the 988 Crisis Hotline under the Community Treatment Services category. Since this time, other sources of funding have been identified to support the 988 Crisis Hotline and DMHAS does not plan to use SUPTRSBG funds for the hotline in this year's allocation plan. Overall funding for the 988 Crisis Hotline has not been reduced but DMHAS plans to use other sources of funding to continue to support the hotline.

Funding has been added for Methadone Maintenance (\$150,000), under the Community Treatment Services category, to provide Medication for Opioid Use Disorder (MOUD) to individuals with an opioidused disorder residing within skilled nursing facilities throughout the state.

Funding for Community Treatment services has not been reduced and the net change from FFY 23 to 24 reflects the combination of both factors explained above.
