To Whom It May Concern:

This letter is in regards to the increase in fees from Eversource.  
Since a long time ago, there are no many options regarding obtaining affordable options for power supply. Like it or not, Eversource is the only company in the area and residents buy from Eversource and pay the "delivery fee."

A few years ago, we looked into solar energy options and it was cheaper with a 30-year commitment, making it not a feasible option.  
The last year, we have an audit for energy consumption, took advantage of all the energy savings options at the property and we were able to reduce the consumption a bit, but the prices are always increasing and it is due in part to the energy cost but most interestingly due to the "delivery fee."

The last two billing cycles, the energy consumption is lower than a year prior, and still prices are double due to the "delivery fee." We need a solution to this problem. The cost of energy cannot be double to a "delivery fee."

6/9/20 Bill	Cost of Supply: \$74.65	Delivery Fee: \$106.51	Usage: -7.4%
7/9/20 Bill	Cost of Supply: \$71.21	Delivery Fee: \$115.35	Usage: -6.9%
8/14/20 Bill	Cost of Supply: \$104.65	Delivery Fee: \$183.98	Usage: -12.8 %

Eversource ID # 51788952083

Respectfully,

  
Claudia Bouchard
