

Hello,

I feel the Eversource rate hike wasn't justified at all. We have some of the highest electric rates in the country, and Eversource has a complete monopoly over transmission - yet the rates are constantly increasing. They goofed up the storm prep and restoration after Isaias, after promising this won't happen again (provided they receive another rate hike) in the aftermath of hurricane Sandy.

PURA seems to be overly concerned with the Eversource shareholders and executives, and always at the expense of the rate payers of Connecticut. NOW is the time to begin to rectify this.

Thank you.
