

To: Honored Chairs Sen. Needleman and Rep. Arconti and Distinguished Members of the Energy and Technology Committee

From: Jon and Susan Olson, 109 Hopmeadow St, Weatogue, CT 06089

Our family invested in solar roof panels in 2009 and they have met 90% of our electricity needs summer and winter diminishing peak demand on the grid. We support expanding the solar residential investment program (RSIP) for others to benefit and to continue solar net-metering at least until 2022 supporting residents as well as local solar installers.

We do not support investment in expansion of fossil fuel infrastructure! Rather invest in battery storage of expanded renewables. In ten - or 30 - years we will be living with the decisions we are making now.

Thank you for the opportunity to comment.

Sincerely,
Susan and Jon Olson
