

I support expanding voting rights so that voters can automatically vote by mail due to the Covid-19 pandemic. We shouldn't have to submit requests for every primary, special election, or general election during these perilous times.

I personally have immune issues, and I don't want to be exposed to other people if I don't have to be—I don't want to have to choose between my health and my right to vote— and neither should anyone else!

Thank you for your consideration.
