CT State Programs & News

News coming out of the Governor's Office regarding information impacting CT manufacturers is a near daily event. Here are some highlights (click for more below):

State's Small and Minority

Business Program -

Oct 14, 2021

Updates to this funding opportunity include a new law signed this summer (Public Act 21-76), which modifies the definition of "small business enterprise". Going forward, small businesses will need to register in SAM.gov.

Funding Initiatives

Strengthening CT's

Manufacturing Sector -

Oct 14, 2021

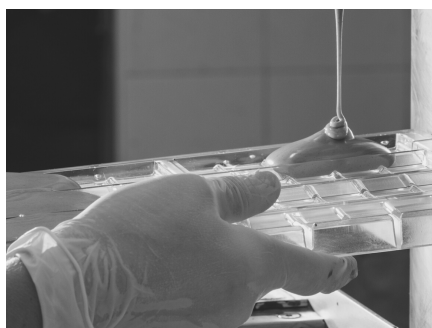

The MIF Board approves release of \$8.3M in funding to support a series of technology and workforce initiatives designed to strengthen long-term manufacturing competitiveness in Connecticut.

Programs to Create Jobs and

Boost Community Vibrancy -

Oct 18, 2021

Innovation Corridor and Communities Challenge programs to be administered by DECD; part of the Governor's Economic Action Plan for more than \$750M over five years, with matching funds.

CampusCT Mobile App-

AdvanceCT and the Governor's Workforce Council have partnered with UpperCampus, a leading technology company in career readiness software, to design CampusCT, a mobile experience built exclusively for Connecticut students. CampusCT aims to increase awareness of the state's innovative employers and careers. Employer partners have the opportunity to engage over 55,000 students in the Hartford region, through an annual membership. [Email](#) for more information.

CT Manufacturers Struggling to Find and Retain Workers

Aired 11/1/21

[View Replay Here](#)

"There is no greater challenge than the labor shortage—despite thousands of job openings, the manufacturing sector has recovered just 38% of COVID-related job losses," said Chris DiPentima, CBIA's president.

"We are trying real hard to get younger people in the industry. We have a lot of older people retiring out of the industry. COVID certainly has exacerbated that," said Jewell. "We are doing our best to educate and help people realize that these are great career opportunities."

What is a Regional Sector Partnership?

We've been hearing a lot about Regional Sector Partnerships recently. What are they? Who is the Institute for Networked Communities (INC) supporting CT efforts?

Next Generation Sector Partnerships are partnerships of businesses, from the same industry and in a shared labor market region, who work with education, workforce development, economic development and community organizations to address the workforce and other competitiveness needs of the targeted industry. Partnerships are 1) Industry-Driven, 2) Community-Supported, and 3) Sustainable.

Next Generation Sector Partnerships are a product of the Institute for Networked Communities (INC), a 501(c)(3) nonprofit organization. INC's mission is to build connected, inclusive economies by activating public-private networks around a shared commitment to place.

The team behind INC and Next Gen Sector Partnerships are the nation's leading experts in the who, what, why and how of building regional economic partnerships. To find out more, click [here](#).
