

This is in regards to **LCO No. 3576**:

- What is preventing ballots from to go to dead people?
- What about people who have moved.
- What previsions will be in place to stop people from going to nursing homes to “assist” filling them out?
- Will the ballot counting be done by an independent TRUSTED 3<sup>rd</sup> party?
- Will there be a secure online portal to input a code that matches the address like the Census?

Unless these issues and I’m sure there are a whole host of others can be addressed, sending these to everyone is not only a waste of money but ready for fraud.

Thank you,

Brian Tyler
