

To whom it may concern:

My electricity bill from June was the highest ever at \$167.00 and I thought it was because of my new central air and the hottest June we have ever had, then Julys bill showed up at \$213.00 ...I flipped and made some phone calls and all I got was it is what it is and like no answers to my questions of why....the delivery charges had been approved to increase by the state regulators...really ?

This is just plain GREED ! specially with the pandemic going on.

Hopefully there will be competition in the state soon because I will never stay with Eversource....pure profits over people.

Sincerely,

Bill Poleshuk
Project Superintendent
