SUMMARY,

Historical and Political,

OF THE

First Planting, Progressive Improvements, and Present State of the BRITISH'Settlements in NORTH-AMERICA.

CONTAINING

I. The Hiftory of the Provinces and Colonies of New-Hampfhire, Rhode-Ifland, Connecticut, New-York, New-Jerfies, Penfylvania, Maryland, and Virginia; their feveral original Settlements and gradual improvements; their Boundaries. Produce and Manufactures, Trade and Navigation, Laws and Government.

- II. Their Natural Hiftory, Religious Sectaries, Paper Currencies, and other Mifcellanies.
- III. Several Medical Digreffions, with a curious Differtation on the Treatment of the Small-Pox, and Inoculation.

By WILLIAM DOUGLASS, M.D.

VOL. II.

HISTORIANS, like fworn Evidences in Courts of Law, ought to declare the WHOLE TRUTH (fo far as comes to their Knowledge) and nothing but the TRUTH.

BOSTON, NEW-ENGLAND, Printed: LONDON, re-printed for R. BALDWIN in Pater-nofter-Row. M.DCC.LV.

A Summary, Hiftorical and Political, of the first Planting, progressive Improvements, and prefent State of the British Settlements in NORTH-AMERICA.

VOL. II. PART I.

A Supplement to the first Volume; And Introduction to the fecond Volume.

HE writer of this hiftorical fummary, does not affect a fludied elegancy. This is a plain narrative of inconteffible facts delivered with freedom, a collection or common-place of many years obfervations, defigned at firft only for the writer's private amufement or remembrancer; but at the defire of fome friends it is published for the benefit of the publick, and for the use of future hiftorians, Deus nobis hæc otia fecit. As the writer is independent, being in no publick office, no ringleader of any party, or faction; what he writes may be deemed impartial : If facts related in truth offend any governor, commodore, or other great officer, he will not renounce impartiality and become fycophant.

Vol. II.

As

As this fummary has been difcontinued many months from an * incident which may in courfe be mentioned by way of a digreffional amufement; I find myfelf inclined to continue the hiftory of fundry affairs down to this time, April 1750.

I. The naval affairs upon the continent coast of British North-America. Here + ends (a peace being concluded at Aix la Chapelle) our naval wars with France and Spain upon the coast of North-America; the peace of Aix la Chapelle was figned October 7th, 1748, and proclaimed in Boston, May 10, 1749.

In autumn 1747, Commodore Kn-les arrived in the harbour of Bolton with a squadron of men of war from Louisbourg of Cape-Breton, ordered all our 1 men of war stationed for the protection of the North-American trade, to join him at Bofton to profecute fome fecret expedition against the French and Spaniards in the gulph of Mexico; the reduction of St. Jago de Cuba was the principal defign, and was not effectuated; but en passant, he happened to furprize the French fort of Port Louis of the island of Hispaniola, and had the better in a sea engagement with a Spanish squadron off the Havannah of the island of Cuba; these occurrences are not within the limits of our history, which is confined to the British continent fettlements in North-America; and the admiral Kn----'s conduct in thefe expeditions, as it is faid, is now upon the carpet at home. Our coast being thus left naked in May 1748, about fourteen French and Spa-

• The great man of the province for the time being, finding that the writer, though of his perfonal acquaintance, was not a fycophant, but wrote transactions with a true and impartial freedom, endeavoured that his own management might remain obfcure, and not flare himself and the publick in the face; this he attempted in many forms, in diverting, impeding, or rather defeating this publick-spirited laborious undertaking.

† The fea bickerings of Georgia and St. Augustine are left to the fection of Georgia.

+ They were only frigates, not fit for line of battle, or for battering of land forts.

nifh

INTRODUCTION to Vol. II.

nilh privateers were roving from South-Garolina to New-York: They failed up Delaware bay and river fo high as New-Caftle, and with their armed boats to within five miles of Philadelphia : Philadelphia news-papers fay, "foreign trade is now at a ftand, and the port as much "fut up as if the river was frozen." In Chefaepeak bay of Virginia they went fo high as Repahanock river and carried off feveral fhips. In September 1748 two Spanifh privateers failed up Cape-Fear river of North-Carolina, landed Men, plundered Brunfwick, took poffeffion of fix veffels, but from fome cafual difafters, they foon returned down the river. Here was a fine opportunity given to the French and Spaniards to plunder our continent ports, or put them to high contributions; but the French and Spanifh pufilanimity favoured us.

II. A treaty of peace with the || Abnaquie or eaftern Indians. Or, rather the formal fubmiffion of these Indians by their delegates to the government of New-England. Vol. I. p. 564, ended our account of the late French and Indian incursions in New-England; fince that account, there have been only fome fmall damages done by a few fcattered Indian banditti.

As this Indian treaty or fubmiffion to King GEOROE II. is very plain, eafy, and voided of fome antiquated wild fooleries which ufually accompany fuch affairs, we fhall infert it here by way of a specimen of Indian treaties.

The St. John's Indians of Nova-Scotia, are of the Abnaquie nation, but were not in the congress, because lately they seem chiefly to affociate with the Mikmake Indians of Nova-Scotia.—The Pigwaket tribe of Abnaquie are almost extinct, they did not engage in this war, but retired and lived amongst the English, during the war, in the county of Plymouth; fourteen of them, men, women and children, were present at this congress—The Massifuk Indians on the east fide or Durch fide of Lake Champlain or Corlaer, are in the Abnaquie division, but never do affociate with the Abnaquies. I he statistic of Scatacooks, on Houss on Hudson's river, though Abnaquies, are under the protection of the Mohawks or Iroquies great nations.

B 2

There

ţ

There was first a previous general meeting of the Indian delegates from all the tribes in a general council, to pray the government of New-England for a treaty of peace.

Some time in June 1749, nine delegates from the feveral tribes of Indians came to Boston to make propofals for a peace; they proposed the fage governor Dummer's treaty to act upon, and that the congress should be at Falmouth in Cafco-Bay, about 100 miles eastward from Bofton.

The congress began at Falmouth, September 27, 1749. between the commissioners of Massachusetts-Bay, viz.

> Thomas Hutchinfon, Ifrael Williams,

John Choate,

John Otis, Efgrs.

And of New-Hampshire, Theodore Atkinson, John Downing, Efgrs. on the one part; and the delegates of the eastern Indians on the other part, viz.

Eight from the tribe of Norridgowocks;

Toxus,	Soolephnia,
Eneas,	Naktoonos,
Magawombee,	Nefaqumbuit,
Harrey,	Pereez.

Five from the tribe of * Penoblcot ;

Eger Enimet, Esparagoosaret,

Maganumba, Neemoon.

Nictumbouit,

Six from the tribes of + Arrefuguntoocooks, and Weweenocks:

Sawwaramet,	Sauquifh,
Auffaado,	Wareedcon,
Waaununga,	Wawawnunka.

* The Penobicots jocofely faid, that they could answer for their young men if they were not drunk.

+ These by the French, are called the mission of St. Francois and of Befancourt; both lie upon the fouth fide of St. Laurence, or Canada river, one 40 the other 30 leagues above Quebec ; their joining with the other tribes of the New England Indians in this submission to King GEORGE II. of Great-Britain, may well be used as an argument for New England's reaching naturally and in the opinion of these Indians, to the south side of Canada river.

All

All the Indian delegates were not arrived until October 15. The New-Hampfhire commissioners returned home before the treaty was finished, and left a power with Roland Cotton, Efq; to fign in their name.—The colony of Connecticut, tho' defired by the government of Maffachusetts-Bay, did not send any commissioners; perhaps they reckoned themselves out of the question, being covered by the whole breadth of the province of Massachusetts-Bay; Nova-Scotia was also invited.

Roland Cotton, Efq; was clerk.

Capt. Joseph Bean was interpreter, both under oath.

Toxus of Norridgowocks was reckoned the chief of thefe Indian tribes, and their fpeaker; he faid, "Ever fince governor Dummer 4 treated with us, all the Indians lik'd it well, and have reckoned it well ever fince." Mr. Hutchinfon, chairman of the commissioners from Massachusetts-Bay, in his speech to the Indians, "You have always spoke well of governor Dummer's treaty, and the English have lik'd it well, and it lasted long; this we propose to be a plan for a treaty.

The Treaty is as follows,

"We the Indians inhabiting within his Majefty's territories of New-England, make fubmiffion to King GEORGE II. in as full and ample a manner as any of our predeceffors have heretofore done.

1. We Indians in all times coming, will maintain a firm and conftant amity with all the || English, and will never confederate to combine with any other nation to their prejudice.

2. That the English subjects may peaceably and quietly enjoy their rights and settlements; referving to the Indians all lands not formerly conveyed to the English, as also the privilege of fishing, hunting and fowling as formerly.

A That treaty was anno 1725.

The defignation English is used, as more familiar to the Indians than that of Britsin.

B 3

3. The

4

6 A SUMMARY, HISTORICAL and POLITICAL, &c.

3. The trade to be under the direction of the Massachusets government.

4. All controversies shall be issued in the due course of justice of Massachusetts government courts.

5. If any of our Indians commit hostilities against the English, we shall join the English to bring them to reason.

6. If any tribe of Indians make war upon any of the now contracting tribes, the English shall affist and bring them to reason.

Moreover, it is agreed that there shall be truck-houses at Georges and at Richmond. The Indians defire a truckhouse also at Saco river."

III. A fhort and general continuation of the * Nova-Scotia affairs, particularly as to the Chebucta fettlement.

* See p. 305, 317, 566, vol. I. There was a government fcheme of this nature fet on foot 1732; it was too much Utopian, and therefore impracticable: I mean the fettlement of the province of Georgia in the fouthern parts of South-Carolina, a frontier against the Spaniards of Florida, in a dry, fandy, parched foil: the fcheme was pompous, viz. to raife great quantities of rice, wine, cotton-wool, indigo, cochineal, filk, hemp, flax. Hitherto they have done nothing, though a great charge to the crown, in civil and military establishment; from 1733, (1733, the parliament granted 10,000 l. sterl. 1735, 26,000 l. sterl. &c.) to 1743 inclusive, the parliament grants for the civil establishment amounted to 120,000 l. sterl. 1743, to 1749, their civil and military grants were blended together; 1749, the parliament granted for their civil establishment, 5,304 l. sterl, their military establishment has been very chargeable, the pay and victualling of one regiment and feveral independent companies of regular troops, armed fchooners and rangers.

The patent for erceting Georgia into a province or corporation, paffed the feals 1732. In Feb. 1733-4, the whole number of perfons that had been fhipped to Georgia were 320 men, 113 women, 102 boys, 83 girls, in all 618 perfons, whereof one quarter were foreigners; fince that time many people have been imported, but not long fince in that province were to be found only 602 perfons. July 1748, in Mr. Whitefield's Bethefda, (12 miles from Savannah) were only 1 mafter, 2 women. 4 men-fervants labourers, and 18 children, whereof two paid for their board; in his vagrancies this was his great cantfund to beg money and other effects from weak chriftians. Here I inadvertently anticipate what properly belongs to the fection of Georgia.

The

The general of Canada fince the conclusion of the late peace, by letters to the prefident of Nova-Scotia and to the governor of New-England, claims the greatest part of Nova-Scotia or L'Accadie : the French Coureurs des Bois and their Indians, 1749, have made fome fmall appearances to intimidate our new fettlers. I. A number of French and Indians came before our block-house at Minas without effect, they furprize and carry off about 18 stragglers as captives. 2. In September, eight Indians as traders came aboard Donnel a trading floop in Chicanecto bay, by furprize with their long knives they kill three of his men, while feveral Indians on fhore waited the event; in this fcuffle, the Indians loft feven of their . 2. Beginning of October, a company of about 40 men. Indians, as was fuppofed, furprized eight of Gilman's timber-men near the faw-mills, east fide of Chebucta bay; they killed four of Gilman's men, three escaped to the flanker of the block-houfe, one man is miffing, fuppofed to be captivated to make discoveries; the Indians did not attempt the block-house :--- Afterwards there was a more general rendezvous of Indians, but having no prospect of any advantage, and the St. John's Indians differing with the Mikmaks, they broke up and went home.

The chief fettlement will be the town of || Hallifax or Chebucta, laid out and fettled in a few months; * for defence round it at proper diffances are five picquetted block-houses containing barracks for Warburton's regiment.

In our first vol. p. 566, we just entered upon the late projected, but now vigorously profecuted + re-settlement

So called from earl of Hallifax, the principal encourager of this fettlement.

• Idlenefs and intemperance, the bane of all our plantations, effecially confidering the nature of the first fettlers of this place, are more dangerous than any parcels of defpicable straggling Indians.

+ I am forry to write, that from 1710, to 1740, being near the fpace of forty years, the French have been filently allowed to keep poffefion in all respects of the province of Nova-Scotia, the fort of Annapolis and its banliew excepted.

of

of Nova-Scotia, by the indefatigable governor Cornwallis: the first parliamentary allowance or encouragement was 40,000 l. sterl. towards transporting to Nova-Scotia, and maintaining there, for a certain time after their arrival, fuch reduced officers and private men, lately difmiffed trom his majefty's land and fea-fervice, and + others, as fhall be willing to fettle faid colony. Col. Cornwallis with his fleet of one frigate of 20 guns, one man of war floop-transports-with fettlers, provisions and stores, arrived in Chebucta bay end of June; foon after arrived the French transports (who had brought from France the troops that took pofferfion of Louifbourg) from Louisbourg with the British troops who had evacuated Louisbourg, confifting of the two regiments of Fuller and Warburton, and a detachment of the train; the regiment of late Fuller's, to recruit Warburton's, and to leave fome fettlers, was reduced to 25 private men per company. half their former complement, and fent home.

In this bay of Chebucta, is built a uniform elegant town called Hallifax, after the earl of Hallifax, a great promoter of this fettlement. This harbour of Chebucta is a most convenient place of arms for our American men of war, and a certain check upon the French of Louisbourg: it is well fituated for making of dry cod-fish, being about the middle of a long range of Cape-Sable coast fishing banks, and may prove the best cod-fishery hitherto known. I heartily wish fuccess to the fettlement, but we cannot expect that it sould answer fo well for husbandry, that is for tillage and pasture, as our co-

† A riff-raff of difmiffed foldiers and failors habituated to idlenefs and vice, by their labour can never fettle a new colony; but two or three young vigorous regiments (fuch as Warburton's) canton'd all over the country, paid and victualled from home for two or three years, (from New-England we can fupply them with wives, good breeders) and when thus habituated to the country, and to hufbandry, with proper encouragement of land, they may be difmiffed from their military fervice; and make lafting good fettlements.—No old men paft their labour, no women but fuch as are of the ages of breeders, that is, none exceeding 35 æt. be admitted, excepting parents of numerous children, to ferve as their guardians.

lonies

lonies further fouth. I conclude with the words of Bacon lord Verulam, "Settling plantations is like planting of "timber, we must wait patiently fome years, before we "reap any benefit. 4

IV. A fhort recapitulation and conclusion of the Louisbourg affair; the Cape-Breton islands, for reasons of state, are now reftored to the French dominions : and after fome political remarks, we shall take our final leave of them. See vol. I. p. 335, &c. and p. 347, &c. The French of Canada and Cape-Breton had more early intelligence of the French war than we of New-England, it was proclaimed in Boston June 2, 1744. Louisbourg of Cape-Breton furrendered to us, June 17, 1745. Autumn following to garrifon Louifbourg, were fhip'd off from Gibraltar, Fuller's and Warburton's regiments of foot, and three companies of Frampton's regiment, with a large detachment from the train; it was too late in the year before they arrived upon our winter coaft, and were obliged to winter in Virginia, a few of them put into New-York ; they arrived at Louisbourg May 24, 1746, and relieved the New-England militia confifting of about

4 In the late treaty of Aix la Chapelle, October 7, 1748, there were many things in relation to trade, and to the claims and boundaries in the respective plantations to be settled with France and Spain, which required a confiderable time to be adjusted, and therefore could not be inferted in the body of the treaty, but referred to a convention of commissioners as the French court in their various negociations are noted for appointing men of merit and real knowledge in the various affairs with which they are intrusted, doubtlefs our ministry will use gentlemen of practical knowledge in trade, and habituated to plantation affairs, men of a quick clear thought, and of a diffinct clear elocution.

In the prefent flate of things, the well-being of the European mother-countries depends much upon their plantations; plantations make a country rich; Holland is rich, not from its produce or manufactures, but from its East and West-India plantations, its trade and navigation. France never flourished so much as in the administration of cardinal Fleury, his principal attention was to their plantations and trade; the empire of Germany, Sweden, &c. though they abound in labouring men, for want of plantations and trade, are very poor.

1500

1500 men, who had kept garrifon from the furrender of the place; commodore Warren was at that time governor; after him commodore Knowles was pro-tempore. governor; admiral Townshend from the West-India islands with a small squadron is ordered for the protection of Louisbourg, and fails for England in November 1746. Mr. Knowles in his time at a very great charge, repaired the town and fort, as if they were to remain to Great-Britain for ever. Commodore Knowles in the autumn 1747, with a fmall fquadron came to Boston, and proceeded upon a fecret expedition to the Sugar islands, and Mr. Hobson lieut. col. of Fuller's regiment is appointed governor of Louisbourg. Peace drawing near, Shirley's and Pepperell's regiments from a complement of 100 private men per company were reduced to 70 men; the private men of the three companies of Frampton's regiment, were incorporated by way of recruits with Fuller's and Warburton's regiments, and their commission officers, ferieants, corporals, and drums fent home; Pepperell's and Shirley's regiments in Louisbourg were entirely || difmiffed June 24, 1749, their arms and other accoutrements were detain'd by the government. The British troops evacuated Louisbourg, July 12, 1749, and were carried by the French transports to Chebucta, and the French troops being about 600 men took poffeffion of the place.

It is a fpreading pufilanimous opinion amongft the lefs thinking people, that the great advantage of Louifbourg's falling into our hands was its ferving as a propitiatory free offering to France, and without reftoring it we fhould have had no peace: but we ought to obferve, 1. That both parties in the war were low in cafh and credit. 2. The French navy trade and navigation were fo reduced, that they could not avoid defiring a peace; we had taken as many of their men of war as might have been fufficient to reduce the remainder; we had taken great numbers of their South-Sea, Eaft and Weft-India,

They were put in pay, Sept. 1, 1745.

Turkey,

Turkey, and other Ships, and what remained were obliged to continue in port, (in fear of our numerous privateers) having no convoys or men of war to protect them. 3. The corruption which prevailed in Holland was like to be extirpated, and the Dutch became active. 4. The army of our auxiliary Ruffians were upon the march to join us, for fome reafons of flate they feem to have been retarded in their march. If Louifbourg had not fallen into our hands, the reduced towns and forts in Flanders must have been returned, that is, evacuated; it feems that in all modern negociations for a peace the bafis is reflitution of all land conquefts on both fides, excepting where equivalents or antiquated claims fall in the way.

The court of Great-Britain cannot cordially approve of this infinitely rafh New-England corporation adventure, though beyond all military or human probability fuccefsful; it involved the nation, already deeply in debt, in an additional fum of about 800,000 l. fterl. in the feveral articles of reimburfement-money, extraordinary, fuperfluous repairs, transport fervice, stores, garrifon officers, a large detachment from the train, and a numerous garrifon of regular troops: this place was unavoidably to be evacuated and reftored to the French upon a peace, and as it happened, in a better condition, and without any reimburfement or equivalent, cui bono! I cannot perceive any real advantage acquired by the reduction of Louisbourg. The small British squadron stationed at Boston, without any additional national charge, would have been an effectual check upon the Louisbourg privateers; commodore Warren from the West-India islands was fent for the protection of the coast of New-England and Nova-Scotia in the fpring 1745, and our trade in the northern parts of America could not have fuffered above 2 or 3 per ct difference of infurance, which is as nothing compared with the great charge of 800,000l. fterl.

sterl. before the charge was fully known, I estimated it at 500,0001. sterl. or less. *

I tum up the Louisbourg affair. 1. It was infinitely rash, a private corporation adventure, without any orders or affured affistance of men of war from home; thirty-fix hundred raw militia (fome without proper arms) without any discipline, but at random, as if in a frolick, met together, no provision of cloathing or ships: by this and small care of the sick, and want of discipline, we lost about one half of our men by scurveys and putrid flow fevers; in a military way we lost only about 60 men killed and drowned, and about 116 prifoners to the French in the rash foolish attempt upon the island-battery: during the siege, by good fortune,

* If the Canada expedition which was recommended home by governor—had proceeded and fucceeded, after another great addition to the national debt; for reafons of flate, without any equivalent or reimburfement, it must have been evacuated and reflored to the French; New-England was at confiderable charge towards this intended expedition in levy-money, victualling, transport fervice, bedding, &c. for want of proper application, Maffachufetts have received no reimburfement of this: Rhode-Island, by application have received their reimburfement.

Another extra-provincial perquifite expedition was the fending off 1500 men towards the reduction of Crown-Point, a French fort, near Lake Champlain in the province of New-York; this involved our province in fome charge (never to be recovered) by fending provifions, ammunition and other flores by water to Albany; an epidemical diftemper in the county of Albany luckily prevented us; if it had been reduced, it must either have been kept by us at a very great charge equal to the opposition of all the force of Canada; or we must have demolished it, to be re-built by the French at one tenth of our charge in reducing of it.

Another projection towards ruining our province was the charge of building a fort at the Carrying-place in the government of New-York, between the falls of Hudion's river and Wood-Creek : this was attended with the fame inconveniencies as the former.

Sending off troops to affift the Six Indian nations of New-York— All these idle proposals, were not resented by the government of New-York, as, if that rich government had been incapable or neglectful of self-protection, but filently admitted of Sh—quixotifms; our house of representatives in their journal say, the people of New-York were much abler to protect themselves.

we

we had conftant dry favourable weather: but June 18. next day after we had possession of the town, the rains fet in, which certainly from our men being ill cloathed and ill lodged, must infallibly have broken up the fiege. We had a wretched train of artillery, or rather no artillery (they were voted by the affembly not worth the charge of bringing back to Bofton) in a Quixote manner to demolifh a French American Dunkirk, in which were 1900 armed men, whereof 600 were regular troops. 125 good large cannon, 19 mortars, with stores and provisions sufficient for fix months. 2. The military fuccefs was miraculous, but the cunning part of the project was natural, and could not mils of fuccefs. 1. A neceffary enormous multiplied emiffion of a depreciating paper currency, enabled the fraudulent debtors to pay their debts at about 10 s. in the pound discount. 2. Vaft perquifites to the manager. +

CURRENCIES. || The parliament of Great-Britain, before the commencement of the late French war, had under

+ As writers and preachers forbear publifting ****** which are fingular, rare or new, left they fhould prove of bad example; I fhall only fum up these perquifites in this manner: In the fpace of four years, viz. 1741 the introductory gratuities from the province, and from ***** of many thousands of pounds, and the unprecedented perquifites in the three expedition years of 1745, 1746 and 1747, from a negative fortune, was amassiled a large positive estate, and the loose corns built a country-house at the charge of about fix thousand pound sterling. The predecession, an honess genteman of a good paternal estate, after eleven years administration, in a message to the general assession, July 21, 1741, represents, that he had been obliged to break in upon his own estate fome thousands of pounds, to fupport the character of a king's governor; in faithfulness to his truff he refused a certain retaining fee.

|| This accurfed affair of plantation paper-currencies, when in courfe it falls in my way, it proves a flumbling-block, and occafions a fort of deviation. In the appendix, I fhall give a flort hiftory of all the plantation paper-currencies; it may be a piece of curiofity for times to come. Maffachufetts-Bay was the leader, and exceeded all the colonies in this fraud; from their first emiffion 1702 (I take no notice of Sir William Phips's Canada bills, they were foon out of the

14 A SUMMARY, Historical and Political, &c.

under their confideration fome regulations concerning the plantation currencies; and now that war being ended, this third feffions of the tenth parliament of Great Britain have refumed the confideration thereof.

Maffachufetts-

the queftion) to 1749, the laft year of Mr. Sh_____ administration, our bills of publick credit or flate-notes fuffered a difcount of 88 per cent; in France in the worft of times when Mr. Law had the direction of the finances, the difcount upon their flate-notes was only 65 per cent: Maffachufetts publick bills of credit 1749, were pejorated to eleven for one flerling.

In the few years of Mr. Sh_____administration, this fraudulent currency from 127,000 l. old tenor, was multiplied to about two and a half millions, and by this depreciating contrivance the fraudulent debtors paid only 108 in the pound, and every honeft man not in debt loft about one half of his perfonal eftate. The money-making affemblies could not keep pace with him in his paper emiffions; 1747, the governor infifting upon further emiffions, the 4ffembly reprefents, "If we emit more bills, we apprehend it muft be followed by a great impair, if not utter lofs of the publick credit, which has already been greatly wounded;" and in their journal 1746, p. 240, "We have been the means of actually bringing diffrefs, if not utter ruin upon ourfelves_____When any complaints were offered to the affembly concerning depreciation, by______contrivance, they were referred to committees confifting of the moft notorious depreciators. See Journal, Auguft 17, 1744.

By way of amufement, I shall adduce fome different managements of administrations with respect to a fraudulent paper medium-1702 by contrivance of Mr. W---- from New-England, Barbadoes emitted So,0001. at 4 per cent (common interest was 10 per cent) upon land fecurity, payable after fome years; those land-bank-bills im-mediately fell 40 per cent. below filver; upon complaint home the court of England fent an instruction to governor Crow, to remove from the council and all places of truit, any who had been concerned in the late paper credit; thus currency was suppressed. and their currency became and continues filver as before.-Governor Belcher of New-England, 1741, from integrity and faithfulnefs to the publick, when a wicked combination called LAND-BANK, became head-firong; he refused their bribe or retaining fee, negatived their speaker and 13 of their councellors, and superseded many of their officers, civil and military.—Soon after this scheme was dam'd by act of parliament, governor Sh-I shall not fay in contempt, but perhaps in neglect of this act, promoted their directors and other chief managers to the highest offices, of councellors, provincial agents, judges, justices, sheriffs, and militia officers preferable to others. When

Maffachufetts-Bay, as they have at prefent no province bills out upon loan for terms of years, have previoufly fettled their currency by act of affembly, approved of by the KING in council; it is intitled, An act for drawing in the bills of credit of the several denominations, which have at any time been iffued by this govern-ment, and are still outstanding; and for ascertaining the rate of coined filver in this province for the future. By this act it is provided that the treasurer shall be impowered to receive the * reimburfement money to be exchanged after the 31ft of March 1750, at the rate of 45 s. old tenor for a piece of eight; and one year more is allowed for exchanging faid bills-After 31ft of March 1750, all debts and contracts shall be payable in coined filver only, a piece of eight at 6 s. one ounce of filver at 6s. 8, + as also all executions with fuch addition according to the time of contracting, as the laws of the pro-

When there was an immediate publick emergency for raifing of money, borrowing of publick bills, already emitted, from the possififors, would not have increased a paper currency, but prevented depreciations; fome merchants and others offered to lend these bills at a simil interest, fome gentlemen said, that they had better let them without interest than that their personal estates from multiplied emissions, should depreciate at a much greater rate than after the value of an accruing interest: but this would have effectually defeated the scheme of the depreciators the fraudulent debtors, therefore the proposal or expedient was rejected by the advice of ______

For paper currencies, see vol. I. p. 310, 314, 308, 493.

• This reimburfement money arrived at Boston Sept 18, 1749, in a man of war frigate, confisting of 215 chefts, (3000 pieces of eight at a medium per cheft) of milled pieces of eight, and 100 casks of coined copper. Connecticut, a government of fagacious hufbandmen, feems to have acted more prudently than Massachufetts-Bay; by their assembly act, Oct. 1749, they allow three years (to prevent a fudden confusion) to cancel their bills gradually; and in their reimburfement money to fave the charges of commissions, freight, infurance, and other petty charges, they are to draw upon their receiving agent, and these bills will readily purchase filver for a currency.

† This is not in proportion, a milled piece of eight is 7 eighths of an ounce, and at 6 s. per piece is 6 s. 10. one 3d of a penny better per ounce.

vince

vince do or shall require; the several acts of affembly whereby some funds of taxes, for cancelling province bills of credit, have been postponed gradually to 1760 are repealed, and the tax of 1749, toward cancelling thefe bills shall be three hundred thousand pound old tenor. Penalty to those who receive or pay filver at any higher rate, fifty pound for every offence; and after ailt of March 1750, the penalty for paffing any bills of Connecticut, New-Hampshire or Rhode-Island, shall be fifty bound for every offence; and from thence to March 31ft 1754, all perions entering into any town affairs, conflables, representatives, councellors, all officers civil and military, 1 plaintiffs in recovering of executions, tavernkeepers, and retailers of ftrong drink, shall make oath that they have not been concerned in receiving or paying away any fuch bills.

As the exportation of fterling coin from Great-Britain is prohibited by act of parliament, Spanish pieces of eight are reckoned the plantation currency, and are efteemed as fuch in the proclamation act fo called, for plantation currencies; but although the British or sterling fpecies could not be a plantation currency, the Spanish coin might have been reduced to their denominations at 4 s. 6 fterl. per piece of eight, and all the colonies reduced to the fame fterling denominations of Great-Britain, which would much facilitate the trade and bufinefs of the plantations amongst themfelves, and with their mother-country: thus we fee in Portugal a mill-ree, though no fpecie or coin, but only a denomination, is the bafis of their currencies; and in the fame manner with the plantations a pound or crown sterling, although no fpecie or coin in the colonies, might have been the general basis of our denomination or currencies.

4 That is, all delinquents are out-law'd; a very fevere penalty: this may introduce a habit of forfwearing or perjury.

I may

I may be allowed to drop a tear, I mean fome expreffion of grief, over the languishing state of my altera patria, the province of Massachusetts-Bay, formerly the glory of our plantations; but now reduced to extreme mifery and diffrefs, precipitately brought upon us by the administration of **** and a party of fraudulent debtors. At his acceffion he was lucky to find a flanding irrefiftible party formed to his mind, and not empty-handed; they effectually depopulated the province by the loss of many of our most vigorous labouring young men, the only de-pendance or life of a young plantation; they pecculated the country by ruinous unneceffary expence of money-Our prefent commander in chief in his first speech to the affembly, Nov. 23, 1749, modeftly expresses the late pecculation and depopulation of the province; " deliver " this province from the evils and mifchiefs (particularly " the injuffice aud oppreffions) ariling from the uncertain " and finking value of the paper-medium -- the cultivation blies fometimes complain. June 3, 1748, the council and representatives in 'a joint meffage to the governor, enumerate the " great lofs of inhabitants for hufbandry " and other labour, and for the defence of our inland " frontiers; the vaft load of debt already contracted, and " the unparallelled growing charges, in supportable difficul-" ties !" The house of representatives upon a certain occafion complain, " with publick taxes we are burthened " almost to ruin ;" in their journals 1747, " Should the " whole fum expended in the late expedition be reimburft "us, we have itill a greater debt remaining, than ever " lay upon any of his majefty's governments in the plan-" tations." Mr. ---- had no fympathy with the fuffering province, because * depreciations of currency, and our unsufferable taxes did not affect him.

Vol. II.

By

• Depreciations, by his fucceffive affemblies were made more than good in advancing his allowances and other perquifites: he is exempted

By the province being depopulated, labour is dear, and all countries can afford to underfell us in produce and manufactures, in confequence our trade is loft : I shall adduce a few inftances; 1. When Mr. Belcher was fuperfeded 1741, in Bofton at one and the fame time were upon the flocks 40 top-fail veffels of about 7,000 tun. all upon contract: at Mr. Sh---- going home 1749. only about 2,000 tun on the flocks, whereof only 4 or 5 ships upon contract, the others upon the builders account to wait for a market, and to keep their apprentices to work, and to work up their old ftores of timber. 2. 1741, in Marblehead, our chief fishing town, were about 160 fishing fchooners of circiter 50 tun each : 1749 there were only about 60 fifting fchooners. 3. For . many months lately there were not to be found in Boston goods (nay not the coarsest of goods, pitch, tar, and turpentine) fufficient to load a middling fhip to. Great-Britain; but under the prefent administration and management of affairs our trade and navigation feem to. revive.

empted from taxes by act of affembly. Whereas all perfons of the province not in debt, have loft about one half of their perfonal effates by depreciations in this flort administration; and the provincial poll tax of 2 s. 3 d. O. T; this tax is equal to rich and poor, and befides poll tax, there are provincial rates upon effates and faculties, excife, impost, tunnage; and befides provincial taxes, there are country and town poll rates, &c. Mr. Belcher, by his wife and honeft management, had brought all our publick debts or paper credit and currency to be cancelled in one year 1741, being 127,000 l. O. T. but Mr. ---- and his party being afraid of lofing hold of this accurfed fraudulent currency, they refolved (the province was at that time in its greatest prosperity) that 127,000 l. O. T. was an inconvenient fum to be cancelled in one year, and therefore divided it among three fublequent years; by this neft egg in a few years they increased the brood to two and a half millions; and the g----- upon his call home 1749, for certain reasons which may be mentioned, (by the advice of his trufty friends) contrived two years excellive taxes of 360,000 and 300,000 Q. T. to be collected in not much exceeding one year, when the country was depopulated, pecculated, and much reduced in trade and business : this fudden and quiet reverse change of fentiment in this party is unaccountable; but quicquid id est timeo, perhaps they expect confusion; they have practifed fifting in troubled water.

In

In the feveral SECTIONS OF HISTORIES of the feveral colonies, may generally be found, but not in the fame flrict order, the following particulars.

r. When the colony was first discovered and traded to by any European nation; when first colonized by the English: and what revolutions have happened there from time to time, in property and jurifdiction.

2. Its boundaries, if well afcertained, or if controverted in property or jurifdiction.

2. Wars with the French, Spaniards and Indians.

4. The numbers of whites or freemen, and flaves.

5. The last valuation, that is, the number of polls and value of estates, taken to adjust the quotas of taxes for the feveral counties, districts, towns and parishes.

6. The militia upon the alarum-lift, and how incorporated or regulated.

7. House of representatives, their nature and number : the qualifications of the electors, and of the elected.

8. Courts of judicature.

1. The nature of their juries, and how returned.

2. The jurifdiction of a justice, and of a bench of justices, and of their general quarter fessions.

3. Inferior or county courts of common pleas.

4. Superior, fupreme, or provincial courts for appeals.

5. Chancery or courts of equity, if in ufe.

6. Justiciary courts of over and terminer.

7. Ordinary for probate of wills and granting admiaistration.

8. Courts of vice-admiralty.

9. Justiciary court of admiralty for crimes committed at fea.

9. The prefent taxes, viz. polls, rates, impost, and excise.

10. Produce, manufactures, trade and navigation.

11. The number of entries and clearances of extraprovincial veffels, diftinguished into ships, snows, brigantines, floops, and schooners.

1-2. The various fectaries in religious worship.

C 2

Īų

In most of the sections there is a digressional article, to prevent repetitions, concerning fome things which are in common to feveral colonies, but inferted in that fection or colony the most noted for those things : thus I, in the fection for Maffachufetts should have been inferted the affair of paper currencies, as they did originate and were carried to the greatest discount or fraud there : but as by a late act of affembly confirmed by the king in council, paper currencies are terminated in that province, we drop it. 2. As Piscataqua, alias New-Hampshire, has for many years been noted for royal mafting contracts, we chose to infert in that SECTION, fome things concerning masting, lumber, and other timber for construction or building, for joiners and for turners work; and if that article does not fwell too much, we may infert fome other forest trees and flowering shrubs fit for boccages, parks and gardens. 2. As Rhode-Island has been noted for fectaries, from no religion to the most enthusiaftick, there is defigned fome account of our plantations or colony fectaries; though at prefent Penfylvania exceed them in that respect, where besides the Rhode-Island sectaries, are to be found a sect of free-thinkers who attend no publick worfhip, and are called keep-athome protestants; publick popish mass-houses; and some fectaries imported lately from Germany, fuch as Moravians called unitas fratrum or united brethren, who have had fome indulgencies by act of parliament 1749. 4. Connecticut, a colony of fagacious laborious hufbandmen, first in course naturally claims the digreffion concerning grain and grazing; it is true New-York, Jerfies, and Penfylvania at prefent much exceed them in grain and manufacturing their wheat into flour. 5. Maryland and Virginia for tobacco, and mast for raising swine or pork. 6. The Carolinas for rice, skins, and hides. 7. Georgia as an inftance of an Utopian unprofitable colony. . To render this hiftory as compleat as may at prefent be expected, I have annexed fome maps of the feveral colonies, not borrowed from borrowingerroneous hackney map

map publishers, but originals composed and lately printed in the feveral countries: For instance, with the fection of the colony of Connecticut, the laft of the four New-England colonies, I annex a * correct map of the dominions of New-England, extended from 40 d. 30 m. to 44 d. 20 m. N. Lat: and from 68 d. 50 m. to 74 d. 50 m. W. Longitude from London. To the colony of Penfylvania is annexed a + map of New-York, the Jerfies and Penfylvania, published 1749, by Mr. Evans in Penfylvania, much more accurate than any hitherto published. To the colony of North-Carolina, is annexed a map of North-Carolina, || and fome parts of South-Carolina principally with regard to the fea-coast and lands adjoining; this large inland country is wafte or vacant, and confequently delineated at random by col. Edward Mofely of North-Carolina.

* This map is founded upon a chorographical plan, composed from actual furveys of the lines or boundaries with the neighbouring colonies, and from the plans of the feveral townships and districts copied from the records lodged in the fecretaries office and townships records, with the writers perambulations : when this plan is printed, the author as a benefaction gives gratis, to every township and difirict, a copper plate copy; as the writer of the fummary had impartially narrated the management of a late g--- which could not bear the light; to check the credit of the author, the g ---- endeavoured (as shall be accounted for) to divert, impede, or defeat this publick generous-spirited amusement, but in vain. The writer in his journeys upon account of his chorography and other occasions (formerly used to such amusements in the gardens of Paris and Leyden) has en paffant, but with fome fatigue, made a collection of above eleven hundred indigenous plants, classically described and refered to icons in Botanick writers which have the nearest semblance, as the specifick icons could not conveniently be cut here; this is an amulement proper for gentlemen of estates and leifure, it is not quite to ridiculous as our modern virtuolo amusements of shells, butterflies, &c. The medical or medicinal part of botany is fmall, and foon becomes familiar to people of the profession; the same may be said of the other branches of the materia medica from animals, minerals, and chemical preparations of those; but to proceed further as a naturalist, is only proper for gentlemen of fortune, leifure, and leifibabbers as the Dutch express it; or otioforum hominum negotia.

+ From 43 d. 30 m. to 38 d. 30 m. N. Lat. and from 73 d. 30 m. to 78 d. Weit long. from London.

From 33 d. to 36 d. 30 m. N. Lat.

Сз

SECT.

SECTION IX.

Concerning the PROVINCE of

NEW-HAMPSHIRE,

A S the four colonies of New-England were originally fettled by the fame fort of people called * Puritans; their municipal laws, cuftoms, and occonomy are nearly the fame, but more especially in New-Hampshire, which was under the assumed jurifdiction of Massachusetts-Bay for many years; therefore to fave repetitions, we refer several things to the section of Massachusetts-Bay.

The prefent possession of the preference of the preference of the possession of the sector of the sector of the put in possession of the waste lands, the affembly of New-Hampshire passed acts for confirmation of their township grants and of their boundaries, without any faving of the right of the general proprietor; upon Mr. Allen the proprietor's application, the queen in council difallowed and repealed those acts.

The crown affuming the vacant lands, until the proprietors claiming in right of Mr. Mason shall make forthal proof, that Mr. Mason ever was in possession of these lands; this appears by an action of ejectment brought by the claiming proprietor Mr. Allen against Waldron and Vaughan; Allen, being cast in costs, appealed home, but his appeal was dismissed because he had not brought

* See vol. I. p. 367.

<u>.</u>...

over proof of Mr. Mason's having ever been in posselion, and was ordered to begin de novo. The collective body of the people by their representatives in assembly, have no + pretension to the vacant or waste lands, and therefore have no concern in granting of unoccupied lands; all grants or charters of these lands, according to the governor's commission and instructions, are vested in the governor and council, with this clause or referve, so far as in us lies; -- this refervation seems to favour the claims under Mr. Mason; as is also a clause in the royal new charter of Massachusets-Bay 1691, "Nothing therein contained shall prejudice any right of Samuel Allen, Esq; claiming under John Mason, Esq; deceased, of any part of the premises."

The jurifdiction of this province is indifputably in the crown. In property there are many and various claimers, * 1. As it is faid that Mr. Mafon and his heirs and their affigns never complied with the conditions of the grant, in confequence it reverts to the crown; and the crown at prefent is in poffeffion not only of the jurifdiction but property of lands hitherto not granted. 2. Capt. John Tufton Mafon, heir in fucceffion, as he fays, to the original grantee capt. John Mafon, lately made a conveyance of his right for a fmall confideration to 14 or 15 perfons of New-Hampfhire; by their advertifements in the Bofton news-papers they feem to make a bubble of it. Bofton poft-boy Nov. 9, 1749. "The prefent claimers under the late Samuel Allen of London, will find upon trial, they have no right to any of thefe lands; that the faid claimers under John Tufton Mafon, will be able to make out the right to be in them, and are willing to

+ The other three colonies of the dominions of New-England, by their respective royal charters, have the property or disposal of their vacant lands lodged in the representatives of the collective body of the people.

• Upon any judgment in the provincial courts of New-Hampshire, by an appeal home, all these claims may be finally settled by the king in council, and prevent all bubblings of property in New-Hampshire.

C 4

difpute

difpute the point in law, as foon as any perfon will give them opportunity."

John Hobby, grandfon and heir of Sir Charles Hobby, fays, that Thomas Allen, heir to col. Allen, by deed of fale, August 28, 1706, conveyed one half of these lands to Sir Charles Hobby of New-England, knight, See vol. I. p. 505.

2. Hobby and Adams claiming under Mr. Allen by their bubbling advertisements, Nov. 9, 1749, published in the Boston post-boy, November 20, 1749, in these words, "Whereas fundry gentlemen in the province of New-" Hampfhire, claim a right to all those lands in faid pro-" vince and elsewhere which were granted to capt. John " Mafon of London, by letters patent from the council " eftablished at Plymouth dated March 9, 1621, and con-" firmed to him by charter from king Charles the first, dat-" ed August 19, 1635; which lands the faid gentlemen " claim under capt. John Tufton Mason, the now pre-" tended heir to the faid original patentee : This is there-" fore to inform whom it may concern, that although " it should appear that the faid Tufton Mason is the lawful " heir to the faid original patentee, (which is yet to be " doubted) it evidently appears that John and Robert " Tufton Mason, undoubted heirs to the faid original pa-" tentee, did by an absolute deed of sale, dated April "27, 1691, in confideration of the fum of 27501. " fterling, convey all their right and title to the faid " lands to Samuel Allen of London, afterwards governor " of New-Hampshire aforefaid, which conveyance we " doubt not will be made to appear legal and valid, the " faid Samuel Allen's claim having been allowed and con-" firmed by king William and queen Mary, as ap-" pears by their charter to the government of the pro-" vince of the Maffachufetts-Bay; and that Thomas Al-" len, only fon and heir to the faid Samuel Allen, did by "deed of fale, dated August 28, 1706, convey one " half of faid lands to Sir Charles Hobby of Boston, New-"England, Knight, under whom John Hobby late of " Barbadoes. ⁴⁴ Barbadoes, but now refiding at Bofton, grandfon and ⁴⁵ heir at law to the faid Sir Charles Hobby, together ⁴⁴ with John Adams, of Bofton, have a lawful claim to ⁴⁵ the faid half of faid lands; and the heirs of the faid ⁴⁶ Thomas Allen or their affigns, have a right to the ⁴⁶ other half; all which will foon be made to appear : ⁴⁷ And whereas the firft-mentioned claimers are granting ⁴⁶ fundry tracts of lands to people who apprehend their ⁴⁷ title to be good, it is thought proper to advife fuch ⁴⁷ perfons to be cautious in fettling faid lands, till it ap-⁴⁶ very fpeedily, when the wafte lands may be granted; ⁴⁶ and alfo thofe perfons already poffefs'd of lands may ⁴⁷ be confirm'd in their poffeffions on eafy terms.

4. The claim of Mr. Allen's heirs, if Mr. Mafon's heirs fulfilled the conditions of the grant, feems to be the beft. It is true the Mafons and affignees in favour of their claim, fay that thefe lands were entailed, and therefore could not legally be conveyed to Mr. Allen; but Mr. Allen's heirs fay, that upon Mr. Allen's purchafing of Mr. Mafon's grant, he obtained a feigned or common conveyance of thefe lands; the effect of this fort of recovery is to difcontinue and deftroy eftates tail, remainders and reverfions, and to bar and cut off the entails of them.

5. Wheelright and affociates claim to lands in New-Hampfhire by Indian deeds; this was revived by Mr. Cook and others about 30 years fince, but without effect. See vol. I. p. 410.

6. Million purchafe, fo called. See vol. I. p. 419. This interferes with the late conveyance of the prefent Mr. Mafon to fome New-Hampfhire gentlemen; as thefe claims will never be of any confequence, it is not worth while to difint angle them. This million purchafe claim was revived about 28 years fince, and lately by an advertifement in the Bofton gazette, June 21, 1748.

7. Not many years fince, when the affair of the property of their lands was to be referred to the king in council:

ceuncil; the governor and council, fo far as in them lay, granted to themfelves and friends, (in all about 60 perfons of New-Hampshire,) a tract of land called Kingswood, laying upon and near Winepesiakce lake or pond, containing almost the whole of the waste lands in Mr. Mafon's grant, and perhaps further than Mr. Mason's grant extended.

In the reign of Charles II. the king in council at fundry times appointed trials of the claims of the colony of Maffachuletts-Bay, and of Mafon's heirs concerning the difputed lands between Neumkeag and Merimack rivers, but without refult or iffue; at length by charter of William and Mary, October 7, 1691, conform to the old charter of 1629, that tract of land was confirmed to the province of Maffachufetts-Bay abfolutely as to jurifdiction, but with a referve of col. Allen's claim under Mr. Mafon as to property.

The corporation, or company called the council of Plymouth or council of New-England (see vol. I. p. 366, 386.) made many grants of property, but could not delegate jurifdiction; therefore to supply this defect, fome of these grantees obtained additional royal charters with power of jurifdiction; Mr. Mason 1635, Sir Ferdinando Gorge 1639, obtained royal patents; here we may observe, that although the jurifdiction of the lands from Neumkeag to Merimack river are included in Mr. Mason's patent, this patent was posserior to the Massachusetts old royal charter, which included that jurifdiction.

Originally the extent of this province from three miles north of Merimack river to Pifcataqua river was twenty miles fea line, and fixty miles inland; by the determination of the king in council 1739, the fea line continues the fame, and westward heading the province of Massachusetts-Bay, it extends from Newichawanack river about 115 miles to New-York bounds; northward towards Canada it is indefinite, or rather not determined.

The

• The fucceflive changes in property and jurifdiction, are as follows. Mason's first grant, see vol. I. p. 418.

Towards the end of 1635 dies capt. Mason, and by will leaves New-Hampshire to John Tufton (to be called Mason) and his heirs: John dying before he was of age, it came to his brother Robert Tufton Mason an infant, who was not of age till 1650: during his minority the fervants in New-Hampshire embezzle every thing, and the civil wars preventing any legal relief, the Massachusetts people at the defire of the inhabitants of New-Hampshire, took all those lands into their own disposal and jurisdiction.

1661, Robert Tufton Mason petitioned king Charles II. to be relieved as to his property of these lands; Sir Geofry Palmer, attorney general, made report, that these lands were the undoubted right of faid Robert Mason, grandson and heir of faid John Mason. The inhabitants of New-Hampshire, and province of Main, incapable of protecting themselves against the incursions of the Canada French and their Indians, defired the protection of the colony of Massachusetts-Bay; the assembly of Massachusetts-Bay by their agent, that is attorney at home, purchased the property of the province of Main, July 20, 1677, from the heirs or assess of Gorge; the property and jurisdiction was confirmed to the province of Massachusetts-Bay by their new charter.

1675, Mr. Mason still continuing his petition, the king refers them to the attorney and folicitor general; they report his title good, and the king fends a mandatory letter || dated March 10, 1675-6 to the Massachuletts-Bay colony: William Stoughton and Peter Bulkley are sent over agents to answer Mason's complaints; they

|| This letter is directed: To our trufty and well beloved the governor and magistrates of our town of Boston in New-England. N. B. in those times the colony of Massachusetts-Bay (a hard word) was called the Boston colony.

as

as attorneys legally conftituted in the name of Maffachufetts colony difclaim those lands before the court of King's-Bench.

1679, the proprietors and inhabitants of New-Hampfhire not capable of protecting themfelves against the Canada French and their Indians, defired of the crown to take them under their immediate protection ; accordingly the king commissioned * a prefident with ten councellors for the government thereof, Sept. 18, 1679, and the lands granted there by the Massachusetts colony, were directed to pay Mr. Mafon's heirs fix-pence in the pound quit-rent, as incomes at that time were valued by way of composition; at the fame time a court of record is conftituted, to try and determine all caufes, referving an appeal home when the value is 50 l. fterl. and upwards; Robert Mason may make our titles to the prefent poffeffors at fix-pence in the pound value of all rents of real eftates, as quit-rents, the unoccupied lands to remain to faid Mafon.

1682, May 9, King Charles II. appoints Edward Cranfield, Elq; lieutenant-governor. When the crown was endeavouring to reaffume all charters and patents, the patentees made another formal furrender of jurifdiction to the crown; and Cranfield 1684 was commissioned governor, but foon went to Barbadoes, and lieutenant-governor Usher had the administration.

Robert Mason the patentee's case was recommended by the crown; he came over to New-Hampshire, some few of the possession of the possession of the possession of the possession of the this proposal. Mr. Mason brought write of ejectment against Mr. Waldron and about 30 others, he recovered

* For the honour of those families who in these times were reckoned principal original settlers, we shall transmit them by name, viz. John Cuts, president, the ten councellors were Richard Martyn, William Vanghan, and Thomas Daniel of Portsmouth; John Gilman of Exeter, Christopher Hussy of Hampton, and Richard Waldron of Dover, with power to chuse three others to confitute the first council; the president and five other councellors to be a board.

judgment,

judgment, but was opposed in the execution, and his life threatened. 1684 Mr. Mason brought a writ of ejectment against William Vaughan, Esq; and recovered judgment; Mr. Vaughan appealed to his majesty in council; this appeal was dismissed and the former judgment confirmed, and costs given against the appellant. Mr. Mason despairing of any accommodation with the people, and his life threatened, returned to England, and son after dies, leaving two fons John, and Robert Tuston Mason.

1691, April 27, John and Robert Tufton Mason by their deed lawfully executed for the confideration of 2750, l. sterl. did grant to Samuel Allen of London, Esq. all their + right to lands in New-England.

1692,

+ An abstract of Mason's deed to Allen. 1691, April 27, John Tufton Mason and Robert Tufton Mason, sons of Robert Tufton Mafon, fome time of the parish of St. Martin's in the fields in the county of Middlefex, Efq; deceased, sell to Samuel Allen of London Merchant, in confideration of 2750 l. sterl. a portion of main land in New-England from the middle of Merimack river to proceed eaftward along the fea-coaft to Cape-Anne and round about the fame to Pifcataqua harbour, and fo forwards up within the river of Newichawanock, and to the furthest head of the faid river, and from thence northwestward till 60 miles be finished from the first entrance of Piscataqua harbour; and also from Neumkeag through the river thereof up into the land weft 60 miles; from which period to crofs over land to the 60 miles end accounted from Piscataqua through the Newichawanock river to the land north westward; and also all the fouth half of the ifles of Shoals, together with all other islands and islets as well imbay'd as adjoining, laying, abutting upon or near the premifes within five leagues diltance, not otherways granted by fpecial name to any at any time before April 18, 1635, called by the name of NEW-HAMPSHIRE. Alfo ten thousand acres at the S. E. part of the entrance of Sagadahock, called by the name of MASONIA. Alfo a portion of land in the province of Main, beginning at the entrance of Newichawanock river and fo upwards along the faid river, and to the furthest head thereof, and to contain in breadth through all the length aforefaid three miles within the land from every part of faid river and half way over faid river. Alfo that part of the fea-coaft of New-England, on a great head land or cape north caftward of a great river of the Masachusetts, stretching into the sea east-wards five leagues or thereabouts in the lat. between 42 d. and 43 d. known by the name of Tabigranda or Cape-Anne, with the north.

ł

1692, March 1, Col. Samuel Allen was commissioned governor of New-Hampshire, and his commission was from three miles north of Merimack river to Piscataqua river, &c.

north, fouth and east shores thereof : the back bounds towards the main land beginning at the head of the next great river to the fouthward of faid cape, and running into the main land weftward, and up a river inpposed to be called Merimack, north weftward of faid cape to the furthest head of faid river; from which period to cross over land to the other great river which lies fouthward of forefaid cape. and half way over, that is to fay to the middle of the faid two rivers within the great island called Ista MASON laying near or before the bay, harbour or river of Agawam, with all illands laying within three miles of faid fea-coast, known by the name of MARIANA. Alfo all those lands and countries bordering on the rivers and lakes of the Iroquois or nations of Indians inhabiting up into the landward between the lines of the weft and north weft, conceived to pass or lead upwards from the rivers of Sagadahock and Merimack, together with the lakes and rivers of the Iroquois, and other nations adjoining, the middle part of which lake lies near about 44 d. or 45 d; as also all lands within ten miles of any parts of faid lakes and rivers on the fouth east part thereof, and from the west end or sides of the said lakes and rivers, so far forth to the west as shall extend half way into the next great lake to the westward, and from thence northward into the north fide of the main river, which runneth from the great and vaft weftern lakes and falleth into the river of Canada, including all within faid perambulation, which portions of lands, rivers and lakes are commonly called the province of LACONIA. As also the towns and ports of Portsmouth. Hampton, Dover, Exeter, Little Harbour, Greenland, Salisbury, old Salisbury, Concord, Sudbury, Reading, Pelerica, Gloucester, Cape Anne town, Ipswich, Wenham, Newbury, Haverhill, Andover, Rowley, Bafstown, Woburn, and all other villages, towns, ports and har-Bours in the aforefaid tracts of land called Masonia, Mariana, Isle Mason, and province of Laconia, with all mines, minerals, &c. and all royal letters or patents, deeds, writings, rentals, accounts, papers, and evidences of land whatfoever relating to the fame.

It is faid that Mr. Mason (called treasurer and pay-master of the army,) 1634, fent over about 70 fervants with stores and provisions to carry on the settlement of New Hampshire; and Mr. Mason dying towards the end of 1635, that his estate in New-Hampshire inventered, amounted to about twenty thousand pounds sterl.

1700,
1700, Col. Allen came over to New-Hampshire to profecute his claim, and found there were 24 or 25 leaves torn out of the records; these leaves contained the records of former judgments of ejectment obtain'd by Ma-He enters new writs of ejectment against Waldron, fon. Vaughan, &c. the juries brought in for the defendants cofts; the king in council difmiffed his appeal without cofts, because he had not brought proof of Mr. Mason's poffeffion, and was allowed to begin de novo. Col. Allen petitioned Q. Anne in council to be put in pofferfion of the wafte lands, &c. the petition was referred to the board of trade and plantations; they advised with Sir Edward Northey, attorney general, who reported that her majefty might fafely put him in possession of the unimproved land, but where the inhabitants had poffeffion he might bring his writs of ejectment: an order was fent to governor Dudley (at this time Dudley was governor of the province of Maffachufetts-Bay and of the province of New-Hampshire by two diffinct commiffions) to put col. Allen in pofferfion of the wafte lands, but for land improved he was to bring write of ejectment, and when the trials came on governor Dud-- ley was directed to go into court and demand a special verdict; accordingly upon a trial of ejectment against Waldron, governor Dudley was notified to attend, but for certain reasons at that time best known to himself, and a great indifposition of body (as he faid) he proceeded no further than Newbury; the defendants obtain'd cofts of fuit: Col. Allen appeals to the crown, but dies before the appeal was profecuted, leaving one fon and four daughters. His fon Thomas fucceeds him in these claims. and was caft in his writs of ejectment with cofts, a fpecial verdict being refused; he appeal'd, and died before it could be heard, leaving two fons and one daughter infants. To cut off the claim of Mr. Allen's heirs to wafte lands, fo far as in them lies, lately this government have made a grant of the waste lands by the name of Kingswood to about 60 of their principal inhabitants poffeffors,

feffors, that there might remain no waste lands in Mr. Mason's grant.

The lands lately adjudged by the king in council, not to belong to the Maflachufetts-Bay grant, are now crown lands, but at prefent under the jurifdiction of the province of New-Hampshire; they lay north of Massachusetts, and when the boundaries with Canada are fettled may prove a good diffinct inland province for produce. Bv an order of the king in council 1744, it is directed, that if the government of New-Hampshire do not provide for fort Dummer, there will be a necessity for returning that fort with a proper contiguous diftrict to the province of Maffachusetts-Bay: but so it happened, that during the late French war, the province of Maffachufetts-Bay by the contrivance of - for fake of perquifites maintained that fort and many block-houses within the district of New-Hampshire, without any confideration or allowance, for want of proper application at home.

As Mr. Maion's grant lies indented in the province of Maffachufetts-Bay, (the old colony of Maffachufetts-Bay is westward, and the province of Main by the new charter annexed to Maffachufetts-Bay is eaftward) perhaps it would be for the interest of Great-Britain and for the good of the inhabitants, to annex this fmall country to the neighbouring government by an additional charter. The property of the vacant lands of Maffachufetts-Bay being in the reprefentatives of the collective body of the people, and the property of the vacant lands in New-Hampshire being in the crown, is no obstacle, seeing the vacant lands in Sagadahock or duke of York's former property, tho' annexed by charter to Maffachufetts, continue the property of the crown, that is, not to be affigned by the government of Maffachufetts-Bay, without confent of the crown. New-Hampshire is too diminutive for a separate government or province; the numbers of their people and the value of their commerce are infignificant : in fact the governor of Massachusetts-Bay for many years was also governor of New-Hampfhire 3

Hampshire with a diffinct commission, but about ten years fince the affembly of New-Hampshire enter a complaint to the king in council against the joint governor of that time, in relation to the cafe of fettling the boundaries between the two provinces; that he was partial in favour of his more profitable government of Massachusetts-Bay, by adjourning and proroguing the affembly of New-Hampthire, when the cafe was in agitation; this complaint, by the king in council, was judged true and good, therefore a separate governor for New-Hampshire was commissioned anno 1740. In fuch diminutive governments, the governor may domineer and act in a more defpotick manner, than his fovereign can possibly in Great-Britain; it is faid that a governor and fuch of the council as he thinks proper to confult with, difpenfe with fuch provincial laws as are troublefome or fland in their way in procedures of their court of equity, fo called.

Here is at prefent fubfifting a difpute (interrupting all, publick bufinefs) between the governor in council, and the houfe of reprefentatives, concerning the governor's prerogative of negativing a fpeaker, and his qualifying fo many towns and diffricts as he fhall think worthy to fend reprefentatives; and in this infignificant government it may be called lis de lana caprina, but in our confiderable colonies it is an affair of great confequence, therefore I hall here infert a fmall digreffion concerning thefe prerogatives and privileges.

A DIGRESSION concerning fome diffuted points relating to the legiflatures of the feveral British colonies in America; particularly where the prerogatives of the crown governors feem to clash with the privileges of the reprefentatives of the collective body of the people or fettlers, in general court assembled.

Perhaps, in our colonies after a legiflature is conftituted by royal charters as in New-England, as by proprietary patents of government as in Penfylvania, Mary-Vo_L_II, D land,

Digitized by Google

land, &c. or by royal commission or instructions * to the first crown governor in the king's governments; further instructions from the court of Great-Britain, though obligatory upon the negatives of the country's representatives, who naturally may be supposed, and doubtles were intended, as a check upon instructions from the boards at home not well versed in plantation affairs.—On the other fide, as to prerogative, the plantation acts ought to have a sufpending clause, that is, not to be obligatory (thus it is in Ireland, a British colony or acquisition, an ancient precedent) unless confirmed by the British court. Thus in general, there are two supreme negatives in the legislatures of our American colonies; the king in council, and the particular legislatures of the several colonies.

In a colony where there is a royally conftituted legiflature, perhaps their publick acts, after being approved of, or not difapproved after a certain time (Maffachufetts-Bay charter expresses it after three years) cannot be difannulled but by the legislature of Great-Britain called the parliament, who in all British cases and over all perfons according to the British constitution are absolutely supreme and the dernier refort.

If any innovations were to be made by the administration at home upon the eftablished conftitution of our colonies, they naturally will begin with some infignificant colony, such for instance is this of New-Hampshire, where the people have no money nor interest lodged at home to maintain their privileges; and from precedents of such impotent colonies, proceed to impose upon the more rich and valuable colonies: thus it was in the latter end of the reign of Charles II. and in the short abrupted reign of James II. when all corporation valuable privileges were defigned to be abrogated; they began with the infignificant impotent borough corporations.

* The inftruction is, that after *** a limited time, they shall issue a fummons for convening a general assembly,

A go-

A governor perhaps by foliciting at home and glving adequate gratuities and fees to the proper leading clerks of the feveral boards, may obtain additional inftructions fuitable to his intereft or humour. I do not maintain but only mention, that we feem to have a late inftance of this in the province of New-Hampfhire. 1744-5, there was a difpute between the governor and houfe of reprefentatives-concerning the houfe's not admitting of members from the governor's new conflituted townfhips and diftricts, but not qualified by the houfe; the governor by folicitations, &cc. at home, obtained, in the king's abfence, from the lords juffices an additional inftruction as follows.

" By the LORDS JUSTICES.

Gower, P. S. Additional inftruction to Benning Went-Bedford, Montagu, Pembroke. Bedford, Montagu, Pembroke. Additional inftruction to Benning Wentworth, Efq; his majefty's governor and commander in chief, in and over the province of New-Hampfhire, in New-England in America; or to the commander in chief of the faid province for the time being.

(Seal)

Given at Whitehall, the 30th day of June, 1748, in the 22d year of his majefty's reign.

Whereas it hath been represented to his majefty. That you having in his majefty's name, and by virtue of your commission, issued a writ to the sheriff of the province under your government, commanding him to make out precepts, directed to the select-men of certain towns, parishes and districts therein mention'd, for the election of fit persons qualified in law to represent them in the general affembly, appointed to be held at Portsmouth, within the said province, on the 24th day of January, 1744-5; by which writ, the towns of South-Hampton and Chester, and the districts of Haverhill, and of Methuen and Dracut, and D 2

the diffrict of Rumford, were impowered to choose reprefentatives as aforesaid; the said general assembly did refuse to admit the perfons duly elected to represent the said towns and districts to fit and vote in the choice of a speaker: And whereas the right of sending representatives to the said assembly was founded originally on the commissions and instructions given by the crown to the respective governors of the province of New-Hampshire, and his majesty may therefore lawfully extend the privilege of sending representatives to such new towns as his majesty shall judge worthy thereof.

It is therefore his majefty's will and pleafure, and you are hereby directed and required to diffolve the affembly of the province, under your government, as foon as conveniently may be, and when another is called, to iffue his majefty's writ to the fheriff of the faid province, commanding him to make out precepts, directed to the felect-men of the towns of South-Hampton and Chefter, the districts of Haverhill, and of Methuen and Dracut, and the district of Rumford, requiring them to cause the freeholders of the faid towns and diffricts to affemble. to elect fit perfons to reprefent the faid towns and diftricts in general affembly, in manner following, viz. One for the town of South-Hampton, one for the town of Chester, one for the district of Haverhill, one for the diffrict of Methuen and Dracut, and one for the diffrict of Rumford : AND it is his majefty's further will and pleafure, that you do support the rights of such reprefentatives, when chofe; and that you do likewife fignify his majefty's pleafure herein to the members of the faid -general affembly."-

This would be nearly the fame as if the patricii of Rome (in our colonies they are called governor and council) had affumed the prerogative of regulating the + tribuni plebis, or reprefentatives of the people.

The

+ When the patricii or optimates came to lord it too much over the other people of Rome, these people infisted upon their having representatives

- Of New-HAMPSHIRE.

The writs or precepts for electing of reprefentatives for the feveral townships and districts returned into the fecretary's office, were produced in the house, Jan. 5. 1748-9, being the first day of the fitting of a new affembly, they confided of

:

There were fome other members returned by fome new towns, Chefter, South-Hampton, and three other diffricts, but not admitted to fit: Richard Waldron, Efq; a worthy man, chofen fpeaker by all the votes, excepting one, was negatived or difallowed by the governor, becaufe the reprefentatives from the new towns were not admitted to fit and vote in the choice. The houfe were ftrictly required by the governor to admit thefe new reprefentatives, the refuial of them being the higheft contempt of the king's authority, as he faid, and to proceed to a new choice of a fpeaker. This was abfolutely refufed by the houfe ; denying the governor's power of negativing a fpeaker, and of introducing + members not

prefentatives in the publick administration, called tribuni plebis, to maintain the liberties and privileges of the commons against the power of the optimates; perhaps the house of commons in the British legislature had some such original.

† If the king fends infructions to his governors of colonies, concerning the negativing of speakers, and qualifying any new towns or districts that shall be thought worthy to fend representatives to their general assemblies; it seems an ancient established custom or practice, that is, privilege of the house to admit or refuse novel practices, it being a notorious privilege in the British constitution for the representatives of the people to regulate their own members.

warranted

Digitized by Google

warranted by law, usage, custom, or any other autho-

This house still subsists (June 1750) by many prorogations and alternate messages, but have done no publick or ordinary provincial business; whether the governor or house of representatives are in fault I do not determine; I only relate matters of fact, and refer it to proper judgment.

As to a governor in the British colonies NEGATIVING A SPEAKER, it is faid to be a controverted point, therefore shall make a few remarks in relation to it.

1. As the king at home and his governors in the plantations abroad, never pretended to negative the election of a member for a county, town, or diffrict; it feems inconfistent that they should claim a negative upon a speaker, or chairman, or moderator, chosen amongst themselves.

2. In Great-Britain, towards the end of the reign of Charles II. all charters and other privileges of the people were defigned to be facrificed to the prerogative; there was a difpute between the prerogative and the privilege of the commons concerning the court's negativing of a fpeaker; but ever fince, this controverfy lies dormant; it is a tender point, a noli me tangere; and plantation governors, who endeavour to revive the like in their diffricts, by flily procuring inftructions from the court at home in favour of fuch a negative, are perhaps no true friends to their colony, nor to the British constitution in general.

3. Notwithstanding that, in the new charter 1691 of the province of Maffachusetts-Bay, it is expressly faid, that the governor shall have a negative in all elections and acts of government; in their additional or explanatory charter 12 Geo. I. in the king's absence granted by the guardians or justices of the kingdom, it is faid, that no provision was made in faid charter, of the king by his governor, approving or disapproving the election

δŧ

of a fpeaker of the houfe of reprefentatives. In confequence of this new charter, not by any abfolute royal command, but by the voluntary confent and act of the reprefentatives themfelves, the commander in chief is allowed to negative the fpeaker. Thus perhaps an act of the general affembly of New-Hampfhire or their tacit fubmiffion, might inveft their governor with the like power, but not to be affumed in any other manner.

4. The exclusive right of electing their own speaker is in the house of commons or representatives; the confirmation by presenting him to the king, or to his governors, is a meer form in course: thus the lord mayor and sheriffs of London are presented in the king's exchequer-court, but no negative pretended; and perhaps if the king in a progress should happen to be in any corporated city or town at the time of the election of their mayor and sheriffs, in compliment and form they would be presented to the king.

As to the governor's difpute with the house of reprefentatives concerning his fummioning NEW MEMBERS FROM UNPRIVILEGED PLACES OR DISTRICTS, we make the following remarks.

1. The prefent governor of New-Hampshire, without any prudential retenue or referve, impolitically exposing such an arbitrary proceeding; menaces them with ten more such representatives, he means an indefinite arbitrary number in his message, Feb. 15, 1748-9. 2. For many scores of years, which is generally con-

2. For many fcores of years, which is generally conftrued a prefcription; there have been no royal addition of members of parliament; and at the union of the two kingdoms of Scotland and England, to prevent multiplying of members, the fmall royal corporated towns of Scotland were claffed, that is, four or five of them jointly to fend one member or reprefentative; therefore as the royal appointing of new reprefentatives in Great-Britain has been difcontinued time out of mind, why fhould the D 4

general conftitution be infringed upon in our colonies? and from the caprice or private intereft of a governor, the affembly members be + multiplied to an inconvenient and chargeable number? excepting where the cultivation of wildernefs lands may require new townfhips or diftricts, and if inconveniently remote from a former fhire or county town, they require a new feparate county or fhire.

3. As an inftance or precedent of a royal regulation in the colonies; in the charter of Maffachufetts-Bay it is expressly declared, " that the house of representatives " with the other branches of the legislature, should de-" termine what numbers should be afterwards sent to " represent the counties, towns, and places;" therefore the affair of representation in the legislature is not abfolutely in the governor and his devotees of the council.

4. In the neighbouring province of Maffachufetts-Bay by charter, each township was qualified (by a late inftruction, the newly granted townships are disqualified) to fend two representatives, whereas they generally fend

† In the province of Maffachufetts-Bay, from 1730 to 1741 (the reafons or inducements of this procedure, I fhall not account for) by erecting of new townships and splitting of old townships into many corporations, the members of the houle of representatives were likely to be increased to an impolitical number; therefore in the following administration, (fee vol. I. p. 490) the governor had an instruction, in granting new townships to exclude them from fending reprefentatives: this spense inconfistent with the British confistution, whereby all freeholders of 40 s. per ann. income and upwards, are qualified to be represented in the legislature and taxation; in particular, freeholders are not to be taxed but where their agent or representative does or may appear.

A vote of the reprefentatives to regulate their own house, is not a general act of government.

Governors have a confiderable advantage over their affemblies; when he fends them any imposing mellage of importance, but not reasonable; to prevent any representation of its inconveniency or illegality, he adjourns or prorogues them.

one,

one, and at times exclusively the house of representatives excuse some towns from sending, and mulce other townships for not sending. In Great-Britain there are many borough towns or corporations not privileged to send members or representatives to parliament; but as there are county representatives, as freeholders they arerepresented in their county: whereas in New-England there being no county representatives, these unprivileged districts are not represented, which is an ** infringement upon the British constitution.

5. All new townships and districts, who by a governor's precept are required to fend representatives, their qualifications ought to be confirmed by an act of affembly, before they are allowed to sit, otherwise the governor to serve a turn may multiply the house of representatives to any inconvenient number and unnecessary publick charge where the representatives are upon wages; together with the general damage of calling off from labour and business, many perfons invincibly ignorant of publick affairs.

6. The last charter of the city of New-York in the king's province of New-York, was confirmed by act of their provincial association of the state of

• To obviate or rectify this, the counties by act of affembly may be allowed county reprefentatives, or the new townships and subdivisions of old townships may be classed and jointly send one or more representatives. As in the nature of things, nothing, no constitution is persect; where any inconveniency from time to time appears, it ought to be rectified. This introducing of county reprefentatives. or of classical representations of towns, is not consistent with a late instruction from the court of Great Britain, that in granting of new townships, a provision be made that the number of representatives be not thereby increased, or with a suspending clause, i e. It shall not take place till confirmed from home.

I fhall

I shall here infert some observations concerning general affemblies or houses of representatives which were omitted in the section of Massachusetts-Bay.

1. Conftituting townships with all corporation privileges, but expressly excluding them from the privilege of fending representatives, seems ANTI-CONSTITUTIONAL; especially confidering, that there are no county representations of freeholders in New-England. See vol. I. p. 459.

2. By act of the affembly of Maffachufetts-Bay 40 members are required to make a QUORUM in the houfe of reprefentatives; as this is not by charter, it may be rectified by act of affembly. In the houfe of commons of Great-Britain conflicting of 558 members or returns, 40 make a quorum; why fhould the houfe of reprefentatives of Maffachufetts-Bay, which this year 1750 conflicts of only about 90 returns, have the fame number 40 for a quorum? As many towns are delinquent in fending reprefentatives, and fome members of the other towns negligent in their attendance, it may fometimes be difficult to make a quorum of 40, and confequently publick bufinefs impeded.

3. The old act, that a reprefentative must be a refident in the township for which he is elected, may be falutary for some time in a new country not much concerned in commerce and policy; but a trading politick country, fuch as is Massachusetts-Bay, for a country-man not used to trade or money to prescribe in such assaching is not natural. See vol. I. p. 506.

•

4. As in England, fheriffs of counties are excluded from being members of the houfe of commons, fo in the colonies the fame regulation may take place, becaufe a fheriff may be fuppofed to be under the influence of the court or governor, his conftituents, and his perfonal prefence feems required in his bayliwick.

5. That the councellors and representatives may ferve their country gratis: thus we shall have generous members, not hirelings easily to be corrupted. This year 1750, the town of Boston and some country townships by by way of leading examples have made an introduction. Anciently in the parliament of England a knight of the fhire was allowed 4 s. and a citizen or burgefs 2 s. a day, by the refpective places for which they were chosen; at prefent they have no wages; the house of lords, the king's hereditary council or fecond branch in the legislature, never had any pay. It is full time that our colonies should conform to this example; feveral provinces have conformed, particularly in New-England our neighbouring colony of Rhode-Island ever fince 1746. See vol. I. p. 507. This will be a confiderable article of faving in the ordinary charges of government.

A DIGRESSION concerning the national claims of Great-Britain and France relating to diffuted countries on the continent of North-America and fome of the Caribee Weft-India islands.

The crown lands lately taken from the province of Maffachufetts-Bay, and the lands north of Mafon's grant, have lately pro tempore been annexed to the jurifdiction of this fmall province of New-Hampfhire; they extend from weft to eaft from New-York eaft line (which is 20 miles eaft of Hudfon's river) to the weft line of the province of Main about 115 miles; north they extend indefinitely to a line dividing the American British dominions from the dominions of France called New-France or Canada; this line is now upon the carpet in Paris, to be adjusted by British and French commissiaries. * Mr. Bollon, agent for Massachusetts-Bay, has an + instruction

• This line does not immediately affect the province of Maffachufetts-Bay, it affects Nova-Scotia, Sagadahock, (the jurifdiction pro tempore but not the property of Sagadahock or duke of York's grant, is in the province of Maffachusetts-Bay, as was also Nova-Scotia by the prefent charter) the late crown land of New-Hampshire, New-York, &c.

† That the curious may have some notion of our colonies agencies at the court of Great-Britain, I shall here insert, by way of infance, an abstract of the last body of instructions to agent Bollon voted by the assembly, January 19, 1749-50. I. To

instruction from their assembly to represent the encroachments which the French are making upon our settlements in North-America.

The late exorbitant French claims of extending their boundaries in America, beyond all the limits which have hitherto been challenged or allowed, gave occasion to the following paragraphs.

M. La Janqeriere governor general of Canada or New-France, by his inftructions from home, lately fent letters to the commandant of Nova-Scotia and to the governor of Maffachufetts-Bay, claiming a great part of Nova-Scotia, and from thence fo far as Quenebec river in New-England. At this writing M. La Corne a French officer from Canada with a confiderable 4 force, lies canton'd on the northfide

r. To folicit the payment aud reimburfement of the charges of the late intended expedition against Canada.

2. To folicit the payment for the provincial cloathing, made use of by ad. Knowles for his majesty's sea and land forces at Louisbourg.

3. To folicit the charge of supporting fort Dummer, and defending the frontiers of New-Hampshire.

4. To make application, that the governments of Connecticut, New-Hamp(hire, and Rhode-Island, be obliged to a speedy and equitable redemption of their bills of publick credit.

5. To represent the encroachments made and making by the French on his majefty's territories in North-America.

6. To enquire into the flate of the line between this province and the colony of Connecticut as formerly fettled, in order to have it confirmed, if not already done.

7. To make application that feveral governments on this continent be obliged to bear a just proportion of men and money in case of another war.

8. To folicit the exemption of fea-men and others in this government from imprefies on board any of his majefty's fhips that may come into this province.

9. That he apply to the court of Great-Britain for pay for the fnow Eagle and Dominique taken from the captors at Louisbourg, and employed in his majefty's fervice to carry home prisoners to France.

10. The agent being impowered to receive what money shall be obtained at Great-Britain for this government, he is to lodge the same at the bank of England for the further order of the general assembly.

4 This force confilts of three companies of marines, about 400 Indians of Canada, St. John's, Cape-Sable, and Penobscot, fome Canada militia fide of Chicanicto bay and river, to prevent us from extending further north than the peninfula, fo called, and from building a fort upon the neck where is the barcadier by the Bay Verte to Canada. Major Laurence of Warburton's regiment with about 450 men was fent to diflodge them, but finding the French too ftrong, and inftructed to repel force by force, as alfo the houfes burnt to prevent any lodgement there, he retired to Minas.

The French court has appointed as commiffaries the marquis de la Gliffoniere late commandant general of New-France, and M. La Houettes; with two commiffaries nominated by the court of Great-Britain, Mr. Shirley, late governor of Maffachufetts-Bay, and Mr. Mildmay; to regulate all the respective pretensions of the two nations in America, and the contest ftill remaining on fome prizes made on both fides during the war. It is thought that for fome time they may avoid coming to any determination, and perhaps instead of a definitive may come to a provisional treaty of Uti, &c.

There was lately a difpute concerning the property and jurifdiction of the island of Tobago in the West-Indies between the governor of Barbadoes and the general of Martinico; this difpute ended in a provisional treaty; this with some other of the windward Caribee islands commonly went by the name of || Neutral Islands.

Soon after the peace of Aix la Chapelle, which was concluded October 7, 1748, the French began to fettle (erect batteries) the neutral CARIBEE islands of * Tobago, St. Vincent,

militia and Coureurs des Bois, and French neutrals, as they are called, of Nova-Scotia.

|| The imprudence of our commanders and other officers, in giving the denomination of neutrals to the French fettlers of Nova Scotia, perhaps gave occasion to the prefent French claim of a great part of Nova-Scotia and of some part of New-England so far as Quenebec river.

* Tobago was formerly the property of the dukes of Courland; they had a fettlement on the coaft of Guinea called Fort St Andrew, to fupply it with negro flaves: in the beginning of the reign of king Charles II. they were difpossefield by the Dutch; this occasioned James

Vincent, St. Lucia, and St. Dominico. These and some other Caribee islands called Neutrals are expressly mentioned to keep up the claim, in both + commissions of the governor of Barbadoes, and the French general of Martinico. Beginning of December 1748, the French governor of Martinico issued a proclamation, prohibiting the English, Dutch or Danes from trading there without licence from the general of Martinico, on pain of forfeiting vessel and cargo. Upon information of these proceedings the governor of Barbadoes fent capt. Tyrrel with some frigates to

James duke of Courland by treaty November 17, 1664, to make over to Charles II, the fovereignty of the faid ifland and fort of St. Andrew's, referving liberty of trade to the Courlanders and Dantzickers. Upon this the Dutch feem to have quitted the ifland, and the Courlanders never repofieffed it; thus it remains at least a fief of the crown of Great-Britain.

It was first discovered by the Spaniards, and had its name from Indian tobacco smoakers. When the English first fettled Barbadoes, there being no Spanish fettlers in Tobago, the English from Barbadoes frequented it, and Charles I. made a grant of it to the earl of Pembroke; the subsequent civil wars prevented his settling of it. Soon after about 200 Dutch people settled there, but were expelled by the Spaniards and Caribee Indians. Next James Kettler duke of Courland, god-fon to James I. of England, made a settlement there; but was dispossed by the two Lampfons, Dutch merchants from France; they had the titles of counts and barons of Tobago; and from the Dutch Wett-India company had a grant of the island, and with confent of the States they fent over M. Bavean governor. It was in difpute between the English and Dutch in Charles II. Dutch War. The house of Kettler being extinct it reverted to England.

† The prefent governor of Barbadoes, his commiftion runs thus; Henry Grenville, Efq; captain general and chief governor of the iflands of Barbadoes, St. Lucia, St. Vincent, Dominico, and the reft of his majefty's ifland colonies and plantations in America, known by the name of the Caribee Iflands, hying and being to windward of Guardaloupe. The pretent governor of Martinico his commiftion runs thus; Marquis de Caylus governor and licut. general of the iflands of Martinico, Guardaloupe, Grande and Petite Terre, Defiada, Marygallant, the Saints, Dominico, St. Lucia, St. Vincent, Bequia, Cannaovag, Caricacocoan, Grenada, and of all the iflands and iflets commonly called the Granadillos, Tobago, St. Bartholomew, St. Martin, Cayan, and the coatinent comprehended between the river of the Amazons and Oranoke.

Tobago.

Tobago. Capt. Tyrrel fent aboard the French commodore to enquire what bufiness he had there; who roundly told him, he was come to settle that island, and if obstructed therein, was to make the best defence he could. Capt. Tyrrel returned to Barbadoes for further orders.

When complaint was made to the French court by the court of Great-Britain concerning the French affuming the ifland of Tobago; the court of France by way of recrimination anfwered in April 1749, that the English were the aggreffors, by prefuming last November in a clandeftine manner to flick up a proclamation in that ifland, commanding the French subjects there to quit the place within the space of thirty days, upon pain of military execution: this (as they pretend) induced the general of Martinico, without previous orders from his court, to prevent the same, by settling inhabitants and batteries there.

Martinico, November 27, 1749, a provisional (not definitive) treaty was figned between commodore Holbourn. authorized by governor Grenville of Barbadoes, and the marquis de Caylus governor of Martinico, for the reciprocal evacuation of the island of Tobago, as well as for the immediate demolition of all the works and fortreffes which the French have raifed on Rockley-Bay, or any other part of the faid island : that neither nation shall make fettlements there, but may wood and water there, catch fifh, and build temporary huts to fcreen them from the weather during their fishing and wooding, but shall not cut down any trees other than for fire-wood, nor gather any fimples or valuable plants. Accordingly a British man of war sloop from Barbadoes, and a brigantine from Martinico, failed to Tobago, having each of them an officer on board charged to fee that island evacuated by the fubjects of both crowns.

The wars of New-Hampshire with the Canada French and Indians their allies, is generally comprehended in what

what is wrote in the fection of Maffachufetts-Bay. * Moreover, 1. Towards the reduction of Louifbourg, on Cape-Breton island, they contributed a regiment of 350 men under col. More. 2. Towards the fecond reinforcement of 1000 men fent from New-England for the protection of Nova-Scotia, they contributed 200 men, whereof only 40 that were fent to Minas did any duty, the reft in fome trifling difgust foon returned to Portfmouth in New-Hampshire. 3. In the late French and Indian wars, they were neither capable nor willing to protect their own Frontiers; the g—— of Maffachusetts-Bay gladly embraced this opportunity of further perquisites, and procured the affembly to take them under protection at a confiderable provincial charge, but hitherto without any reimburfement.

This province makes only one county or fhire: anno 1742, it contained about 6000 rateable whites, and about 500 negroes or flaves.

Their complement of councellors is ten; when much deficient, the governor may appoint pro tempore. The new grants of lands or townships are not from the re-

* As we hinted in the first volume, during the late French and Indian war, at the request of the president and council of Nova-Scotia, reprefenting the weak state of Annapolis as to their garrifon and the ill condition of their fortifications; there were three reinforcements of men fent from New-England to Nova-Scotia. 1. From Maffachufetts-Bay 200 men, they were of good use in the beginning of the French war in fummer 1744; the other two reinforcements were of no use. 2. In the winter 1746-7, a reinforcement of 500 men of Massachusetts-Bay, 300 of Rhode-Island, and 200 of New-Hampshire, in all 1000 men, to be canton'd amongst the French at Minas to keep them in due fubjection, and at the fame time to eat up their spare provision which nfed to victual the French and Indian parties : from ill contrivance and worfe management; being indifcreetly canton'd, no fnow fhoes, and ill provided with ammunition, they fuffered a difmal maffacre by a French and Indian party from Chicahicto; our forces happened to be only 470 men, the 300 Rhode-Island men never arrived, having fuffered ship-wreck; of the 200 New-Hampshire men, only 40 marched to Minas, the reft foon returned home. 3. Was, a reinforcement of \$70 men from Massachusetts-Bay sent in the winter 1747-8, when the peace with France was as good as concluded.

prefentatives

prefentatives of the collective body of the people, but by the governor and council conform to the governor's commission and instruction, at a certain nominal quit-rent, v. g. London-derry to pay yearly one bushel of potatoes when required. The constitution of their house of reprefentatives, see vol. II. p. 37.

The juries are returned by the sheriff.

Their courts of judicature, belides the jurifdiction of a justice of the peace, and of a bench of justices, are

1. The general feffions of the peace held quarterly.

2. Inferior courts of common pleas held four times a year, confift of four judges, whereof three make a quorum.

3. A fuperior court of judicature or common pleas held twice a year, confifts of a chief judge and three other judges, whereof three make a quorum; from thence are allowed appeals to the governor and council, or to a court of appeals in cafes where the value in diffute exceeds 100 l. fterl. and to the king in council where the true value of the thing in difference exceeds 300 l. fterl.

4. Courts of over and terminer, affizes, or general goal delivery, are specially appointed by the governor and council.

5. At prefent the fame judge of vice admiralty and other officers, ferve for Maffachufetts-Bay, Rhode-Island and New-Hampshire.

6. The officers of the court of probates, are appointed by the governor and council, with appeal to the governor and council.

7. Court of equity. The commander in chief with the council, fuftain by way of appeal from the court (having jurifdiction) next below; directly without any new procefs, is tried on the fame original writ or procefs brought to the first court, and comes in statu quo exactly, faving that either party may bring new evidence if they please: after a hearing, perhaps fome weeks or months may elapse before fentence is pronounced; and from these may appeal to the king in council.

VOL. II.

E

Iŋ,

In this province there is only one collection or cuftomhoufe, kept at Portfmouth. By the quarterly accounts from December 25, 1747, to December 25, 1748, foreign voyages

Cleared out,	Entred in,

befides about 200 coafting floops and fchooners, which carry + lumber to Boston, Salem, Rhode-Island, &c. whereof about one half enter in with freight from these parts.

Their produce is provisions, but scarce sufficient for their own confumption; masts, timber, deal-boards, joists, staves, hoops, clap-boards, shingles, and some dry cod fish.

Their manufactures are fhip-building; lately a good fifth rate man of war called the America was built there. Bar-iron, the noted iron-works on Lamper-eel river were only bloomeries of fwamp or bog ore; these works were foon discontinued; they never made any confiderable quantity of bar-iron, they wanted water in the drought of fummer and in hard fross of winter, and their ore became fcarce.

+ By lumber is meant all forts of wooden traffick that is bulky and of fmall value. In North-America, ranging timber, fpars, oak and pine plank, oak and pine boards, flaves, heading and hoops, clap-boards, fhingles and laths, are called lumber. In the act of parliament 1722, giving further encouragement for the importation of naval fores, lumber is fpecified, viz deals of feveral forts, timber balks of feveral fizes, barrel-boards, clap-boards, pipe-boards, or pipe-holt, white boards for fhoemakers, boom and cant fpurs, bowflaves, caprevans, clap-holt, ebony-wood, headings for pipes, hogfheads and barrels,' hoops for coopers, oars, pipe and hogfhead flaves, barrel flaves, firkin flaves, trannels, fpeckled-wood, fweetwood, fmall fpars, oak plank, and wainfcot.

Their

Their excife upon firong liquors may amount to about 1000 l. O. T. per annum; this with 1000 l. O. T. from the intereft of loan-money per annum is the prefent falary of their governor. In New-Hampfhire as in Maffachufetts-Bay, there are two forts of licences for felling of firong drink. I. A licence to keep an open tavern. 2. A licence to retail liquors out of doors only. This liberty or licence is first to be obtained of the felect men of the township, afterwards to be confirmed by the justices of the county in their quarter feffions.

Mr. Brown, miffionary at Portfmouth of New-Hampfhire, anno 1741, writes to the fociety for the propagation of the gofpel in foreign parts, that there were in New-Hampfhire about 50 to 60 families of the church of England, the reft were Independents; that they had no quakers, baptifts, feparatifts, heathens, or infidels amongft them.

MISCELLANIES. About 1623, Mr. David Thompson attempted a settlement at Piscataqua now called New-Hampshire, it soon vanished, and the very memory of it is lost.

New-Hampshire printed law-book begins July 8, 1696.

Usher, Partridge, Vaughan and John Wentworth, Esq. were fuccessively lieutenant governors; the fuccessive governors of Massachusetts-Bay being governors in chief, until July 1741, when Bennin Wentworth, Esq. was appointed governor in chief of New-Hampshire.

John Wentworth, Esq; was appointed lieutenant governor 1717; he died Dec. 12, 1730.

1731, in July, arrives col. Dunbar as lieut. governor; he was alfo furveyor general of the woods in North-America, with four deputy furveyors, principally to prevent wafte of the mafting trees. Anno 1743, he relinquifhed those posts, and was by the directors of the East-India company appointed governor of St. Helena; there has been no lieut. governor appointed fince, and governor Wentworth fucceeded him as surveyor of the woods.

A Di-

A DIGRESSION

Concerning Timber, Wood, Lumber, and Naval Stores; the growth, and manufacture of North-America.

This is a fubject fo copious as to require a peculiar volume, but the + character of Summary does not permit to expatiate upon this useful fubject.

The timber trees of North-America for || conftruction of fhipping and framing of houses may be reduced to two general kinds, pine and oak.

The PINES may be fubdivided into the masting, or white pine, the pitch pine or picea, and others of the pine kind used as lumber. I shall not use any stiff * scholastick

+ For this reason I feldom mention their quadrupeds commonly called beafts, their birds, their fifthes, their ferpentine kind, and their infects: I avoid the useles's virtuoso part of natural history concerning figured stones, curious marcasites, extraordinary petrefactions and crystalisations, shells of all forts, &c. Men of that fort of curiosity may consult peculiar authors, v. g. in botany, father Plumier a Minime of Marseiles, in his four voyages to America discovered 900 new plants, especially in the capillary tribe; in this tribe, North-America exceeds any country upon our earth or globe.

|| New-England perhaps excels in good ax-men for felling of trees, and fquaring of timber.

· P. Tournefort. M. D. for many years professor of the royal garden in Paris, a defervedly celebrated antiquary and naturalist, as appears by his voyage au Levant 4to. 2 vol. Paris 1717 : in his Inftitutiones Rei Herbariæ, seems upon too frivolous differences, that is, from the number of leaves or needles from the fame theca or fheath, transfer the noted naval store pines, the white and pitch pine to the larix. Claffing of plants, especially trees by their general habit, feems to be more obvious or fcientifick, than the minute inspections of their flowers and feed ; we find Tournefort himfelf, the prince of botanists, recede from this rigour in classing of his leguminous trees by differences in the leaf, viz. foliis fingularibus, foliis ternis, & foliis per conjugationes. When he comes to use this last deviation with regard to the pine kind, inftead of the obvious habit, he feems not to diffinguish well: his general diffribution of the pine tribe into coniferous and bacciferous is natural, but his subdivision of the coniferous into abietes or firrs foliis fingularibus, pinus foliis binis, larices

lastick enumerations, which can be of no common use, but shall endeavour to express myself in an intelligible manner.

The WHITE PINE or \dagger MASTING PINE may be called pinus excellior, cortice lævi foliis quinis angustis perpetuis ex eodem exortu, conis longioribus; Tournefort calls it, Larix Americana, foliis quinis ab eodem exortu. Plum.' Some are of very large dimensions. An. 1736, near Merimack river a little above Dunstable, was cut a white pine streight and found, seven set eight inches diameter at the butt-end; the commissioners of the navy feldom \downarrow contract for any exceeding 36 inches diameter at the butt-end, and to be for many yards in length as they are inches in diameter at the butt-end.

From time to time the commissioners of the navy agree with contractors to furnish certain numbers of fpecified dimensions of mass, yards and bowsprits, with his majesty's licence for \parallel cutting such trees: the late contracts have been from Piscataqua harbour in New-Hampshire, and Casco-bay in the province of Main. The mass shifts built peculiarly for that use, are generally about 400 tun, navigated with about 25 men, and carry 45 to 50 good mass per voyage. By act of parliament there are * penalties for cutting of mass without licence, cognizable by the court of vice admiralty.

Col. William Dudley fome years fince, in his frequent furveys of new townships about 50 or 60 miles inland,

larices foliis (or needles) pluribus quam binis ex eadem theca, or fheath, is not natural, because the foliis pluribus quam binis in their external habit agree with the foliis binis, and ought to be called pines.

† In New-Hampshire and province of Main, much good ship timber and masting trees: in duke of York's grant, called Sagadahock, not much of either.

4 Col. Partridge fome years fince had the masting contract for ten years, no mast to exceed 36 inches diameter at the butt-end, he fent home a few of 38 inches and two of 42 inches.

|| Hard winters are good for the fledding conveyance, but hard frofts render the edges of their falling axes inconveniently brittle.

E₃

observed white ash trees, streight and without branchings for about eighty feet, and about three feet diameter at the butt-end; it is as light and much tougher than white-pine. Would not those make stronger mass than white pine, and in all respects better? It is true, the land carriage for so great a distance is inconvenient—The black ash has a smaller leaf than the white ash.

White pine is much ufed in framing of houfes and in Joiners work, fcarce any of it to be found fouth of New-England. In joiners work, it is of a good grain, foft, and eafily wrought; but foon lofes its good complexion by mildewing; priming or painting may hide this in many cales, but in fome cafes it is not to be hid, v. g. in flooring; the foftnefs of its texture fubjects it to fhrink and fwell hygrometer like, and confequently never make a good joint. The beft white pine is from the upland; thefe from fwamps or marfhy lands, are the moft apt to mildew, make a bad joint, and fhake or fhiver upon the leaft violence. The apple pine is of the white pine kind, but more frowey. +

New-England abounds in faw-mills of cheap and flight work, generally carry only one faw; one man and a boy attending of a mill may in 24 hours faw four thousand feet of white-pine boards; these boards are generally one inch thick, and of various lengths, from 15 to 25 feet, and of various widths, I foot to 2 feet at a medium; it is reckoned that 40 boards make 1000 feet.— These mills mostly stand upon small streams, because cheap fitted, but with the following inconveniencies. I. As the country is cleared of wood and brush, small streams dry up. 2. In living small streams they do not afford water sufficient to drive the wheel in summer. 3. In the winter they are frozen up. The surveyors of the woods mark the massing trees, and survey the logs

† Norway red deal boards answer for upper works of ships, because their splinters are not so dangerous as oak. Norway white deal boards are 9 to 10 feet long, 1 and quarter to 1 and half inch thick.

at

at the mills, for which they have fome perquifites from timber-men. A timber-man's effate confifts in mills and oxen; oxen are a more fleady draught than horfes; in † logging the fnow muft not exceed two feet deep.

Spruce or true || firr grows ftreight and tapering, is very beautiful; is used as spars; it is apt to cast or warp, and being

† Mifunderstandings with the Indians are a great hindrance in our timber and lumber trade; therefore the Indians ought to be awed by four or five forts at proper diffances upon our inland frontiers, kept in a refpectful condition by the appearance of fome military force; and enticed by proper affortments of goods, to exchange with their furrs, fkins, and feathers.

The commonly called Scots firr, is properly pinis foliis binis ex eadem theca.

I shall enumerate five abletes or firrs of the growth of New-England; this volume fivells too much, I can only mention them.

1. Abies peclinatis foliis Virginiana, conis parvis fubrotundis. Pluk. Hemlock. It is cut into deal boards, but much inferior to the white pine. Its bark is used by the tanners.

2. Abies tenuiore folio, fructu deorfum inflexo, minore, ligno exalbado. The white fpruce firr of New-England. All the abietes, efpecially the fpruce fo called, grow in fwamps or marfhes; the extremity of a branch is well reprefented by T. I. R. H. fol. 354, and its cone or fruit in fol. 353.

3. Dit ligno rubente, red spruce.

4. Dit. ligno obscuriore, black ipruce.

c. Abies tenuioribus foliis abíque ordine difpofitis, fructu deorfum inflexo, balfamifera Accadienfis. The firr turpentine tree of Nova-Scotia, commonly called the balfam Gilead tree of Nova-Scotia. From the tumors or blifters in the bark, by incifion is gathered a thin fragrant firr turpentine, which from its citron-like fragrancy, fuch as that of the Levant balfam, has been called balfam Gilead; it is very hot. Some years fince, when balfam capivi was wanting here, I ufed it in gonorrhœas; but it increafed the ardor urinæ and fome other fymptoms to fach a violent degree, I was obliged to drop it. The name of balfam Gilead gives a prejudice in its favour; but from its great heat and attraction in all recent wounds, bruifes, and other ulcers, it induces violent pains, inflammations and fluxions upon the part.

It is a miffaken notion of many people, that all our medicinal balfams or liquid rofins are from various firr-trees; I fhall here by way of amufement rectify those errors, by enumerating and deferibing the medicinal natural balfams.

1. Opobalfamum, balfamum verum, Gilead, Syriacum, Judaicum, e Mecha; is a liquid rofin fragrant as citron, of a fyrup confiftence; E 4 from

being too flexile is not fit for mafts or yards of any confiderable largenefs; its twigs with the leaves are boil'd with a beer or drink made with molaffes, and is efteemed good in the fcurvy and the like foulneffes of the

from a fmall tree or fhrub with pinnated leaves ending in an impar; on the top of the ftalk are hexapelous whitifh flowers fucceeded by a roundifh rugged fruit; this fruit is called carpobalfamum, and the wood is the xylobalfamum of the apothecary fhops, but at prefent not in practice.

2. The balfam Gilead or firr turpentine of Nova-Scotia, Newfoundland and Canada, is from the abies tenuiore folio, already defcribed.

3. Terebinthina communis, one of the enumerated naval flores, is from the pinus foliis ternis ex eadem theca; it is whitish, thick and opaque.

4. Strafburg turpentine, from the abies mas Theophrasti. Picea major prima five abies rubra. C. B. P. Red firr. This turpentine is clearer, paler, of thinner confistence than Venice turpentine, of a pleasant lemon-peel smell.

5. Venice turpentine is from the larix folio deciduo conifera. I. B. The larch tree; this is browner and thicker than the Strafburg turpentine. The cedrus Libani et Palessinæ præcelsa. Lob. belongs to the larices.

6. Chio, and Cyprus turpentine, is not from the pine kind, but from the terabinthus vulgaris. C. B. P. The turpentine tree. It is a tree fhrub with pinnated leaves, ending in an impar; the fruit is a longifh hard nut. This, though not of the pine kind, gives name to all the rofins of the pine kind. It is thicker and more tenacious than Venice turpentine, and of a pleafant fmell; that from Chio is clear and almost transparent, that from Cyprus is full of drofs and browner.

7. Balfam capivi. Balfamum Americanum. C. B. P. It comes to us from the Dutch plantations of Surinam. It is from a large tree with long rounding leaves; its fruit is in fhort pods. This balfam is of a bitter hot or rough tafte, does not give that remarkable violet fmell to the urine, that turpentine occasions. By experience I have found it the most effectual of all the natural balfams, in internal ulcerations, dyfenteries, difease of the lungs, kidneys and bladder, in the fluor albus and gonorrhœa: it inviscates the acrimony and prevents the colliquation of our juices.

8. Balfam of Peru from Spanish West-Indies in earthen jars; it is of a reddish dark colour, consistence of a thick fyrup, fragrant, warm, aromatick taste; from a middling tree with almond tree like leaves, and a fox-glove flower. This balfam is also a nervine medicine internally and externally used.

9. Balfam of Tolu, comes in fmall calabashes from Tolu in the Spa-

nifh

the blood and other juices; it is much drank in the northren parts of North-America, especially in Nova-Scotia and Newfoundland.

What is further to be faid of the pine kind, is referred to the paragraphs of lumber and naval-ftores.*

The

nift Weft-Indies of a yellow brown colour friable by age, of a fargrant fmell and aromatick, tafte: with this is made the fyrupus baltamicus, used in the affections of the lungs. It is from the foliques arbor five ceretia. I. B. with a pinnated leaf and foliquous fruit.

There are feveral other natural balfams, but hitherto not introduced into the materia medica.

• Here once for all, I shall infert fome general annotations concerning vegetable produce.

There is fuch a lufus naturæ in the herbs, fhrubs, and trees between the tropicks, or in hot countries, they are fcarce to be reduced to tribes.

Most of the fine flowers in the gardens of Europe came from the Levant or Asia. The fultans and their mistresses or feraglio women, take pleasure in fine flowers and delicious fruits; the bashaws and other governors of the several provinces supply them with the most gay, fragrant, and elegant; most of the orchard, especially the stone fruit, came from thence.

Systematick writers in any part of literature, are much inferior to those who write only of fuch things as were discovered or observed in their own time and place. I shall mention a few in the affair of plants. Cornuti Canadensium plantarum historia, 4to Paris 1635, he was a small-rate botanist. Hortus Maleharicus, containing elegant descriptions and icons of 475 East-India plants, done by the direction and at the charge of Draakenstin governor of the Dutoh East-Indies, in folio, published in twelve parts from anno 1678, to 1693.

Tournefort, Corollarium rei herbariæ, 4to Paris 1703, in 3 vol. containing 1356 new plants which he difcovered in his voyage or travels to the Levant, that is, the islands of the Archipelago and the Lesser Afia, at the charge of the king of France; as a supplement to his lnstitutiones rei herbariæ, 4to Paris 1700, in 3 vol. whereof two volumes are composed of elegant icons, the other vol. contains a catalogue of

~ 8846 plants. His Histoire des plantes, qui naissent aux environs de Paris, avec leur usage dans la medicine, is a finished useful piece of 1037 plants, printed at Paris in octavo 1698.

As to time and place in general with regard to our mothercountry, anno 1696—laft edition in 8vo. Mr. Ray a naturalift in his Synopfis methodica flirpium Britannicarum, has 1480 plants, whereof 113 are trees and fhrubs. With regard to the country near Boston

in

The WHITE OAK OF OAK for CONSTRUCTION of SHIPPING may be called Quercus ligno exalbido duriore cortice cinereo leviter rimofo. We have + great variety of oaks.

• • Plukenet in his Phytographia and almageftum botanicum published in folio, London 1691 to 1696; he mentions Benister's catalogue of Virginia plants not published at that time. Sir Hans Sloane a noted liefbebber or virtuoso, his Catalogus plantarum infulæ Jemaaca, &c. London 1696; there are no descriptions; the plants generally were not in his own knowledge, but an immethodical rapfody of synonima copied from sundry writers concerning the West-India settlements. There are enumerations of many American plants with elegant proper coloured icons in Catesby's natural history of Carolina and the Bahama Hands. See Phil. transact. vol. 36. p. 425; vol. 37. p. 174, 447; vol. 38. p. 315; vol. 39. p. 112, 251; vol. 40. p. 343; vol. 44. p. 435. Catesby's effays are in eleven sets.

Father Plumier in his description of the American plants published at Paris near 60 years fince, gives an account of more Weft-India or American plants than all the botanists of that age; he made four voyages to North-America, on purpose, and observes, that it remarkably abounds with capillary plants.

The two brothers Lignons in the French islands, and Saracen in Canada, in quality of royal botanists with falaries, have deferved well. Dierville a French furgeon in Nova-Scotia fent fome curious plants from Nova-Scotia or L'Accadie to Tournefort. In New-England hitherto we have no botanick writer.

Frequently I find fome difficulty to reftrain myfelf against excurfions. I shall conclude this excursion by observing that in the fixteenth century, the moderns began to apply themselves to the knowledge of plants in fome method; before that time, plants were ranged according to their general appearances, or virtues, and in a very loose manner; in that century many good botanists appeared; Gesner the father of all natural history, born in Switzerland 1516, died of the plague 1565, his botanick writings were most of them lost and never published; Tournefort followed his method of classing the plants by their flower and feed.

† These botanick excursions must prove tedious to most readers; I shall therefore slightly describe only a few of the oaks that are most common in New-England, partly by their classical Latin names, and partly by their common English appellations.

1. The

Digitized by Google

oaks, but this is the only oak required by contract with the ship-builders for construction. Black oak for the bottom of veffels always under water answers well, and being very acid, as I am informed, is not fo fubject to the eating

1. The white oak of the fhip builders, is a large tree, with afhcoloured bark of small and frequent crevices, the leaves refemble thole of a dwarf oak, robur 111. Clusii, or rather like that of T. I. R. H. tab. 349, on inch pedicles, the acorns fometimes, more than one from a common half inch pedicle from the finus of the leaves near the extremities of the furculi, paraboloid, exos, one inch, tranfverse diameter three quarters of an inch, of a pleasant taste, the cupulæ are shallow and verrucose.

2. The red oak, while young all the bark is fmooth like the beech tree, when old the bark of the lower part of the tree becomes rough; it is a large fpreading tree with a large thining leaf efculi divifura, that is, lacineated to tharp points, a large acorn but no pleafant tafte, generally the wood is of a reddifh cast and very porous; this species is subdivided into many distinct forts, viz. red, grey, blue, yellow, &c.

This oak being very fpungy is of fhort duration in ufe, it rives eafily into staves for molasses, bread, and dry cask.

N B. Quercus parva five phagus Græcorum, et esculus Plinii, C. B. P. or the efculus of the ancients, is a fhrub oak with a deeply lacineated leaf, its name is from the peculiar fweetness of its acorn ; for this reafon in Maryland, Virginia and Carolina all acorns, beech nuts, walnuts, and other nuts of the forest are called mast from maflicare, and when plenty, it is faid to be a good maft year for feeding of fwine or making pork.

3. Black oak, perhaps to called from its dark coloured bark, may be called quercus Americana magna, patula, cortice obscuriore rimoso foliis majoribus esculi divisura; may be used as plank in the under water parts of a ship; it makes the best charcoal.

4. Swamp oak is from strong moist land, such as white pine requires; it is of a middling fize, its leaf like that of ilex, (T. I. R. H. tab. 350.) but not fo rigid and spinolous ; the acorns are oval, of a pleasant taste, in dusky scally cups.

5. Cheftnut oak, fo called from the inequalities or rimæ of its bark, refembling the bark of cheftnut trees : it is of a fine grain, and by fome used in construction.

6. Common black shrub oak, grows from five to ten feet high, patulous, fmooth bark, deeply finuated, fomewhat rigid leaf, acorns fmall from the body of the trunk on fhort pedicles, bitter tafte, and feally cup.

7. A

eating or boring of the teredines or worms of the hot countries; fome think that black oak may be used as timber but not as plank. In Virginia and the Carolinas there is an oak called live or ever-green oak, quercus latifolia perpetuo virens, caudice contorto et valde ramofo; it is very hard ftubbed fhrub trunk, but of a crofs grain fit for compass timber, that is, for crooked rising timbers, standards, and knees; but not for plank. Excepting this live oak, all oaks fouth of New-England are foft and fpungy, they rive well for staves, but in ship-building they soon rot. In Great-Britain and Ireland there is no other diflinction of oaks but upland and marsh oak; their oak is quercus vulgaris brevioribus et longis pediculis, I. B. 1. 70. the leaves refemble those of our shrub white oak, the leaf has a fhort or no pedicle, unequally lacineated or rather deeply dented with four or five dentations each fide of the leaf, the acorn fome have fhorter fome longer pedicles. Great-Britain does not afford oak fufficient for their own use, they import much from the Baltick or east country. Pomerania ships off the beft oak timber and plank; Koningfberg in Ducal Pruffia fhips off confiderably; the best east country oak

7. A leffer black shrub oak refembling the former, but of a distinct fort.

8. White fhrub oak, three or four feet high, vimineous, leaf dented like that of the fwamp oak, acorns fmall as a pea, feffile in the finus of the leaves, and feally cup.

9. A leffer white fhrub oak, resembling the former, but of a diftinct kind.

N. B. Such waste barren lands as in Great-Britain are called heaths, in New-England are called shrub oak and huckleberry plains, from these shrubs which are their only produce. In Great-Britain there are several species of heaths, the most common is the erica vulgaris humilis semper virens flore purpureo et albo. I. B. common heath; in New-England are several species of shrub oak, the most common is the large black shrub oak, and several forts of the vitis idæa, or huckleberries, the most common may go by the name of vitis idæa communis foliis subrotundis non crenatis, fructu nigro minus succulento in fasciculis.

timber

timber and plank, comes down the Oder to Stetin, and down the Vistula or Weser to Dantzick; this river of Weser is navigable a long way up into Germany and Poland, and is the chief mart in Europe for importing of herrings and exporting of grain.

The next oak in goodness, if to be used in shipbuilding or construction, is swamp oak to called; see the annotations.

The black oak, fome find that it may do for timbers; not long fince a gentleman by way of experiment built a fhip, timber and plank of black oak, called the Black Oak Galley.

Live oak in the fouth parts of North-America is used for construction; it is a short stubbed tree, hard wood.

Mahogany wood of the West-Indies between the tropicks is used in ship-building there; it is durable, and in receiving shot does not splinter: for cabinet and joiners work it is excellent, much surpassing the red cedar of Carolina and Bermudas, which has a difagreeable perfume.

Cedar of Bermudas, fee vol. I. p. 148. It is excellent for floops, the worm does not feize it, it is light and of quick growth, may be cut every twenty years, plank thin and narrow; crooked timber, beams, and mafts, are brought from the continent, for the floops.

In Newfoundland they build fishing and coafting veffels of many forts of wood.

From the cupruffus of Carolina they make canoes and periaugues that may carry fifty barrels; it is of a good grain, but foft. It is of the cedar or berry-bearing kind of pine, grows tall, affords good boards and fhingles.

The AMERICAN PITCH PINE. This is the mother of the naval flores of turpentine, tar, pitch, rofin, and oil of turpentine, and may be expressed by a short § description. Pinus Americana communis, sive picea, patula, cortice

§ The name of a plant expressing a short description thereof, is of great use in botany, being the most natural.

fcabro

fcabro rimofo, foliis ternis ex eadem theca, conis mediocribus turbinatis duris quafi feffilibus vix deciduis. It grows on a dry fandy foil. The leaves about three inches long, with a prominent longitudinal rib inftead of a fulcus; T. I. R. H. tab. 355. fig. A. well reprefents its amentaceous flowers, and fig. G. reprefents its frefh cones. In New-England there is another diftinct pitch pine, called yellow pine; it is taller, bark not fo rough and dark, wood with a yellow caft, and not fo knotty, does not yield turpentine fo plentifully. In the Carolinas, much pitch pine, harder than that of New-England, fo as to fink in water; it is faw'd into boards for the Weft-India iflands; it is ufed for mafting, being ftreighter than that of New-England.

1. TURPENTINE of North-America is a liquid rofin, gathered by boxing the pitch pine trees in the lower part of their trunk. 2. White pine boxed affords a turpentine brighter than that of the pitch pine, but not in plenty, and therefore neglected or not followed. 3. The abies or fpruce gives a very liquid turpentine by incifion of bladders or tubercules in the bark; it is not gathered in quantities, therefore of no general naval ufe. 4. From the white cedar is gathered from the bark in lumps or grains a folid dry rofin, being concreted exudations, and by fome is called olibanum or frankincenfe. 5. Pitch pine knots boil'd in water, gives a top by way of fcum, a femiliquid rofin refembling Burgundy pitch.

New-England turpentine is of a honey confiftence, that of the Carolinas is lefs liquid, refembling tallow or flufh. New-England turpentine yields about three gallons oil per ct. wt. that of the Carolinas not exceeding two gallons. Turpentine refiduum in diftillation is about 7 12ths, called rofin. The ftill not exceeding one half full of turpentine, left it fhould boil over. Our chemical and pharmacopœa writers feem not to be practical diftillers; Quincey, much confulted by young practitioners, advifes

advifes to add water to the turpentine, whereas the more phlegm in the turpentine the more tedious and dangerous is the diftillation. In diftilling, if the turpentine boils up, a fprinkling of water makes it fparkle and By, but a large quantity of water foon quells it. - The stills in Boston are small; three barrels of turpentine of 300 wt. each may be wrought off in three hours. The principal care in diffilling, is in the beginning, left the phlegm boiling over should blow up the still; as the phlegm goes off the still subsides, and the danger is At first comes over more phlegm than oil; the over. proportion of phlegm gradually diminishes to the ceasing of the watery ebullition, and for a fhort time oil only paffes, and more abundantly, but foon comes turbid, and if the fire is not removed the reliduum or rolin is fpoilt; after the oil is drawn off and the fire removed or extinguished for an hour, the rofin is to run off from the ftill.

Varnish is from one half rosin and one half oil of turpentine boiled up together, and is fold at the same price with oil of turpentine.

Tar is from light wood fo called, the knots of fallen pitch pine; every 14 years they reckon that the pine lands afford a fufficient crop for the tar kilns. In Carolinas the people are not fo much indulged as formerly in gathering of touchwood at random in the proprietory lands, and the exports of tar and pitch from the Carolinas is not fo much as formerly. The largeft kiln of tar in Carolina in my knowledge was of 960 barrels; this is too great a rifk, becaufe in blowing up, all is loft. Four hundred barrels is a good kiln, and the running of the first 100 barrels is not much inferior to that of Stockholm. Anno 1746, the difference in price between Swedes and American tar was 21 s. Swedes, and 16 s. New-England per barrel; Swedes tar is cooler and better for cordage. By act of parliament only the first half of the running of a kiln is to be used as

3

as tar, the other half to be boiled into pitch, penalty. forfeiture of the kilns; this act is not put in execution. Green tar which has an additional premium, is made from green pitch pine trees stript of the bark eight feet or thereabouts up from the root of each tree; a flip of the bark of about four inches in breadth, having been left on one fide of each tree, and fuch trees . shall stand one year at the least before cut down for making of tar. No certificate bill shall be made out by any officer of the cuftoms for any tar, &c. imported from the plantations, nor any bill made out by the commiffioners of the pavy, to entitle the importer of tar to any premium; unless the certificate of the governor, lieutenant governor, collector of the cuftoms, and naval officer, or any two of them, to express that it has appeared to them by the oath of the owner that fuch tar, &c.-Tar that leaves a yellowish stain is good; a black stain is of a bad burning quality.

Pitch is made by boiling three barrels of tar into two barrels: in South-Carolina this is done in coppers; in North-Carolina it is done in clayed cifterns by fetting fire to the tar. At prefent fcarce any tar is made in New-England, and very little turpentine is gathered— A barrel of tar fhould gauge 31 and a half gallons, a barrel of pitch fhould be two and a half ct. wt. neat. Tar fhould be free from water and drofs; pitch free from all dirt and drofs; turpentine free from water and chips, and ftones.

The horn-beam trees, or carpinus dod, and the button-tree (fo called from its feeds growing in clufters refembling buttons,) or platanus occidentalis, becaufe of their crofs or confufed grain not liable to rive or fplit, are ufed for windlaces, blocks, and turners-work.

This fection fwells too much, I fhall refer lumber and other woods to the article of natural hiftory in the appendix, and at prefent only mention the following obfervations.

Shingles

Shingles are made by cutting, fplitting and fhaving of certain woods into the form of a flate or flat tile for covering the roofs of houfes; in New-England they are made of white cedar, or cedrus excelfior ligno exalbido non olente in udis proveniens; this wood is eafily fplit and managed, but may be furrowed by the rain, therefore fhingles from white pine are preferable; thefe may continue good 20 or 30 years. In Carolina fhingles are made of pitch pine and cyprus. In Jamaica they ufe bullet wood, which may laft 100 years.

Clapboards for facing of houfes, and laths for plaftering, are made of the fame woods.

Red cedar; or cedrus folio cupreffi atro, medio ligno rubro duro; this is of excellent use for posts fixed in the earth, it will hold good for a century.

The common cheftnut of North-America, or caftanea ampliftimo folio, fructu moliter echinato. T. I. R. H. the fruit is fmaller, and capfula not fo much echinated as in Europe. It rives well, and is most durable in rails in fencing of lands.

In North-America are many + varieties of walnuts. The hunters of the woods fay that there are almost as great a variety of walnuts as apples; their general distinction is into black and white, from the colour of the wood.

† Hickery or white walnut. This is the most common walnut of New-England, a middling tree, the central laminæ or annuli with age, become dark like black walnut; the nuts are small, oval and smooth, too hard to be cracked by the teeth. This is our beft fire wood.

2. Nux juglans virgimana nigra. H. L. B. Black walnut; the wood is of a dark brown, is much used in joiners and cabinet work.

3. Nux juglans fructu tenero, fragili putamine. C. B. P. Shagbark of New-England. It is not fo common as the hickery, and of a fmaller habit, the bark exfoliates in coats (as the birch and button tree) the nut is eafily broke by the teeth.

4. Nux juglans porcorum, the pig nut, a middling fpreading tree, exfoliating bark; the putamen or fhell of the fruit is not fo brittle as the fhag-bark, nor fo hard as the hickery, the nucleus is confiderable and of a pleafant tafte.

Vol. II.

Vitis

t

Digitized by Google

Vitis or grape vines in New-England, natives, are five or fix diffinct forts * that are in my knowledge.

Cerafus, or cherries, natives of New-England, in my knowledge are four or five diffinct || kinds.

Our

• 1. Vitis Americana fylvestris, uvis nigris, pruni fylvestris magnitudine foliis magnis, valpina dicta Virginiana. Pluk. The fox grape or wild vine with black grapes. It is the most common of all our grapes, grows generally near ponds, not exceeding 4 to 7 in a racemus, ripen into grapes, not much fucculent, and of a difagreeable tobacco tafte.

2. Dit. Uvis albidis, vulpina Virginiana alba. Pluk. White for grapes differ from the former only in colour, and less frequent.

3. Vitis quinquefolia Canadenfis scandens. T. I. R. H. Five-leafed ivy of Virginia, or Virginia creeper. It creeps and climbs to a great extent, leaves of a bright green colour, makes agreeable arbours, very plenty in the woods: the racemi or clufters are lax, the grape or fruit is in form and bignefs of the uvæ Corinthiacæ or currants ufed in puddings.

4. Vitis sylvestris Americana, platani folio, uva racemosa, acinis rotundis parvis acidulis, nigro cæruleis. The fmall American grape vine with large leaves and fmall black grapes, in lax clufters.

ç. Vitis Americana sylvestris, platani folio, uva recemosa, acinis rotundis parvis rubris; differs from the former only in the deep red colour of its grape.

1. Cerafus sylvestris rubro fructu Americana. Common wild cherry. It is frequent in the woods, and flowers more early than the racemofæ; is an arborescent frutex, in taste flatter than cerasa fativa, or common red cherry.

2. Cerasus sylvestris Americana racemosa præcocior fructu majori nigro. The greater wild clufter cherry or birds cherry. A middling tree, the racemus of the flowers and fruit is from the extremities of the branches, not from the finus of the leaves as the padus. I. B. The cherry is larger than the following, black, fucculent and fweet; its wood is used in joiners and cabinet work.

3. Cerafus Americana sylvestris racemosa, fructu minore nigro dulci. The common bird cherry of New-England, a middling tree, flowers and fruit in racemi, like the ribefia, and fomewhat larger; in New-England it is used in place of the officinal or cerasus sylveftris fructu nigro. I. B. the small birds affect it much.

4. Cerafus Americana fylvestris humilis fructu nigricante non eduli. The American dwarf crabbed birds cherry, does not exceed the height of 7 or 8 feet; it is not a padus, because the racemi are not from the finus of the leaves, but from the extremities of the branches or twigs; this cherry is imaller than the former, dark red, and of an acerb choaky tafte.

I have
Our apple trees are all from Europe; ten to twelve bushels of apples are required to make one barrel of cyder, one barrel of cyder gives not exceeding four gallons of proof spirit: beginning of October is the height of cyder making.

Saffaphras ex Florida ficulneo folio. C. B. P. is plenty is New-England, and not fo ftrong a perfume as further fouth: it is an ingredient in the decoction of the woods fo called, and used in venereal and other pforick diforders.

I omitted in the proper place to infert, that the right merchantable hoops are from the faplins of white oak and of hickory; white oak is the beft. Staves for tight cafk are from the white oak; red oak ftaves are used for molaffes and dry cafk. One thousand ftaves make from 30 to 35 hogsheads of 100 gallons each.

Some mifcellany observations relating to this DI-GRESSION.

In New-England fhip-building, a veffel fitted to fea, two thirds of the cost is a profit to the country; the other third is iron, cordage, fail-cloth, and fmall stores from Great-Britain.

Timber if of too old growth, is dotted; if too young, 'tis fappy: neither of them fit for construction.

There are feveral good acts of the British parliament, and of the legislatures of the feveral colonies, concerning the feafons and times of falling of timber; as also con-

I have not room to mention the great varieties of wild roles, gooleberries, currants, brambles, rafp-berries, &c.

All the apple trees, in New-England are exoticks; as I formerly hinted. La Hontan perhaps is miftaken in faying, that he did fee feveral European fruit trees natives upon the river Ilinois; probably they are the relicks of a former French fettlement there.

Thuya Theophrasti. C. B. P. Arbor vitæ. Clus. Tree of life of New England, is by mistake called favine. Sabina is not well defcribed by botanists. Some with Boerhaave fay, it is bacciferous, fome with Ray call it conifer: the ambiguity may proceed from its bearing feldom, and not till very old.

cerning

Digitized by Google

cerning the proper feafons of killing thefe beafts that afford furr, fkins, and hides: but little attended to, and perhaps never put in execution.

Clearing a new country of wood, does not render the winters more moderate, but conduces to its being more healthful: the damp of wood lands produces intermitting, pleuritick, peripneumonic, dyfenterick, and putrid fevers.

Where trees and other growth are large, it is a fign of good land. Cheftnut, walnut, and beech trees are fymptoms of good land. Alder is good meadow ground.

We have in the woods variety of beautiful flowering fhrubs; but few of them flower in winter, the most valuable qualification for a flowering fhrub.

For peculiar things of this kind, if we confult the moft celebrated dictionaries we are led aftray; for inftance, Bailey defcribes tar, "A fort of großs fatty liquor iffuing "from the trunks of old pine trees."

In middling climates timber or wood is generally fpungy or light by alternate relaxations and bracings from heats and colds, confequently of no good ufe or duration; thus it is from New-England to Carolina: further north the timber is folid and heavy, fit for permanent conftruction, v. g. in New-England, Nova-Scotia and Canada; ftill further north the timber is too fmall, fhrubby and narrly; in the hot countries are many fpecies of hard wood of flow growth, good for wainfcotting and other joiners work; Summary does not allow me to enumerate them.

Summer-built veffels are of better use than those of any other feason.

The fire wood near Boston is much exhausted; we are under a necessity of fetching it from the province of Main, and territory of Sagadahock. A wood floop with three hands makes about fifteen voyages per ann. from the eastward to Boston, may carry about 30 cord fire wood each voyage. — A cord of wood is eight feet lengthwise, per four feet height, of four feet sticks or logs. A kiln

for

for charcoal or furnaces, bloomeries and refiners of iron, is generally of 20 cord wood, and generally may yield 10 cart-load of charcoal at 100 bufhels per load.

At finelting furnaces they observe that young black oak makes the best coal. One acre of wood land at a medium yields about 40 cord wood; one cord of wood yields 40 to 50 bushels charcoal.

Our feafons are uncertain; in open winter the fap rifes too foon, and a fubfequent hard froft makes the bark fplit and peel off; thus at times our fruit trees particularly fuffer.

Timber under 12 inches is called ranging timber, above 12 inches it is called tun timber; ftandards and knees are called compass timber; the compass timber to the northward is best.

Our trees, especially the oaks, while growing, are much subject to the + teredo or worm, therefore in all new-built ships these worm-holes in the plank must be carefully spiked.

The fhips built in Bofton exceed all of other building yards, the many merchants and fhip-mafters, good connoifeurs, transiently inspect them, and every bad piece of timber or length of plank is censured. In Newbury where they are not much inspected, the builders act at pleasure, and as the contracts are generally to be paid in goods, they build accordingly; thus a noted builder T. W. jocofely faid, that he had built for — a callicoe fhip. The other country building places are ftill

⁺ There are varieties of teredines or wood eating infects; I fhall upon this occafion only mention two. 1. An afcarides or maggot-like teredo, which preys upon the wooden wharfs in Bofton and elfewhere. 2. The xylophagus marinus major navibus infeftus, it is pernicious to fhips in hot countries, efpecially in their firft voyages; lately it did damage in the harbour of Newport of the colony of Rhode-Ifland; this is not the fame with the infect which makes the worm-holes in our timber trees while a growing: neither is that which a few years fince, 1730, and increafed for 8 or 9 years, feized the piles or paalen of the dykes in Helland, threatning an inundation, but were deftroyed by a hard frofty winter.

F₃

worfe,

worfe, particularly North River, where inftead of what is reckoned fhip-timber, they use forest-wood of any fort; these vessels with repairs last only two or three voyages, and are designed as a bite upon ship buyers at home.

Timber used green or with the sap up, is like formum madide repositum, it soon tends to putrefaction: this sap may be extracted by macerating or soaking in salt water. In ship-building, they ought to use only white oak for timber, plank and trunnels; and these as much as may be without sap, \downarrow rot, or worm-holes.

[] Oak if long feafoned or dry'd, becomes vapid or dry-rotted, and does not laft; we have lately had a notorious inftance of this: cordfire wood to the N. E. of Bofton cut before our late war with the French and their Indians, during the war of a few years, could not be carried off; upon a peace it was fhipt to Bofton, it

1 The annuli or annuolex increments of trees begin from the center of their transverse sections or heart of the tree; and in the decline (trees like animals, for many years according to the nature and conftruction of individuals of their feveral species increase, then for some years are at a state or stand, and afterwards are upon the decline; thus our first or ancient growth of timber is not good, our fecond growth perhaps may equal that of Great-Britain) the dottedness, ceriofity, or tabes begins naturally, progressive from the center; this is most remarkable in the spungy timber of red oak. One may blow spittle through a stave of four feet length; its annuli, or circular laminæ, in the transverse sections are noted, and after surveying, if red oak, and fome other trees, are used for monument trees, by the number of the furcrescent laminæ we compute the number of years from the furvey; therefore it is better to mark monument trees upon the bark, which does not alter, than upon the wood fubftance where the marks are yearly inveloped.

A wood fire is more pleafant to the fight and fmell than that of pit coal, but its warming influence is not fo diffusive; it fearches more, but is not fo steady and lassing, its smoke and vapour is more offensive to the eyes, it discolours and dry-rots paper prints more than pit-coal. We have lately in Charles-town adjoining to Boston made an effay for discovering of pit-coal; if it succeeds, by act of assembly wood ought to be prohibited for use in firing in and near Boston; otherways than in charcoal for the use of furnaces of bloomeries and refineries.

burnt

burnt like stubble, of no duration, leaving no coal, and the ashes not profitable to the soap-boiler.

* Oak timber from thick wood lands is not good.

Next to the ore, in all iron works, wood or charcoal is the most effential: here we may observe, that iron works require only 3 men who may be called artificers, viz. a forgeman, a carpenter, and collier; the others are only common labourers.

When the fun does not fhine, les hommes des bois, fwampeers or wilderness men, diftinguish the courses or corners of winds by, 1. Mossies growing most plentifully on the north fide of old dotted trees. 2. Pines branching most fouthward. 3. Trees reclining generally eastward, theirs from the prevailing of the westerly winds; Sir John Nerborough observed the fame in South-America. This observation holds good all over America. 4. The rings in the transverse fection of trees, which are most compact northward.

There is no author who has wrote tolerably well concerning the natural hiftory of New-England. +

When Sweden began to impose upon Great-Britain in the exportation of their naval flores, an act of parlia-

* Oak timber called day oak, from places well cleared, is better than that from wood lands where there is not the benefit of the fun and free air; our fecond growth of timber or pasture oak is almost equal in quality to that of Great-Britain.

In all oak timber there is an acid juice which corrodes iron (therefore the French fpiking does not answer so well as our trunneling of ship plank) and the timber itself; therefore it ought to be seasoned either by drying, or by (this is better) so aking in falt-water to extract this corrosive acid out.

+ Joffelyn frequently quoted, arrived at Bofton 1653, and refided in New-England many years, publifhed a fmall book called eight years observations, printed in London 1672, as a natural history of the country; it abounds with grofs mistakes, v. g. "fome frogs when they "fit upon their breech are a foot high, and fome as long as a child "one year old. Barley frequently degenerates into oats." Here he was imposed upon, by some oat and barley feed intermixed as frequently happens: "in New-England, no woodcocks, no quails." N.B. they are very plenty.

ment

ment was made allowing certain premiums upon the importation of certain naval stores from English America. 4

In rope-making by the addition of tar, the cordage acquires one fifth more in weight, the rope-makers great gains.—A rope-walk for merchants use need not exceed 200 fathom: because 200 fathom yarn when twisted makes 120 fathom cable.

In the mifcellany article of a fection, I fometimes infert things which should have been inferted in their proper places but were forgot.

Here should have been inferted some short account of Dr. Berkley's tar-water ufed as a medicine; but as most readers are not in the tafte of natural hiftory, I have already exceeded too much in that refpect; and here shall only observe, that his directions for making of it are: A gallon of cold water to a quart of tar workt thoroughly together with a flat flick for five or fix minutes, after three days the tar being thoroughly fublided, decant the above, and bottle it for use; at a medium one pint drank per diem at intervals upon an empty ftomach : it may be made weaker by a lefs proportion of tar or lefs ftirring, according to the conflitution and ftomach of the patient. As Dr. Berkley favoured Boston with some fermons agreeable to the people in New-England, his medicine ex verbo facerdotis is much ufed there, and I have had the opportunity of observing the effects thereof. 1. In ladies of a loft fine fair complexion, a

There must be a plantation certificate that they are the growth or produce of our colonies: upon landing the pre-emption to be offered to the commissioners of the navy: if 20 days after landing the commissioners do not contract for the fame, the owners may dispose of them at pleasure, and receive the premium.

long

10

long use of it gives their countenance a fallow, that is, a yellow greenish cast. 2. As tar is a creature of the fire, and therefore caustick, I observe, it has a bad effect in all hecticks and hæmorrhages, and inflammatory cases. 3. In vapid diforders of the nervous system it is of good use, if not used too long; if used too long, its effects are more violent and destructive to the constitution, than the habitual drinking of rum or brandy. N. B. Of all these I can produce special vouchers.

4. This is no quack medicine, because it is no noftrum, and published by a benevolent clergyman without any defign of lucrative profit; his friend in publishing a confiderably large book of many hundreds of cases exactly in the form and universality of quack recommendations, is a disparagement.

The prerogatives of provincial governors multiplying members or reprefentatives from new places to the general affembly ad libitum, is a matter of great confequence to our colonies: as this has been lately affumed in the fmall government of New-Hampfhire, I cannot clofe this fection, without taking fome further notice of the fame.

There is a law of this province called the triennial act, by which the qualifications of members, and of those who may elect them, is stated; the method of calling and governing the meetings of the electors is regulated, and the longest term an affembly may sublist limited. June 4, 1748, the affembly became diffolved in courfe by virtue of this law; from which time to the 3d of January following there was no affembly in being; this interval the governor received the instruction, vol. II. p. 35. and befides the places mentioned in faid instruction, the freeholders of Pelham and Methuen are ordered to unite and chufe one reprefentative for both places at a joint meeting held at Pelham: this was a novel thing, to affemble the electors of two or five towns in one body : in Scotland, where by the act of the union parliament

parliament (not by prerogitive) four or five towns were claffed to fend one member or reprefentative, each town voted feparately for a reprefentative, and those reprefentatives by vote fent one of their own number as a member of parliament; but in a different manner the freeholders of the towns of Dunstable, Merrimack, Holles, Monson and Nottingham west, are ordered to unite in one meeting to be held at Dunstable, and chuse one member for the whole as a consolidated body; this was done, but no return made, as I am informed.

After the late running of the line with Maffachufetts-Bay government, feveral parts of townships and other fettlements formerly in Massachusetts-Bay fell within this province; as the affembly were defirous that the polls and effates of these annexations should contribute to the charge of government; by a temporary act, they incorporated them by the name of Diftricts, with the fame appellations as before, and the fragments from the Maffachuletts townships, viz. of Almsbury and Salisbury were made one diffrict : from Metheun and Dracut one district, Haverhill one district, &c : this act was frequently renewed for fhort periods, only that they might contribute towards the charge of government; but after repeated application of the inhabitants, they had the privilege of townships added, but still temporary; fome of these districts were made townships by charter, thus Dracut was made a town by the name of Pelham: about feven months after calling the affembly the laft district act expired; notwithstanding their legal existence expiring, Methuen, v. g. had a representative in the affembly.

By the triennial act, the felect-men of each place fending reprefentatives, are to call the qualified voters within their, precincts to meet and proceed to a choice; but there was no legal authority for the felect-men of one town or diffrict to call a joint meeting of the electors of two or five places, and therefore was in propriety a tumultuous tumultuous affembly: thus were two of the excluded members chosen.

The governor was from home required to communicate the lords juffices additional inftruction of June 30, 1748, to the members of the general affembly concerning this affair; which he never did in form; they only obtained a transcript of it by the courtefy of a private hand as a favour; and the governor's friends infifted that they should first admit these disputed members, and afterwards enter upon the merits of the case. I have no concern in the affair, and endeavour only impartially to represent facts.

N. B. By the royal charter to the colony of Rhode-Island, their affembly is to determine what towns have power to fend representatives to the affembly.

As this is a petty inconfiderable province or government, very irregular and factious in their œconomy, and affording no precedents that may be of exemplary use to the other colonies; I omit (to ease the Summary) many articles which in the other colonies are deduced at length, as of good use and information. Perhaps if this government were annihilated, and annexed to the neighbouring province; it might be of benefit, for their protection in cases of war with the neighbouring French and Indians, or infurrections, and for good order, and to ease their charges of government.

SECTION X.

Concerning the COLONY of

RHODE-ISLAND.

I Shall not repeat what I have already mentioned in general, concerning the earlieft European difcoveries and fettlements in America.*

This colony was not originally or immediately from England, it proceeded from the neighbouring colony of Maffachufetts-Bay; and was at firft made up of the emigrants and + banifhed from thence, becaufe of diffenting from their generally received way of religious worfhip; thefe emigrants were puritans of puritans, and by degrees refined fo much that all their religion was almost vanifhed; afterwards it became a receptacle of any people without regard to religion or focial worfhip: and their modes of civil government were very variable and defective.

* See vol. I. p. 63, &c. For the first British discoveries and fettlements there, fee p. 109, &c. and p. 203, &c. the first fettling of New-England, p. 364, &c.

† These banishments were under pretence of preferving the publick peace, and preventing of sectary infection; and as is natural to all zealots and bigots, they fell into the same error of rigidity, which they complained of upon their emigration from the church of England. At a general synod in Newtown near Boston, which was called August 30, 1637, eighty erroneous opinions were presented, debated, and condemned; and by the general assembly or legislature of the colony, October 2 following, some perfons were banished.

There

There were fome incidents, which favoured the firft Englifh fettlements. 1. A few years before the Englifh came to New-Plymouth, there prevailed fome malignant, contagious, very mortal diftempers amongft the Indians from Penobfcot to Narraganfet, which made room for a fafe fettlement. 2. Several of the neighbouring Indian nations were infligated to deftroy one another: thus the Narraganfets affifted the Englifh to deftroy the Pequods 1637; Myantomy the great fachem of the Narraganfets was made prifoner by Uncas the fachem of the Mohegins, and was put to death 1643.

In the British acts of parliament, this colony is named Rhode-Island, Providence Plantations, and the Narraganset Country or King's Province: originally these were distinct associations or plantations, but since have been united, and by charter incorporated into one colony or jurisdiction. I shall briefly mention the origin of these feveral distinct fettlements.

Mr. Roger Williams came over from England to Salem 1630; he fucceeded Mr. Shelton minister of Salem 1634, and becaufe of his antinomian, familiftical, brownift, and other fanatical doctrines, though in other refpects a good man, 1635 he was excommunicated and banished from Maffachufetts colony by their affembly or legislature as a disturber of the peace of the church and common-wealth. and removed to Seaconck, now called Rehoboth, and procured a grant of lands from Massafoit fachem of the Pakanokat Indians; the magistrates of the colony of Plymouth, Seaconck being within their jurifdiction, obliged him to remove; in the fpring following, with fome of his friends and adherents he fettled on the other fide of Patuket, the boundary river at Moofachick, by Mr. Williams called Providence, and the Narraganfet fachem made them feveral grants of lands; one of the grants is dated Nantiganfick the twenty-fourth of the first month commonly called March, the fecond year of our plantation or planting at Moofachick or Providence; Mr. Williams lived in Providence forty years; 1640 the twentyfevent}

feventh day of the fifth month about forty perfons \downarrow voluntarily formed a fort of civil government. When for the eafe of the inhabitants, the colony, formerly all in one county as is at prefent the fmall province of New-Hampthire, was divided into three counties, the township or plantation of Providence was divided into four townships, Providence, Smithfield, Scituate, and Glocester; Providence solve four representatives to the general assembly, the others fend two each.

Duke of Hamilton's grant from the council or company of Plymouth in April 1635, was from Providence or Narraganfet-Bay eaft, to Connecticut river weft, foutherly upon the fea, and northerly up inland fixty miles, or fo far north as to reach the Maffachufetts fouth line; this takes in all the colony of Rhode-Ifland, and the eaftern parts of the colony of Connecticut; the duke of Hamilton had a further grant of 10,000 acres eaft of Sagadahock adjoining to lord Ware's grant; that family have at fundry times effayed to revive their claim, but as they never fulfilled the conditions of the grant or fettling, they never profecuted the affair to effect. There were feveral other vague grants, but as they are now obfolete, and claims not like to be revived, we fhall not mention them.

In the year 1637, the fynod at New-town in Massachusetts-Bay having condemned the opinions of many fectaries, and by the subsequent general court or assembly perfons being ill used, these perfons with their friends

4 To perpetuate the memory of the first confiderable fettlers and of their families, I shall in the history of our several colonies mention some names. The first twelve perfons who with Mr. Williams were concerned as proprietors of the Providence lands; William Arnold, John Greene, John Throgmorton, Thomas James, William Harris, Thomas Olnay, Richard Waterman, Francis Weston, Ezekiel Holliman, Robert Cole, Stukely West-coat, and William Carpenter; afterwards were associated Chad. Browne, William Fairsfield, J. Warner, E. Angel, J. Windsor, R. Scot, Wm Reinolds, Wm Wickenden, Gregory Dexter, &c. at length they amounted to the number of 100 proprietors of Providence, being the value of twenty miles square.

and

and adherents went to Aquatneck, now the island of Rhode-Island, and by deed, March 24, 1637-8, purchafed the island from the Indians; 18 perfons || without a patent did voluntarily incorporate or affociate themfelves; the eafterly end of the island with Seaconet was called Pocaffet; this fettlement increased fast, and was called Isle of Rhodes or Rhode-Island; 1644 it was divided into two townships, Newport its easterly part, and Portsmouth its westerly part; lately Newport is fubdivided into Newport and Middletown. In the beginning the ceconomy or government was variable; 1640 they agreed that the government should be in a governor, deputy-governor and four affistants, * they held their offices until the patent of incorporation.

1642-3, $\hat{J}an.$ 12, Showamet was purchafed of the Indians by eleven affociates, + and called Warwick in honour to the family of the earl of Warwick, who had a grant (but never profecuted) of a large tract of land in these parts; they were by directions from this minister incorporated in the Province of Providence Planta-

¹ Thefe 18 perfons were William Coddington, John Clark, William Hutchinfon, John Coggefhal, William Apinwal, Samuel Welborn, John Porter, John Seaford, Edward Hutchinfon, jun. Thomas Savage, William Dyree, William Freeborn, Philip Sherman, John Walker, Richard Corder, William Raulifton, Edward Hutchinfon, fen. Henry Bull. N. B. Some families returned to the Maffachufetts-Bay colony, the Hutchinfons, Dummers, Savages, &c.

* William Coddington, governor, W. Brenton, deputy governor, N. Eafton, J. Coggifhal, W. Hutchinfon and S. Porter.

+ Rendal Holden, John Wickes, Samuel Gorton, John Greene, Francis Wefton, Richard Waterman, John Warner, Richard Corder, Samfon Shelton, Robert Patten, and William Woodeal. N. B. Gorton was a preacher or exhorter, of many wild peculiar opinions in religion, different from those of the other New-England sectaries, and used a mysterious dialect; his followers were called Gortonians; he came to Rhode-Island 1638, was banished from thence 1640; he was of a good family in England, he difowned the Puritans and opposed the Quakers: he fettled at Patuxet, and kept a peculiar religious fociety for upwards of fixty years, and lived to a great age; but as this fect is utterly extinct, we shall not revive the memory of it in the digref fion concerning the British plantation fecturies.

tions.

tions. About this time fome people began a fettlement at Patuxet river, \downarrow whereof at prefent part is in the township of Providence, and part in the township of Warwick. Warwick is lately subdivided into the township of Warwick, four representatives, and country two representatives.

1643 Mr. R. Williams went to England as agent, and by the affiftance of Sir Henry Vane, obtained from the earl of Warwick, governor and admiral of all the English plantations for the parliament, a fort of charter of incorporation of the feveral fettlements by the name of " the incorporation of the Province Plantations in " the Narraganset-Bay in New-England; may settle them-" felves into any form of government the majority of the " freemen should agree upon, suitable to their estate and " condition, and make fuitable laws, agreeable to the " laws of England, fo far as the nature and conftitution " of the place will admit, &c." dated 1643-4, March 17. Their first general assembly was not called until May 19, 1647; this affembly established a body of very good and wholfome laws, and erected a form of government for the administration of these laws, and for making further laws that may be found requilite. Their legiflature, called a court of commissioners, consisted of fix members from each of the four towns of Providence, Newport, Portsmouth and Warwick; but the supreme power to be in a regular vote of all the [] freeholders of the colony or incorporation, the freemens vote fuperfeded or repealed the acts of the court of commiffioners and made them void. - A prefident and four affiftants yearly chosen were judges of the court of trials, affifted by the two wardens or justices of the

4 Meadows upon a river has, in our northern plantations, always and every where been an inducement to begin a fettlement; as being immediately furnished with food for their cattle in winter.

At prefent there remain in our plantations, only two populace or popular colonies, where the fupreme power or dernier refort is lodged in the community, viz Connecticut and Rhode-Island.

particular

particular town, in which this court fat from time to time. Every town chofe a council of fix perfons to manage the prudential town affairs, and had the tryal of fmall cafes, with the wardens or juffices of the town, but with an appeal to the court of prefident and affociates. There was a fhort interruption of this form of government, October 2, 1652, by order of the council of ftate from England; but foon refumed, and continued until the prefent charter took place.

The prefent charter is dated July 8, 1662, 15 regn. Carol. II. in which it is enumerated, that they were people who left their fettlements in the other colonies, becaufe obliged thereto by their different fentiments in religion; and did by good providence transplant themfelves into the midft of Indian natives, and made land purchafes of those natives, fit for building of vessels, making of pipe staves and other lumber: that their defign was to live quietly with liberty of confcience together, and to convert the Indians. They are by charter made a body politick or corporate by the name of the governor and company of freemen of the English colony of Rhode-Island and Providence Plantations in Narraganfet Bay in New-England.

Grants liberties of confcience in religion, a power to make a common feal, to call an affembly annually, first Wednefday of May, and last Wednefday of October, or oftener: composed of the governor, the deputy governor, ten affistants; and representatives of towns, whereof Newport not exceeding 6, Providence 4, Portsmouth 4, Warwick 4, and 2 for each other place or town, to be elected by the majority of freemen in each town. The majority of the affembly, whereof the governor or deputy governor and fix of the affistants at least to be

• Without excepting Roman Catholicks or any others.

+ In the charter, for the first year, the king nominated Benedict Arnold, Efq; for governor, William Brenton deputy governor. Vol. 11. G

feven; + to have power to appoint the time and place of their meetings, to make any man free of the company, to nominate proper officers, to make laws, &c. not repugnant to those of England, to appoint courts of judicature with their proper officers, to determine what towns have power to fend representatives to the affembly, to pardon criminials, to make purchases of the native Indians ; when the affembly does not fit, the governor with the major part of the affiftants to have the direction of the militia. The governor, fix of the affiftants, and major part of the representatives of the freemen in affembly, have power of making war against the Indians or any of the king's enemies, but not to invade the Indians of any neighbouring colony without the confent of the government of that colony: allowed the liberty of fishing and of curing fish on any of the coafts of New-England: perfons born there, to be denizens of England; all perfons and manner of goods may be transported thither from England: any difference arifing with the neighbouring colonies, to appeal to the king in council : to have a free trade with all the other English colonies. The bounds of the colony to be westerly, the middle channel of the middle great stream of Pokatuke, alias Narraganset great river, so far as it lies up the country, and thence by a line due north to the foutherly line of the Maffachufetts colony; northern bounds, the foutherly line of the Maffachufetts colony fo far east as three miles to the E. N. E. of the most eastern and northern parts of the Narraganset-Bay.; the eastern bounds, as the bay lieth or extendeth itself from the ocean into the mouth of the river which runneth into Providence : and from thence higher along the easterly bank of faid river called Seaconck river, up to the falls

+ As in the majority of voters there must at least be the governor or deputy governor and fix of the affiftants, it was the fame cafe as if the governor and affiftants were a feparate board or house; therefore after some years by act of affembly they were constituted a feparate house, and the governor in case of an equivote in the board of affiftants, to have the casting vote, but no negative.

called

called Patucket-falls, being the most westerly line of Plymouth colony: and from faid falls in a streight line due north, till it meets with the fouth line of Massachusetts; fouthern bounds, the ocean comprehending all the islands and banks in Narraganset-Bay, Fisher's-Island excepted. To hold of the king as the mannor of East-Greenwich, in free and common foccage, 'paying the sisth of all gold and filver ore found there.— Any clause in a late grant to the governor and company of Connecticut colony notwithstanding. Signed Howard.

Their first assembly met at Newport, March 1, 1663, and enacted, That on the first Wednesday of May annually by a majority of the votes of the freemen of the colony, shall be elected a recorder or secretary, a sheriff, * an attorney general, and one treasurer general.—All purchases of the Indians without consent of the assembly, to be void, and the purchasers finable. All inhabitants of tompetent estates christians (Roman Catholicks emepted) to be accounted freemen, and have power of choosing and of being chosen deputies and other officers.

This competency of eftate has been varied from time to time; anno 1746, the affembly enacted, that the qualification for a freeman fhould be freeholds of 400 l. currency in value, or that fhall rent for 20l. per ann. or the eldeft fon of fuch a freeholder; and to be propoled to their respective town meetings three months at least before their admission. As briberies in the elections of affembly men and general officers were become frequent and notorious, by the fame act no man is admitted to vote until he has taken oath or affirmation, that he will use his freedom for the good of the government without any other motive, and shall not receive nor expect any reward or promise of reward in elections. The fame affembly enacted, that no affistant (member

* At prefent the theriffs of the feveral counties are appointed by the general affembly.

af

G 2

of the council) or member of the house of representatives should be allowed any wages or pay for their fervice. Several other such wholfome and exemplary + laws have at times been enacted, when the government was in good hands.

From time to time there were fome English trading houses, with small purchases of lands from the Indians, in the Narraganset country. 1657, the island of Canonicut was purchased of the Indians, and 1678 incorporated by act of assembly, and named James-Town. Some gentlemen of Rhode-Island and other parts of New-England made a confiderable purchase of Petaquamsecut (from the Indians) which with the adjacent lands were incorporated a township by the name of Kingfton 1674: but fince divided into three townships, South-Kingston, North-Kingston, and Exeter.

Mifquamicut purchafed of the Indians, 1665, was conftituted a township 1669, by the name of Westerly; this is lately divided into three townships, Westerly, Charles-Town and Richmond; in Charles-Town is the Narraganset Indian referve (Ninigret is fachem,) of two miles from E. to W. and of about 6 miles from north to so the friends of the Indian guardians appointed by the affembly, upon long leafes and small rents.

Maniffes or Block Island, 1672, was constituted the township of New-Shoreham.

1677, the township of Greenwich was incorporated, and lately divided into the two townships of Greenwich, and West Greenwich. By this time all the colony or general lands were reduced to private property; see a fubfequent table, p. 89.

When the court of England, in a bad administration, were refolved to vacate charters of any nature, because reftraints or obstacles to a despotick power; a writ of Quo Warranto was issued out against the colony Oct. 6,

† Exemplary to the other colonies.

1685,

1685, and delivered June 2, 1686, by Edward Randolph, Efq; The freemen of the colohy by their ballots or written votes called proxies, by a majority gave in their opinion to the general affembly, in conformity to which, the general affembly, after the example of many corporations or charters in England, determined not to ftand fuit with his majefty, but by an humble addrefs to the king, pray for the continuance of their privileges and liberties according to charter : the king promified them protection and favour; they were put under the government of prefident Dudley, who was foon imperfeded by governor Andros. 1686-7, Jan. 15, Sir Edmond Andros's commifion as governor of New-England, was published in Rhode-Island, and all the colony formed into one county.

Diffusion the ORANGE REVOLUTION, by a general vote of the freemen in May 1689, it was concluded, that Sir Edmond Andros's authority; by his confinement in Bofton, was terminated or filenced, and therefore they reaffume their former government or charter; and as their charter never was vacated in a due courfe of law or judgment, the court of England allows them to continue in the pofferfion and use of it to this day.

Each township is managed by a town council, confifting of the affistants who refide in the town, the justices of the town, and fix men freeholders cholen annually by the freemen of the town; the major part of them is a quorum, with full power to manage the affairs and interest of the town to which they respectively belong, to grant licences to publick houses; and are a probate office for proving wills and granting administration, with appeal to governor and council as supreme ordinary.

On any urgent occasion the governor, or in his abfence, the deputy governor, may by warrant call a general affembly.— The direction of the militia is in the general affembly of the colony; but when the affembly does not fit, the governor and affiftants have the power of the militia. G_3 At

At the township meetings in March annually, the freemen of the town bring in their written votes called proxies, for a governor, a deputy governor, ten affistants, recorder, treasurer, and attorney general; these votes are sealed up and sent to Newport for next May general election; the governor has no negative in elections, has no negative in paffing of bills or refolves. only in the house or board of affistants in case of an equivote, he has the cafting vote. All other officers civil and military are appointed by a joint vote of the board of affiftants and house of representatives. The legislature of Rhode-Island colony stile themselves. The governor and company of the English colony of Rhode-Mand and Providence Plantations in New-England in America; the enacting stile is, Be it enacted by the general affembly of this colony, and by the authority of the fame it is enacted. The affembly adjourn themfelves for any time. The governor for the time being has the cuftody of the colony's charter, feal &c. and appoints the naval officer; the governor's falary is 3001. per ann. currency, and all his perquifites do not exceed 10001.+ There are yearly two affemblies or elections of representatives; they fit first Wednesday in May at Newport; the second assembly meets last Wednesday of October at Providence and South-Kingfton alternately. In all grand committees, and elections of officers, the board of affiftants and house of representatives fit and vote together.

In the last # election of general officers first Wednesday

of

At this writing 1750, the deputy governor has a falary of 30 l. currency or O. T. per ann. the treasurer 2001; affistants and reprefentatives have no wages.

|| Formerly the parties in elections and publick transactions were upon settary footings; but for some years past the opposite parties are, they who are against multiplying a fallacious fradulent paper currency, and they who encourage it for private iniquitous ends; majority of the present house of representatives are of the paper money fide, notwithstanding of a growing depreciation: from April 1, 1750, to Sept. of May 1750, were chosen William Greene governor, Robert Hazzard dep. governor; affistants, George Wanwn, Jonathan Nichols, John Potter, John Bowen, Benamin Tucker, Robert Lawton, James Arnold, William Richmond, Daniel Coggeshal, Jeffry Watson; Thomas Ward fecretary, Daniel Updike attorney general, and Thomas Richardson general treasurer.* When the charter first took place 1663, there were only 18 representatives, 6 from Newport, 4 from Providence, 4 from Portfmouth, and 4 from Warwick; at prefent, 1750, befides thefe, there are 2 from each constituted township incorporated from that time, and at prefent are 58 members. 9.42912 As ي الذر وتشطعه

Sept. 1, 1750, their paper currency from par fuffers a difcount with the Maffachusetts paper currency above 20 per cent, that is, a piece of 8 in Boston fells for 45s. O. T. in Rhode-Island it fells for 56s. O. T; by folling, I mean, it is merchandize, and will continue fuch until the paper money is generally annihilated, or by its fmall quantity arrive at a just par with filver : I shall mention a palpable instance of the good effects of paper currency being gradually annihilated (if the transition is too fudden, it may occasion a stagnation of business, confusion and uproars, which ought carefully to be avoided, as tending to fedition) by finking of our paper medium; within these last fix months (this is wrote September 1750) exchange with London is fallen from eleven and a half, for one sterling, to nine and a half, for one fterling good bills or well endorfed.

• The fallacious plantation paper money currencies are a most difagreeable topick, and fall too often in my way: here I cannot avoid observing, that the habitual practice of this paper money cheat, has had a bad influence not only upon profligate private perfons, but upon the administration of fome of our New-England governments : for inftance, one of the legiflature, a figner of the Rhode-Island colony bills, was not long fince CONVICTED of figning counterfeit Men are chosen into the legislature and executive parts of their bills. government, not for their knowledge, honour, and honefty, but as Ricklers for depreciating (for private ends) the currency, by multiplied emiffions: this year, 1750, the parties amongst the electors of affembly men were diffinguished by the names of paper money makers, and the contrary: the paper money makers have got a majority in the lower house, and propose a new emission of 200,0001 O. T. ; it is probable the house or board of affistants will not con- . cur; it is not for want of paper-currency, at prefent they have more than ever; Maffachusetts-Bay, where the bulk of their bills were lodged, have fent them back accompanied with the bills of New-Hampshire; their defign is by quantity to depreciate the value of Ġ4 their

As a table is the most concise and distinct form of representing several numeral articles relating to a colony; I shall here represent each township, their late numbers of proxies or freemen voters, their representatives in general assembly, their justices, their companies of militia, perlustration (1748) of whites, negroes, and Indians,

their bills; and lands mortgaged for publick bills will be redeemed in those minorated bills, at a very inconfiderable real value. In the neighbouring province of Massachietts-Bay the principal directors and figners of bubling or notorious cheat bills (in the act of parliament, 1741, it is termed a mischievous undertaking and publick nusance) were by votes concurred by gov. Sh — y, made councellors, figners of publick bills of credit, judges, justices, &c. this to an impartial reader must appear the greatest disregard of a minister (all governors are in a ministerial capacity) to acts of parliament. To prevent this nusance, in all acts of affemblies concerning paper money currencies, there may be a claufe, that any perfon convicted of making, figning, or uttering any false, fraudulent, or counterfeit bills, be rendered incapable of any place of profit or truft in faid province or colony.

In Maffachusetts Bay province December 1748, the act for drawing in their bills of credit, expresly declares, " that the bills of the neighbouring provinces have passed promiscuously with the bills of our province ; and the inhabitants of Massachusetts- Bay province will thereby be liable to greater evils than they have as yet fuffered, if the bills of the neighbouring governments continue current within the province; therefore, &c." particularly every perfon fo accounting (extra provincial bills reckoned up to a perfon or otherways evading in negociation) receiving, taking, or paying the fame, shall forfeit the fum of fifty pounds new tenor for every fuch offence. There has lately happened a publick controverfy in the Botton weekly news papers for Sept. 1750, concerning the word accounting : this ought to be explained by some subsequent act of assembly; as there is a discovery of a principal manager, negociating in Boston (in a manner as he thought evadable in the law) fome bills of New-Hampfhire : as he was a principal agent in reftraining the currency of bills of the neighbouring provinces, if interest had not prevailed against common prudence, he would have evaded the negociating of these bills in any manner though evadable in law.

N. B. To annihilate plantation paper currencies in a general fence, is very laudable; but to do it fuddenly or in the space of one year, when there is no other medium or currency, puts a soft trade and busines; this obstruction may divert our commerce into some other hannel: we have a notable instance of this in the province of Maffachusetts-Bay, 1750.

N. B. The numbers of whites, blacks, and Indians for the townships of New Shoreham or Block-Island, Smithfield, Warren, and Richmond, are only estimates, and not an actual census.

When the qualification of a freeman, as formerly, was low, the proxies or voters never exceeded 1300: at prefent the qualification is better or higher, and anno 1749, the proxies were only 888.

The valuation or cenfus anno 1730, was whites 15,302, blacks 1648, Indians 985, in all 17,935; the valuation anno 1748, was whites 28,439, blacks 3077, Indians 1257, in all 32,773; from these deduct Briftol, Tiverton, Little Compton, Warren, and Cumberland, a late 11

late addition taken from the jurifdiction of Mallachuletts-Bay, and added to Rhode-Island colony, of 4196 whites, 343 blacks, and 228 Indians, remain 24,243 whites, which is an increase of near 9,000 whites, upon 15,500 circiter, in 18 years; this is more than one third increased in the space of 18-years. The census of their blacks and Indians perhaps is not exact; that imail colony does not poffefs more negroes, than the much larger province of Maffachusetts-Bay; it is true, their late Guinea trade exchanging of negroes for horfes, flock, and provisions shipt off for the West-India islands, has added considerably to the number of their negroes. Here is an increase of 44 Indians, whereas they are observed every where to be upon the decrease from the intemperate use of British fpirits, and from their being fent to fea, and upon expeditions. The 51 militia foot companies are formed into 4 regiments, being one regiment foot in each of their four counties of Newport, Providence, King's-county, and Briftol; there are also one troop of harfe in the county of Newport, and a troop in the county of Providence.

Concerning the boundaries of the colony of Rhode-Island.

King Charles, anno 1630, made a grant to the earl of Warwick form Narraganfet-Bay, weftward along thore 40 league, and in length from fea to fea : he affigned this grant to William vifcount Say and Seal, * lord Brooks, lord Rich, and eight more affociates : the conditions of the grant were never compiled with by fettling, &c. and the grant is become void. A fubfequent grant to duke Hamilton, 1635, for the fame reafort is null.

• Seabrook at the mouth of Connecticut river is fo called from the name of vifcount Say and lord Brook. This humour of joint namesfor townships is still practified in the colony of Connecticut; thus a township granted lately to Hartford and Windsor jointly, is called Harwinton, from the initial fyllables of these two townships: In the beginning of our fettlements, the country not being well inveltigated, fundry fucceeding royal grants interfered with former grants. * King Charles II. having received complaints concerning the wrong defcription of places and grants, not to be determined at a diftance, but by commiffioners to be fent exprefly upon the fpot; accordingly 1664, four commiffioners, col. Nichols (afterwards governor of New-York) Sir Robert Ker, &rc. were fent over to fettle all the controverted boundaries of the provinces, and to be determined by the concurrence of any three of these commiffioners, or of two of them, whereof Nichols to be one. + Three of those commiffioners

* For instance, Plymouth old north line, from Conahaffet due weft to Patuket river, and Maffachusetts south line, from a miles fouth of the fouthermost part or head of Charles river, extended E. and W. overlap one another feveral miles; Attleborough Gore is plainly included in Plymouth grant, and also in the grant to Rhode-Some of the lands of Tiverton and Little Compton, feem ifland. to be in both these grants. In equity perhaps the prior grant should take place; but this was not observed in the late determination of Rhode-Island easterly bounds; the validity of the Plymouth grant as to jurifdiction being questioned. Rhode-Island colony pretended to the settlements of Tiverton, Little Compton, Dartmouth, Rochester, Sandwich, and Cape-Cod townships, because Plymouth grant is not faid to be bounded upon the ocean : but as this claim was not brought before a late court of commissioners appointed by patent from Great-Britain to fettle the eastern boundaries of Rhode-Island colony, it may be supposed dropt and silenced. Lately in Rhode-Island, they have imagined a claim of jurifdiction further north than their prefencline; taking in part of Wrentham, Bellingham, Mendon, Uxbridge, and Douglafs; they were encouraged to this by their late fuccess in the eastern claim; but when they complained home concerning the en-croachments of Massachusetts-Bay, upon their eastern borders, they made no complaint of northern encroachments ; which if any, might have been adjusted by the same commission without further charge : and when commiffioners were appointed, December 18, 1749, by the general affembly of Maffachuletts-Bay, to join with commissioners from the jurisdiction of Khode-Island, to run and renew the line agreed on and settled by both governments, Jan. 19, 1710-11; the Rhode-Island commissioners did not appear.

† The Rhode-Islanders construed it that nothing could be concluded without the concurrence of Nichols; and because Nichols happened not to

miffioners gave the Attleborough Gote to Plymouth colony, that is, Patucket alias Blackstone || river to be the dividing line between these two colonies; the king's pleasure concerning this determination was never signified; as it was not confirmed at home, it continued many years in dispute, and at length, determined by commissioners 1741, and confirmed by the king in council 1746, in favour of Rhode-Island; it is now called Cumberland township, in honour to his royal highness the duke of Cumberland, and is annexed to the county of Providence.

Rhode-Island easterly line dividing it from the present province of Massachusetts-Bay was lettled by commissioners* 1741. Maffachufetts government appealed home against every part of the judgment as grievous and injurious; but the judgment in whole was confirmed 1746. by the king in council. In autumn 1746, the government of Rhode-Island fent to the government of Maffachufetts-Bay, a copy of his majelty's order in council, affirming the judgment of the court of commissioners, for fettling the boundary line between the two governments, and by act of affembly appointed commissioners to run (Dec. 2, 1746) this late adjudged line with commiffioners from Maffachuletts-Bay; the affembly of Maffachufetts-Bay could not be informed of this appointed time until their next sitting, December 24; thus Rhode-Island contrived to run this line ex parte. For a minute description of this line, see vol. I. p. 399.

For Rhode-Island northerly line dividing this colony from the province of Massachusetts-Bay, see vol. I. p. 415.

to be one of the three that concurred in the determination of the Attleborough Gore, they alledged the determination was not perfect, whereas Nichols was plainly intended to have only a cafting vote when two were against two.

This river was to called by the name of Mr Blackstone, who removed from Maffachutetts-Bay and lived in this Gore, upon that river, many years.

• The fettling of this line coft each government about 4,000 l. O. T. The commissioners had from each government 6s. sterl. per dicm, with all charges in coming, at, and returning from the congress. Southerly Southerly the colony of Rhode-Island is bounded upon the fea or Atlantick ocean.

Its wefterly line dividing it from the colony of Connecticut was fettled by commissioners from both colonies September 27, 1728; was afcertained by a direct line extending welt from the rock at the uttermost point of Warwick neck, 20 miles, to a confiderable heap of stones in a cedar swamp, the S. W. corner of Warwick purchase. From this monument the line with Connecticut is determined by running first N. 7 d. E. by compais, 23 miles 10 rod to a large heap of ftones in a valley being between two marked pine trees in the fouth line of the province of Maffachufetts-Bay, and for the first 7 and a half miles were made monuments every half mile, and from thence northward to the Maffachufetts fouth line, were made monuments at the end of each mile: from the faid monument the S. W. corner of Warwick was made a foutherly running of 15 miles and 9 rod S. 11 d. 20 m. W. to the mouth of Aftrawage river where it falls into Pakatuke river; and from thence Pakatuke river is the boundary to the fea.

concerned adjacent]	in the British North ndians, and their enco	have been very little -America wars with the ouragers to rapine the aker principles of many

of the inhabitants, and as not being immediately exposed to the ravages of the French and their Indians. In the expedition against Port-Royal in Nova-Scotia, an. 1710, and in the abortive expedition against Canada, 1711, they

93

they had fome forces: towards the feint or intended expedition against Canada, in the summer 1746, they fitted out 300 land men with a warlike floop of 100 feamen; they were ordered for Nova-Scotia, but in their voyage suffered disafters, never proceeded, and after some time this expedition was countermanded. They have been noted for privateering against the French and Spaniards in time of war. They have built a good fort upon Goat-Island, an island in the harbour of Newport.

The numbers of their whites, flaves, and other lifts, may be seen in a foregoing table.

Concerning their courts of judicature.

. Formerly the colony of Rhode-Island made only one county: not long fince it was divided into 3 counties, Newport, Providence, and King's county; lately they have conftituted a fourth county called Briftol, comprehending the late addition from the province of Mafiachufetts; Cumberland is in the county of Providence. Newport county contains Rhode-Island (the townships of Newport, Portfmouth, and Middletown,) Block-Island (the township of New-Shoreham) Canonicut-Island (the township of James-Town) Prudence-Island, and Patience-Island, with the lately adjudged parts of Tiverton and Little-Compton. Providence county comprehends the townships of Providence, Smithfield, Scituate, Glocester, Warwick, Coventry, Greenwich, Weft-Greenwhich, and Cumberland. King's county includes South-Kingfton, North-Kingston, Exeter, Westerly, Charles Town, and Richmond.

The legislature, called the general court or general affembly, fits the first Wednesday in May annually at Newport, and at Providence and South-Kingston alternately the last Wednesday of October.

The form of their judicial oath or affirmation does not invoke the judgments of the omnifcient GOD, who fees fees in fecret, but only upon the peril of the penalty of perjury. +

IURIES. The town council of each township take a lift of all perfons liable by law, and whom they shall indere able and well qualified to ferve on juries, and lay the fame before a town meeting called for that purpole : and the names of all fuch perfons written on feparate pieces of paper, shall be put in a box to be delivered to the town clerk, to be by him kept under lock and key. When the precept or notification for returning of jurors is iffued, at a town meeting the box shall be unlocked, and the town clerk shall draw out fo many tickets, as there are jurors required, to be returned as jurors; fuch as in the judgment of the town meeting are unable to ferve at that time, their names shall be returned into the box and others drawn in their flead; the names of the perfons returned to ferve, shall be put in another box from time to time, until all the tickets be drawn as aforefaid; then they shall be returned into the first, to be drawn from time to time as aforefaid. The town council shall once a year lay before a town. meeting fuch other perfons as may from time to time become qualified, to be put in the box. If by reafon of challenge or otherways there are not a fufficient number of good and lawful men to make up the jury, the jury shall be filled up by the sheriff or his deputy de talibus circumftantibus.

JUSTICES OF THE PEACE. The general affembly in their May feffions, chufe for each town fo many juftices of the peace as they may find requisite, to be commissioned by the governor of the colony under the feat of the colony; their power extends all over the county. A justice may join perfons in marriage, take the ac-

+ This does not seem to be a facred or solemn oath, and may be illustrated by the story of two profligate thieves; one of them had folen something, and told his friend of it: well, fays his friend, but did any body see you? No: then says his friend, it is yours as much as if you had bought it with your money.

knowledgment

knowledgment of a deed or other inftrument, take depolitions out of court, the adverse party being notified. Two or more juffices may hear, try, and adjudge all manner of debts, trespasses, and other actions, not exceeding five pounds currency; titles of lands are excepted, and such other actions as are excepted by any particular law of the colony. Three or more justices of the peace may try all perfons suspected of thieving to the value of ten pounds currency. Appeals in civil cafes are allowed to the inferior court of common pleas, and in criminal cafes to the court of the general settions of the peace: the judgment of which court, on all appeals from the justices court, is final.

SESSIONS OF THE PEACE. In each county are held twice a year, a court of general feffions of the peace, five juffices of the county making a quorum, impowered to hear and determine all manner of matters and things relating to the confervation of the peace, the punifhment of offenders, and all pleas of the crown (capital crimes excepted) are therein cognizable. Any perfon aggrieved at the fentence of this court, may appeal to the next fuperior court of judicature, court of affize and general goal delivery.

INFERIOR COURTS OF COMMON PLEAS, are held twice a year in each county; three juffices of the faid court are a quorum: they have cognizance of all civil actions arifing or happening within the county, and tryable at common law, of what nature, kind, or quality foever: but no action not exceeding five pounds currency, is brought into any of these courts, unless where any man's freehold is concerned, or by way of appeal from any juffices court. Liberty of appeal from these inferior courts of common pleas, is allowed to the next superior court of judicature, &cc.

SUPERIOR COURT OF JUDICATURE, COURTS of allize and general goal delivery, are holden twice a year in each county; three judges are a quorum: they have cognizance of all pleas, real, perfonal, or mixt, as alfo pleas

Of RHODE-ISLAND.

pleas of the crown, and caufes criminal, and matters relating to the confervation of the peace, punifhment of offenders, and generally of all other matters, as fully and amply to all intents and purpofes whatfleever, as the court of common pleas, king's bench, or exchequer. in his majefty's kingdom of England have, or ought to have, and are impowered to give judgment therein, and to award execution thereon, and make fuch neceffary rules of practice, as the judges fhall from time to time fee needful; but no caufe, matter, or thing (writs of error, capital crimes, &c. excepted) are brought into this court by an original writ or procefs, but by appeals from the inferior courts of common pleas.

APPEALS TO HIS MAJESTY IN COUNCIL are allowed, where the matter or thing in controverfy is the value of three hundred pounds new tenor, unlefs from judgment obtain'd upon a bond, which has no other condition but for the payment of a fum or fums of money. They appeal to the king in council not only on perfonal, but alfo in real actions.

A COURT OF CHANCERY or delegates not long fince was erected; but on their iniquitous proceedings in difpenfing with all laws, no man's property was fafe; it was therefore diffeontinued.

THE ORDINARY FOR PROBATE OF WILLS, and granting administration, is in the respective town councils, with appeals to the court of governor and affistants.

THE COURT OF VICE ADMIRALTY confifts of the fame individual officers or perfons that officiate in Maffachufetts-Bay, or by deputations from them.

THE JUSTICIARY COURT OF ADMIRALTY is much of the fame nature with that of Maffachufetts-Bay, with an addition of the governor and fome of the council of the neighbouring province of Maffachufetts-Bay.

Their prefent taxes of all kinds are very inconfiderable; the intereft of their publick loans generally defrays all Vor. II. H charges

charges of government and other needfuls both of the colony and particular towns.

NAVIGATION. Newport of Rhode-Hand is their principal trading town at prefent; lies in 41 d. 35 m. N. lat. it is of eafy and fhort accefs, being near the ocean, but for that reafon not fo well fituated for home confumption. Providence is about 30 miles farther up Narraganfet-bay inland, therefore in a few years it must be their principal place of trade. For the fafety and conveniency of failing into the harbour of Newport, in fummer 1749 was erected a light-house in Beaver-tail at a publick colony charge.

LIGHT-HOUSE.

The diameter at the base is 24 feet, and at the top 13 feet. The height from the ground to the top of the cornice is 58 feet, round which is a gallery, and within that stands the lanthorn, which is about 11 feet high, and 8 feet diameter.

The ground the light-house stands on is about 12 feet above the furface of the sea at high water.

The following are the bearings (by the compais) of feveral remarkable places from the light-houfe, viz.

The entrances and clearances of veffels in the collection of Newport for the laft year of the late French and Spanifh war; and for the first year of the prefent peace.

From 25 March 1747, to 25 March 1748.

Ships Snows Brigs Sloops Schooners Entred in Total 56 2 3 20 27 4 Cleared out 4 33 71 118 From 25 March 1748, to 25 March 1749. Entred in 2 30 37 Total 75 2 4 Cleared out 8 83 11 49 9' 160 The veffels used here are generally brigantines and floops. Their trade in time of war confifts much in privateering; this laft war they had bad fuccefs; not much trade with Europe; much used to fmuggling of contraband and uncuftomed goods; they export for the West-India islands, horses, live stock of several kinds, butter, cheefe, lumber, and rum of their own diftilling: their trade feems to be upon the decline; they import or rather carry to Boston, sugar, molasses, and other West-India island produce, a few negroes from Guinea, and logwood from the bay of Honduras.

Ever fince 1710, their most beneficial business has been banking or negociating a base fraudulent paper money currency, which is to contrived, that amongst themselves it comes out at about 2 and half per cent. per ann. interest and lend it to the neighbouring colonies at 10 per cent. \ddagger a most barefaced cheat. The interest of these publick iniquitous frauds, one quarter goes to the several townships to defray their charges, the other three quarters are

† I shall only mention their emission 1744, of a publick paper money credit of 160,0001. O. T. upon pretext (as the preamble expresses it) of the present spanish war, and of an impending French war; but was shared amongst themselves by way of loan at 4 per ct. per ann. interest, for the first ten years, and after the expiration of those ten years, the principal to be paid off gradually in ten years more without any interest.

H 2

lodged

lodged in the treasury to defray the government charges of the colony.

PRODUCE. Rhode-Island colony in general is a country for pasture, not for grain; by extending along the shore of the ocean and a great bay, the air is fostened by a fea vapour which fertilizeth the foil; their winters are foster and shorter than up inland; it is noted for dairies, hence the best of cheefe made in any part of New-England, is called (abroad) Rhode-Island cheefe.

Anno 1687, when by act of affembly taxes were receivable in produce of certain fpecies, Indian corn was valued at 18 d. per bufhel, butter 4 d. per pound, fheeps wool at 8 d. per pound; currency at that time, pieces of eight at a denomination of 33 3 quarters worfe than fterling.

The most confiderable farms are in the Narraganset country. Their highest dairy of one farm, communibus annis, milks about 110 cows, cuts about 200 load of hay, makes about 13,000 wt. of cheese, besides butter; and fells off confiderably in calves and fatted bullocks. A farmer from 73 milch cows in five months made about 10,000 wt. of cheese; besides cheese in a season, one cow yields one firkin of butter, 70 to 80 wt. In good land they reckon after the rate of two acres for a milch cow.

In this colony there is no college or fchola illuftris; lately fome gentlemen, lovers and encouragers of the liberal arts and fciences, to promote literature in the colony, have in Newport, the metropolis of the colony of Rhode-Ifland, lately founded a library. That this may be of exemplary use to our other provinces and colonies, I fhall give fome account of it. 1747, Abraham Redwood, Efq; bestowed 500 l. sterl. in books, being volumes, 206 folio's, 128 quarto's, 712 octavo's, and 251 duodecimo's; feveral other perfons have bestowed fome valuable books; a gentleman of noted liberality has promifed an experimental philosophy apparatus, and to erect a fpiral monument with an observatory. Some gentlemen gentlemen incorporated by an ample colony charter have contributed, and upon ground, given by Mr. Henry Collins, merchant, erected a regular building for a library, at the charge of about 8,000 l. currency O. T.

The building for the library confifts of one large room where the books are kept, 36 feet long, 26 feet broad, and 19 feet high, with two fmall offices adjoin-The principal or west front is a pediment and ing. portico of 4 columns after the Dorick order; the whole entablature of which, runs quite round the building. The two offices are placed as wings, one on each fide the portico, aud connected with the body of the building, fo as to form two half-pediments proceeding from the lower part of the entablature. These two wings, befides the conveniencies they afford, have a very good effect in extending as well as adding variety to this front. The east front confists of a plain Dorick pediment sup-. ported by a ruftick arcade of three arches, in the receffes of which are placed three Venetian windows, after the lonic order. The outfide of the whole building is of ruftick work, and ftands on a bafe about 5 feet high from the ground, and the entrance is by a flight of fteps the whole width of the portico. Their charter conflitutes them a body politick, by the name of the company of the Redwood library, with power to chufe annually eight directors, a treasurer, fecretary, and librarian; to admit new members, make laws, &c.

It is to be wifhed that a tafte for learning and books with the better fort of people may prevail in all our colonies. In Philadelphia, fome years fince, a company of gentlemen, well-wifhers to letters, have conftituted a confiderable library; of this we shall give some account in the fection of Penfylvania. In Charles-town of South-Carolina, is lately formed a library company, April 21, 1750, they confifted of 128 members; their first general meeting was 2d wednesday of July 1750; they are to have four general quarterly meetings yearly, whereof one is the general annual meeting for election of officers, viz. prefident, vice-

vice-prefident, treasurer, fecretary, librarian, correfpondent, and fleward. The contributions of the members to be 15 s. currency per week: the books to be lent to any of the fociety, giving a receipt for the fame, to be returned within a limited time, a pamphlet indays, an octavo or duodecimo in-weeks, a quarto in-weeks, a folio in-months; of this we fhall give a further account in the fection of South-Carolina.

Rhode-Island government * pretend to an extent of jurifdiction further north than is at prefent fettled, (this we hinted at p. 91. of vol. II.) and takes off from the jurifdiction of Maffachufetts-Bay, confiderable parcels of the townships of Wrentham, Bellingham, Mendon, Uxbridge and Douglass. Commissioners were appointed by the general affemblies of the province and colony, as is usual, to run their divisional line last autumn 1749; respectively they did not meet, and the Rhode-Island commissioners run the line ex parte, Jonathan Randal,

| 8d sterl. which is about 34 s. sterl per annum.

Ĺ

* The provincial taxes and township rates having lately in the province of Maflachufetts-Bay, from the wrongheaded management of ------ been fo oppreflively great, that, 1. Upon a difpute be-tween the province of Massachusetts-Bay and colony of Connecticut, lately broached concerning fome townships of the province indented with the colony; the Massachusetts townships of Woodstock, Somers, Enfield, and Suffield, did in a voluntary manner withdraw from the jurifdiction of Massachusetts, and put themselves under the jurifdiction of Connecticut; and by force or menace prevent the civil officers of Maffachusetts from exercising any authority and gathering of taxes. 2. The Maffachufetts townships adjoining to the northerly line of Rhode-Island colony, allowed the Rhode-Island men (in an actual trespais) to run a line, without any opposition ; chusing rather to be under the jurifdiction of Rhode-Island, where the publick or colony taxes are very finall, and fometimes nothing, and no parish or minifierial rates, a very funting or difcouraging article in the poor new fettlement : these disputes cannot be composed, but by applying to the court of Great-Britain at a great charge. Here we may observe, that ill devifed exorbitant taxes occasion discontent amongst the people. with a charge, and confusion to the governments.

Thomas
Thomas Lapham, and Richard Steern, Efgs; + were appointed in August 1749 commissioners to run the line according to charter : the commissioners with Henry Harris, Efg; furveyor, and two chairmen, by themfelves run a line to their own mind, and made report last Tuesday of February 1749-50; that, 30th of October 1749, no commissioners from Massachusetts-Bay appearing, we proceeded : "We || could find no ftake or momument of Wood-" ward and Safferey, but from the place defcribed in our " commission, viz. we found a place where Charles river " formed a large crefcent foutherly, which place is known " by the name of Poppolatick pond, which we took to be " the fouthermost part of faid river; from thence we mea-" fured three miles on a plain in Wrentham, one quarter of "a mile N. cafterly from the dwelling-house of Thomas "Many and about a quarter of a mile S. eafterly from the "house of Robert Blake, where we marked a pine-tree " and erected a monument of ftones, and found the fame "to be in lat. 42 d. 8 m. north, which we deemed the "N.E. bounds of the colony. From faid pine-tree we "proceeded to run the northern boundary line in a weft "courfe of 8 and half d. variation, and in this courfe " marked many trees,' faid line passing over the fouther-" most part of Manchoag pond, * and did terminate " about thirty rods eaftward of a fmall pond called Graffy-"Pond at a black oak tree which we marked with a mo-" nument of flones about it, as the north western bounds " of the colony, being about twenty-two miles from fore-" faid pine-tree to faid black oak,"

+ In Rhode-Ifland government are fquires many, becaufe annually elective, and once a fquire always a fquire; not long fince, a facetious gentleman met upon the road a Rhode-Ifland justice of his acquaintance, bare legs and feet, driving a team in very foul weather, he faluted him in this manner: your fervant fquire — I am furprized to fee a gentleman of your noted frugality, to wear his bestkockings and shoes in fuch dirty weather.

| Perhaps, according to instructions they designedly did not find this proper monument.

* In the northern parts of Douglafs.

Some

Some time afterwards a new commission issued from each of the governments to perambulate the northern boundary of Rhode-Island colony, by the stake fet up by Nathaniel Woodward and Sølomon Safferey, pursuant to the agreement of the province and colony, Jan. 19, 1710-11.

There is a cafe concerning fome MINISTERIAL LANDS in this colony of confiderable value, claimed by the church of England, and by the prefbyterians or congregationalifts; this cafe has been depending almost 30 years in the colony courts of common law, called the courts below, and before the king in council, and hitherto not iffued : a particular account of the cafe may be agreeable to the devotees of both fides.

Anno 1657, the chief fachems of the Narraganfet country fold to John Parker, Samuel Wilbore, Thomas Mumford, Samuel Wilfon of Rhode-Ifland, and John Hull, goldfmith of Bofton, Petaquamfcut-Hill for fixteen pound; next year the fachem of Nienticut, fold for fifteen pound fome lands north of the faid purchafe, to the fame purchafers. The whole purchafe was about fifteen miles long, and fix or feven miles wide; afterwards they affociated Brenton and Arnold, jointly they were called the feven purchafers. Another company, called Atherton's company, 1659-60, purchafed lands of the Indians north of the faid Petaquamfcut purchafe; thefe two companies had feveral controverfies concerning their boundaries; anno 1679, they came to a final accommodation.

Anno 1668, the Petaquamícut purchafers by deed gave goo acres of their beft land, for an orthodox parfon to preach Gop's word to the inhabitants: from this proceeds the difpute, who is the orthodox minister? By the Rhode-Island charter all professions of christians feem to be deemed orthodox; by one of the first acts of their legislature, 1663, all men professing christianity, and of competent estates, and of eivil conversation, and obedient to the civil magistrate, though of diffesent judgment in religious affairs, Roman catholicks only only excepted, fhall be admitted freemen, and fhall have • liberty to chufe and be chofen officers in the colony, both civil and military.

The boundaries with the Atherton company being finally accommodated, the Petaquamícut purchaíers, 1693, made a final division amongst themselves, and amongst other company grants (120 acres to a mill, &c.) confirmed the grant of 1679, of 300 acres to an orthodox ministry, which were surveyed and lotted.

These ministerial lands not being claimed by any orthodox minister, anno 1702, Mr. Henry Gardiner enters upon 20 acres of it, and James Bundy upon the remaining 280 acres.

Most of the grantees seem to have been of the church of England, but many of them fell off to an enthusiastick sect in Warwick, called + Gortonians, now extinct; perhaps at that time there were no Presbyterians or congregational people in Rhode-Island, and at this time it is faid there are in South-Kingston more people of the church of England than of the presbyterians and congregationalists.

1702, Mr. Niles, not ordain'd in any manner, preached in faid diftrict for fome time, but never had possefilion from Bundy of the 280 acres; in 1710, he left Kingston, and settled at Braintree of Massachusetts-Bay.

1719, George Mumford bought of Bundy the posseful fon of faid 280 acres.

Several inhabitants of the Narraganfet country having

* They were not originally of to catholick and chriftian fpirit in Maffachufetts-Bay colony; the Maffachufetts first fettlers left England, becaute of an oppreffive telt act, notwithstanding (fuch is the nature of zealous, furious bigotry and enthusias in upon their first fettling, 1631, in Maffachufetts was made a telt act, that no perfon could be free of the colony, who was not in full communion with some of their churches in the independent congregational model. Here we see that priests and bigots of all religions are naturally the same; the peak ple of New-England are become good christian catholicks.

+ From Mr. Gorton their leader, this fectary is now loft or exting; it did not furvive Mr. Gorton, the father of the fect.

petitioned

106 A SUMMARY, HISTORICAL and Political, &c.

petitioned the bifhop of London, and the fociety for propagating the gofpel in foreign parts, for a miffionary; Mr. Mc. Sparren was appointed 1721, and Mr. Gardiner delivered his 20 acres which he had in poffeffion, to the church of England incumbent. Mr. Guy before Mc. Sparren's time had been appointed miffionary, but foon left it; Mr. Mc. Sparren upon a writ of ejectment 1723 againft Mumford for the 280 acres, grounded upon the confirmation 1679, and the laying out 1693, the original grant of 1668 being fecreted, was caft in two tryals; he appealed to the king in council, but the fociety for propagating the gofpel refu§ing to meddle in the affair, the matter refted, and Mumford kept possefilion.

The prefbyterian incumbent minister, Mr. Torrey, the first incumbent of ordination, brought an action versus Gardiner for the 26 acres, but was cast; and Mr. Mc. Sparren, the church of England incumbent, brought and recovered ejectment against Robert Hazard tenant to Mr. Torrey.

1732, Mr. Torrey brought an action of ejectment against Mumford; both inferior and superior court gave it for Mumford; but upon Torrey's appeal to the king in council, these verdicts were difallowed, and possession ordered to the incumbent Mr. Torrey, 1734—The members of St. Paul's church of England in Narraganset, April 7, 1735, addressed the society for propagating the gospel, &cc. for their assistance in advice and expence, but to no purpose.

1735, by advice from England, Mr. Torrey conveyed the faid 280 acres which he recovered of Mumford, to Peter Coggihal and five others in fee in truft for himfelf and his fucceffors in the prefbyterian ministry: the faid truftees leafed the fame to Hazard for a few years.

Of RHODE-ISLAND.

judge Auchmuty, brings a new writ of ejectment against Hazard the occupant or tenant of the faid 280 acres, was cast in the courts of Rhode-Island, but allowed an appeal to the king in council, which, for some reasons has not been entered, nor petitioned for a hearing.

For the information of the curious, of after-times, I thall here infert the VALUATION or quota of each townthip towards a publick colony rate of 5000 l, new tenor, Anno 1747.

The affair of currencies in general is left to the appendix; at prefent we shall only hint, that in the colony of Rhode-Island from the votes of their general affembly, it appears, that in February 1749-50, their publick bills of credit current were 525,3351. Os T. (whereof upon funds of taxes 135,3351.; the reft upon loannot to be finissed until 1764) which is sufficient to carry on the trade and business of the colony even at their present depreciated value; and the present design of emitting 200,0001. O. T. more upon loan, is not as a further medium of trade, but a knavish device of fraudulent debtors of the loan money, to pay off their loans at a very depreciated value; the threatnings of Connecticut government to prohibit the currency of Rhode-

107

Rhode-Island bills in cafe the Rhode-Islanders emit more, will be an advantage to the fraud; because Rhode-Island will then have such a drug of their own and New-Hampshire bills as to render them of little or no value, confequently a real debt or mortgage may be discharged by a little or no value.

In Attleborough Gore or Cumberland of this colony are great variety of iron-rock ores, but unprofitable; here we fhall give a flort account of the metallick ores and minerals hitherto difcovered in New-England; fee p. 540. vol. I.

Mr. Baden, an ingenious miner and effayer, not many years fince, was fent over to New-England from England by a company of gentlemen in queft of metallick ores and minerals; he found, 1. Iron ore, (both rock and fwamp or bog ore) in plenty but not profitable. 2. Lead ore near Merimack, and Souhegan rivers, but not plenty, and fo intermixed with rock and fpar, is not worth working. 3. Copper ore in Simfbury hills, in the colony of Connecticut, near Connecticut river; three different companies (Belcher and Cafwel, Mr. Bowdoin and company, Goff and company; this last was a bubble of Shodes) have wrought these mines with a considerable lofs, and for fome years have been neglected; Mr. Belcher erected a fmelting furnace in Bolton for his copper ore, but to no purpofe. 4. Silver ore in Dracut near Merimack river; a furnace was erected in Bolton for fmelting this ore, but the ore proved a cheat of col. V-m's, and all mifcarried.

In Attleborough Gore fome copper ore intermixed with iron ore, which is a detriment to the iron ore, and of no profit as to copper.

We have fome allum-flate or ftone, but no falt fprings, no pyrites of vitriol ftone, fuch as is found on both fides of the river Thames along the Kentifh and Effex fhores in England, no lapis calaminaris. We have plenty of feveral forts of earths, called boles or okers, okers, fuch as black lead in Brimfield of Maffachufetts-Bay near Connecticut river, rudle or red oker in many places, and fome fmall quantities of yellow oker, which is the only valuable oker.

Our only metallick ore at prefent under improvement is that of iron, and may be reduced under the following heads. 1. Furnaces for fmelting of rock ore into pigs in Attleborough, now Cumberland, annexed lately to the jurifdiction of Rhode-Island, were erected at a confiderable charge three furnaces; the country was well wooded for coal, but the ore proved not good or profitable, and is neglected; they were of fome fmall use in the late war in caffing of fmall cannon, bombs, and bullets. Here is a magnatick iron ore, which yields a red fhot iron, not good. 2. Smaller furnaces for fmelting of fwamp or bog ore into hollow or caft ware, pots, kettles, &c. which we can afford cheaper than from England or Holland. 3. Bloomeries, which from bog or fwamp ore without a furnace heat, only by a forge hearth, reduce it into a bloom or femiliquidated lump to be beat into bars; commonly three tuns of this ore yields one tun of bar iron, much inferior to the bar manufactured by the refiners of pig iron imported from the New-York, Jerfies, Penfylvania and Maryland furnaces.

Col. Dunbar, late furveyor general of the woods in America, anno 1731, reported to the board of trade and plantations, that in New-England were fix furnaces, meaning hollow ware furnaces, and nineteen forges, meaning bloomeries, for at that time we had no pig furnaces, no pig refineries.

In New-England, we have two flitting mills for nail rods, one in Milton eight miles from Bofton, and another in Middleborough about thirty miles from Bofton, which are more than we have occasion for. Our nailers can afford spikes and large nails cheaper than from England, but small nails not so cheap.

Religion.

RELIGION, or rather the various religions in the colony of Rhode-Ifland. The Rev. Mr. Cotton Mather in a folio hiftory of New-England, which he calls Magnalia, &c. writes, that anno 1695, (book VII. chap. 3. p. 20.) "Rkode-Ifland colony is a colluvies of antinomians, familifts, anabaptifts, antifabbaterians, arminians, focinians, quakers, ranters, and every thing but Roman catholicks, and true chriftians; bona terra, mala gens," he fhould have added fome brownifts, independents, and congregationalifts, but not formed into focieties or congregations.

In this colony are no township or parish rates for the fupport of ecclesiafticks of any denomination; only the church of England missionaries, ministers, and schoolmasters have falaries from England by the society for propagating the gospel in foreign parts; and the congregationalist minister in Westerly, as a missionary amongst the Narraganset Indians, has an exhibition from an incorporated society in Scotland, called a society for propagating christian knowledge.

In the addrefs of the feveral plantations, fince united by charter into one colony called Rhode-Ifland, to the fupreme authority in England 1659, they call themfelves a poor colony, "an out-caft people, formerly from our "mother nation in the bifhops days, and fince from "the new Englifh over zealous colonies."

The plantations of Rhode-Island were originally fettled by people privately whimfical in affairs of religion, antinomians, rigid brownifts, &c. their first embodied focieties of publick meeting were anabaptists (the true enthusiafts were only transients or vagrants) and to this day feem to have the majority in the colony. — In general they differ from the other two branches (prefbyterians and independents of the professions in England tolerated by licence) folely in their admitting only of adults to baptism, and that not by fprinkling, but dipping or immersion; private perfons among themselves differ in particular tenets, fuch as, it is unlawful to pray with with or for any practical unbelievers — That human learning is no way neceffary for a gofpel-preacher — differences as to grace and free-will, &c. —

Some have no particular place of meeting or worship: We shall give a more particular account of the sectaries amongst the anabaptists in the digressional article of British plantation sectaries in religious worship.

The quakers, perfecuted in Maffachusetts-Bay, first came to Rhode-Island 1656, and several of the most enthusiastick amongst the anabaptists joined with them; the congregational way did not take place until 1698; Mr. Honyman the first settled church of England missionary, fixed in Newport of Rhode-Island 1706, he was the fenior church of England missionary, and died lately.

The baptifts or anabaptifts of Providence, 1654, divided into two fects concerning the effential neceffity of laying on of hands (ordination) as a qualification in a perfon to adminifter baptifm: the laying on of hands at length generally obtained—There is a ftrict affociation of the ordination baptifts by itmerant yearly meetings all over New-England once a year.—1665, a baptift church or congregation was formed in the new plantation of Wefterly, and generally embraced the feventh day or faturday fabbath, and are at prefent a large fociety, called fabbaterian baptifts—1671, from the fabbaterian baptift church of Newport fome drew off, and formed a firft day fabbath church.

1720, in Newport was gathered a fociety in the congregational way; 1728, another church of congregationalifts proceeded from them; their first confiderable appearance, but without any place of publick worship, was 1698.—There is a congregational fociety in Providence, but do not thrive.—There is a congregational a meeting in South-Kingston, which we have mentioned at length in the account of the ministerial lands of Petaquamfcut.—There is a congregational church in Westerly, the minister has an annual exhibition from the Scots fociety

ł

fociety for propagating of chriftian knowledge amongst the Narraganfet Indians as his province; the fund was partly the donation of the Rev. Dr. Williams of London. —There is a congregationalist fociety in Shoreham called Block-Island.—And fome in townships lately taken from the province of Massachusetts-Bay, and annexed to the colony of Rhode-Island.

The church of England fociety for propagating the gofpel in foreign parts, in this colony have four miffionary minifters at Newport, S. Kingfton, Providence, and Briftol, and occafional worfhip at Warwick and Wefterly, two fchool mafters with falaries, and lately in Newport a catechift or fchool-mafter, a donation of their late collector of the cufloms, Mr. Keys.

Here is no prefbyterian congregation after the model of the church of Scotland, Holland, Geneva, and the French hugonots.

Many quaker meetings all over the colony.

Civil officers are choien indifferently out of every religious fociety; fome years fince Mr. Cranfton was continued governor many years as an impartial good man; he did not affociate with any fect, and did not attend any publick meeting; as the charter grants an univerfal liberty of confcience, he was a keep-at-home protestant.

A fmall congregation of jews, who worship at a private house, where a clerk or subordinate teacher regularly officiates at all constituted times.

A DIGRESSION concerning the various fectaries in religion, in the British settlements of North-America.

With regard to religion, mankind may be diftinguished into three general fects, 1. infidels, 2. scepticks, 3. the religious, properly so called, confisting of many peculiar modes or schemes of practical devotion.

The religious are divided into christans, &c. there we write concerning christians only.

The

The facred fcriptures, called our BIBLE, is the magna charta of all chriftian focieties; this book or bible is a most valuable collection of moral precepts, fometimes delivered in plain literal fentences, but generally by way of mystery, fable, allegory, allufion, and the like, as was the manner of the eastern fages and writers of those times. I am a catholick chriftian, no libertine, no enthuliast, no bigot; what I relate is purely historical; bishop Tillotson writes, " the zealots of all parties have " got a fcurvy trick of lying for the truth."

It is the general opinion of politicians, that a proper deference to a well regulated clergy is requifite in a commonwealth; notwithstanding, and not inconfistent with this due deference, I may be allowed to make the following remarks concerning the conversions or propagation of christian knowledge among our American Indians: I shall premife the observations of some good men who were knowing in this matter, before the missionary focieties did take place. *

Mr. Elliot minister of Roxbury near Boston, with much labour learnt the Natick dialect of the Indian languages. He published an Indian grammar, preached in Indian to

• At our first arrival among the American Indians, we found no places and times of religious worship, only some priests called Powowers, a kind of knavish cunning conjurers, like those in Lapland, who pretend to converse with familiar spirits.

After fome years communication with the neighbouring Indians, these Indians of themselves established fome good and natural regulations; fach as—If any man be idle a week, or at most a fortnight, he shall pay five shillings.—If an unmarried man shall lie with a young woman unmarried, he shall pay twenty shillings.—Every young man, not a servant, shall be compelled to set up a wigwam (a house or hutt) and plant for himself.—If any woman shall not have her hair tied up, but hang loose, or be cut as men's hair, the shall pay five shillings.—Whoever shall commit fornication, if a man, shall pay zo s. and if a woman, to s.—None to beat their wives, penalty zo s. The Powowers, who are the Indian physicians as well as priests; any person inclinable to the christian religion, when fick, and weak minded, are used as we christians of different fects of religion use one another, that is, damn them if they do not affent to the faith of the priest.

Vol. IL

feveral

feveral of their tribes, and translated 1664 our bible and feveral books of devotion into the faid Indian language; he relates feveral pertinent natural queries of the Indians relating to our religion. Whether JESUS CHRIST the mediator or interpreter, could understand prayers in the Indian language? How men could be the image of Gop, fince images were forbidden in the fecond commandment ? If the father be nought, and the child good, why should God in the second commandment be offended with the child ? with many other intricate queftions concerning our accounts of the creation and the flood, particularly, how the English came to differ fo much from the Indians in their knowledge of Gop and JESUS CHRIST, fince they had all at first but one father ? Mr. Elliot was fo much approved of, that in relation to the Indians, in the acts of the general affembly, the acts run thus, " By the advice of the faid magistrates and " of Mr. Elliot;" Mr. Elliot travelled into all parts of the Massachusetts and Plymouth colonies, even to far as Cape-Cod.

Mr. Mayhew, a noted English evangelist, + or itinerant missionary among the Indians, more especially with the Indians of Martha's-Vineyard, Nantucket, and Elizabeth islands; he learnt the Indian language, that he might be in a capacity of instructing the natives in the christian faith; his father had a kind of patent from home, as proprietor and governor of these islands.

All our miffionaries who have endeavoured the conversion of the Indians, have been guilty of a grand fundamental mistake, which if not amended, will for ever render their real conversion impracticable. The clergy missionaries began by inculcating the most * abstruie and

+ In his voyage to England 1557, the veffel foundered at lea, and he was loft.

* As it is generally agreed amongst christians, that revelations. and mysteries or miracles are ceased ; religion is become a rational affair, and ought to be taught in plain intelligible words. The basis of

OF RHODE-ISLAND.

and mysterious articles of the christian religion. Mr. Maynew in his journal, writes, " That the Indians declared " the

of all religions and mysteries, is, the belief of the existence of a fupreme incomprehensible BEING, director of the universe; this we can investigate no other ways but by reason: the TRINITY ought to be introduced by fome rational obvious analogies, fuch as: We offer our praifes and prayers to the fupreme being, called GOD THE FATHER; invited and encouraged thereto, from the confideration of the divine elemency and benevolence, that is, by the mediation of GOD THE Son ; with the affiftance of the Devine SPIRIT, GOD THE HOLY GHOST ; all three being the attributes of, or perfonated by one and the fame God, and which we express by three perfons in the godhead : when the heathens come to understand these expressions, they may be impressed upon them in our usual mystical terms ; but all ab-Brule fanatical formulas and creeds, fuch as is the Athanafian creed, ought never to be offered to them.

The catechifms whereby we initiate our children and the Indian heathen into the christian religion perhaps require cassigation. That of the church of England in its first questions seems very low and filly, adapted to a nurse and her child, and may give the Indians a mean opinion of our religion doctors.

Queftion. What is your name?

Anfwer. A. B.

14 N

Queftion. Who gave you this name?

Answer My godfathers and godmothers. That of the Westminiter allembly of divines, immediately enters into the most abstruse articles of our religion.

How many perfons are there in the godhead ? What are the decrees of God ?

Who is the redeemer of God's elect ?

What is effectual calling ?

Good works ought inceffantly to be preached to the Indians. Free will and predefination ought not rathly to be touched upon, according to our notions of the prescience and omniscience of GoD, and of the free agency of mankind which renders them accountable for their actions, they are so much in contrast, that to reconcile them is one of the greatest mysteries of the christian or any other religion.

Their instruction ought to be brief, and not verbose, not to meddle with the manifold small differences and controversies among our fectaries, because, as the conceptions, humours, and interest of feveral people are various, a general comprehension is impracticable in nature. Only teach them that all religions are good which are confistent with fociety; that is, all religions are good, that teach men to be good. Our attachment to peculiar ways of worship, is not 1 1 from

⁴⁵ the difficulties of the chriftian religion were fuch as the ⁴⁶ Indians could not endure; their fathers had made fome ⁴⁷ trial of it, but found it too hard for them, and therefore ⁴⁷ quitted it." The fundamental catholick articles of our religion are fhort, fimple, and eafily underftood by the meaneft capacity. 1. To adore one fupreme being, in his agency of creating and governing the univerfe. 2. To honour our natural parents, and all perfons in political authority (parents of the country) over us. 3. To love our neighbours as ourfelves. 4. To be merciful, even to brute beafts. Whatever is inconfiftent with any of thefe, is irreligion. "What doth the Lord require of "thee, but to do juftly, and to love mercy, and to walk "humbly with thy God." The few credenda, or articles of

from any light within us; but is inculcated in our tender flexible years, by our parents, nurfes, preceptors, priefts, and laws of our country. Orthodoxy in religion is ambulatory; upon a revolution, the party that prevails is the orthodox.

All bigots or uncharitable idle fectaries are diffurbers of fociety, (fuch are the Roman catholicks, the high-fliers of the church of England, the covenanters or cameronians of the kirk of Scotland, &c.) and their ringleaders fall under the infpection of civil authority, and may without any imputation of perfecution upon account of religion, by way of a falutary civil remedy, be fent to a mad-houfe or workhoufe, to bring them to a right mind.

Some proper degree of learning or literature, administred to the Indians, is requisite, not only to civilize them, bring them to our language and manners, but to render them less subject to credulity and frantickness in their devotions. The Roman catholick tenet of ignorance being the mother of devotion, is meant only of a superstitious devotion, not of a proper decent mode of worship. I do not join avowedly with the free-thinkers, who from the maxim of frustra fit per plura fay, that the intricate method of our redemption from damnation and hellish everlasting penances, by the omnipotent God, might in a peremptory manner been done by a fiat.

Mysteries, are properly deviations from the ordinary laws of nature or providence: mysteries in most schemes of religion are unneceffary, and too much multiplied; the standing maxim ought to be, nec Deus intersit, nist dignus vindice nodus. Human laws and fanctions cannot extend to numberles, human vices and wickednesses; therefore divine rewards and punilhments of a God who knows in fecret ought to be inculcated.

faith

faith in any fcheme of practical religion; the lefs intricate, more comprehensive, and confequently not subject to split into sectaries: all enthusiastical or juggling schemes of devotion are a nusance; the Wh-----ld (an insignificant person, but a happy dramatick actor of enthusiasm) newlights, pretend to know one another at first sight as much as if they were of the order of free-masons.

In former times, before hired miffionaries from incorporate focieties took place, the voluntier provincial miffionaries, viz. Mr. Elliot, Mr. Mayhew, &c. of New-England, who believed what they taught, were of exemplary good life, and spared no fatigue, were of great fervice in civilizing our intermixed Indians, though their faith was not ftrong enough to carry them out among the tribes of our adjacent wilderness Indians. We have fcarce any account to give of the late miffionaries from the three feveral focieties now fubfifting for propagating of christian knowledge amongst the wild Indians, or men of the woods, as the French call them. The Albany church of England miffionary, fometimes vifits the adjacent tribe of Mohawk Indians of the Iroquois nation. The congregationalist missionaries from the New-England fociety in London upon the New-England frontiers at Gorges, Richmond and Fort-Dummer, act only as chaplains to these small garrisons of ten or a dozen men each. Mr. * Brainerd, a late missionary upon the frontiers of the

The rev. Mr. Brainerd, a miffionary from the Scot's fociety to the Indians upon the rivers of Delaware and Sefquahanna, was a true and zealous miffionary, giving allowances for his weak enthufiaftick turn of mind. In his printed book, Philadelphia 1745, concerning the Indian conversions, "at a diffance with my bible in my hand, I was refolved if poffible, to spoil their spirit of Powewing, and prevent their receiving an answer from the infernal world." In the year 1744, he rode about 4000 miles to and fro among the Indians, sometimes five or fix weeks together, without feeing a white man; he had three houses of refidence at distances in the Indian countries. Is there any missionary from any of the focieties for propagating the gospel in foreign parts, that has reported the like?

καί δοφωτικής του στη Παγοβ

the Jerfies and Penfylvania upon the exhibition of the Scots fociety for propagating chriftian knowledge, feems to have been the only minister who faithfully performed the fervice of an Indian miffionary.

In all royal charters, and proprietary grants of colonies in British North-America, one of the principal defigns is faid, to be the conversion of the Indians by good instruction and an exemplary good life : the millionaries from the fociety do not in the least attempt the conversion of the Indians, becaufe it requires travel, labour, and hardfhips: and the British people in general, instead of christian virtues, teach them European vices; for inftance, by introducing the use of intoxicating liquors, for private profit, they difpense more strong liquor than gospel to the Indians; and thus have deftroy'd, and continue to deftroy perhaps more Indians, than formerly the Spaniards did, by their inhumane and execrable cruelties, under the name of conversions; the Spaniards destroyed only their bodies, we deftroy body and mind. Mr. Mayhew in his journals writes, that the Indians told him, that, "they could not observe the benefit of christianity, because the English christians cheated them of their lands, &c. and the use of books made them more cunning in cheating." In his Indian itineraries, he "defired of Ninicroft, fachem of the Narraganset Indians, leave to preach to his people; Ninicroft bid him go and make the English good first, and

Enthusiafm in the Roman Catholick missionaries is encouraged by their church and states; it prompts them (fome as merit, fome, as penance) to endure all manner of hardships towards promoting, not only their religion, but also their trade and national interest with the Indians. Religious superstitions, by falling in with the weak and enthusiastick natural propensities of mankind, are very powerful; but in time ought to be rectified, as reason gets the better of these human infirmities. As strong reasoning is not accommodated to the bulk of mankind, credulity or revelation is a more easy possible of the mind; without revelation a man is quite at a loss, from whence he came, for what purpose he exists, and where he is to go when he ceases to live: there is a strong propensity in human nature to religion; fome abandoned politicians make a wrong use of this, to promote their wicked designs, ambitions, and interests.

chid

chid Mr. Mayhew + for hindering him from his bufinefs and labour;" in another place Mr. Mayhew writes, " the Mohog Indians told him, that they did believe in God, and worship him, but as feveral nations had their distinct ways of worfhip, they had theirs, which they thought a good way." The Indians were entirely wanting in any fet form of religious devotional worship.

Seeing the religion millionaries neglect the conversion of the Indians, and take no further care than with relation to their falaries or livings, and of being stationed in the most opulent towns, which have no more communication with the favage Indians, than the city || of London has; the respective governments upon the continent of America ought to contrive fome method of civilizing the Indians, which will be attended with many confiderable advantages. 1. Our own tranquility. 2. Our Indian skin and fur trade. 3. By rendering them ferviceable to us in our agriculture and navigation; thus a too great importation of foreigners may be avoided. In Penfylvania has been a vast importation of Palatines, Saltsburghers, and other foreigners. By a late letter from a gentleman of Philadelphia, a man of veracity, penetration, and authority in the province of Penfylvania, I am informed; (this I publish with relation to those gentlemen, who feem inadvertently to infift upon the introducing of floods of foreigners among us :)

+ This faying of Ninicroft's was very applicable to Mr. Wh-1d, a late vagrant dramatick enthusiast in North-America; H-ly of the oratory, fo called in London, an ecclefiaftical mountebank; and fuch like impostors, ought to be animadverted upon ; they are a fcandal and reproach to the christian religion.

As to the conversion of Indians they make it a fine-cure, or only a name or free gift, and may be enjoyed any where to the fame advantage. As an historian upon the place of observation, I could not avoid (without fulpicion of partiality) representing these misapplica-tions in a true and proper light, being a publick affair; I do not meddle with the perional character of any missionary; if the bishop's commiffary has any authority, it is his office and care; I avoid being officious. I 4

" That

" " That the Germans in all probability, allowing for progress of time, will be possessed of the chiefest and most valuable of our lands; by their industry and penurious way of living, get rich where others starve: the Irifh were fettled this fide of Selquahanna river many years before the Dutch (meaning the high Dutch or Germans) came among us, and wherever they had a good plantation, the Dutch bought it from them; at prefent the Irifh families are but here and there on this lide of faid river; they move to the weftward of the river; the Dutch follow them, and by offering high prices for their lands, the Irifh quit, and go further ; the Dutch by their fuperior industry and frugality may out the British people from the province." This province by importation of foreigners does at prefent, in fencible Men, very near equal all the English or British militia, in the English or British conti-nent of America; in case of a French or Dutch war, these Dutch or German foreigners by herding or fettling together, retaining and propagating the language and differences in religious worthip; upon a discontent or disaffection (better we never had one foreign family fettled among us) may become not only a ufelefs, but a pernicious body.

The miffionaries from the fociety in London for propagating the gofpel, &c. call all diffenters, the feparation: Mr. Hobart, † a late noted congregational writer, fays, this fociety and their miffionaries are epifcopal feparatifts; both fides are notorioufly in the error. William George, D. D. dean of Lincoln, in his late fermon before the fociety for propagating the gofpel, &c. fays, " Cir-" cumftances in worfhip, in their nature variable, are " left to be determined by the diferention of those, whose " bufinefs it is to see that all things be done decently and " in order."

There

+ Mr. Hobart (perhaps from party-prejudice) a gentleman of learning and application, has fallen into a very großs mittake, viz. That the church of England is a feparation in New-England. Before

the

Of RHODE-ISLAND.

There are in Great-Britain three incorporated pious focieties * for propagating christian knowledge. I shall here give some account of them, with relation to the British North-America settlements.

2011. Anno 1659, the parliament of England encouraged the propagation of the gofpel among the Indians in New-England and parts adjacent; and enacted a corporation, conditing of a prefident, treasurer, and 14 affiftants, called, The prefident and fociety for propagating the gofpel in New-England and parts adjacent; that the commissioners for the united colonies of New-England for the time being, shall have power to dispose of faid monies of the corporation. By a collection in virtue of an act of parliament, in all the parishes of England, was collected a confiderable sum, which purchased a confiderable land estate. Upon the restoration, their charter was deemed void, and col. Beddingsield, a Roman catholick military officer, who had fold lands to this society,

the union of the two kingdoms of Great-Britain 1707, the ecclefiaftical conflitution of the English American plantations, was (Roman catholicks excepted) a general toleration of all christian professions without any preference. In the treaty for this union, it was naturally agreed by the commissioners, and afterwards confirmed in perpetuity, by acts of both parliaments; viz. that the church of England was to be deemed the established church, with the established toleration, in all the formerly English colonies, by this expression, " and territories thereto (to England) belonging." I cannot acconnt for the reverend Mr. Hobart's lapfe into that fophiftical school-boy evalion, that the territories thereto belonging, is meant of the Jerley. illands only, but not of the plantations; the act of uniformity, 1558, * Etiz. is out of the queition, because at that time we had no plansations, therefore I shall not adduce it. In the strict act of uniformity 14 Carol. II; there is no addition of territories thereto belonging. (the Jerfey islands at that time belonged to England) all the charter and proprietary grants had a clause of a general liberty of confcience (Roman catholicks excepted) in their colonies, to encourage fettlers of all fectaries; becaufe an exclusive uniformity occafions much distraction and confusion among the good christians of feveral denominations, and might have been an obstruction to the fettlements.

of See vol. I. p. 231.

was advifed to feize them as being an illegal purchafe, and under value. The members of the fociety follicited K. Charles II. for a new charter, which they obtained, dated February 7, 14 Carol. II; ordaining that for ever hereafter within the kingdom of England, there shall be a fociety or company, for propagation of the gospel in New-England and the parts adjacent in America: the first nominated members were of the higheft rank and stations at court; their fucceffors to be chosen by the fociety, but never to exceed the number of 45. In chancery they recovered Mr. Beddingfield's land. Robert Boyle, Efq; was appointed the first governor; upon his decease, Robert Thompson was elected; and upon his death Sir William Ashurst of London, alderman. The prefent governor is Sir Samuel Clark, baronet, who fucceeds his father Sir Robert Clark, baronet. The whole revenue of the corporation is 5001. to 6001. flerl. per ann. at prefent they exhibit small but well placed falaries to feveral miffionaries English and Indians; and appoint commissioners in New-England to manage this charity. There was a benefaction of the good and honourable Robert Boyle, Efq; of 901. fterl. per ann. to this cor-poration; snother of Dr. Daniel Williams, a differing minister of London; he left to the corporation the reversion of a real estate upwards of 1001. sterl. per ann. which fell to them 1746; the claufe of his will concerning it is :

" I give to Mr. Joseph Thompson and the reft of the boot of the the the text of te

* the English plantations in the West-Indies, and for the "good of what pagans and blacks lie neglected there. "And the remainder to be paid yearly to the college of "Cambridge in New-England, or fuch as are ufually " employed to manage the bleffed work of converting the " poor Indians there; to promote which, I defign this " part of my gift. But if my truftees be hindered from " nominating the faid itinerants, under pretence of any " flatute in New-England, or elfewhere, I give the faid " 60 l. per ann. to the faid college in New-England, to en-" courage and make them capable to get constantly fome " learned professor out of Europe to refide there, and shall " be of their own nomination, in concurrence with the mi-" nifter of the town of Bofton, in the faid New-England. "" And if the aforefaid fociety or corporation shall "happen to be diffolved, or be deprived of their prefent "privilege; my will is, and I hereby give the faid man-

"nor, with all the profits and advantages, to the faid "town of Bofton, with the minifters thereof, to benefit "the faid college, as above, and to promote the conver-"fion of the poor Indians."

11. The ftate of the fociety in Scotland for propagating chriftian knowledge. This fociety began 1700; by queen Anne's letters patent 1709 they were incorporated : by donations at prefent, 1750, they are enabled to maintain 136 fchools, in which are educated above 7000 children of both fexes; and from its first erection to this time, it has been the means of instructing about 50,000 children of both fexes. This fociety by a new patent, 1738, are allowed to inftruct their children in hufbandry and handicrafts.-By their first patent they were allowed to extend their care to places abroad, particularly to the Indians on the borders of New-York, New-Jerfies, and Penfylvania; the New-England fociety were fuppofed to have the miffionary charge of New-England. They have contributed to a college lately crected in the New-Jerfies.

III. June

III. June 16, 1701, king William incorporated a, fociety with perpetual fucceffion, by the name of the fociety for propagating the gofpel in foreign parts, to be accountable annually to the lord high chancellor, lord chief juffice of the king's bench, and lord chief juffice of the common pleas. Every year fome new members are admitted, to affift the fociety with their good counfels and fubfcriptions; the prefent members are about 230.

The missions with the respective falaries at this time, are

Salaries to miffionaries, catechifts, fchool-mafters, and officers of the fociety, are an annual expence of about 3540 l. fterl. part of the fund for this, is yearly, by benefactions, legacies, and entrances (at five guineas each) of new members 1600 l.

Yearly payments of fubfcribers

600

Rents of lands, and dividends in the ftocks 317

Ten pounds fterling in books are allowed to each miffionary as a library; and five pounds in devotional books and tracts to be diffributed, fuch as bibles, commonprayers, whole duty of man, &c.

This fociety have the direction of two other feparate charitable funds. 1. The negroe fund, which at prefent may amount to 3000 l. fterl. principal in old S. S. annuities; their yearly donations are very inconfiderable.

fiderable. There are two miffionaries as catechifts of negroes, one at New-York 50 l. fterl. per ann. another at Philadelphia at 50 l. fterl. per ann. 2. The Barbadoes eftate, which is appropriated to particular ufes mentioned in general Codrington's will; fuch as, a catechift to the negroes in the fociety's plantations in Barbadoes, 70 l. fterl. Sundries for a college in Barbadoes, called Codrington's college, a fchool-mafter, an ufher, a profeffor of philofophy and mathematicks, &cc.

Towards the new fettlement of Nova-Scotia, the fociety refolve to fend over fix millionaries and fix fchoolmafters, to prevent the new fettlers being perverted to popery, by the prefent French popifh fettlers. Our new fettlers have not the least communication with the French fettlers; and perhaps in the town of Halifax and garrifon, there are no profeffed papifts to be found; a parochial minister, with the chaplains belonging to the troops, and the congregational minister from New-England for the use of the New-England emigrants, may be fufficient.

The fociety for propagating the golpel in foreign parts is a very good, pious, and most laudable defign; but the execution thereof in British North-America is much faulted. +

1. Aný

+ Itis a profane faying of fome; " he who meddles with the clergy, puts his hand into a neft of wafps or hornets:" but as this fociety in their yearly abstracts, request that people in America, who upon the fpot have opportunities of observing what relates to the execution of this pious christian exhibition, may represent: as it falls in the course of this American history, without being reckoned officious or prefuming. I may be allowed to make these remarks. — In short, the civilizing and christianizing of the heathens, which with us are the Aboriginal American Indians, and the imported negroe flaves, feems naturally to be the principal care of missionaries; the quakers observe, that good falaries called livings, in a fort of fine-cure, is the principal concern of the missionaries; itimerancies and conversions of the -heathen is too laborious, and does not answer their intention.

I. Any indifferent man could not avoid imagining, that by propagating the gospel in foreign parts, was meant, the conversion of natives of such parts as the royal charters and proprietary grants of our plantations, enjoin the civilizing and conversion of the Indians by doctrine and example. It is aftonishing to hear fome of these millionaries and their friends, indifcreetly affirm, that this was no part of the defign, because not expressed in strong terms in their charter. King William, the granter of the charter, cannot be imagined to have meant, that the expulsion or elbowing out fober orthodox diffenters was the principal intention thereof, though at present, their chief practice ; there is not one missionary (the Albany and Mohawk miffionary excepted) that takes the leaft notice of the Indians; the fociety, fenfible of this neglect, in their lateft miffion, that of Mr. Price for Hopkinton about 30 miles inland from Boston, he is particularly inftructed, to endeavour the propagation of the christian religion among the neighbouring Indians.

The practice of the prefent miffionaries, is to obtain a miffion to our most civilized and richest towns where are no Indians, no want of an orthodox christian ministry,

Dr. Lisle, bishop of St. Asaph, in his fermon February 19, 1747-8, before the fociety, speaking of Romish Portugal missionaries in Asia, from a fociety called de propaganda fide, fays, "They fettle them-"felves in nations which are christians already, and under pretence "of converting the infidels, which are among them; their chief "business feems to be, the perverting of christians themfelves from "their ancient faith, and to draw them over." N. B. No prefbyterian or congregationalist could have wrote in ftronget terms, with regard to our prefent missionaries.—As to the conversion of the Indians not being their care; we find it not fo understood in the excellent formons preached before the fociety from time to time; in many of their anniversary fermons, the preacher fays, that the direct aim of the fociety, is the propagation of christianity abroad, among the barbarous nations of America.—In such parts of the world, as have not yet been enlightened by the gospel, or are in danger of having this light extinguished.

In the charter from the parliament of England 1659, the first prefident of the corporation was judge Steel, and the first treasurer was Mr. Henry Ashurst, which should have been mentioned before.

and

and no Roman catholicks, the three principal intentions of their miffion : they feem abfurdly to value themfelves upon the diversion (I do not fay perversion) of the prefbyterians and congregationalists. All men have a laudable veneration for the religion of their ancestors, and the prejudices of education are hardly to be overcome; why then should a person who peaceably follows the orthodox allowed or tolerated way of his forefathers, be over-perfuaded to relinquish it, confidering that by an interceding wavering, the man may be overfet and fink into infidelity? They feem to value themfelves more upon this, than upon the conversion of a heathen to our civil national interest, and to christianity, or the reformation of a Roman catholick, as is much wanted in Maryland; or preferving the British extract from running into infidelity, as in North-Carolina.

2. In their charter it is faid, that in feveral of the colonies and factories beyond the feas, the provision is very mean in fome, and in many others none at all for the maintenance of orthodox ministers; therefore the fociety is established for the management of such charities as shall be received for this use. So it is, their missionaries are not stationed in such poor out towns, but in the most opulent, best civilized and christian towns of the provinces; that is, in all the metropolis towns of the colonies, and other rich and flourishing towns, well able to support, and in fact do support orthodox ministers.

In all our colonies (Rhode Island excepted) there is a parochial provision for an orthodox gospel ministry: Dr. Bray, a very zealous promoter of this society, writes, that in the colonies of Massachusetts and Connecticut, there was no need at all of missionaries.

In the latter years of queen Anne's administration, perhaps, the defign of this charity was perverted from the original defign of converting the heathens, preferving of religion among our out plantations, not able to maintain a gofpel ministry, and preventing a popish influence :

I

it

it was converted to a defign of withdrawing the tolerated fober religious differters to a conformity with the (then) high church; * a manuduction to popery, and the introduction of a popifh pretender to the crown: but as by the happy fucceffion of the prefent proteftant family, all hopes of this kind are vanifhed; it is in vain and will aniwer no end, for any party of men to foment divisions among good chriftians. I have a very great regard for all good ministers of the chriftian gospel, and have no private or particular refentment against any missionary; but as an impartial historian, I could not avoid relating matters of fact for the information of perfons concerned, who by reason of distance and other business, cannot be otherways informed.

In the charter, the propagation of the church of England is not mentioned; the expressions are general. "An orthodox clergy,—Propagation of the christian "religion or gospel in foreign parts." Therefore the missionaries ought to be men of moderation, that is, of general charity and benevolence, considering also that many differents have contributed to this charity, and are worthy members of the society. Fiery zealots || are a detriment to the design of the society.

hdia 16. 5

By

Whigs and tories or high-church originally were only diversities of fentiments concerning the hierarchy or government of the church : afterwards by defigning men, they were used to influence political affairs; the popilh and jacobitly inclined ranged themselves with the tories or high-church, the true protestant fober moderate revolutioners, jealous of a French influence, were called whigs

† Because at that time all orthodox protestant ways of worship, were equally tolerated. In their abstract published Feb. 1749-50, \$ 43, concerning Connecticut, (it is the fame in all the charter and proprietary grants of colonies) it is faid, "That by charter there is a general toleration of christians of all denominations, except papists, without an establiment of any one fort."

Zealots of all denominations, as it is observed, if among the common people, are of the meaneft knowledge, that is, they are the weakeft of men, and the weaker fex or women in general; if among politicians, they are of the deepest wicked defigns. I cannot avoid inflancing the administration in the last years of queep Anne's reign, vVor: II. K they

Digitized by Google

By grofs impofitions upon the worthy and laudable fociety, their charity and chriftian benevolence is egregioufly perverted. I fhall mention a few inftances. I. In the large and not well civilized province of North-Carolina, that country being poor and unhealthful, miffionaries were not fond of being fent thither, though for many years they had no gofpel minister of any denomination amongst them, and did degenerate apace towards heathenism \parallel ; when at the fame time the well civilized and chriftianized colonies of New-England were crouded with missionaries. Lately two missionaries (no

they passed an act for building fifty additional churches in London. In all countries where liberty of confcience is amicably tolerated (that is without an idle curfing and damning, from their pulpits, all tolerated diffenters,) the established church will filently and gradually swallow up all sectaries, the young people or rising generation will chuse to be in the fashionable or established way; their elders, ambitious of posts and honours, will conform ; this is a natural conversion to the church established. Many missionaries settled among sober orthodox diffenters, by their immoderate indifcreet zeal for their own way, instead of smoothing by brotherly love, by a diabolical rancour effrange them from the effablished church : I gave one instance of this, vol. I. p. 228, concerning a miffionary advancing the in-• validity of all baptifms administred by perfons not epifcopally ordained. I shall here adduce another instance, from a mislionary some years fince, occasionally preaching in the king's chapel of Boston, said, that he would rather chufe to err with the church as it was 200 years ago (times of high popery) than &c; in a subsequent fermon by the ingenious and worthy Mr. Harris, king's chaplain, he was chaftiz'd.

|| Not many years fince, fome loofe clergymen of the neighbouring province of Virginia, at times, in a frolick, made a tour in North-Carolina, and christened people of all ages at ---- per head, and made a profitable trip of it, as they expressed.

'Mr. Hall, lately appointed miffionary for the north diffrict, writes, that anno 1749, he baptized 1282 perfors. Mr. Moir of the fouth diffrict, cannot give an exact account of all the perfons he hath baptized in his journies, for want of a perfon to count them (fee abftract for 1749, p. 48.) who have, he thinks, fometimes amounted to more than 100 perfons in one day. I hefe two miffionaries were with fome difficulty obtained by the follicitation of the prefent governor of North-Carolina; he wrote, "That they had no minifters or teachers of any denomination, and without fome due care be taken, the very footfteps of religion will in a fhort time be wore out there."

٠.

more)

more) have been fent to North-Carolina; one to itinerate fouth fide of Neufe river, the other north fide of that river. 2. One claufe in their charter is, " for the in-" ftruction of those who are in danger of being perverted "by Roman priefts and jefuits to their fuperflition;" this is in no respect the case in the colonies of New-England, the most crouded with these missionaries. Maryland is our only continent colony, affected with popery, and where the parochial ministers feem not to attend their conversion or reformation; thus the papifts and difloyal are indulged or overlooked, and one would imagine that the principal defign has been to pervert the protestant loyal diffenters, confidering that the miffionaries with the largest falaries are generally stationed in the very loyal, the best civilized and most opulent towns of the colonies, who are well able and in fact do fufficiently fupport a protestant orthodox gospel ministry. I shall only instance the town of Boston, the place of my relidence, the metropolis of all the British American colonies; in Bofton are many congregations of fober good orthodox christians of several denominations, particularly two congregations of the church of England; their rectors very good men and well endowed by their respective congregations, besides a king's chaplain, so called, with a falary of 1001. sterl. per ann. from Great-Britain; a superb costly church equal to many * cathedrals,

* Extract from the Bofton Ja Jependent Advertiser, No. 85.

Laft Friday being the 11th day of August 1740, the N. E. corner frome of the king's chapel in this town, now re-building, was confecrated and laid with great ecclefiaftical pomp and folemnity, and at about 11 the procession began from the province house. — First, his ex—l—cy our go — or with the rev. Mr. C—r at his right hand, and the rev. Mr. Br—k—ell at his left hand preceded, then the church wardens, and vestry, followed by about twenty-five couple of the principal friends of the church; when the procession came to the church-yard, his ex—l—cy, supported by two chaplains, descended the trench where the flone which was dedicated to GOD was laying at the north-cast corner. — On this flone the go—or knocked three or four times with a mason's trowel, (just the number K 2

· 131

cathedrals, is now a building by the church of England men: yet, notwithitanding, this most excellent and laudable charity is misapplied * by stationing in Boston a superfluous missionary at the charge of 701. sterl. per ann. besides the allowance from his congregation. The bishop of St. David's in his fermion before the

of raps archbifhop Laud gave to the door of St. Catharine's creed church at his memorable confectation of it) fome devout expressions were then dropt by the chaplain. The go----or then afcended the ladder with the two clergymen; and this part of the ceremony being ended, his ex-l---ty and the reft of the company in the fame manner they walked from the province-house, entered the king's chapel, where was a fermon very properly adapted to fuch an occasion, delivered by the rev. Mr. C--r from the zd chapter of Nehemiah and the zoth verfe, those words of the verfe, "The God of heaven, he will profper us, therefore we his fervants, will arife and build"--The words that follow the text are--- "But you have no portion, nor right, nor memorial in Jerufalem." A hymn of praife concluded the folemnity--The Latin infeription upon the corner from is as follows.

> Quod felix fauftumq; fit Ecclefiæ et reipublicæ Hunc lapidem DEO facrum, Regiæ capellæ Apud Boftonium Maffachufettenfium Reftauratæ atque auctæ fundamentum Pofuit, Gulielmus Shirley, Provinciæ præfectus,

August 11mo anno falutis 1749.

Some Zoilus in contrast, has adduced a couplet from our English poet Mr. Pope.

Who builds a church to God, and not to fame,

Will never mark the marble with his name.

• Well may the fociety complain of their funds being infufficient. I do not fay, that fuch mifapplications may in part be the occafion, that laft year, the benefactions and legacies amounted to no more than 7311. fterl. whereas formerly they amounted from 2000 to 30001. fterl. per ann. even in years when they had no royal briefs; if the number of miffionaries are leffened, fee abstract of 1749, and properly flationed, there will be no reafon for complaint; I heartily wish this good fociety may go on and prosper, and not be imposed upon by their miffionaries; it is not at prefent rich enough to bestow fine cures.

fociety

fociety in Feb. 1749-50, in a few words expresses the original design of the fociety, "An opportunity is prefented both among the plain and simple Indians, and among the unhappy negro flaves—an utter extinction (meaning in North-Carolina) of christianity was no absufficient or groundless apprehension."⁺

Connecticut,

+ Confidering the flow advances which the protestant religion, and a fpirit of industry had made among the common people of Ireland, and parochial ministers or clergy not answering; by charter Feb. 6, 1731, a fociety was incorporated for erecting protestant working schools in feveral parts of Ireland, the poplish children to be kept apart from their popifh parents, and fubfifted in victuals and cloathing : not to be admitted under 6 æt. or above 10 æt. From 1731 to 1748 have been admitted 885 children, whereof 509 have been apprenticed. In purfuance of this charity, 1749, the schools already opened were 30, in building 11; more projected 3. The annual expence of maintaining near 900 children their present compliment, including falaries to masters, mistresses, and other incident charges, is only 44351. sterl. which effectually refcues fo many of the rifing generation from beggary, and popery, our civil as well as religious locust or caterpillar, confequently is an accession to the protestant interest, and of wealth to the nation by their being skilled, and habituated to labour. The annual benefactions towards the reading and working fchools of the two incorporated focieties of Scotland and Ireland grow very fast; the prefent members of the Irish fociety are about 900. The last abstract (for 1749) of the fociety for propagating the gospel in foreign parts, hints, that they must be obliged to withdraw some of their missionaries, if their charity does not take a better turn; the reason is natural, the good effects of the charity for working schools is conspicious, that for millionaries is not fo; this will more and more dispose people of a charitable spirit, to vent their charities rather upon schools than upon This fort of a fociety de propaganda fide, has at prefent miffions. upwards of 70 miffions (including catechifts and school-masters) in North-America, and is of about 50 years growth ; if it produce any fruit it will be of the tardif kind, and perhaps not profitable, their accounts fent to the fociety generally mention only the numbers by them baptized and admitted to the lord's fupper; which if administered by any orthodox minister is equally valid in the opinion of the sober and moderate of the church of England; they do not enumerate the Indians by them converted, the Roman catholicks brought over to the protestant religion, methodists or enthusiasts reduced to a sober mind, and the like, as if these were not in the defiga of their mission ; their chief cure or care feems to be a good easy living, and the occasioning of divisions and strife among tolerated differters (I use the expression tolerated K 3

133

Connecticut, a fmall colony, the most prudent and industrious of all our colonies, in which are no waste lands remaining, fupplied with orthodox ministers well qualified and well paid; from misrepresentations of neighbouring missionaries, are crouded with the greatest numbers of miffionaries in proportion to their extent; and in the fociety's last abstract are accused of a PERSE-CUTING SPIRIT, because three or four mean perfons were profecuted according to law, for not paying their township rates, in which might have been included their proportion towards the supporting of a gospel ministry as endowed by a legal town-meeting. So far is New-England at prefent from a perfecuting fpirit, that in the provinces of Maffachufetts and Connecticut, upon a representation home of this nature, there were acts of affembly made, " That all fuch professed mem-" bers of the church of England, shall be entirely excused " from paying any taxes towards the fettlements of any

tolerated diffenters) becaufe by act of UNION the church of England is beyond diffute the established way; in the published opinion of this fociety, there is NO EXCLUSIVE PREFERENCE (as in mercantile affairs, there are exclusive and not exclusive charters) and the withdrawing of wild youth, from the orthodox tolerated way of their fore-fathers, to a more fashionable and less rigorous way, occasions divisions and difaffections in families. Upon the decease of a congregationalist incumbent, in a new choice, fome in their nature and humours do not concur, and in resentment, perhaps by the advice of a missionary, go over to the church of England.

I shall here by way of amusement, intimate, that if this fociety were to relinquish their present charter, and be favoured with a new charter, for propagating of christian knowledge, working schools, and other articles of industry: to each school there may be a misfionary catechist, in church of England orders, of mederation, and qualified in their working as well as devotional business; one or two acres for the fite of the school, lodgings, and other conveniencies; and fome adjacent small farm hired at an easy and long lease, for the improvement of the boys in husbandry, and for the profit of the fchool: the children to be instructed in the principles of the chrifian reformed religion, reading, writing, arithmetick, husbandry, and manufactures or handicrasts. In Ireland, in some schools the ma ter has the profit of the land or farm cultivated by the boys, in lieu of his falary, and 40s, per ann. for the support of each child.

" minister

* minister or building any meeting-house," that the taxes of perfons attending the church of England, be paid to their church of England minister. By acts 1728 and 1729, anabaptists and quakers are exempted from paying to the parish or township ministry. I never heard of any perfecuting fpirit in Connecticut, in this they are egregiously asperfed; it is true, that a few years fince they made fome acts against fome frantick preachers and exhorters, called methodists, intruding (without confent) into the pulpits of established ministers. Boston of Massachusetts, May 25, 1743, at an annual voluntary friendly convention of the congregational ministers of the province, they entered and afterwards printed their testimony against the methodists, 1. For their errors in doctrine, antinomial and familiftical. 2. Following impulses of a diftempered imagination, rather than the written word of our bible. 3. Allowing perfons of no learning or difcretion to pray and teach in publick. 4. Intruding into the pulpits of fettled ministers, endeavouring to withdraw the affections of people from their good and orderly ministers. 5. Ordaining ministers at large without any parochial charge. 6. Endeavouring to excite in their weak hearers, ungoverned passions, extacies, and unfeemly behaviour, acting like Bacchantes. 7. By calling poor people (whole time is their only estate) unseasonably from their business and labour, to a habit of idleness and vagrancy. I cannot fay, that the miffionaries were very strenuous against these irregularities, with much impropriety called METHODISM, because they might find some interest in separations amongst the diffenting orthodox people, divide et impera : I find in feveral accounts of some missionaries sent home from time to time to the fociety, (perhaps that they may have fome pretext of doing bufine(s) complaints of infidelity and methodifm prevailing in their diftricts, at the fame time here upon the fpot, we are not much fenfible of their reclaiming the one, or their oppofing the other by word or writing.

K 4

I muft

I must again observe, that there was not any pretext for fending miffionaries into the province of Maffachufetts-Bay of New-England : they had a well regulated and well provided for orthodox clergy, as, appears by the laws or acts of affembly anno 1692, the first year of the present new charter. The quarter seffions are to take care, that no town be destitute of a minister, that there be a fuitable provision for a minister, and that any perfon to be ordained, shall be recommended by three or more ordained ministers. The missionaries from the fociety de propaganda fide of Rome, are instructed to endeavour to convert the infidel and heretical parts of the world; our miffionaries cannot with any propriety or face, efteem the orthodox tolerated clergy of New-England, as hereticks; because in the published opinion of the fociety, in our plantations all orthodox clergy are upon the fame footing, that is, no preference as to the exercise or practical part of their devotions; see the fociety's abstract in February 1749-50. To justle people from one mode of christianity to another may produce free-thinking and libertinism, where there are no effential differences in doctrine, but only in the variable vestiments and modes of worship,

Some of the miffionaries in their accounts fent home, value themfelves upon the bringing over fome people to the obfervance of the feftivals of the church of Eng-Jand: thefe licenced idle frolicking days are a nufance, in fettling of new plantations, which require fix labouring days. (in the express injunction of our fourth commandment) in the week. The laft account of the charter protestant working schools in Ireland, well obferves, " That the progress of these schools, in its natural course, must gradually abolish the great number of popsish holy days, by means of which some hundred thousand working hands are kept idle, the labour and profit of them lost to the publick — p. 41. This damage is an astonishing drawback from the wealth and strength of the hation,"

I fhall

I shall conclude this missionary article with a few obfervations. It is a lamentable affair, that scarce any of our publick charity charters are so contrived as to prevent missions.

I. The fcheme proposed, vol. II. p. 134. was the converting of the present idle missions into county working fchools, with a church of England missionary catechist of moderation, qualified in the working as well as devotional articles : thus the charge of our present 70 missionaries will maintain and * educate about one thousand working children; if the present missions are continued, may the missionaries be under the inspection and direction of **a** committee of such members of the fociety as reside in America, or under a missionary general, or under the suppointed for British North-America; that the missions may be ambulatory, that is, † removable to places where they are most wanted.

The project of initiating white and Indian children into this mode of the church of England by church of England working schools, quo semel est imbuta recens, would be more effectual than the prefent missionary method; the bringing over of adults is more difficult, and when brought over they foon die, and their influence is loft; in the incorporated charitable locieties of Scotland and Ireland, they only regard the rifing generation, where without any firained allegory it may be called the fowing of the-feeds of christianity, loyalty, and industry. The former too large charity endowments to idle clergy miffions, to colleges, and to charity schools, require to be qualified and reformed; that of working fchools has lately been attended with great fuccefs and benefit to the countries; that is, reading and writing being acquired, the boys are fent to fea, to bushandry, and other laborious trades; the girls to spinning and other fervices with fome peculiar reftrictions. Sir Richard Cox in a late piece concerning the linen manufacture, writes, " Numerous " holy-days are the bane of all industry; and the ruin of every coun-"try where they are permitted : and indeed there are too many al-" lowed by law."

+ This method has had a good effect in Scotland. In Scotland the pope has two vicars apostolical, one for the lowlands, and the other in

II. If

II. If the prefent incumbent miffionaries are indulged with their livings or falaries for their own natural life; upon their decease the respective miffions may cease (as a miffion is no inheritance, it is no hardship upon their families) and be cantoned along our inland frontiers to keep morality and christianity among the poor new fettlers, and to convert the neighbouring Indians to civility and fome of our orthodox professions of religion.

III. As this is formed with the defign of a very extenfive charity, the fupporting of learned and orthodox minifters or teachers, without being confined to the mode of the church of England; why may not this charity be extended to minifters of any orthodox perfuation, who will declare themfelves willing to ferve a miffion among the Indians, as alfo to the orthodox minifters of the poor out towns? At prefent, it is confined towards promoting of uniformity to the difcipline and worfhip of the church of England; not among the heathen who never heard of chriftianity, nor in poor out townfhips, but among the fober-minded, chriftian only educated, and loyally tolerated protestant diffenters, in the most opulent and best civilized townfhips. A ftrict exclusive uniformity (a few lutherans excepted) is practifed only in popifh fovereignties.

IV. Though the members at prefent are about 230, any feven members with the prefident or a vice-prefi-

in the highlands, with many inferior miffionaries; anno 1740, thefe popifi miffionaries were twenty-five; anno 1747, they dwindled away to eleven; the prefbyterian Scots itinerant miffionaries are well fubfifted by many large benefactions and fubfcriptions; the king allows scool. fierl. per ann.

• Our young miffionaries may procure a perpetual alliance and commercial advantages with the Indians, which the Roman catholick clergy cannot do, because they are forbid to marry, I mean, our missionaries may intermarry with the daughters of the fachems, and other confiderable Indians, and their progeny will for ever be a certain cement between us and the Indians.

dent
dent may do buliness; thus four or five zealots, such as the high-church, or friends to a foliciting person, may at pleasure pervert this charity; this perhaps has been the case for some years, in appointing so many idle missions, and many who instead of promoting charity (the nexus of human society) that is, love among neighbours; as bigots or religionists, they act the reverse.

V. The miffionaries in their accounts fent to the fociety, ought to keep ftrictly to the truth, and not impole upon the world; I shall mention two or three inftances. 1. The ftory of the regular discipline of catechumens white and black in New-York, is not known here, though in the neighbourhood. 2. A chriftian congregation of more than 500 Mohawk Indians; the whole tribe does not exceed 160 men living in a difperfed || manner. 3. A spirit of perfecution now in the colony of Connecticut; whereas there are fundry laws * of many years standing in that colony, exempting church of England, anabaptists and quakers from contributing towards building of township meeting-houses, and from the support of township congregational ministers.

VI. As the fociety complain of the infufficiency of their funds certain and cafual, to keep up the falaries of their too much multiplied miffionaries; they are become more circumfpect and trugal, and inftead of a full living or miffion, confidering that they confine their miffion to one parifh, they only make a fmall addition of 20 to 301. fterl. in the S. W. parts of Connecticut colony; the miffions in South-Carolina are reduced from 501. to 301. fterl. per ann. and perhaps in all large falary miffions, without any injury done to the incumbent, a deduction may be made equal to the allowance from the

This refembles the legendary flory of St. Francis, at one time converting fome thousands of people in a defart.

• See the last edition of Connecticut law book, p. 169, 170, 171. Congregation :

congregation : this will be a confiderable faving, and as the parifhes or townships grow, their allowance will efface the missionary allowance; this will be a total faving, and naturally answers that of the design of the charity to affist these places that are not able to subsist a gospel ministry. +

I am now got into a maze or labyrinth; to clafs the various fectaries in religious affairs, is an intricate labour: the New-England fynod, anno 1637, condemned 82 errors. I muft in general obferve, that, 1. As to the fearing or rather loving of GoD, the beft evidence is the working of righteoufnefs. 2. What is generally called confcience, is private opinion. 3. They who have no remorfe of confcience, who do not believe in future rewards and punifhments, and who do not provide for their houfholds or pofterity, are infidels, or worfe than infidels. 4. They who affert that the church is independent of the civil power, and juftification by faith without good works; fuch belief is worfe than no religion, being inconfiftent with political fociety.

In concluding this article of miffionaries, I muft obferve, that if what I have wrote is difagreeable to fome, it is not from any perfonal refentment; feveral of the miffionaries are my friendly acquaintances; but amicus amicus — fed magis amica veritas. The original defign of this fociety, was moft humane and pious; more than 120,000 bibles, common prayers, and other books of devotion, with an incredible quantity of pious fmall tracts, have been difperfed in foreign parts. They are by charter allowed to purchafe real eftate to the value of 2000 l. fterl. per ann. and other eftate to any value : to meet once a month to tranfact bufinefs, or oftener if need be; but no act to be valid, unlefs the majority

+ Can Bofton, v. g. be faid, not able to fupport a gofpel ministry ? the interest of the money, which by estimation the church of England now a building may colt, is sufficient to maintain half a dozen church of England rectors at a comfortable allowance.

of

of feven members (a quorum) with the prefident or a vice-prefident concur. There is a circumftance, which has not always been attended to by the fociety; appointing of miffionaries, faulted as to morality, benevolence, and moderation, called high-flyers, younger fifters of popery.

I shall class the religion opinions which have appeared in our colonies under three general heads, the meerly speculative, the antiquated obsolete or out-of-fashion opinions, and the professions or sectaries which at present subsist and are likely to continue.

1. Speculative private opinions are of no confequence in a flate, until the opinionifts form themfelves into feparate large fociety meetings; I shall enumerate a few. The ANTINOMIANS * affert that the laws of Moses are vacated.

* See vol. I. p. 444.

This error was become obfolete, and remained only with a very few ignorant or vicious people until lately broached here by the vagrant Mr. W-ld, an infignificant perfon, of no general learning, void of common prudence; his journals are a rapfody of scripture texts, and of his own cant expressions; in his epistle to the inhabitants of Maryland he writes, " confidering what usage your flaves commonly meet with, I wondered they did not put an end to their own lives or yours, rather than bear fuch ufage ;" thus in a most execrable manner he might have promoted felo de se among the slaves, and infurrections against their masters; the two great inconveniencies which our plantations are exposed to. I never could account (perhaps it was only frantick, and not to be accounted) for his repeated vagrancies, or firolling over England, Scotland, Ireland, and our American colonies: he was no popifh miffionáry, becaufe being young, he never had the opportunities of being abroad in popifh leminaries or conventuals: he was no itinerant millionary (for fome short time he had a million for Georgia) of our society for propagating the gospel in foreign parts ; because when he effectually acted one part towards an uniformity to the church of England, by occasioning separations and animolities among the orthodox diffenters, at the lame time he found much fault with the prefent conflitution of the church of England: he was no ministerial or court tool, as was the famous Sacheverel in the jacobite part of queen Anne's reign, because the government at present have no occasion for such : he did not travel as a naturalist or as an historian for observation, by the perquisites of preaching

vacated, as being only temporary and local, that is, national or municipal, therefore not obligatory with christian nations; that good works do not forward, nor bad works hinder falvation.

In general, people ought to entertain a laudable religious charity towards one another, feeing they worfhip the fame God, though in different modes : particularly. to make vestiments and other fanciful ecclesiastical decorations a matter of controverly, is very abfurd; + fuch indifferent trivial circumstances may be adapted to the tafte of the vulgar; the Greek and Armenian churches in the Levant preferve the mode of their religion by The Jews had a fuperb magnificent tempageantries. ple, a numerous train of gaudy officers, very expensive facrifices. Simplicity and frugality in all affairs of life is at prefent thought to be most natural, and is generally practifed, even in religion these things have fuffered fucceffive reformations; the church of England is lefs expensive than that of Rome, the three licensed differting worfhips in England are lefs expensive than the \perp church

preaching to defray his charges; becaule be had no genius nor application for fuch fludies. Here we may obferve, what trivial things may be great incentives to devotion, fuch as vociferation (the ftrength of his arguments lay in his lungs,) a vehement frequent use of cant devotional words, a dramatick genius peculiarly adapted to act the enthusiant, proper vefiments or drefs and action; in differing congregations he affected the church of England drefs, and Paul Rubens' preaching posture in the cartoons of Hampton-Court. He and his disciples feemed to be great promoters of impulses, extacies, and wantonness between the fexes. Hypocritical professions, vociferations, and itinerancies, are devotional quackery.

+ La Voltaire in his letters, writes, that the disputes among the capucins, concerning the mode of the sleeves and cowl, were more than any among the philosophers.

4 It would be of great benefit to our out fettlers if they could fall into fome fuch method, feeing the fociety for propagating, &c. take no care of them; they are not able to build publick places of worfhip, and fupport a gofpel ministry, and when they endeavour it, the expence retards their fettlements; a great detriment to the colonies in general.

of

of England, and the quakers have reduced religion to no expence.

The FAMILISTS, # family or house of love, was of the anabaptist tribe in Germany, and suspected to be more addicted to carnal than to spiritual love; they held all pleasures and dalliances among themselves lawful; they were much transported with impulses and other frantick notions; they persuaded themselves that they were the only elect of God, and that all others were reprobates, and that they might deceive any person who was not of their community, magistrates not excepted, even with an oath. They agreed with the antinomians in many articles.

The MUGLATONIANS * are extinct.

The GORTONIANS of Warwick in the colony of Rhode-Island, were of so short duration, they are not to be mentioned; see the section of Rhode-Island.

The rigid BROWNISTS + are relaxed into independents and congregationalists.

The INDEPENDENTS in all our colonies, have fuffered fome reformation, and are at prefent called congregationalifts.

PURITANS were for reforming the reformed religions to greater absolute purity; that appellation is now obfolete.

SEEKERS waited for new apostles to restore christianity; these have quite disappeared.

The father of this family, was Henry Nicols, born at Munßer in Westphalia, and had resided fome time in Holland; he first appeared about 1540, and pretended to be greater than Moses or CHRIST; as Moses had taught mankind to hope, Christ to believe, he taughtlove, which is the greatest; and that he himself was not like John the baptist, a fore-runner of Christ, but Christ was rather a type of him, and that the kingdom of Israel was to be established in the time of his ministry; what he wrote was mean and incoherent, full of vain boasting and profane applications of the prophecies relating to Christ, to his own perfon.

* See Summary, vol. I. p. 447.

† See vol. I. p. 443.

Remon-

REMONSTRANTS and CONTRA-REMONSTRANTS, * or predefinarians and free-will men. The remonstrants are also called arminians. + It is not a doctrine of any national church of embodied communion; there are fome perfons of this private opinion, among all the sectaries. Their distinguishing tenets, are, universal redemption, an indemnity or act of grace to all mankind, who by a good life accept thereof, being endued with a free will to act at liberty what is good or evil.

Concerning the fectaries in our colonies which now fubfift, and are likely to continue.

I do not mean a church hiftory of North-America; bifhop Burnet well obferves, that ecclefiaftical hiftories, are only hiftories of the vices of the bifhops and other clergy.

Most sectaries in religion have been occasioned by vulgar people not capable of giving allowances for the allegories, tables, and idioms of expression used in the Levant, from whence we had our scriptural books; but taking them into a literal and vernacular fease, whereas the prophets generally used losty figurative expressions.

In our North-America colonies there are none properly to be called feparatifts, Roman catholicks excepted (in Maryland, and by the proprietary charter of Penfylvania, Roman catholicks are not excepted) but by the act of union (territories thereto belonging) the church of England is the eftablished church, though only nominal, in all our colonies and plantations. The denomination

* See vol., I. p. 227:

+ So called from Arminius their leader, he was fome time profeffor of divinity at Leyden in Holland: they were also called remonstrants, from their remonstrating, 1618, against fome articles of the fynod of Dort concerning predestination, election, reprobation, and the like; thus the adherents to the princes of Germany, who protested against fome proceedings at the diet of Spire in Germany 1529, were called protestants.

of whigs and tories \downarrow (Deo gratias) is loft : there is no general church government, \parallel by the articles of union, that of the church of England is established in perpetuity; but hitherto in favour to the good confcientious diffenters of many denominations, the colonies are not quarter'd upon by the regular ecclesiaftick troops under the direction of their proper officers, archbishops, bishops, deans, archdeacons, prebends, canons, and other subtern officers : the church of England exercise no jurifdiction (the office of the bishop's commissions of ministers in Connecticut, or the voluntier prefbyters (in imitation of the classical kirk jurifdictions of Scotland) in feveral of our colonies.

I shall not here delineate or describe the papistical church of Rome, the episcopal church of England, and the presbyterian kirk of Scotland; they are generally well known.

The papifts are of no note or notice * excepting in

4 Tory, originally was a name given to the wild Jriff popify robbers, and who favoured the maffacre of the protestants in Ireland 1641, and afterwards applied to all enormous high-fliers of the church. Whig was a ludicrous name, first given to the country field devotion meetings, whose ordinary drink was the WHO or whey of coagulated four milk, and afterwards applied to those who were against the court interest in the reigns of Charles II. and James II. and for the court in the reigns of king William and king George.

|| Church governments may be various, and all equally allowable by prefcription; as in the civil governments of various nations there are monarchy, ariftocracy, democracy, and compositions of these, which in general alliances, treaties of peace, and other transactions among fovereignties, are equally admitted.

* Not many years fince, in Bofton were fome popifit emiffaries; but finding only fome poor wild 1rith carters and porters of the perfuation, they foon relinquished their miffion and difappeared.

As the grants of Maryland and Penfylvania do actually tolerate the publick exercife of the Roman catholick religion; and as that religion is pernicious to human fociety in general, and tends to fubvert our prefent happy conflictution; why may it not be fupprefied as to publick worfhip, by an act of the British parliament, without giving any ambrage to the other good grants and charters at home, and in the plantations?

Vol. II.

L

Penfyl-

Penfylvania and Maryland; in Penfylvania by their new charter 1701 from their proprietary and governor William Penn, the claufe of liberty of confcience does not exclude Roman catholicks, " No perfon who shall acknowledge " one almighty God, and live quietly under the civil go-" vernment, shall be in any ways molested." In Philadelphia there is a publick popish chapel, frequented by a poor low set of Irish; their priests are always England or Maryland born, jesuits, and generally of good conduct and behaviour; an Irish jesuit is never sent. In Maryland are many Roman catholicks, their original proprietary was popish; at prefent there may be ten or a dozen publick popish chapels; father Molineux of Port Tobacco is their director or vicar.

LUTHERANS + are to be found only in the provinces of New-York and Penfylvania. The lutherans differ from the Roman catholicks principally, 1. Communion in both kinds, bread and wine. 2. Divine worship in the vul-3. Indulging priefts or minifters with magar tongue. trimonial pleasures; some profane persons might ludicroufly have observed, that his reformation was owing to his indulgence of wine and women to the fraternity of clergy, as king Henry VIII. reformation in England was owing to fome petticoat affair; here we may observe, that from very trivial matters, very great and good revolutions have proceeded. In the city of New-York there is one lutheran church, and in the reft of the province of New-York feveral difperfed lutherans by the importation of foreigners from Germany in queen Anne's reign. In Penfylvania the lutherans have a church in Philadelphia, and feveral in the country. There is one Swedish lutheran church near Philadelphia, one or two more in the country near Newcastle; they are supplied

† Luther born 1483, at Mansfield in Germany, became an Augustin monk or fryar, preached against indulgences, &c. was excommunicated by the pope; he with Melancton published first the new testament, and afterward 1534 the whole bible in the vulgar tongue; he married 1524, and died 1548; the duke of Saxony was his patron.

once

ence in feven years from Sweden, and generally with good men.

PRESBYTERIANS, church of England, and congregationalists are the fame in all effential articles of christian , doctrine, and their laity are all of the fame faith , the proper diffinctions are only with regard to their diffinct clergy in forms of church government, discipline, modes of publick worship, and vestiments. The presbyterians in our colonies are of two forts, 1. Those who follow the manner of the church of Scotland as established in Scotland by act of union : all differters from the church of England, (anabaptifis, quakers, and moravians excepted) fouth of New-England, are called prefbyterians, the congregationals not excepted; thus the diffenting congregation in the city of New-York, though under a congregational minister from Boston, is called presbyterian. The Scots prefbyterians are modelled according to a directory first agreed upon by an assembly of divines at-Westminster in the time of the civil war, and appointed by the general affembly of the kirk of Scotland 1647; they use no liturgy. 2. These are properly called calvinists, * and follow the confession of Heidelberg (in the palatinate of Germany) fuch are the church of Geneva. feveral churches in Germany, fuch are the church of Holland, and the hugonots of France; they use not only a liturgy or common prayer, but also an establifhed form of pfalmody. A calvinist French church fublisted many years in Boston, and is lately dropt, there being no French new comers, and the children of the late generations un lerftand English better than French. There

* Calvin was born in Picardy in France 1509, a man of general learning; he began his reformation at Geneva; died 1564, æt. 56; he was a voluminous writer; his inflitutions is a mafter-piece of elegant Roman Latin.

It is a common mistake, that by calvinists are understood predestinarians; before Calvin's time there were many predestinarians, the Mahometan predestinarians are not calvinists: some predestinarians as well as free-will men now called arminians, being private opinions, are to be found among all sectaries.

are

are feveral calvinist churches in the provinces of New-York and Pensylvania.

CONGREGATIONALISTS is the religion mode of New-England, (fome church of England, anabaptifts, and quakers excepted) the prefbyterians are only fpeculative, becaufe by act of union they can have no ecclefiaftick claffical jurifdiction in the colonies, and therefore are only congregational, but lefs rigid and narrow in admiffion of church members, and in difcipline. The New-England congregationals may be called independents + reformed, as not exactly the fame with the independents one of the three licenfed diffenting profeffions in England, but formed according to a platform (fo they call it) of their own fcheming; this platform was by a refolve of the general affembly recommended to the churches, but never enacted.

At prefent, anno 1750, the general method of the New-England congregationalists 4 is, when a gospel minister is wanted, the devout elderly men of the precinct invite fundry preachers to officiate, thefe are called candidates; in the next step, the church members or communicants (all males even the pooreft, upon the publick charity, and negroes) at an appointed meeting, by a majority, vote for one of these candidates, and give him a formal call; the following step, is a general meeting of the men of the congregation, who pay ministerial rates, and are qualified as town voters, to approve or difapprove of the above choice; if any difficulty happens, a council of delegates from the neighbouring churches is called for advice, but their opinion is only of advice, but not absolutely obligatory; this council when they attend the ordination, are called the

† The name of independent is quite extinct in our American colonies. 4 In the fecond fession of a synod appointed by the civil legislature at Boston in May 1680, a platform and confession of faith was agreed upon, much the fame with that of the independents in England, October 1658, called the Savoy confession of faith.

See vol. F. p. 438, &c. and other occasional hints.

ordination

ordination council. Upon any occasional difference in a church, a like council of advice is called, but not obligatory, and issues in a vote of the church communicants or general congregation.

The congregationalists of Connecticut are regulated by a platform or confession of their own (scarce differing from that of Massachuletts-Bay) prefented to their general assembly by the ministers and other delegates Sept. 9, 1707; the general assembly or legislature ordained, that all churches || conforming thereto shall be deemed essay blished by law; but no fociety or church, who foberly diffent from faid united churches, shall be hindered from their worship according to their confciences.

There are feveral congregational churches who vary in fome trifles; inftance the rev. Mr. Colman, afterwards D. D. from one of the universities of Scotland, though frequently in mixed conversation he declared his diffent from the prefbyterian church government, anno 1699, perhaps in humour and fingularity, fet up as a feparatist from the generally received congregational mode, and perhaps with a defign to allure fome inclined to the manner of the church of England, to contribute towards his church; his feparation was only in trifles, viz. using the Lord's prayer, reading of leffons in the bible, the hatband and rofe of the church of England clergy, a freer admission to the facraments of baptism and the Lord's fupper; his fucceffor the rev. Samuel Cooper is a good man.

1722, there was a confiderable falling off or feceflus from the congregational mode by Mr. Cutler, prefident of Yale college in Connecticut, and fome of his former pupils; in confequence of their fcheme, they went to

|| In many respects I admire the prudence and acconomy of this government, but here I cannot avoid observing a seeming inadvertency, and afterwards not rectified, because by act of union May I, 1707, the church of England exclusively was the only church established by law in all our plantations; this act perhaps was the occation of Mr. Hobart's calling the church of England separatists.

 L_3

England,

England, obtained episcopal ordination, and the benefit of missionaries; their godliness was great gain.

ANABAPTISTS. See vol. L p. 445. Their effential and diffinguishing doctrine is with relation to baptism; they baptize adults only, and that by immersion or dipping. This formerly was a very wild fectary, and therefore run into many fubdivisions scarce to be enumerated : I am well informed, that at prefent in Penfylvania there are 16 or 17 different forts of anabaptifts English and German. I shall instance some of their subdivisions. 1. English, * a fober and generally good people; German anabaptists, a turbulent people : the German anabaptifts have no meetings or publick places of worship in Philadelphia, but many in the country, and generally refuse the qualification oath; one of their branchings are called menifts, they have no meeting in Philadelphia, but are a numerous and wealthy people in the country, and follow farming; their diffinction is wearing long beards, and refufing government oaths. The dumplers are a finall body of Germans, about 50 miles from Philadelphia, men and women professing continency, live in separate apartments. The men wear a monkifh habit, without breeches like capuchins, but lighter cloth; as to oaths they are the fame with the quakers and moravians; though an illiterate people, they have a very decent chapel, and as craftimen, they are very ingenious; upon a fine stream they have a grift mill, a faw-mill, a paper mill, an oil mill, and a mill for pearl barley, all under one roof, which brings them in confiderable profit. There is one English anabaptist meeting in Philadelphia, and fome in the country. 2. First day baptifts, their weekly holy day is the Sunday, . as in use with all other christians; seventh day baptifts, on the feventh day or jewish fabbath they meet for

• Not long fince the vagrant Mr. W---d obcafioned a feparation in the Bofton anabaptift church; the feparatifts are under the cure or care of a leather breeches maker; they are antimoralist, and therefore permicious in fociety.

publick

publick worfhip, and abstain from common labour, but labour, &cc. on the Sunday or first day of the week; of those there is a congregation in Newport and in Westerly of Rhode-Island colony, and several in the country of Pensylvania. 3. The first day baptists are subdivided into those who use finging + in their publick worship as the generality of christians do; and baptists who do not admit of finging in publick worship; they alledge that there must be a great deal of hypocrify in promiscuous finging, as it cannot be imagined that every one of the congregation is in the humour of finging at the fame time.

QUAKERS, fee vol. I. p. 447. As they are not under the confinement of creeds, confessions of faith, platforms, canons, articles, formulas, and the like, they cannot possibly break loose into fectary * subdivisions; their principal doctrines are to be investigated from their practice, (it is to be wished that it were so in all professions of religion) their industry, frugality, mutual benevolence or friendship. 4. The external part of a quaker's

† The quakers, and not finging baptifts, are defervedly faulted, because finging of pfalms incites and heightens devotion.

• Anno 1642 or 1644, in time of the civil wars in England, George Fox of Leiceftershire, æt 25, fet up for a religionary exhorter or teacher; he exclaimed against the established clergy, fome of Cromwell's foldiers became his profelytes and would not fight, in course the prifons were crouded. In K. Charles II. administration they were frequently prefented for refusing to pay tythes, and for not taking government oaths. Robert Barclay of Scotland wrote an Apology for the quakers 1675, and dedicated it to the king, which abated that perfecution. William Penn, fon of vice-admiral Penn, became a quaker, æt. 22, and with Fox went upon a mission into foreign countries, but from Holland they foon returned home; this Penn was proprietary and governor of Penfylvania; he wrote two folio volumes in favour of the quakers.

Benjamin Holmes lately wrote in favour of quakerism; his book was first published in Amsterdam 1723.

+ 1 know of no differences among them, only fome are more demure, fome lefs demure or precife in the antiquated habit and mode of speech, that is, more jovial and debonnaire.

Not

quaker's religion confifts only in trivial matters, the antiquated modes of fpeech, thee, thou, thy, &cc; and an antiquated drefs of a plain coat without plaits, or buttons on the pockets and fleeves, beaver like hats with horizontal brims as is generally wore by the church of England clergy: the pufillanimous doctrine of not defending themfelves by force against an invading enemy is very absurd: PRO PATRIA is not only a law of nations, but of nature. They fay that a regular clergy with benefices are hirelings, and, like mercenary troops, do duty only for fake of their pay, and not to be fo much depended upon as the militia or voluntary confcientious exhorters.

Quakers hold all fwearing and paying tythes unlawful; they do not find fault with the various forms of civil government, but give obedience to any eftablished government; all who have the gift of the light within them, men or women, are fufficiently ordained to preach the gospel without any commission from a church, or affistance from human learning; all praying and preaching premeditated or extempore without the spirit, are superfititious will-worship and idolatry; they use neither baptism nor the Lord's supper.

Unjuftly they are faid not to regard the fcriptures, whereas in their exhortations, writings, and defences of their orthodoxy, no fect use fcripture phrases and quotations + more than they do. Their affirmation instead of

Not only in the neighbourhood, but by annual or periodical itinerancies of their speakers or exhorters, and also of their most noted men.

+ I shall here give a few inflances of their establishing fome of their tenets by foripture. 1. They feem to be generally arminian, James ii. 20. "But wilt thou know O vain man! that faith without works is "dead." Acts x. 34. "God is no respecter of perfons, he that fears "God and works righteoufness is accepted of him." I John ii. 2. "And "heighte propitiation for our fins, and not for us only, but for the fins of "the WHOLE world." They cannot believe that God has fore-ordained a certain part of mankind to perish, and a certain part to be faved; because

of an oath, is not to be faulted, because it is equally binding, and falfifying is fubjected to the fame penalty as perjury; government oaths are become fo common, they have almost lost their folemnity. They use the fame fubterfuge with our more illiterate teachers and exhorters, 1 Corinth. i. 26. &c. " Not many wife after " the flefh, not many mighty, not many noble are called ; " but God hath chofen the foolifh things of the world, to " confound the wife," &c. Their filent waiting upon the Lord in their publick places of devotion, is faulted by many, but they fay, at that time, they have a divine teacher in their own heart. They believe a refurrection of the just and unjust, and that God will give a reward to every man according to his works, whether they be good or evil; but as to the nature and manner of the refurrection they are filent, they only fay, that it is not fafe

because in such a belief there is no need to take care of falvation or good morals; this is execrably pernicious, and voids all doctrines, religious or moral 2. All mankind have an innate divine light, which if attended to, directs them into a good and holy life, and averts them from fin and passions; " this is the light, (John i. g.) "which lighteth every man that cometh into the world." 3. Water baptilm is not effential to christianity, it must be of the spirit. Acts xi. 16. " John indeed baptized with water, but ye shall be baptized with the "holy ghoft;" as Chrift was born under the law, he fulfilled the law, and was circumcifed : " in Christ Jefus, neither circumcifion nor " uncircumfion availeth any thing, but a new creature :" as they have charity for those who use water baptism confcientiously, and who use bread and wine, fo they ought to have charity for us if we dilufe them, because we believe they are ceased in point of obligation. 4. In anfwer to 1 'Tim. ii. 12. " But fuffer not a woman to teach, nor to usurp " authority over the man, but to be in filence;" they adduce the apostle Paul, Rom. xvi. who advises to help these women which laboured with him in the gospel: in our bible we are told of many women that did prophefy, Acts ii. 18. " And on my fervants, and on "my handmaidens, I will pour out in these days of my spirit, and "they shall prophely." 5. As to their not bearing of arms, Mat. v. 44. "Love your enemies, bles them that curfe you, do good to " them that hate you." 6. Their refuging of government oaths, James v. 12. " But above all things my brethren, fwear not, neither by " heaven, neither by the earth, neither by any other oath, but let " your yea be yea, and your nay nay, left you fall into condemnation," .

to

to be too inquifitive, how the dead fhall be raifed, and with what bodies. I Corinth. xv. 44. "There is a na-"tural body, and there is a fpiritual body;" the apolile Paul faith, "Flefh and blood cannot inherit the king-"dom of God, neither doth corruption inherit incorsup-"tion."

MORAVIANE. Some have transported themselves to Penfylvania. In a late act of the British parliament, \$749, in favour of their affirmation instead of an oath, they are called an ancient protestant episcopal church; they call themselves unitas fratrum or united brethren, as the quakers with very good propriety call themselves friends.

The moravians publish no creed or confession of faith, and can be characterised only from their manners and preaching in a whining canting enthuliaftical ftrain; in church government they are episcopal, but refuse taking of oaths as do the menenists in Holland, and the English quakers; they refuse carrying of arms, but willingly contribute towards the pecuniary charge of a war, which quakers refuse; they use instrumental mufick in their worship; in Philadelphia they have a cha-' pel with a fmall organ, and in the country at Bethlehem their grand fettlement about 50 or 60 miles from Philadelphia, at their folemn festivals, befides the organ they ufe violins, hautbois, and French horns; they poffefs 7000 or 8000 acres of land, and make confiderable fettlements; they are very zealous towards converting the Indians, fome indians have joined their fociety and live with them; they fend miffionaries abroad almost every where, even to Greenland, or Davis's straits; beginning of June, 1749, there arrived in Philadelphia three natives of Greenland, two young men and a young woman converted in their own country by moravian miffionaries; they came in a fhip belonging to the fociety which had carried thither two years fince a ready framed church †

+ These high latitudes produce no timber or other wood.

to be erected there; these Greenlanders \dagger in this ship had visited the brethren in several parts of Europe, in England, Holland, and Germany, and returned from Philadelphia in the same ship to Greenland. The moravians have a mission at Barbice in Surinam, and two Indian converts from thence, with the Greenland converts, and some converts of the Delaware Indians, met at Bethlehem.

1. The moravians * have among them in Penfylvania fome men of letters; Mr. Spenenbergh was a professor of fome fcience in Germany at Hall; but they chiefly confift of handicrafts, by which they carry on their improvements cheap. They encourage marriage amongst their young people; but to marry by casting of lots to preferve an equality among themfelves, which they affect very much, is not natural. By late act of parliament they are indulged with an affirmation inflead of an oath in thefe words, " I A. B. do declare in the prefence of " Almighty God, the witnefs of the truth I fay;" but if convicted of wilful and falle affirming, shall incur the fame pains and penalties as are enacted by law against wilful and corrupt perjury; but shall not by their affirmation be qualified to give evidence in criminal cafes (quakers affirmation is good both in criminal and civil cales) and not to ferve in juries.

After the general description of our plantation sectaries, these in each colony should have been enumerated gbut by anticipation they are generally to be found, r. Those of the four colonies of New-England are at full

 \dagger Here we may transiently observe, that at this cafual congress of Indians from lat. 5, lat. 40, and lat. 65, their hair, eyes and complexions were the same; only the further north the complexions were a small matter paler : but their languages were entirely distinc. The Greenland or Davis's Straits converts were clad in seal skins, hair on, but in general were a nasty fort of christians.

• So called from Moravia, a country adjacent to Bohemia; they feem to be a fprout from the old flock of the Huffites; the Huffite, difeiples of Hufs and Jerome of Bohemia, followed the tenets of the Waldenfes who appeared about 1310, and ot Wickliffe an English Lollard middle of 14th century.

length.

length. 2. In the province of New-York, belides the church of England, there are the mode of the kirk of Scotland, Dutch calvinists, and some lutherans of the confession of Augsburgh in Suabia of Germany. 3. In the Jerfies there are the church of England miffions, the Scots prefbyterians and quakers rule the roaft. 4. Befides the church of England miffionaries in the country of Penfylvania, there is one English church in Philadelphia, a very large congregation. In Philadelphia (and many in the country) there are two prefbyterian meetings, one called new light of Whitefield's inftitution, the other according to the Scots prefbyterian mode; and belides at a great distance in the country there is a congregation of cameronians or covenanters, who renew the folemn league often, and deny all fubmiffion to magistrates from the fovereign to the constable, because at the revolution the king by law affumed to be head of the church, and contrary to their covenant, in England established prelacy inftead of prefbytery. The quakers have two large meetings in Philadelphia, and a meeting almost in every township of the three first settled counties; in the other three counties they do not prevail; but every where preferve power by their two irrefiftible maxims of riches and unity; they have the fecret of keeping their young people up to thefe, and let them think and talk otherwife as they pleafe. 5. In Maryland there are feveral parishes according to the way of the church of England, and the most beneficial of any in our plantations, becaule as the number of taxables or congregation increases, being taxed at fo much tobacco per head, the value of their livings grows: whereas in Virginia the parfons are fixed at a certain falary of 16,000 wt. of tobacco per ann. without any regard to the increase of the congregation : in Maryland are ten or a dozen publick Roman catholick chapels, many prefbyterians, and fome quakers. 6. In Virginia there are no dissenters from the church of England, a few quakers excepted, their clergy are not noted for their piety and aud morality or exemplary life, and require miffionary reformers more than the congregationalifts of New England; it is faid that many of them are a fcandal to the profeffion of the church of England. 7. In North-Carolina fcarce any religion; there are two miffionaries and a few quakers. In South-Carolina there are church of England miffionaries, and the progeny of fome Scots prefbyterians. 9 In Georgia DE NIHILO NIHIL.

A few Mifcellany Observations.

All charities, excepting to poor orphans, other impotent poor, and children of indigent parents, are charities ill applied; charities towards converting people from one mode of religion to another, where both are confiftent with fociety, are not laudable.

By a general naturalization, foreigners may be imported to all our colonies; but to be intermixed with the British settlers, their publick worship of any denomination, and schooling to be in English; * thus in a few years, they will not differ from the British only in family names.

In New-England the congregationalifts at first acted with too much feverity, which occasioned fome inhabitants of Boston to petition K. Charles II. anno 1679, for a church of England, modestly called the king's chapel, (thus it is with ambassifadors chapels,) fignifying not an established, but tolerated or privileged place of worship.

The clamours concerning the perfecutions of differters from the congregational way were very ill founded; for inftance, 1725, the affeffors of Tiverton and Dartmouth were by a proper warrant from the province treafurer committed to jail for not affeffing the township towards common rates.

• A late proposal in Pensylvania of eresting German schools was most absurd.

SECT.

SECTION XI.

Concerning the COLONY of

CONNECTICUT.

The dominions of New York The dominions of New York The dominions of New-England. It is a plantation of industrious fagacious hufbandmen, inotwithstanding that fome of the meaner fort are villains, corruptio optimi peffima, especially in not paying their just debts to the inhabitants or dealers of the neighbouring colonies; in all their elections of governor, councellors, reprefentatives, judges, and other publick officers, by cuftom, they generally prefer the most worthy. Their eastern town-Thips have been tainted by the adjacent paper-moneymaking colonies of Massachusetts-Bay and Rhode-Island, and followed that fraud inflead of going into the better currency of their western adjoining province of New-York ; the Connecticut administration are at prefent fensible of this error, and have reduced all their publick fees and fines to proclamation money .-- I could not avoid this preamble, by way of eulogy upon the prefent adminiftration in their exemplary jurisdiction. They have subfifted as a government about ninety years, and from oeconomical experience, have formed a body of laws lately revised and published anno 1750, in a small folio of 258 pages, of the most natural, equitable, plain and concife laws for plantations, hitherto extant.

This colony at prefent is by royal charter, a coalition of two diffinct voluntary focieties, formed from articles

articles by lubicription of many planters, then called Hartford and New-Haven colonies. That of Hartford was from an emigration of fome difcontented rigids of fome townships adjoining to Boston (see vol. I. p. 444.) they went west southwardly, and planted the lands now called Springfield, Suffield, Enfield, Windfor, Hartford. Wethersfield, &c. fome of these were within the Massachusetts jurifdiction : those who were without the jurifdiction, by subscription of articles formed themselves after the model of Maffachusetts-Bay into a voluntary but not legal jurifdiction; their first election of magistrates was 1636; 1637 people from England under the direction of Mr. Eaton, Mr. Davenport, &c. purchafed of the Indians, and began another distinct voluntary jurisdiction upon Long-Island found called the colony of New-Haven, and continued one of the * united colonies of New-England until the reftoration of king Charles II. and was then with the faid colony of Hartford by royal charter incorporated into the prefent colony of Connecticut.

John Winthrop, fon of John Winthrop, governor of Maffachufetts-Bay, as agent from the lords Say and Brook, arrived at fort Saybrook 1635, and was afterwards chofen governor of Hartford colony. Upon the reftoration of king Charles II. he went home and obtained a royal charter incorporating Hartford and New-Haven colonies into one united colony; he was fourteen years governor of this united colony. +

* The united colonies of New-England from 1643 to 1663, were Maffachufetts-Bay, Plymouth, Hartford, and New-Haven.

During the confusions or civil war in England, the colonies in America were neglected, and acted at pleasure.

† John Winthorp, formerly governor of Connecticut, died in Boston, April 5, 1676, zet. 73, eldest fon of Mr. Winthrop, governor of Massachusetts, who died March 26, 1649.

He was much given to experimental philosophy and medicine; feveral of his recipes are still used by that family in charity to the poor; fome of his pieces are to be found amongst the first philosophical transactions of the London royal fociety; he was a great admirer of Van Helmont, and dealt much in antimonials.

z,

The

The first volontaire governor of Hartford colony was Edward Hopkins, born in England 1600, a Turky merchant of London; he returned to England, was in feveral offices there, and died in London 1657. Alternately with him Mr. Hains was chosen governor. After them George Willis, Thomas Wells, and John Webster were chosen governors.

Mr. Eaton, an east country merchant of London, one of the patentees of Massachuletts colony, with a parcel of planters 1637 fettled at New-Haven; after being for many fucceflive years governor, he died 1657; to him fucceeded Francis Newman, he continued three or four years governor and died. Mr. Leet, a lawyer, fucceeded and continued governor until Hartford and New-Haven were by royal charter united into one colony, and was their deputy governor under Mr. Winthrop while he lived, and after Mr. Winthrop's death continued ten years governor till his own death.

We fhould have mentioned that Robert, earl of Warwick, having obtained a grant 1630 from the council of Plymouth, procured a patent from king Charles I. of lands in New-England from Natraganiet river, as the fea coaft runs towards Virginia forty leagues, and eaft and weft from fea to fea or to Maffachufetts fouth line; this was made over to William vifcount Say and Seal, Robert lord Brook, and company; they built a fort at the mouth of Connecticut river, and called it Say-Brook; but finding no profit to accrue, they fold it to the fettlers 1644.

The prefent boundaries of Connecticut colony are its north + line upon Massachusetts-Bay province of about 72 miles, fettled 1713; its * easterly line upon the colony of Rhode-Island of about 45 miles, fettled 1728; its foutherly line is upon Long-Island found, being a fea

+ See vol. I. p. 416, by mistake it was faid to have been confirmed by the king in council.

* See vol. II. p. 93.

line

line of about 90 miles in a direct W. foutherly courfe from the mouth of Pakatuke river to the mouth of Byram river; its wefterly line as finally fettled with New-York, and by a deed of furrender from the colony of Connecticut to the king May 14, 1731, is as follows. This weft line was regulated thus, beginning at

20 miles east from Courtland's point || of Hudson's 'river; N. 12d. 30m. E. 52 and half miles to a continuation of the Maffachusetts and Connecticut divisional line in N. lat. 42d. 2m. * From the abovefaid projection from Courtland's point run S. 24d. 30 m. east, 7 and I quarter miles, then W. S. W. 13 miles 64 rod, then S. S. E. eight miles to the mouth of Byram river. A line parallel with the first two lines at the distance of one mile three quarters of a mile and twenty rod eastward is the prefent boundary between Connecticut and New-York, and the land comprehended by these parallel lines is called the Oblong granted by Connecticut to New-York as an equivalent for fome lands upon the Sound, fettled by, but not originally belonging to Connecticut; this was confirmed by the king in council. The Oblong contains about 69,000 acres, whereof 50,000 acres is in diffute, the property being claimed by Eyles and company, also by Hanly and company; + it remains a place of refuge for the miscreants from New-England and New-York.

The partition line between New-York and Connecticut as established December 1, 1664, runs from the mouth of Memoroncok river (a little west from Byram river) N.N. W. and was the ancient easterly bounds of New-York till Nov. 23, 1683, the line was run nearly the same as it is now settled.

Courtland's point is computed to be 40 miles as the river runs from the city of New-York.

• This N. W. corner of Connecticut colony is 20 and 3 qr. miles from Hudson's river about 9 miles above Kingston, 1 mile below the mouth of Biopus river, and about 50 miles below Albany.

+ See New-York settion.

Vot. II.

Duke.

Duke of Hamilton's grant took in part of the prefent colony of Connecticut, this grant was from Narráganfet-Bay to Connecticut river, and back into the country until it met with Maffachusetts south line; but as this was never purchased of the native Indians, and never fettled, it may be deemed as obfolete; there have been fome attempts to revive this claim, but never profecuted.

The Indians almost extinct; they have a small referve upon the east fide of Connecticut river at Pistol point in Weathersfield; a very fmall parcel of Nianticks about 5 or 6 miles weft from New-London; there is an Indian referve of - acres upon New-London river in the northern parts of that township called Mohegins.

In Connecticut are eight convenient shipping ports for fmall craft, but all mafters enter and clear at the port of New-London, a good harbour 5 miles within land, and deep water, here they build large ships, but their timber is fpungy, and not durable, it fplits or rives well into staves; small vessels are built at Saybrook, Killingfworth, New-Haven or Wallingsford river, &c. In the Sound the tide flows 6 to 8 feet, the deep water is upon the Long-island fide.

Foreign veffels entered and cleared in the port of New-London from the 25th of March 1748 to the 25th of March 1749, scarce any registered more than 80 tuns, and generally are West-India traders.

Here, as in all other British colonies, the collector and other cuftom house officers, are by warrant from the commissioners of the customs in confequence of an order from the treafury ; the commissioners of the treafury direct all officers of the revenue.

In

62

In Connecticut the government is in the hands of the reprefentative of the freemen or people, * as was also the property; but at prefent no colony or general lands remain (fo it is in Rhode-Island) excepting fome Indian referves.

In the reigns of Charles II. and James II. the colony of Connecticut (as also of Rhode-Island) in the case of their charter, did not stand a law suit at home, as did Massachusetts-Bay, but tacitly dropt their charter or jurisdiction, and upon the happy revolution tacitly reasfumed their jurisdiction, which was deemed good, and subsists to this day.

This colony (before a charter granted them, by the two diffinct appellations of Hartford and New-Haven) was two of the four affociated colonies of New-England; Old Maffachufetts and Old Plymouth were the other two; the quota of charges of the two Connecticut colonies of Hartford and New-Haven was equal to that of the old colony of Maffachufetts-Bay.

As to their wars or rather bickerings with the Canada French and their Indians, as also with our intermixed Indians in their infurrections, they were in common with Maffachusetts-Bay colony and province; we refer to the section concerning Massachusetts-Bay. What happened prior to the Connecticut royal charter, see vol. I. p. 189; their share in the reducing of Port-Royal, now

* Our colonies are of various natures. 1. In fome the government and property are in the crown; South-Carolina, North Carolina excepting the property of the earl of Granvile's one cighth fhare; Virginia, excepting the property of the north neck which belongs to lord Fairfax; New-York, New-Hampfhire, Nova-Scotia; and Newfoundland. 2. In fome, both government and property are in the proprietarics, Maryland, and Penfylvania. 3. In fome, the government and property is in the reprefentatives of the people, Connecticut and Rhode Ifland. 4. In others, the government is in the king, but the property is in the reprefentatives of the people, as in Maffachufetts-Bay. 5. Government in the king, and property in a certain body of proprietors, as in New-Jerfies. 6. Georgia may be faid not digefted.

> Being in all about a hundred reprefentatives.

Every township sends two representatives excepting those marked * which are new or poor townships, pay no colony rates, and consequently send no representatives to the general assembly or legislature : Haddam and East Haddam fend only one representative each.

The freemen of each town shall in September meet to chufe representatives for the general affembly, and twenty perfons in nomination for the next May general election. In April the twelve affistants to be chosen by the freemen of each town out of the twenty nominated perfons, to be fent fealed up to the general affembly, with the votes for the governor, deputy governor, fecretary and treasurer; as also votes for the representatives for the May affembly called proxies, returned by the conffable of each town.

The affiftants and the reprefentatives are paid out of the colony treasury.

Annually two general courts, the firft at Hartford, called the court of election, fecond Thurfday in May, where the freemen shall elect a governor, deputy governor, twelve affistants, treasurer and secretary, the second at New-Haven second Thurfday in October : in the general court shall consist the power of making laws, granting levies, disposing of colony lands, erecting of jud.catories and officers, granting release in cri-M 4

minal or capital cafes, diffolving and proroguing of themfelves. The governor, deputy governor, or fecretary may call a general court upon emergencies. No member of the general court during its feffions, to be arrefted, except for treafon or felony. Every town may fend one or two deputies. Previous to all other bulinefs, the houfe of reprefentatives or deputies are to chufe a fpeaker and clerk. They are the only judges concerning their own election. Every day's abfence, fine 10s. to be paid to the colony treafurer. In an equivote the governor in the upper houfe, and fpeaker in the lower houfe, fhall have a cafting vote.

Courts of judicature.

All cafes exceeding the value of 40s. shall be determined by a jury of twelve men in common law.

Annually in January at a town meeting there shall be chosen jury-men to serve in the several courts, qualification 50s. at least freehold rated in the general list; the names of the jury-men so chosen shall be put in a box with a lock, and when any number of jury-men are summoned to serve at any court, the town constable shall at random draw so many out of the box, as is required from that town; any juror so drawn, but not appearing at the court, penalty 10s. and deficiencies in juries to be filled de talibus circumstantibus. The number of jury-men to be annually chosen in each town,

N. B. I cannot account, why Hadham and Eaft-Haddam, Colchefter, Bolton, Willington, Toland, and Litchfield in the county of Hartford; New-Milford, and Durham in the county of New-Haven; Woodbury in the county of Fairfield; and Killingley in the county of Windham, who fend reprefentatives to the general court or affembly, do not fend jurors to the courts below.

All judges and justices are appointed by the general affembly, and commissioned by the governor with the province feal; the governor, deputy governor, and aflistants, are justices ex officios

As to the courts, where though the cafe may be of confiderable value, no jury is required; there is

1. The court of probates.

2. Court of vice-admiralty are the fame officers as for New-York.

3. Jufficiary court of admiralty; some of the judges are from New-York.

There

There shall be a superior court of judicature, ambulatory from county to county; this court to consist of one chief judge and four other judges (whereof three a quorum) and shall have cognizance of all pleas of the crown that relate to life, limb, or banishment; of divorce; of all pleas, real, personal, or mixt; the same to try by a jury or otherways, proceed to judgment, and award execution. This court to be held in each county twice annually. The chief judge, or in his absence, any three of the judges, may call a special court upon extraordinary occasions. Any one judge may open and adjourn the court; and where no judge prefents, the fmeriff may adjourn the court to next day. The judges to appoint and swear their own clerk.

An interior court of judicature to be held in each county twice a year, by a judge with two or more justices of the quorum commissioned for that purpose; to determine by a jury or otherways all civil causes, real, perfonal, or mixt, as also all criminal matters, not extending to life, limb, banishment, or divorce. Have power to levy a county tax.

A fpecial county court may be called upon any extraordinary occasion, and may adjourn themselves to any distant time, to appoint and swear their own clerks and county treasurer. Every chief judge or president, or moderator in any civil court, shall have a casting vote.

A court of probate confifting of one judge and a clerk by him to be appointed, to be held in each of the following diffricts, called the diffrict of Hartford, Newhaven, New-London, Fairfield, Windham, Plainfield, Guilford, Woodbury, Stanford, Eaft-Hadham, Litchfield, Danbury, and Norwich. In difficult cafes may call in two or three juffices of the quorum. Any perfon aggrieved may appeal and review to the next fuperior rourt of the county.

The judges of probates to enquire after all escheats, and give notice to the colony treasurer, who is to make fale by publick vendue of all escheats for the benefit

of

of the colony; but if afterward any just title of an heir appear, it shall upon reasonable terms be restored.

Executors after two months probate, neglecting to register an inventory of the deceased's estate, shall forfeit 51. per month. Executors refuling to accept, administration shall be granted to the next of kin, or principal creditors. Executors neglecting to prove a will after 30 days, shall forfeit 51. per month. Administration upon intestate estates, to the widow or next of kin, atthe difcretion of the judge of probates. The diftribution of intestate estates to be, 'one third of the personal estate to the widow for ever, and her dower of one third of the real eftate for life, the remainder to be equally divided among the children, but the eldeft fon to have a double fhare; and if all daughters, they fhall inherit as copartners; the division of the eftate to be by three fufficient freeholders upon oath appointed by the judge of probates. The portion of any child dying before of age or married, shall be divided among the furvivors. No representatives to be admitted among collaterals after brothers and fifters children. Where no legal reprefentatives, the widow shall be allowed one moiety of the perfonal eftate for ever, and one third of real eftate for life. All fales of lands made by administrators shall be void.

Marriages. No perfon to be married unlefs publifhed in fome congregation, or publickly pofted up eight days before fuch marriage. No perfon to join people in marriage, befides a juftice in the county or an ordained minister of the parish where the parties dwell. Any juftice or minister marrying perfons without publication, and certificate of the confent of the parents or guardians, penalty 201. 'Any man endeavouring to obtain the affections of a maid, without liberty of courtship from the parents or guardians, for the first offence 51. &c. — Degrees of kindred forbidden marriage, are according to the levitical law, and fuch marriages are declared to be null and void, and to fit

fit upon the gallows with a rope about their neck, and ftripes not exceeding forty, and to wear the letter I on their arm or back. If any perfons within faid degrees do marry or cohabit, or perfons cohabiting after divorce; penalty as adultery; excepting cafes of absence, as the law directs, where the superior court may grant liberty to marry again.

A man found abed with another man's wife, both to be whipt not exceeding 30 ftripes. Men or women wearing contrary apparels, fine not exceeding five pound.

The age of confent for marriage is to the man 14 æt. to the woman 12 æt. No perfon unmarried fhall keep houfe of himfelf, without confent of the town, penalty 20s. per week. Contracts of perfons under parents, guardians, or mafters, are not valid. The felectmen, and overfeers of the poor, with the affent of the next juffices, may bind out poor idle children, boys to 21 æt. girls to 18 æt.

The dower for widows where no jointure was made before marriage, is one third of the perfonal effate without limitation, and one third of the income of the real effate for life, but to keep it in good repair.

All perfons of right understanding æt. 21 or upwards, though excommunicated; by deed or will if 17 æt. and upwards, may difpose of personal estate. The age for chusing of guardians shall be 14 æt. for males, and 12 æt. for females.

Where parents or masters neglect children under their care, the felect-men may bind them out, boys to 21 æt. girls to 18 æt.

Ideots, impotent and diftracted, shall be under the direction of the county courts, to be provided for by the following degrees of kindred; father or mother, grand-father or grand-mother, children or grand-children, if able. The estates of such (if any) by a proper order may be fold for their maintenance. Where no sufficient relations or estate does appear, they shall be supsupported at the charge of the town where they live. The felect-men are to appoint them guardians.

Idle perfons and drunkards, by warrant to be brought before a juffice; the goods of fuch perfons shall be under the management of the select-men, who may sell all or part (not real, without an order of the general assembly) of their estates, and on deficiency, dispose of their perfon to service for a certain time, to pay their just debts. May appeal from the select-men to the county court. All such perfons are disabled from making of contracts.

In this colony is no particular court of chancery; in fome cafes the general court act as a court of chancery or equity.

Jufficiary courts of over and terminer, called affizes and general goal delivery, is the fame with the fuperior court.

The court of vice-admiralty, the fame judge and other officers of that court, which ferve for the province of New-York, ferve also for the colony of Connecticut.

The jufticiary court of admiralty for trial of crimes committed at fea confifts of judges, fome from the colony of Connecticut, and fome from the province of New-York, purfuant to the inftructions from home.

A justice may determine in any cafe not exceeding 40s. if land is not concerned; if the judges find that the jury have not attended to the evidence, they may caufe them to return to a fecond and third confideration, but no more. The judges to determine in cafes of law, where the jury brings in a non liquet or fpecial verdict, viz. " if the law be fo in fuch a point, then we find for the plaintiff, but if the law be otherways, then we find for the defendant." May appeal from a juffice to the county court, and from thence may review to the next county court, or appeal to the next fuperior court; from the review to the fecond county court, may appeal to the next fuperior court, but without any review in the fuperior court ;

court; but if from the first county court he appeal to the superior court, he is admitted to review in the next superior court. In a debt upon bond, bill, or note, for a value not exceeding 40s. no appeal to be allowed, and if not exceeding 101. no appeal is allowed from a county court.

No appeals are allowed to the king in council. Some have gone home by way of complaint at a confiderable charge, but no relief, excepting in the cafe of John Winthrop, Efq; who procured a declaration of the king in council, " That their law concerning dividing land inheritance of an inteftate was contrary to the law of England, and void:" but in fubfequent cafes this colony have no regard to the declaration.

The general affembly hear writs of error against proceedings of the superior court; and in some instances act as a court of chancery.

Where any other court exceeds their jurifdiction, the judges of the fuperior court may grant a prohibition with the fame power, as the king's bench in England

Sheriffs to be appointed by the governor and council called affiftants, giving fecurity; in cafe of riots or great oppofitions in his office, may raife the militia of the county, and to be under his command.

Each county appoints one king's attorney.

In cases of account, the court may appoint three auditors.

In cases of abatement of a writ, the plaintiff upon his paying to the defendant his costs to that time, may amend the defect and proceed. No writ shall abate for a circumstantial **pift**ake.

In all actions before a justice, fix days warning is required; before a county or fuperior court, twelve days.

Any defendant upon default, paying down to the adverse party costs, may be admitted to the tryal.

All titles of lands to be tried in the county where the land lies.

No perfon to be kept in prifon, where fufficient estate does
does appear; where no effate appears, the debtor shall satisfy the debt by service.

Fees. For attending the general court, per diem, to an affiftant 6s. to a representative 4s. and 4d. per mile, travelling out; chief juffice of fuperior court 12s; affiftant judges 9s; county courts chief judge 7s; juffices of the quorum 5s; licence to a tavera keeper 3s; acknowledging any inftrument 6d; to the fecretary for the colony feal 1s; to the general affembly for every petition 11: attornies fees, fuperior court 8s; inferior or county court 4s; goalers fees, commitment and difcharge 2s; for dieting each prifoner per week 2s; to a county furveyor of lands and for his horfe, befides expences, 4s. per diem. N. B. These fees feem to be in bills of the emiffion equal to three and half old ten. of New-England common currency.

Publick houses of entertainment for each town to be nominated in January annually by the magistrates, select-men, constables and grand jury-men, be approved of by the next county court, and licensed by them: the house-keeper not to fuffer fons not of age, or fervants, to fit tipling, fine 6s; ftrangers and foreigners excepted : none to keep company in publick houses evening next following the Lord's day, or days of fast; any perfon found in a tavern (fome exceptions) the night before and the night after the Lord's day, or after nine o'clock in any other night, fine 3s; by a fpecial warrant, houfes may be broke open in fearching after persons in taverns; inhabitants not to fit in a tavern drinking above one hour at a time, excepting upon extraordinary occasions, fine 6s; tavern hunters to be posted up at the tavern doors with a prohibition of entertaining them upon penalty of 31; no tavern-keeper to bring an action for drink, fold after two days; none but licenfed houfes to fell ftrong liquor in quantities exceeding one quart of wine or spirits, or one gallon of any other liquor, fine 31. first offence, 61. fecond offence, and fo doubled every offence; if not able

able to pay, to be whipt not less than 10, and not exceeding 15 stripes every offence.

In Connecticut (and all over New-England every conflituted township is a CORPORATION;) the qualification for a voter or freeman is 21 æt. and upwards, with a freehold rated in the common lift at 50 s. or perfonal estate rated at 401. besides his poll or perfon. Township meetings or assemblies may make prudential laws or orders, penalty of transgression not to exceed 20 s. Township officers to be chosen annually in December, viz. select-men not exceeding seven, listers (assession) not exceeding nine, &c. all elections to be by a major part of the qualified voters. Town clerks to register marriages, births, and burials.

No perfon to be admitted an inhabitant of a town, but by confent of the felect-men; no ftranger to refide exceeding—days without liberty from the felect-men, and the entertainer finable. A ftranger continuing after being warned out, fine 10s. per week, or whipt not exceeding ten ftripes. One year's refidence qualifies a perfon for an inhabitant. A ftranger entertained above four days, the entertainer fhall be at the charge if taken fick. Vagrants to be ordered from conftable to conftable back to the place they came from; if they return, fhall be toties quoties whipt not exceeding ten ftripes.

Annually first Monday of March the proprietorships not constituted into townships, are to meet and chufe a moderator, clerk, treasurer, and a committee to manage affairs in the intervals of their general meetings. By a major vote computed by interess they are to be chosen, and may levy taxes as may be needed. Sufficient partition fences to be five foot if rails or wooden fences, stone fence four feet high; or hedges, brooks, ditches, creeks, rivers, in the judgment of the fenceviewers, equivalent thereto. No person to feed his cattle in his neighbour's land, as if common field, without leave, from 10th April to 10th October.

....

Taxes

Of CONNECTIOUT:

Taxes confift in the articles of rates, impost, and excife.

Rates comprehend the poll-tax. Every perfon an-nually, at or before September 10, to give in a lift of his polls and rateable eftate : those lists to be returned to the general court in October :- perfons to be four-folded who leave out part of their estate, or who give in no estate; the lifters may relieve people overcharged, may appeal to a justice and to the felect-men of the town. ____ Every male perfon from fixteen to feventy æt. to be fet in the lift at 18 l. (governor, deputy governor, affiftants, ministers of the gospel, president and tutors of the collegiate school, students there, school-masters and infirm perfons are excufed) every ox at 4 l; each fteer, cow, or heifer of three years and upwards at 31; steer or heifer of two years at 40 s; each steer or heifer of one year 20 s. Each horfe or mare of three years old and upwards at 31. of two years old 40 s. of one year old 20 s. Every fwine one year old and upwards 20 s. Each dwellinghouse with adjoining land 20 s. per acre; plow and mowing land in fome counties 15 s. in others 10 s. in others 7 s. 6 d. per acre; boggy mowing meadow land 5 s. per acre; all upland pasture or mowing 8 s. per acre. Peculiars to be affeffed by the nearest town. Veffels at 15 s. per tun. The prefident of Yale college, and all ministers of the gofpel, their effates in the towns where they live are exempted. All allowed attornies at the law, 50 l. their faculty; and others higher in proportion to their bufinefs. All traders, &c. to be rated for their faculties at the diferction of the lifters.

RATES. In our American colonies, in affeffing of rates, real eftate is generally valued at feven years income, which is favourable. In Great-Britain lands are fold at twenty to thirty years purchafe.

In Connecticut 1 d. rate, produces 4000 l. to 5000 l. currency.

IMPOST. There is a high duty upon the exportations of all timber and lumber to the neighbouring govern-Vol. II. N ments

. .

178 A SUMMARY, HISTORICAL and Political, &c.

ments of Maffachusetts, New-York, Rhode-Island, and New-Hampshire; this is defigned in lieu of a prohibition, that after fome years the colony may not be deftitute of those materials. The impost upon rum is per gallon 1 d. if imported directly from the West Indies or sugar islands, and 2 d. from all other parts; a drawback is allowed upon its exportation.

All foreign trading veffels not owned in the colony at clearing, to pay powder money to the naval officer.

The governor with advice of the council, upon occafion, by proclamation may for a time prohibit the exportation of grain and other provisions; delinquents forfeit these goods by an order obtained from a special county court.

EXCISE 3 d. per gallon on all wine and diffilled liquors; this is applied to defray county charges. The county courts to appoint receivers of the excife, fees 2 s. in the pound. Receivers may agree with the publick houses by the year.

The act regulating maritime affairs extend from p. 147 to p. 152, in twenty-feven fections in their law book; does not contain any thing peculiar.

By the act for forming and regulating the militia. The governor to be captain general, the deputy governor lieutenant general: the military companies of the feveral townships to be formed into 13 regiments of foot, and to each regiment of foot, one troop of horse of 64 men, officers included. The field officers of each regiment, colonel, lieutenant colonel, and major, to be appointed by the general affembly, and commissioned by the governor. Once in four years to be called together for regimental exercise. All male perfons from 16 to 50 aet. to attend military musclers, excepting Indians and negroes, fecretary, justices, church officers, members of the collegiate school, allowed physicians and furgeons, representatives, school-masters, attornies at law, a miller

to

to each grift mill, ferry men, conftant herdfmen, conftant mariners, fheriffs, conftables, and impotent perfons. All militia lifted foldiers to be provided, belides his accoutrements, with one pound of good powder, four pound of bullets, and twelve flints. In each company of 64 foldiers befides officers, there fhall be a capt. a lieut. and four ferjeants; where 32 foldiers, there fhall be a lieut. enfign, and two ferjeants; where but 24 foldiers there fhall be two ferjeants. The companies to be trained four times a year, every foldier for not appearance to pay 35.

The arms and ammunition of all perfons in the government to be viewed on the first Monday of May annually. Each trooping horse freed from rates and impresses. Diforders on training days, may be punished by laying neck and heel, riding the wooden horse, or 15 s. The fines to be applied for colours, drummers, halberts, banners, trumpets, trumpeters, and other charges of the company. The colony to provide a magazine of powder and shot, and the selectmen of each town to provide military stores for their towns.

The felect men may appoint watches and wards in their feveral towns.

Any perfons may form themfelves into artillery companies fo called, for promoting of military exercises.

Deferters from the king's fervice sea or land, fine 201. and half a year's imprisonment.

The training militia of this colony may confift of about 15,000 men. 1740, at a great ftruggle in the election of a governor, there were about 4000 freemen voters. 4

4. In the house of representatives of Mässachusetts-Bay, in their journal June 3, 1748, they declare that Connecticut is two thirds as big (meaning in perfons and effates, but not in extent of territory, Plymouth and province of Main included) as the province of Massachusetts-Bay. With submission, I find Connecticut not half so big in numbers and effates as Massachusetts-Bay. At times by the prudent N 2

No

No impresses of perfons or cattle, but by warrant, with a reasonable allowance for service, and for damages if any happen.

Their produce, manufactures, trade and navigation.

Connecticut uses fcarce any foreign trade; lately they fend fome fmall craft to the West-India islands; they vent their produce in the neighbouring continent colonies, viz. wheat, Indian corn, beaver, pork, butter, horse, and flax. For some years they have been endeavouring to raise hemp and flax; flax may succeed, but hemp seems to require a stronger soil and warmer climate, it thrives better further south, as in Pensylvania; that from the northern parts, does not dress so

administration of the jurifdiction of Connecticut colony, their taxes were only 4000 l. to 5000 l. currency per ann. whereas the polls and rates of the Massachusetts-Bay, were at the same time per ann. about 400,000 currency.

1742, by the valuation on Massachusetts-Bay were 41,000 white males taxable for polls; allowing for concealments they may be effimated at 50,000 fencibles; which multiplied by 4 according to Dr. Halley's rules, makes 200,000, men, women, and children; and in Connecticut about 100,000 people. In general the nearest effimate that can be made of the people in New-England, is

Maffachufetts-Bay	200,000
Connecticut	100,000 .
Rhode-Ifland	30,000
New-Hampshire	24,000
· · · · ·	

354,000

One fourth part of these are 90,00 fencible men, one fifth is 70,000 fencible marching men, sufficient to swallow up the French of Canada, and Cape-Breton islands at a few meals or encounters.

In political ballances, the number of inhabitants is a grand article. In Great-Britain and Ireland are about 10 millons of people, in France about double that number, in Spain about five millions, according to the duke de Riperda's estimate, in the seven United provinces called Holland, about three millions; but the produce of trade called money, fometimes implies the inferiority of fencible men, thus the general ballance of trade being in favour of Holland, it becomes the center of exchange for all Europe.

Digitized by Google

kindly,

kindly, nor whiten fo well. The Ruffia hemp exported from the northern parts of Archangel, Narva, Revel, and Riga, is brought down from the fouthern parts of Ruffia.

Wool, hemp, flax, and iron, are the general materials of all our manufactures. The raifing and manufacturing of hemp, flax, or any other herba into cordage, cauras, and other linen, is a general and great advantage without any detriment to our mother country; it may be fome difadvantage to our traders to Ruffia, Germany, and Holland; but private lucration ought to give way to a publick good. The linen bufinefs employs variety of people, pulling the flax, watering of it, breaking, fwingling, hackling, fpinning, weaving, &c.

Some years fince, the government of Connecticut eftablished a corporation for commerce, called the New-London society; but in the fraudulent humour of these times, contrary to the design of their institution, they soon began to manufacture printed society notes to be imposed as a currency: the government in their wonted prudence declared it a nusance; these bills were forbid a currency, and called in at the charge of the society.

In all countries the inhabitants may be reduced to three claffes, 1. Villinage or coatters. 2. Yeomanry or farmers who improve their own freeholds; and 3. Gentry who live by the rents of their effates farmed to others; the fecond fort is generally our cafe.

Irish potatoes or folanum esculentum tuberosum, C.B.P. is much planted in New-England, thrives well, and is of good use; varieties here, are the rough coat, red coat, flatwhite, and long white : my taste prefers the rough coat.

* There is copper ore in Simfbury hills, about a dozen

miles

• I learned from Mr. Baden, as was hinted before, an ingenious miper and effayer fent from London a few years fince by a company of gentlemen, to explore New-England for metallick ores and minerals; he found, 1. Bog and rock iron ore plenty, but not profitable. 2. Some lead ore, but io intermixed with rock and ipar, as not to N 3

miles west of Connecticut river; it has been wrought, but did not turn to account; at prefent it lies dormant.

For their wheat and Indian corn; fee elfewhere, as also for their merchantable falt pork.

Ship building and ftaves are their chief lumber export.

+ Wool not fufficient for the house confumption of the colony.

A very confiderable produce in the colony of Connecticut is a feminary of learning, or fchola illustris, called a collegiate college, and when professions in feveral fciences

turn to any account. I. In Simfbury near Connecticut river, there were three different companies wrought for copper ore; Mr. Belcher and Cafwell, they also erected a fmelting house in Boston, those turned to no account, and the affair dropt. 2. Some affociated merchants of Bolton, got a leafe of some adjacent copper mine lands, they carried it on with vigour, and fent quantities of their ore to England, the company found the scheme turn to no advantage, and defined. 3. A company of bites, rented fome adjoining lands; they pretended to find fome shoades, a good symptom for veins; they put some of these pretended rich shoades aboard of a small sloop; this floop perhaps by contrivance funk in Connecticut river; the owners did not find it adviscable to weigh the ore, left the fallacy of the shoades might be discovered. Schaylers rich copper mines in the Ierfies are not much wrought, the owners keep them deposited as old There are some symptoms of copper ore in Attleborough, but gold , not explored. In Attleborough there is a magnatick iron ore, it yields a red shot iron, not good, (see vol. I. p. 540.) In Attleborough Gore is fome copper ore, but fo intermixed with the iron rock ore, as to render both unprofitable.

Mr. Baden found fome allom flate or flone; but no vitriol flone er pyrites, fuch as is found both fides of river Thames in England, along the Kentifh and Effex flores; no falt fprings; we have rudle, which ferves to mark theep, and may ferve as a ground colour for priming, as Spanish brown, and black lead in Brimfield, these are not metallick ores, but boles or terras; of okers there are none of any value, fome yellow oker.

In New-England, they do not forge bar iron fufficient for their home confumption, by bloomeries and refineries; they import from England, New York, Jerfies, Penfylvania, and Maryland.

+ England is always jealous of our exporting theeps wool to foreign market, but it may be depended upon, that our New-Bngland wool is not fufficient for home confumption; and we import many woollens from Great-Britain. Some years fince, but not at prefent, fome was fhi, ped from Nantucket to France, very fmall quantities.

are

Of CONNECTICUT.

are endowed, it will be called an university; this plant is vigorous and thriving, under the cultivation of the prefent prefident, the worthy reverend Mr. Clap.

Some account of Connecticut college, called Yale college in New-Haven.

Anno 1636, the general affembly of Maffachufetts-Bay (fee vol. I. p. 543.) granted fome money towards erecting a college or collegiate school in Cambridge near Bofton; the people of Connecticut contributed fome fmall matter; and after fome years, becaufe of the diftance and charge, their ministers and some in civil authority prefented, 1701, a memorial to the general affembly, defiring that a collegiate fchool might be erected and endowed, and proposed 10 ministers of 40 æt. and upwards, as truftees for ordering the fame; furvivors to fupply vacancies, feven to be a quorum: accordingly a charter * for this purpose was granted October 1701, to appoint officers, make laws, but not repugnant to the laws of the civil government, to give degrees; poffefs lands not exceeding the yearly value of 500 l. and other eftate, and to receive yearly out of the publick treasury, 100 l. currency +; Saybrook was refolved upon as a proper place, and the truftees chole Mr. Pierfon minister of Killingworth for rector, 4 and until a place could be fitted up in Seabrook, the scholars were to meet at the rector's houfe in Killingworth, where they continued till the rector's death, 1707. Mr. Heinmingway, fince minister of Easthaven, was the first scholar and folus about half a year. Several of the truftees gave books out of their own libraries to begin a library for the college; Mr. Lynde of Saybrook gave a house and land; major James Fitch of Norwich gave land in

• This charter was drawn up by Mr. fecretary Addington of Maffachufetts-Bay.

+ Equal at the time to about -01. sterl.

4 The rector and 10 truffees conflituted the corporation.

Kil-

Killingley, which were afterwards, 1730, converted into 628 acres in Salifbury. There was a general contributton throughout the colony.

... Upon rector Pierson's death, Mr. Andrews of Milford was chosen pro tempore until they could procure a refident rector, and the fenior class was removed to Milford, the others to Saybrook under the care of two tutors; they boarded at private houses, and went to school at their tutors chambers under the infpection of Mr. Buckingham of Seabrook, one of the truftees, and continued in this flate about feven years; in this fpace of time fundry donations of valuable books were made to the library, particularly by Sir John Davie of Groton upon his recovery of the family honours and eftate in England. The greatest donation of books was from the generofity and procurement of Jeremiah Dummer, Elq; agent in London, ann. 1714, he fent over above 800 volumes of valuable books, whereof about 120 volumes at his own coft, and the reft by procurements from Sir Ifaac Newton, Sir Richard Blackmore, Sir Richard Steel, Dr. Burnet, Dr. Woodward, Dr. Halley, Dr. Bentley, Dr. Kennet, Dr. Calamy, Dr. Edwards, Mr. Henry, Mr. Whilton, &c. governor Yale of the East-India company, fent 300 volumes: but a great part of this valuable library was loft in a tumult upon the removal of the library from Seabrook.

There were divisions concerning a fixed fituation for the college, and in the mean while, 1718, it was agreed that the fludents might go where they faw caufe to be inftructed: the greater part went to Wethersfield under the inftruction of Mr. Elisha Williams, afterwards rector, fome remained at Seabrook under the tuition of Mr. Hart and Mr. Ruffel.

1716, the majority of the truftees voted a convenient college and rector's house to be erected in New-Haven, which was effected accordingly, but with much opposition and contufion from the northern and eaftern parts

of

of the colony; * the truftees notwithstanding held their first commencement at New-Haven in September 1717.

The forefaid Elihu Yale, Efq; an East-India merchant, from his correspondence with Mr. Saltonstal governor of Connecticut, bestowed in the whole, 1001. sterl. in three hundred volumes of books, and about 4001. fterl. in effects, and by will defigned 500 l. fterl. more, but this was never accomplished; 1718 Mr. Dummer fent more books value 30 l.; and Jahaleal Brenton, Efq; of Newport, Rhode-Island, gave 501. fterl. The college building was raifed October 3, 1717, 170 feet long, 21 feet wide, and three stories high ; cost about 1030 l. sterl. contained above 50 ftudies, befides the hall, library, and kitchen. September 12, 1718, there was a splendid commencement, and the truffees gave it the name of Yale college, and fent a letter of thanks to Mr. Yale for his generofity to the colony, and letters of thanks to Mr. Dummer, and general Nicholfon, for their donations of books. In December following, upon removing of the books from Saybrook, there happened a tumult; about 250 of the most valuable books, and fundry papers of importance, were conveyed away by unknown hands, and never could be recovered.

1719, the truftees chose Mr. Cutler, minister of Stratford, to be a resident rector, and for his accommodation a rector's house was built 1722, cost by subscription, 351. by impost upon rum, 1151. and some part out of Mr. Yale's donations by fale of lands 1201. and by a general contribution 551.

1722, at the commencement he declared himself to be of the church of England, and defigned for episcopal orders, which by going to England he obtained with a D.D. at prefent he is a missionary in Boston. The college con-

* The affair was referred to the general affembly 1717, the upper and lower house differed, and the reference dropt. N. B. last year there were scholars residing at New-Haven 13; at Wetherssfield 14, at Saybrook only 4.

tinued

tinued without a refident rector four years, the forefaid Mr. Andrews performed this office at their commencements.

1723, the general affembly gave to the collège an additional explanatory charter, + viz. that a truftee might refign at pleasure, that seven truftees should be a quorum and to act by a majority, that a minister of 30 zet. might be chosen a truftee, and that the rector should be a truftee ex officio.

Mr. Daniel Turner of London fent them a collection of valuable books, 28 volumes in phyfick and furgery; the college conferred upon him a diploma of M. D.

1725, September 29, the truftees chofe Mr. Elifha Williams minister of Newington parish in Wethersfield as rector, and upon giving his confent to the confession of faith and rules of church discipline agreed upon by the churches of the colony of Connecticut, he was installed rector by the truftees; he reformed the college very much, and advanced useful and polite literature.

In October, 1732, the general affembly granted to the college 1500 acres of land, being 300 acres in each of the new towns of Norfolk, Canaan, Gofhen, Cornwal, and Kent: which after fome years may be valuable.

1732, the rev. Dr. George Berkley dean of Derry, (late) bifhop of Cloyne in Ireland, came over to found an epifcopal college in the continent of North-America, or the Britifh Weit-India iflands; he refided fome time at Newport of Rhode-Ifland, and purchafed a country feat with about 96 acres of land. For certain reafons, he gave over his defign of erecting an epifcopal college, and returned to England; although there was fomething peculiar in his manner, he was a gentleman of general learning, and of a generous difpolition to propagate the fame among mankind; he was a good judge of the world, and of all our colonies and feminaries of learn-

+ It is faid to be drawn up by governor Saltonstal.

At the first founding of this college, it was ordered, that where no fpecial provision was made by the trustees, the laws of Harvard college in the province of Massachusetts-Bay should be their rule.

ing ,

ing; (the epifcopal college of Williamsburg'in Virginia not excepted,) he gave the preference to the college of Connecticut, a laudable colony; he gave his farm in Rhode-Island to this college, the income to be premiums from time to time for the best Greek and Latin scholars in the judgment of the president and senior episcopal missionary of the colony; this has been some incitement to excel in the classics. He gave them a fine collection of books of near 1000 volumes, whereof 260 were folio's, 400 l. sterl. value. These donations were made partly out of the dean's own estate, but principally out of the monies put into his hands for founding the episcopal college.

Rector Williams, by reason of indifpositions, October 31, 1739, refigned, returned to his own estate in Wethersfield, and was employed in a civil and military capacity. The reverend, learned, worthy, and mathematically ingenious Mr. Thomas Clap, minister of Windham, succeeded; and in April 1740, gave his affent to the Seabrook articles 1708, of faith and discipline; he had been 14 years minister of Windham, he was installed rector: his first effay was to form a new body of laws, and to place the books of the library in a proper distinct order, to be with facility come at; this catalogue is printed.

1742, the general affembly augmented the annual grant to the college, whereby they were enabled to fupport three tutors and a rector, (formerly one tutor carried on two classes) the prefident requires confiderable encouragement, as he is obliged to perform the office of prefident, professor of divinity, professor of mathematicks, and of a tutor in ordinary.

1744, Anthony Nougier of Fairfield, by will left to the college 27 l. fterl to be put to intereft.

The affembly was petitioned by the truftees, for a new and more perfect charter, whereby the college was to be incorporated by the name of the prefident and fellows (not truftees) of Yale college in New-Haven. This was approved of by the name of an act for the more

more full and compleat establishment of Yale college, &c. dated May 9, 1745, it is ordained, 1. That + Thomas Clap, Samuel Whitman, Jared Eliot, Ebenezer Wil-liams, Jonathan Marsh, Samuel Cooke, Samuel Whittlefey, Joseph Noyes, Anthony Stoddard, Benjamin Lord and Daniel Wadsworth, are a body corporate and politick by the name of the prefident and fellows of Yale college in New-Haven, with fucceffion. 2. All former donations to this collegiate fchool, though in various expressions, are confirmed and vested in the faid president and fellows, with fuccession. 3. That the forefaid prefident and fellows shall continue during life, or until they refign, or are displaced. 4. There shall be a general meeting of the prefident and fellows annually fecond Wednefday of September, the major vote of the members present shall be definitive; in case of an equivote, the prefident shall have a cafting vote. 5. The prefident and fellows, fix at leaft, concurring, may remove and appoint in their room a prefident and fellows, a clerk, a treasurer, tutors, professors, steward, and other necessary fervants. 6. That the prefident, fellows, tutors, profeffors, and all other officers, before they enter upon the execution of their office, shall publickly take the oaths; and fubfcribe the declaration appointed, I Georgii I. 7. The corporation may appoint from time to time regulations not repugnant to the laws of England or of the colony, but may be difallowed by the general affembly. 8. The corporation may confer degrees as in other colleges. 9. All eftates belonging to the college, (if real, not exceeding the value of 5001. flerl. per ann.) all members and refident officers of the college, tutors and ftudents, are exempted from rates, military fervice,

⁺ This is an ingenious gentleman, mathematically learned; at this time, 1750, contriving fome compendiums and other improvements in aftronomical calculations. Many of the fludents (fludents in college about 80) are expert in aftronomical calculations, from the folid good tuition and in braction of the worthy Mr. Clap, a credit to the colony.

working

working upon the high ways, &c. 10. A grant of 100 l. proclamation money annually during the pleafure of the affembly.

1745, Philip Livingston, Efq; of the king's council of New-York, as he had four fons educated in this college, gave 2001. currency, to begin a foundation for a profession of divinity, to be called Livingstonian professor of divinity.

1746, Mr. Samuel Lambert of New-London, merchant or dealer, left fome lands to the college, but from fome intricacies in his affairs, they turned to no great account, excepting about 100 acres in Wallingford, and 62 acres in New-Haven.

There were a great many fmaller donations from time to time, which in a fummary are not to be enu-merated, and for the fame reafons I am obliged to omit the lifts, from the foundation to this time, of the fucceffive rectors or prefidents, truftees, treasurers and tutors.

1748, upon a motion of the prefident, the general affembly ordered a new college to be built at a publick colony charge, 100 feet long, and 40 feet wide, 8 rooms on a floor, 3 ftories high, belides garrets and cellars.

The regulations as to the degrees of batchelors and masters are the same as in Harvard college of the province of Maffachufetts-Bay, fee vol. II. p. 546.

This college at New-Haven thrives much; in Sept. 1749, there commenced 11 mafters and 23 batchelors; at Cambridge in Massachusetts-Bay, July 1749, there commenced only 9 masters and 22 batchelors, though a college of much longer standing, and in a large govern-ment : at that time it was observed by many, that every thing in the province of Maffachufetts-Bay was upon the decline, attributed to the late bad civil adminifiration.

189

Mountains

Mountains and Rivers.

Connecticut is generally broken land, that is, hills and dales, but well watered. Simfbury or the copper mine hills are their higheft lands, but not fertile, as it is faid of all merallick ore hills.

The noted rivers and runs of water in Connecticut are, 1. Those which fall into Thames river or New-London long creek. 2. Connecticut river with its branches. 3. Housatonick river. with its branches, which at Stratford falls into Long-Island found. Paukatuke river which divides Rhode-Island colony from Connecticut colony, and Byram river which divides Connecticut colony from the province of New-York, are of no consideration. 4 Upon the Long-Island found is a range of townships.

1. Thames river is a long navigable creek of about 14 miles, the head of it is in Norwich; this is the barcadier for the easterly parts of Connecticut, and in time may be the principal trading place of the colony; at prefent the township of Norwich pays the highest tax of any township in the colony, and consists of five or fix parishes. From Connecticut river to the eastern boundary of the colony, is an extraordinary well watered country, confifting of two principal rivers and theirbranchings, which fall into the bottom of this creek in Norwich, these two rivers are Satucket and higher Wilemantick, and Quenebaug. Quenebaug rifes in Brimfield, paffes through Sturbridge, and Dudley in the province of Maffachusetts-Bay, thence in the colony of Connecticut it divides Pomfret from Killingley, Canterbury from Plainfield, and in Norwich falls into Sakatuke river which difcharges into Thames river or creek : this river from Brimfield of Maffachusetts-Bay, in its course in Thompson parish of Killingley of Connecticut receives French river from Leicefter and Oxford, and further in Killingley receives five mile river, whereof Honeycomb Brook comes from Douglass, and Muddy Brook from Woodstock, next Nathomy brook

L

Of CONNECTICUT.

brook from Pomfret, Moufaſhop river from Valington, Rouland's brook in Canterbury, and many other runs of water too minute to be mentioned : Quenebaug river falls into Satucket river a few miles before it diſcharges into the faid creek. Satucket river where it originates in Brimfield is called Willemantick river, and in Stafford of Connecticut receives feveral fmall runs of water, it divides Toland from Willington, and Coventry from Mansfield; in Windham (where it is called Windham river) it receives in its weftern fide Scagungamog fiver and Hope river, on its weftern fide it receives Manchoag river which had received Fenton river, and higher had received in Aſhford Bigelow river, Still river and Bungea river from Union and Woodſtock; in Norwich it received Quenebaug river, as above.

2. Connecticut river with its branches and townships upon the river, its branches are enumerated, vol. I. p. 459, &c. in the section of Massachusetts-Bay.

3. Houlatonick, Westenhock, or Stratford river, see vol. I. p. 456.

4. Upon the Long-Island found is a delightful and profitable range of good townships, the glory of all our American plantations, Stonington, Groton, New-London, Lyme, Saybrook, Killingsworth, Guilford, Brentford, New-Haven, Milford, Stratford, Fairfield, Norwalk, Stamford, and Greenwich.

As the governors are annually elective, that is, very variable, I fhall not mention fuch temporary matters; only obferve, that the Winthrop family has for many years been the most noted in New-England: Mr. Winthrop was the first resident governor of Massachusetts-Bay, his fon John Winthrop, Esq; procured the present charter of Connecticut colony, and was their charter or first governor, and afterwards their elective governor for many

many years; this man's fon John was fucceffively governor for many years, he died æt. 69, November 27, 1707, was born in Ipfwich of New-England 1638; Gurdon Saltonstal, a worthy man, a congregationalist preacher, was elected in his room, and was with good content fucceffive governor, elected for many years till death, October 1724, was fucceeded by Joseph Talcot, Efg; &c.

Currencies, I refer to the appendix; at prefent only obferve, that the 28,000 l. fterl. reimburfement, and rates of feven pence per annum, will cancel all their paper currency, in two or three years. +

* In New-England, we are still in confusion as to our paper currencies; governor Sh-y's precipitate scheme of 1749, has had a bad effect, nothing could be rather excepting the Cape-Breton expedition, where the chance against us was vastly great, but beyond all human probability successful; the unexpected intervention of some British men of war under the direction of Mr. Warren, alleviates the miraculoufnefs of the affair ; it pecculated and depopulated New-England, occasioned near one million sterling additional national debt to the kingdom of Great-Britain, and finally was reftored to the French in a better state than statu quo. Perhaps the Ch-eto settlement in Nova-Scotia as a barrier against the Canada and Cape Breton French with their Indians, at prefent carried on with much vigour, may turn to the fame bad account as G-gia (which GoD forbid) faid to be a barrier against our fouthern enemies the Spaniards, and their Indians. Mysteries of state I do not pretend to explore or explain, quæ fupra nos non ad nos; the foil adjacent to Ch-cto is fo irrecoverably bad, it can never be a PLANTATION ; it may answer as a good fishing village, or may, as a place of arms, be supported at a great charge : I do not fay this was a political amusement, to divert people (by giving them fomething to play with in their imaginations) from canvalling the furrender of Cape-Breton without any equivalent to the British nation, not fo much as an explicit confirmation of the ceffion of Nova-Scotia, or L'Accadie

That New-England is ftill in confusion, appears, 1. By the affembly of Mallachufetts-Bay being perhaps obliged to dispense with an act of their own, confirmed by the king in council, and to ppolong the time for cancelling their province bills: the generality of the refponsible merehants of Rhode-Island, though they have always declared against multiplying of a depreciating currency, in a memorial to the general assessed of Rhode-Island, tay, though the act December

1748,

Of CONNECTICUT.

I shall here infert abstracts of some of their laws exemplary, natural, plain, and concise, adapted to plantations.

In the late authoritative revifal (1750) of their municipal laws; the introductory law or act, is, in the manner, of a magna charta, fecuring the general privileges of his majelty's fubjects in the colony, in these words, "Be it enacted, &c. that no man's life shall be taken away, no man's honour or good name shall be stained, no man's perfon shall be arrested, restrained, banished, difmembered, or otherwise punished; no man shall be deprived of his wife and children; no man's? goods or eftate shall be taken away from him, nor any ways indamaged under the colour of law, or countenance of authority; unlefs it be by virtue or equity of fome express law of the colony warranting the fame, established by the general court, and fufficiently published. In cafe of defect of fuch laws in any particular cafe, by fome clear and plain rule warranted by the word of. God.

All his majefty's fubjects within this colony, whether they be inhabitants or not, fhall enjoy the fame justice and law, that is general for the colony, in all cases proper for civil authority, and courts of judicature in the same; and that without partiality or delay.

That no man's perfon shall be restrained or imprisoned

1748 of Maffachufetts-Bay for drawing in their publick bills of credit, was in a too violent and hafty manner. 2. The colony of Rhode---Ifland this fpring, 1751, have emitted 100,0001. currency with a greater interest and to be cancelled after ten years; this is a step towards reformation.

Connecticut continues honeft. New-Hampfhire always inclinable to a depreciating fraudulent paper currency, from a difference between their governor and house of representatives, formerly mentioned vol. II. p. 34, have had no legislative capacity for fome time, and confequently incapable of augmenting their paper currency, much to the detriment of their governor, who by confending to such emisfions, might have obtained an addition to his falary.

Vol. IL

195,

by any authority whatfoever, before the law hath fentenced him thereunto; if he can and will give or put in fufficient fecurity, bail or mainprize for his appearance and good behaviour in the mean time, unlefs it be for capital crimes, contempt in open court, or in fuch cafes where fome express law doth allow or order the fame.

No perfon, except in his own cafe, other than a qualified attorney, is allowed to plead at the bar: in cafes not exceeding 5 1. one attorney only is allowed: in larger cafes, two attornies and no more.

Each town shall have a peculiar brand for their horses on the near or left shoulder.

All calks shall be of the London affize, viz. buts, 126 gallons, puncheons, 84 gallons, hogsheads, 63 gallons, tierces, 42 gallons, barrels 31 and half gallons.

Miller's allowance for grinding per bulhel, three quarts Indian corn, two quarts other grain, one quart malt.

Every town to have a fealer of weights and measures,

In Connecticut, as generally among the congregation, alifts of New-England, according to the jewifh manner, they begin and end the Lord's day at the fetting of the fun.

Here are about 150 established ministers called prefbyterians, congregationalists, and consociated; besides confcientious differents, faid not to be established but tolerated. In some townships are many parishes or precincts. In all our colonies voluntary associations (most of which may asterwards be confirmed or incorporated by provincial or colony charters) towards academies and libraries, ought to be encouraged.

The civilizing and christianizing of the Indians was one great and professed condition in all our royal grants.

I do not endeavour a strict pedantick narration; but though in a common place manner, I shall observe fome method.

Common interest is 6 per cent per ann. letting of cattle and maritime affairs excepted.

In

In all our plantations, colonies, and provinces; they abound with civil and military titles of judges, fquires, colonels, majors, and captains; gratifications for being of a governor's party, or by a pecuniary interest.

of a governor's party, or by a pecuniary interest. By an act of the assembly of Connecticut, in building of vessels, no timbers or plank to be allowed other than white oak and rock oak, except for the deck and ceiling.

In New-England, particularly in Maffachufetts-Bay, it. is not only the depreciating of the currencies by enormous paper credit emifions called money, but the fearcity of labourers from vaft expeditions unprofitable and ruinous to the colonies. In manufactures, our labour is fo dear, that we cannot afford our goods any where at market, fo cheap as other plantations or countries may. It is not fearcity of provision or depreciations only, but chiefly fearcity of labourers and confequently advance of labour: that in bricks, where the difference is only in labour, about 40 years fince they were fold at one piece of 8 per thousand, at prefent they are fold at three pieces of 8.

Concerning the TENURE OF LANDS. All grants of colony lands by the general affembly shall be according to the most free tenure of East-Greenwich in the county of Kent in England, conform to our charter grant. All townships, and farms, to particular persons, shall be from the general affembly by patent signed by the governor and secretary with the colony seal. Title of lands to be tried in the county where the lands lay. All estates for ministry, schools, and charitable uses, are free from payment of rates.

Three freeholders appointed by the court of probates to divide real effate among legatees or heirs of inteffates. No Indian title without the approbation of the generalaffembly to be pleadable. Proprietors having loft their bounds, three freeholders appointed and fworn by a justice of the peace, may fet up and fix the bounds, but, O_2 with

with appeal. In devife of real eftate, wills to be witneffed by three perfons in the prefence of the testators. Guardians to minors with fome perfons appointed by the court of probate may divide lands with the furviving partners. Lands held in partnership to be divided by a writ of partition. Perfons prefuming to fell Indian rights of lands not confirmed by the general court, fine 50 l. and the perfons wronged by fuch fales to recover treble-damages. All grants and divisions of lands heretofore made by ancient cuftom of town-meetings shall be good and valid though without confent of the proprietors act May 9, 1723 Hereafter undivided common lands shall belong to the proprietors exclusive of other inhabitants, which proprietors may have their own meetings to manage fuch undivided lands. Sales of lands devifed to be fold by executors, shall be good and valid, though fome of the executors do not join in the fale. Five proprietors of undivided lands may obtain a meeting to be called by a justice's warrant. All estates though accruing by wife, formerly fold by the hufband alone, (act bears date Oct. 10, 1723) the deeds shall be valid, but for the future no fuch deed shall be valid without the wife's confent by hand and feal. Proprietors of land in common, may make rates to defray necessary charges. By an act of parliament 1732, in any actions in the plantations, when one of the parties plaintiff or defendant resides in Great-Britain, evidences to prove any matter or thing, may be taken in Great-Britain before any chief magistrates where the party refides, which certified and transmitted, shall be good as if done viva voce in open court in the plantations; and all houfes, lands, negroes, and other hereditaments, as by the laws of England, shall in the plantations be liable to fatisfy debts: where an administrator makes it appear, that the deceased's personal estate is not sufficient to fatisfy the debts, the affembly may direct his real eftate to be fold towards paying of his debts. Partition of lands not to be valid till furveyed and recorded. No deed of real

real estate is compleat until it be figned, sealed, witnessed, acknowledged and recorded.

No lands to be bought of Indians without confent of the general affembly. + No Indian to be fued for debt.' No indenture for fervice made by an Indian, fhall be valid, unlefs acknowledged before authority.

Debtors. Any book debt not accounted for with the original debtor in feven years, shall not be pleadable after the debtor's death.

Upon execution iffued, the fheriff fhall at the ufual place of the debtor's abode demand the debt; upon nonpayment he fhall levy the execution upon the moveables (neceffary apparel, houfhold ftuff, tools, and arms excepted) and fet up a lift of faid goods upon the town poft, to be fold by out-cry after twenty days. In want of goods, and upon the creditor's refufing lands, the debtor's body may be feized. May levy execution upon real eftate valued by appraifers. All executions are returnable in fixty days, or to the next court.

Debtors committed to jail, fwearing that they have not effate to the value of five pounds, fhall be fubfifted by the creditors at a certain rate. Debtors and felons to be kept feparate. The county fheriffs to have the cuftody of the jails.

As to absent or absconding debtors, if no estate is to be found, the debtor's agent, or usual place of abode, may be ferved with a writ; if no debtor nor agent appear, the writ may be continued to next court, and if need be to one court further, and then judgment to be rendered for the plaintiff, and execution granted upon the debtor's effects wherever found: perfors conceal-

+ The affembly 1722; confirmed a purchafe made fix or feven years fince from the Mohagan Indians upon the Mohagan hills, part of their referved lands, to governor Saltonstal, major Livingston, Dennie, Rogers, and Bradshaw; this was constituted the north parish of New-London.

*OXFORD 03

ing

ing the goods of absconding or absent debtors, are liable to family the debt fued for.

No writ of error shall be brought for the reversal of any judgment after the space of three years, and no review upon a writ of error.

The effates of deceafed infolvent debtors to be diffributed in equal proportions to the creditors; debts to the government, ficknefs, and general charges being firft paid; faving to the widow (if any) her houfhold goods and dower during her life, and upon her death to be diffributed among the creditors. A certain time allowed for receiving claims, the commiffioners to be appointed by the judge of probates : creditors not bringing in their claims during that certain time allowed, are for ever excluded.

٩

No action to be brought for bill, bond, or note, but within the fpace of feventeen years. No action of trefpafs or defamation (fine for defamation not to exceed ten pounds) but within three years.

Any debtor in a debt not exceeding 20 l. may confeis judgment before a fingle justice.

Criminal affairs. The governor, deputy governor, or three affiftants, may reprieve a condemned malefactor to next general court or affembly.

The capital crimes are confpiracy against the colony, rape, bestiality, fodomy, false-witness in cases of life and death, wilfully firing houses, disfiguring, or difmembering the private parts, and wilful murder, blasshemy. Deism, first offence incapacity of any employment, second offence outlawed.

All complaints and prefentments, to be made within one year after the offence is committed, excepting in capital crimes; difmembering is banishment, and theft exceeding ten shillings.

All fines imposed by the general court or affembly, and by the fuperior court, belong to the colony treafury; imposed by the county court, belong to the county county treasury; imposed by an affistant or justice, belonging to the township treasuries.

Tavern offences, see the paragraph of excise.

A bill of divorce and liberty to marry again, may be granted by the fuperior courts, in cafes of adultery, fraudulent contract, wilful defertion for three years, or feven years absence not heard of.

Single perfons committing fornication to be fined 33 s. or whipped, not exceeding ten stripes; anti-nuptial fornication only half penalty.

Every perfon playing at dice, cards, or tables, fine 20 s.

Forgery. Three days publick pillory, double damages to the injured party, and incapable of being an evic dence in law. The form of their oath is, You fwear by the the name of the ever-living God.

All kind of delinquents to pay the charge of prefentation, guilty or not guilty.

Perjury 20 l. fine, and fix months imprisonment; if unable to pay his fine, shall fit in the pillory with both ears nailed, and incapable of giving evidence.

Lord's day, penalties; neglecting of the publick worship, working or playing on the Lord's day, 10 s. rude behaviour, disturbing the publick worship, 40 s. travelling, 20 s. going abroad excepting to publick worship, 5 s. no vessels to fail excepting upon extraordinary occasions, 30 s. and several other particulars; refusing to pay shall be publickly whipped.

Theft, to forfeit threefold, and a difcretionary fine, not exceeding 40 s. and if the value amount to 20 s. and upwards, shall also be whipped not exceeding ten stripes; if the offender cannot pay, the perfon may be fold for a certain term of years fervice : penalty for receiving or concealing ftolen goods, is the fame; buying goods of flaves, penalty is treble value, fervice or whipping.

Riots.

Riots. Three or more perfons affembled together, to do an unlawful act; if they obstruct the proclamation in reading, or do not disperse after proclamation made by a proper officer, shall be punished by fine not exceeding 10 l. for each perfon, and imprisonment not exceeding fix months, or by whipping not exceeding 40 stripes: if any rioter is killed or hurt by any perfon of the posses in the perfon is indemnisied. The prosecution must be within twelve months. The sheriff, if need be, may raise the militia in his aid.

Manslaughter (without premeditated malice) but wilful'; penalty, forfeiture of goods, burnt in the hand with letter M, whipped, and disabled from being evidence in law.

Lascivious carriage may be punished at discretion by

* About thirty years fince, there was a riot act made in New-Hampfhire.

In the province of Maffachufetts-Bay, the violent, hafty, and rafh manner of calling in all their publick credit bills in the space of one year by act of affembly, which had been gradually emitted in the course of fifty years, was found impracticable, and was like to have produced, a general tumult : this occasioned the making of a riot act, February 14, 1750-1, to be in force for three years, viz. where any perfons to the number of twelve, armed with clubs, or other weapons, or any number of perfons confifting of men, armed or not armed; thall be unlawfully riotoully affembled; any juffice of peace, field officer, or captain of the militia, sheriff, under sheriff, or constable, shall make proclamation to disperse; if they do not disperse within an hour, every fuch officer with affiltance, may carry them before a juffice, and if in relifting any perfon is hurt, or killed, the officers and affiitants are indemnified : perfons not difperfing in the space of one hour, shall forfeit to the king all his lands and chattels, or such part thereof at the discretion of the justice for the use of the province, and be whipped thirty-nine stripes, one year's imprisonment, and receive the same number of stripes once every three months during his imprisonment. Demolishing houses the fame punishment or penalty. This act to be read every general festions of the peace, and anniverfary meeting of each town; no profecution after twelve months; the judges may abate the whole or any part of the whipping.

In the colony of Rhode-Island, there are no riot acts, because, as generally supposed, they are inconsistent with their constitution.

the

Digitized by Google

the county court ; by fine, house of correction, or corporal punishment.

Burglary or robbery; penalty is branding, ears cut off, and whipping: third offence is death.

Counterfeiting or altering publick bills of credit of this or of the neighbouring colonies; penalty, cutting off ears, branding, and work-house for life, estates forfeited, and to be debarred of all trade. Any fociety prefuming to emit bills of credit to be used in trade, to be punished as in case of counterfeiting; the utterer to forfeit double the fame.

Criminal perfons making their escape from the authority of other provincial governments to this government, may be remanded back to the place of perpetration.

The colony acts relating to the religious observation of the first day of the week, Sunday, fabbath-day or Lord's-day, perhaps are too puritanical; they seem to droop gradually, I shall not revive them.

Any perfon of the age of differentiation (which is 14 æt.) publishing a lie to the prejudice of the common-wealth, or damage of private perfons, to be fined, stocks, or whipping.

Apprentices and fervants æt. 15 or upwards, abfconding from their mafter's fervice, shall serve three times of their absence. Servants or apprentices flying from the cruelty of their masters, may be protected by a magistrate and discharged from their service.

A woman delivered of a child, afterwards found dead, if the cannot prove, at leaft by one witnefs, that fuch child was born dead, the mother thall be accounted guilty of murder.

Any flave or Indian ftriking a white man, penalty whipping, not exceeding thirty ftripes.

Penalty for perfons who refift, or abuse any king's officer, fine not exceeding 10 l.

Curfing or fwearing; penalty 6s. or the ftocks. Every houfholder

-houfholder to have at least one bible, orthodox catechifm, and other books of practical godlines.

A house of correction to be established in each county, two thirds of their earnings towards their support, and one third for other charges.

Penalty for felling ftrong liquor to an Indian 10 s. per pint; drunkennefs and idlenefs are the general vices of Indians. An Indian convicted of drunkennefs, penalty 5 s. or 10 laftes. All the Indians in a township shall be mustered once a year, and the requisite laws read to them. All English families taking Indian children into their families, shall teach them to read English, and inftruct them in the principles of the christian religion; for every three months neglect, a differentiation not exceeding 30 s.

The laws relating to the observation of fabbath day and regulation of publick worthip are severe; and too many to be inserted here; these are under the inspection of the grand jury, tything men, and constables.

Private lotteries, and wagers to vend goods, forfeiture is the value of the goods.

Parish churches of the established religions (presbyterians, congregationalists, and confociated ministers) are under the direction of the county courts; tolerated diffenters from those professions are left at large.

Any Indian, molatto, or negroe travelling without a pais, may be feized as a runaway.

Schools are well regulated, and have a colony allowance. Every ecclefiaftical fociety of 70 families or upwards, fhall have a fchool for the inftruction of children to read and write. A grammar fchool to every head or county town. One college or fchola illustris in the colony.

There are fevere penalties for cutting down of trees, or firing of woods and lands; the accufed, where there is no proof, must exculpate himfelf by oath.

A Dı-

Of CONNECTICUT.

A DIGRESSION,

Concerning North-America grain and grazing, with a few occafianal remarks relating to natural hiftory, especially as to the seafons, winds, and weather, in a loose miscellany common place manner.

Connecticut is a good country as to climate and foil; and is valuable for grain and pafture. Any country is happy, where the meaner inhabitants are plentically and wholfomely fed; warmly and decently cloathed: thus it is in Connecticut.

Upon the first arrival of Europeans in America, the Indians bread kind were only the mays or Indian corn of the cerealia or grain, and the phaseolus or kidney beans called Indian or French beans of the legumina or pulse kind. • Besides they eat earth-nuts of several kinds, berries of many kinds, and variety of mass, it too numerous to be enumerated and described in a summary. As also their hunting of sundry kinds of quadrupeds or beasts, moole, deer, &c. their fowling, especially of birds, websooted; their catching of river, pond, and sea fish, especially of the testaceous.

As the frumentum Indicum, or Indian corn, was their principal fubliftence, though not fpontaneous, but cultivated, I cannot avoid giving fome particular defcription and account of it; hitherto it has not been minutely defcrib'd. It has with much impropriety been called frumentum Saracenicum; properly, frumentum Saracenicum (from the Saracens country in Barbary) is buck-wheat, and at prefent is cultivated by the Dutch in the govern-

• The Indians upon the fhore, used the pifum maritimum spontaneum perenne humile repens; beach pease; flowers end of May; it refembles that of marison. H. Ox. 2. 43.

fembles that of marilon. H. Ox. 2. 43. + Mafts, from mafticare, are leveral forts of forest-nuts, cheinut, wajnut, hazle-nut, and the like.

ment

ment of New-York for hafty pudding, and as provender for horses.

Its most profitable culture is in light fandy land, with a small intermixture of loom, it requires fand heat, such as is that of pitch pine or huckle-berry lands. Though a hungry grain, it requires much and repeated labour. It is first plowed, then cross plowed, next harrowed all fmooth, then furrowed and crois furrowed; at proper diftances of about four feet at the interfections in hollows are dropt five or fix feed grains (a peck fows or plants one acre) and by the hoe covered with earth the end of April and beginning of May; foon after its first appearance, it is plowed two furrows lengthways between each row of grain, and by the hoe the weeds are brought towards the grain; this is called the first weeding; after fome time it is crofs plowed two furrows between each planted row, and by the hoe the earth and weeds are brought to the corn, this is called half-hilling; next it is plowed lengthways, as before, two furrows, and by the hoe the earth is brought to the roots, and forms a hill to prevent the winds eradicating of it; fometimes it is hoed a fourth time: in midddle of August the grain becomes mellow fit for roafting, a fort of delicacy in the fugar-iflands, called mutton : it emits its coma, plume, or blooms, end of June; then they eut off the top of the stalks, that the grain may receive the more nourifhment. $\bot A$ wet fummer makes it run too much into ftalks and leaves, which starves the ears. End of September and beginning of October the ears are hand gathered, the tops are very agreeable to cattle for fodder.

4 Here the farina fecundans of vegetables feems to be evinced: this plume or flower, if cut off before its maturity, the mays bears no ear or grain. In New-England where the grain is of various colours (white, yellow, reds of feveral fhades, blues of feveral fhades, marbled, and mixtures of these in the fame ears) the grains planted of various colours, and in the neighbourhood receive alterations in their colours or shades by the various impregnations: this is obfervable also in other vegetables, baets, carrots, &c.

The

The ears have 8, 10, 12, 14 rows of grain, the more rows, the better is the grain; fome fay there has been 18 rows, but none under 8 rows.

Indian corn does not weigh fo heavy as New-England wheat; their Indian corn at a medium is in weight 45 lb. their wheat 55 lb. per bulhel. The Virginia In-dian corn is white and flat, yielding a better or whiter meal; the New-England corn is of a pale yellow, fmailer but thicker, and answers better in fatning of beeves, hogs, and other flock ; Virginia corn is planted at greater distances, being of greater growth, and is all white; in New-England and Canada it is generally of a pale yellow, does not bear fo many ears as that of Virginia, it is of a leffer habit and quicker growth. The Indian corn of New-England at a medium produces 25 bufhels per acre, and ripens in a fhorter time; || (this a providence in nature, becaufe their hot feasons are shorter) the Virginia feed in New-England does not ripen into grain, as requiring a longer growth than the New-England feafons do allow. The West-India or fugar islands have per ann. two crops of Indian corn planted May and September : in our continent we have only one crop planted in May. Capt. Hill of Douglafs by way of experiment planted Indian corn, middle of June, it was ripe middle of August in a hot season. End of April they begin to plow; Indian corn harvest is beginning of October; when it begins to be in the ear, rain or drizle occasions a fmut.

The phafeolus; which we call Indian beans or French beans, because the French from the Canada Indians were the first in propagating them. * It is the phafeolus

Thus in Lapland and the northern parts of Sweden, barley from fowing ripens two weeks (coner than at Stockholm; and in New-England, Indian corn ripens in a fewer days from planting or fowing than in Virginia.

* When English pease (pisum majus flore fructu albo. C. B. P.) fell at three, these Indian beans sell in proportion at two; they are more

feolus Indicus fructu tumidiore minore niveas et verficolor. Morifon, tab. 4. fect. 2. They are generally white, and there is an indefinite number of fimple colours and variegations or marblings.

In New-England (fome parts of Connecticut excepted) the general fublishence of the poorer people (which contributes much towards their endemial pforick diforders) is falt pork and Indian beans, with bread of Indian corn meal, and pottage of this meal with milk for breakfast and fupper.

For the varieties of phaseolus called Indian beans, calavances and bonavift, see vol. I. p. 122, and the sections further south.

Connecticut wheat is full of cockle +. 20 bushels per acre is a good crop. It is faid, in Canada they fow no winter grain. New-England wheat is fubjent to blast; fome think that it proceeds from the farina fecundans of adjacent barberry bushes. \perp

Our best wheat is from Virginia and Maryland, next best is from Pensylvania, 55 lb. to 60 lb. per bushel, and casts whiter than the English wheat; the further north the flour casts the darker; Nova-Scotia wheat casts almost as dark at rye. Some years fince in a fearcity of wheat in New-England, fome was imported from England; from the long westward passages it became musty, cast dark, and did not answer.

In New-England the allowance to a baker of fhip-

more colicky than peafe: the tribe of the phafeolus is very large r fome years fince, Peter Ccelart in Holland cultivated above-roo diftinct species. The cow itch, as we pronounce it, is the cow-hege of Zura in the East-Indies: phafeolus filiquis hirfutis, pilis pungentibus.

+ Lychnis segetum major. C. B. P.

4 Barberis latifumo folio Canadenfis. H. R. P. it is plenty all over North-America, it is of a larger habit than that of Europe, is 10 to 12 feet high; it is used as hedges, but foreads too much into fuckers. There is a law in Connecticut, p. 13. for deftroying these bushes, they are thought "to be very hurtful by occasioning, or at least increasing the blatting of English grain."

biscuit

biscuit is 3 bushels and quarter wheat for 112 lb. wt. of biscuit, besides — per ct. wt. for baking.

Herrings * have formerly been taken notice of.

In New-England fome oxen of 18 ct. wt. and hoge of 25 fcore have been killed; Connecticut falt pork is the best of America; they finish the fatning of their hogs with Indian meal.

In New-England their barley is a hungry lean grain, and affords no good malt liquor; moloffes is the principal ingredient in all their buvrage. Their barley of four rows called French barley is not fo good as that of two rows called English barley. Their oats are lean, chaffy, and of a dark colour.

In New-England they fow their winter grain 3d and 4th weeks of August.

In New-England, after gathering in their common grain, flax, &c. the first natural appearance of indigenous plants is panicum non crisstatum spica multiplici, ambrolia, and virga aurea annua Virginiana Zanoni. Near Boston and other great towns, some field plants which accidentally have been imported from Europe, spicad much, and are a great nusance in pastures, such as ranunculus pratensis repens hirsutus, C. B. P. Butter cups, bellis major. I. B. the greater wild white daisy, dens leonis. Ger. dandelyon, &c. at present they have spicate for Boston, about 30 miles.

Great-Britain and New-England, though differing about 10 d. in lat. feem to be of the fame temperature : New-England is fomewhat colder in winter and warmer ? in fummer, from the vaft land continent N. W. of it, :

• Upon the coaft of Great-Britain, the herring fiftery begins a little before midfummer; they emerge or make their first appearance off Crane-head in Braffa-Sound N. Lat. 61 and half d. from thence gradually proceed fouth to Dogger-Bank, where that fummer fiftery ends: the winter fiftery begins off Yarmouth, and continues about? 70 days, they proceed fouthward, and are caught in plenty about the Thames mouth until the latter end of January.

which

which receives and communicates continually (therefore with intenfenels,) by the lambent air these different temperatures of the feafons. N. W. is our general or natural wind. 1. After ftorms or perturbations of our ambient air from any point of the compais, being expended, the wind fettles N. W. 2. All our fpring and fummer fea breezes, return to the N. W. 3. In middle • of February 1731-2, called the cold Tuesday (the most intenfe infupportable cold I ever felt) the wind was at N. W. It is not eafily accounted for, that in different countries though the temperature of the air be nearly the fame, the natural growth of plants differs much, v. g. the bellis minor or leffer wild daify, a native of Great-Britain, abound there from 50 d. to 60 d. of lat. but will not grow in North-America. All of the cucurbitaceous kind, pompions, &c. (Mr. H-y an ecclefiaftical mountebank, in his farces called oratory, calls the New-England people pompionites) by cultivation without the force of hot beds grow well, but in Great-Britain requires force.

In a new country there may be a tax upon improved lands, as a fund for premiums to encourage the clearing and planting of wilderness lands for the first year; the fecond and third year are the next profitable for produce, and requires no bounty, and afterwards, efpecially in New-England, it ought to be fmoothed and lay for pafturage.

In New-England, two acres cow-pen land may raife about a tun of hemp, but is foon exhausted.

Locufts, called grafhoppers, and a fpecies of caterpillars, fome years are very noxious to our pastures; in the summer 1749, a small locust, with a drought destroyed our berbage; they generally prevail June and July.

Lands in New-England which yield at a medium 20 "ct. wt. of hay are the best, if 40 ct. wt. the hay is rank and four; fome fresh meadows, if mowed more than once, yield greater quantities. In mowing lands an uniformity of grass ought to be attended to and endeavoured, because some graffes ripen soon, and are upon the

Of CONNECTICUT.

the decline before others attain a perfection for mowing. End of June and beginning of July the height of upland or English hay harvest is over; third and fourth weeks of August they mow their falt-meadow hay. Salt-hay is from falt or spring tide marshes; fresh hay is the natural growth of inland marshes; English or upland hay, is the herbage imported from Europe. + New-England crops or produce are very uncertain, for instance of hay, in the spring 1750, it fold for 41. New-England currency, in the spring 1751, it fells for 13 s. per cf. w Wt. Two acres, if good, is a cowland.

Cyder is a confiderable produce for confumption and exportation; when diffilled, it does not yield above one twelfth fpirit; end of August they begin to make a mean fort of cyder from the windfalls.

Turneps fowed in any latitude thrive, even in Davis's-Straits or West-Greenland; our belt New-England turneps are from new lands N. E. from Boston.

Some remarks relating to the natural history of New-England.

The feafons from year to year are better determined by fome paffenger birds and fifh, than by the bloffoming of trees, and flowering of fome inferior vegetables, for inflance, fwallows conftantly arrive from the fouthward in the fecond week of April with a latitude of only two or three days; peaches fometimes bloffom bëginning of April, in fome years not till beginning of May, a latitude of 30 days. Anno 1735, last day of December, 1st and 2d of January, fell about 20 inches of light fnow, wind N. W. northerly, followed by a very hard frost, and peaches did not begin to bloffom

+ In hot countries they make no hay; it dries too quick, dry ross and turns to dust. In some parts of North-America, the winters are too long and cold, and in other parts too hot for grass, consequently can afford no quantity of provender for cattle, and will never be beef countries.

P

Vol. II.

till

till May 7. Anno 1719, the beginning of winter was very fevere; peaches did not bloffom the fpring following.

End of autumn and beginning of winter, if dry, follows a mild winter; but if falling weather, rain, or fnow (freezing inland is a baffs for fnow to lodge and chill the winds from N. to W.) produces hard freezing in our plantations, which are to leeward. 1731-2, Feb. 14 and 15, tinctura facta froze, the coldeft weather I ever felt, after a flight of hail and fnow, the wind from S. came fuddenly to the N. W. 1732, April 5, wind N. E. northerly falls about 14 inches fnow, foon diffolved, a great from at fea; 1751, April 6, all day a heavy fleaky fnow, but foon diffolved. Travelling in Connecticut from Penfylvania, 1716 June 26, finger cold, roads froze, ice thick as a crown-piece, Indian corn beginning to bloom is hurt. *

Mackarel † fet in fecond week of May, lean, and feem to eat muddy. Some are caught all fummer; there is a fecond fetting in for autumn, fat and delicious eating; they are a N. lat. fifh, and are not to be found fouth of New-England; beginning of July for a fhort time they difappear or will not take the bait.

Herrings (a bad kind) fet in middle of May, they feem to be whimfical or variable as to their ground.

Frogs feem to be dormant, as are fnakes in the winter or very cold feason; we have three fpecies of frogs, ra-

The northerly and N. E. fnows, as being from the fca, are fofter and milder, than those from the north wefterly land continent. Great inows lodged in the woods westward, covered from the dissolving fulluence of the fun, by their chill retard our furings; it is a vulgar error, that the inows lodged upon the ice of our westerngreat lakes is the occasion; from the observations of a curious gentleman, an officer belonging to the four, independent companies stationed in the province of New-York, who commanded the garrison at Oswego upon the lake Ontario about three years, I find that the great lakes are never frozen over, and consequently cannot lodge so.

+ Hook mackarel for a market are preferable to those caught by fins which bruife one another.

n4
DE CONVERTIQUE.

na visidis arboroa, the green-trop frog ; the tana terrefirm et aquatica, the rana maxima Americana aquatica, the bull frog.

1719-20, January 7, the coldeft of days, wind at N. W. inow laying about one foot deeps Charles-Town ferry (tide runs \pm or β knots) froze over in 24 hours, pafiable on the ice (no weather, it is faid, so cold, fince winter 1697) continued extreme cold to the 14th. This year the peaches did not blofform.

, Wild geefe fly to the fouthward middle of Septembers, and neturn beginning of March 1, a wild goofe may yield half lb. feathers; fix brants yield 1 lb. feathers. Cuckows return beginning of April. +

In the winter leafon, we have from 15 to 20 days at times, a frost to freeze the ink.

In maritime places, as are all our North-America colonies, the weather is variable, according as the wind blows from the fea or inland; in itlands it is more conftant, becaufe all winds do come from the fea; as alfo inland countries, as is Canada, their winds are all from the land, and confequently of the fame nature.

The New-England winters generally set in end of October and beginning of November, and are over middle of March; the extreme frosts are from Christmas to middle of February; the very hot weather is in the first weeks of July.

Early winters are generally fevere and long. 1732, the rivers froze up middle of November, and continued froze until end of March, many cattle die for want of provender.

Mr. Thomas Robie, a fellow in Cambridge college of New-England, an ingenious accurate observer, comp

+ In Europe the cuckows, paffinger birds, areive genetally beginning of April; therefore the full day of April is called fools day, this bird is fo foolifh as not to have any exclusive neft; hence filly married men whole wives are not exclusive but common, are called cuckold, kockoek, or cocu.

paring

paring with Mr. Derham's observations at Upminster in England, found that winds continuing long in one quarter, especially if strong, were nearly the same in both places, allowing some days for their passage from one place to the other.

Salmon are a high latitude fifh, they are not to be found fouth of New-England; the further fouth the later they fet in, and continue a fhorter time; for instance, in Connecticut river they fet in beginning of May and continue only about three weeks; in Merrimack, river they fet in beginning of April, to fpawn, and lie in the deep cold brooks until September and October, then filently (fo as not to be observed) and with difpatch, they return to the fea; in Chebucto, Cape-Breton, and Newfoundland, they continue the greatest part of the year. The people living upon the banks of Merrimack. river in Massachusetts-Bay of New-England, observe, that feveral species of fish, particularly falmon, shade and alewives, are not fo plenty in the feafons as formerly; perhaps from disturbances or some other disgust, as it happens with herrings in the feveral friths of Scotland.

Smelts a high latitude fifh, fet in to Bofton wharfs middle of September and take the hook; beginning of February they go up to fpawn in the frefhes; no finelts fouth of New-England; tom-cod goes up to fpawn end of November.

We reckon it a good paffage for trading vefiels, from New-England to London in 4 weeks, and from London to New-England in 6 weeks.

In New England generally the falling weather is from N. E. to S. E. in winter, if the wind is N. of E. fnow: if S. of E. rain The N. E. ftorms are of the greateft continuance, the S. E. ftorms are the most violent. 1716-17, February 20 to 22, wind at N. E. northerly, fell a very deep fnow upwards of 3 feet upon a level. N. W. freezing wind backing to the S. W. if reverberated, proves the most intense cold weather; thus chemical reverberated heats are the ftrongest.

Trees

Trees generally lose their leaves middle of October. The button tree or platanus occidentalis, is of a fine parabolick form fit for avenues, but its verdure is of short continuance, and the tree is not long lived; it is not full in leaf till middle of May, and its leaves begin to fade end of July,

Our great rains are in August about two months after the summer solftice, and our great snows in February two months after the winter solftice; the greatest snow in my remembrance was 1716-17, third week of February.

In falling weather, wind, the further north from the eaft, the finer and dryer is the fnow; the further fouth from the eaft, the more fleaky and humid is the fnow; when the wind comes fouth of the S. E. it turns to rain.

The winds from the W. S. W. to the N. N. W. are dry winds, fit for dry curing of falt-fifh; further north they are damp and foft as coming from the ocean; further fouth are from the hot latitudes, and fun-burn the fifh.

Early fprings accelerate the buds and bloffoms of trees, and frequently a fubfequent eafterly chill, blafts or pinches them; but are advantageous for hay, becaufe a late fpring is too foon fucceeded by the fummer, and the grafs before it becomes thick, runs into ftalks, ftraw or ftubble, and feed: Indian corn requires early fprings, becaufe if too late it is in danger of autumnal frofts.

In extreme freezing weather the infenfible perfpiration or vapours from the harbour, houfe pumps, &c. becomes a fenfible perfpiration, being by the cold condenfed in form of fmoke.

1732-3, the winter was very fevere and long with gufts of wind, 50 to 60 veffels bound to New-England could not hover upon the coaft to wait a favourable fourt of wind and weather for pushing in; but were obliged to bear away to Bermudas, South-Carolina, and the Weft-India islands; peaches were not generally in P 3 bloffom

Digitized by Google

- 413

bloffom till middle of May; there effects of a fevere winter did not reach South-Carolina.

Oars, Barley and rice, are ripe middle of July.

No herrings (alewives, the fame fpecies) appear fouth of Great-Britain, and none fouth of New-England, which makes a difference of 10 d. in lat. but not in temperature; therefore the temperature must be nearly the same, though differing in latitude; this is also observable in falmon.

We have natural pacers of horfes, which at a cow run, (a gait which they acquire by pasturing, when colts, with the cows) will pace three miles in feven minutes.

1719, October 14, hatd frost as if mid-winter, robins dlfappear. This winter I walked round Boston Peninsula at a quick pace upon the ice, without all the wharfs, in one hour seven minutes.

· End of February arrive wild geefe, brants and teal.

Our intense hot days are with the wind from S. to W. S. W; from N. to E. N. E. is our most chilly weather. The dry winds are from W. to N. N. W. all other winds carry more or lefs damp, this is manifelt in the drying of falt cod-fifth. Our dry winds with continuance are from the continent N. N. W. to W. S. W. our falling weather, is from the ocean, wind N. N. E. to E. S. E. the other winds are variable and partake of both. From middle of October to middle of April requires chamber fires. Long winters are bad for neat cattle, becaule without fufficiency of grafs or hay, fubfifting only by grain, they lose their cud. Our featons as to temper of the weather may be feckoned, winter from the winter folflice to the fpring lequinox, fpring from faid equinox to fummer folftice, Kimmer from faid folftice to autumn equinox, and autumn from thence to winter folffice.

End of August the symptoms of approaching winter begin to appear, we call it the fail (autumn) of the year, the leaves of imaple turn red; the leaves of birch turn yellow. The almus or alder holds its leaf, and the verdure of its leaf the longest, it is a conifer; the betulo, tho' a conifer, loses its leaf foon. Some afters are the latest of our wilderness flowers. We have scarce any winter flowering shrubs. August sometimes is a very hot month; 1719, August 15, so hot that some men and cattle die in travelling the road (the succeeding winter was very cold and long) some boys faint away at school, strong wind S. W. southerly, dusky morning.

In fome very fevere winters, fuch as 1732, lumps of ice fettle upon the oyfter banks, and kill the oyfters.

When tides fet in higher than ufual for the feafon and time of the moon, it is a fign of eafterly winds at fea,. and veffels from Europe have fhort paffages.

Early winters are generally fevere and long.

The New-England earthquake of November 5, 1732, an undulatory motion was felt the fame day and hour at Montreal in Canada, but more violent; this was not fo violent as that of 1727, October 29, 10 and half in the night, a vibrating motion was felt at Barbadoes the proceeding day.

In hot countries, the birds have gay plumage, and fing but little; their flowers have beautiful mixtures of colours, but little or no fragrancy. In hot countries no good wines, extreme heats or colds do not agree with wines.

Where there is a hollow fea, land is at a great diftance : certain kinds of fifh and fowl are fymptoms of land.

The quality of lands in New-England is known by the produce; in the beft lands are cheftnuts and walnuts, next is beech and white oak, lower is firr, then pitch pines, then whortles or huckle-berry plains, laftly, fome marshy shrubs, low and imperfect, being the lowest degree of suffrutex vegetation.

We have a few winter birds of paffage, which arrive in autumn when the fummer paffenger birds depart, and go off in the fpring when the fummer paffage birds return, v. g. the fnow bird or paffer nivalis. Some paffen-

ger

gers remain only a few days, fome a few weeks, others for fome months.

In New-England are fome pretty little quadrupedes, putorius Americanus firiatus, the pol cat or fkunk. Sciuri or fquirrels of feveral kinds, the black, the grey fox fquirrel, the ferret fquirrel, &cc. I feem to forget that a place is referved in the appendix for fome things relating to natural hiftory. +

Goofeberries, raspberries, and strawberries are spontaneous in all our North-America settlements.

The clearing and cultivating of wilderness lands, is a very laborious and tedious affair.

Between the tropicks, winds are generally eafterly, called trade winds; from the tropicks to the high latitudes, they are variable, but mostly westerly, being an eddy of the trade winds : in the north high latitudes the winds are froze N. E. to N. W.

The

+ My fummary defign does not allow of botanick excursions. I shall only observe, 1. that in the country near Boston, I have collected and described about eleven hundred indigenous species of plants, perhaps a few of them might be cafually imported from Europe. Ray in his synopsis of British plants, enumerates about 1400 diffinct species, Tournefort in his Hiftoire des plantes des environs de Paris, enumerates and describes about 1037 species. 2. New-England, perhaps all North-America, feems mostly to abound with plants, flore composito, flore apetalo, capillares, mufei, lichenes and mushrooms. Between the tropicks, they are generally anomalous, monopetalous and polypetalous, not reduceable to our European tribes, and require a botanical addition of more tribes : Tournefort in his appendix and corollary has no new genius of verticillatæ umbelliferæ, cariophylei, and very few of the papilionacei. 3. The marine plants feem to be the fame all over the earth, perhaps from the communications of the feas: the maritime plants differ much. 4. The further fouth, the timber and other wood rives better into flaves and the like, but does not yield much crooked timber, being fpungy; in the intermediate latitudes, from the alternate variable hot and cold weather, it is not durable; in very hot countries their wood is hard and ponderous.

|| Our intense heats are many weeks after the summer folfice, in the first half of July; our intense colds are in January; thus it is in

Of CONNECTICUT.

The great import of moloffes into New-England, hinders the cultivation and malting of barley and other grain; therefore ought to be charged with a high duty, equivalent to a prohibition.

Hunting and other sports of the field are little used in America.

The difcovery and fubfequent poffeffion of American lands, gave the English an exclusive right against all other people, the native Indians excepted. Grants of lands to particular perfons, or to companies and corporations by the crown, notwithstanding of other purchasters from the Indians, fixes the tenure of the lands in the crown, by fome fmall quit-rent. The Indians of the N. E. parts of America seein to be the least improved of human kind; they are strangers to religion, policy, and arts.

. In New-England, idleness prevails too much; they observe religiously that article in the fourth commandment, rested the seventh day, but neglect a very essential article, fix days shalt thou labour; when wages are high and provisions cheap, they do not labour half their time.

Wild pigeons, palumbus torquatus migratorius, fee vol. I. p. 126, in their paffage northward, begin to appear in New-England end of February and beginning of March, but not in large numbers, becaufe they travel more inland for the benefit of laft autumn berries of feveral forts in the wildernefs; they return in their paffage fouthward, in larger quantities, end of Auguft; and fome years fince have been fold at 4 d. currency per dozen;

in all phænomena of nature where there is a reciprocation of caules and effects; the intenteness of the effects are fome time after the efficient caules have passed their height; the oscillation of the ocean in tides, the tides are not the highest until the third or fourth tide after new and full moon; in summer the hottest time of the day is about z or 3 hours P. M. and in winter the coldest time of the day is generally about the fame hours; our cold weather is protracted into the spring feason of the year, and occasions short springs; our warm weather is protracted also, and occasions long autumn weather.

they

they at that seafan keep towards the plantations for the benefit of their harvest. They are of great advantage in their seafons towards victualling our plantations; the country people feed fome of them (they are catched alive in nets or finares) for fome time with Indian corn, and brought to market, and are good delicate eating; cuming feed or its oil, are found by experience the best lure to induce the pigeons to their nets. The fpring flights 1751 were very large, like thunder shower clouds, but foom over.

Cuckows, as above, come in 4th week of March, and beginning of April; black-birds arrive from the fouthward about the fame time with the fwallows, 2d week of April.

Mackarel. See above.

Brants arrive middle of February, very lean and of fhort continuance, they return in autumn fat, and in October proceed fouthward.

Catefby, a late affiduous naturalift, enumerates 113 diffinet species of birds from 30 to 45 d. N. lat. in North-America, and observes, that animals, particularly birds, diminish in number of species as we rife the degrees of northern latitudes. He observed about 18 forts of servers, whereof only 4 are of the viper kind, and of these the rattle-snake, viper caudifona Americana, is the most pernicious.

A frosty winter produces a dry summer; a mild winter produces a wet summer.

Rains and fogs are more common on the shore and in foundings than in deep water at sea.

In Canada the winds are more uniform and intenfely cold than in New-England, becaufe the bleak damp eafterly winds from the ocean do not reach fo far; the Canada fprings are fometimes more early than the fprings in New-England; in Canada the fnows fall early before the frofts enter the ground deep, therefore fo foon as the fnows diffolve, the fun fooner enters the ground, than in a frozen foil.

Foreits

Construction Construction Hard F. Com

Forefts cover and retain the fnow long in the fpring, and occasion late springs by their chill; when cleared, we shall have better featons.

In a mifcellany or loofe article, I may be allowed to infert any thing for information or amufement, if not too foreign to the proposed subject. 1. Our Indians formerly accounted by fingle wampum, by ftrings of wampum, and by belts of wampum; in the fame manner as the English account by the denominations of pence, fhillings, and pounds. 2. An Indian preacher. navement or naturally in the introduction to his fermon. faid, "Brethren, little I know, and little I fhall fay;" though generally the lefs a preacher, knows, the more tedious are his fermions. And in the old manner of jingle. faid, God does not require of us to part with our fons, as he did of Abraham of old, but to part with our fins. 3. Clergy, though by fome faid to be of human inftitution, are defigned as of good we to perfuse people into civility and good manners; and feem to be effential to fociety ; but their bad examples of immorality and paffionate condemning of all who do not follow their not effential mode or whims, renders them more hurtful than beneficial to fociety.

SECTION XII.

Concerning the PROVINCE of

NEW-YORK.

To deduce this colony and any other of the British colonies in America, ab origine, as it were, with their progreffive improvements and viciffitudes, fee vol. I. feft. 2: article 3: giving fome account of the difcoveries and first fettlements in America from Europe :-and fect. 4: general remarks concerning the British colonies in America, --- and particularly p. 204. concerning New-Netherlands, comprehending the prefent British provinces of New-York, New-Jersies, and fome part of Penfylvania. In a fummary, references are more proper and confonant, than recapitulations.

As New-Jerfies, and part of Penfylvania, were formerly with New-York called the Dutch colony of New-Netherlands, or Nova-Belgia; I cannot here avoid by anticipation mentioning fome things concerning them.

In those times all the country from Maryland to New-England was called Nova-Belgia, or New-Netherlands.

King James I. by letters patent April 10, 1606, in one patent incorporated two diffinct companies or colonies. 1. The first colony to Sir Thomas Gates, Sir George Summers, Richard Hackluit prebend at Westminster, and Edward Maria Wingfield, Esq; adventurers of the city of London with their affociates; from 34d.

to

to 41 d. of northern latitude, including all the lands within an hundred miles directly over-against the sea coast, and back into the main land one hundred miles from the sea coast, and each plantation or settlement to extend too miles along the sea coast. 2. The second colony to Thomas Hanham, Raleigh Gilbert, William Parker, and George Popham, Esqrs. of the town of Plymouth, with their affociates; liberty to begin their first plantation and seat, at any place upon the coast of Virginia, where they should think fit, between the degrees of 38 and 45 of northern latitude; with the like liberties and bounds as the first colony; provided they did seat within a hundred miles of them.

What relates to Virginia is referred to the fection of Virginia. Anno 1610, my lord Delaware was fent governor to Virginia by the South Virginia company; tailing in with the land about two degrees to the northward of the capes of Virginia, difcovered a fine large bay, in compliment to his lordship, called Delaware-Bay.

The Swedes and Finns feem to have been the first occupiers of fome parts of that large country, afterwards called by the Dutch, NEW-NETHERLANDS; they made fettlements both fides of Delaware river, and began feveral towns and forts, Elfenburgh, Cafimier, now called New-Caftle, &c. The Dutch traded thither and foon became more powerful and rich than the Swedes ; the Swedes and Finns followed hufbandry only, and being in constant fears from their neighbouring numerous Indians, put themselves under protection of the Dutch 1655, and John Kizeing the Swedish governor, made a formal furrender of that country to Peter Stuivesant governor for the states of Holland. Whereupon all that tract of land in North-America from the latitude of about 38d. to the latitude of about 41 d. in Connecticut, was called New-Netherlands by all people, except the English, who still claimed it as part of New-England; in fact, governor Argol of Virginia had feveral bickerings with the Dutch. particularly 1618 in the bay of Delaware, and with others elfewhere.

elfewhere, in the affair of the English exclusive trade and property in those parts; but in the senerof the doleful civil wars in England onder various forms of administrations, finding intricate labour enough at home, neglected the American plantations; and their neighbouring European settlements at full ease were much increased to our prejudice. The progeny of the banditti Swedes, who first fettled Delaware river, still live in a separate manner, they have at times preachers and books of devotion from Swedes, but do not hold their lands of the Peans; because the royal grant to Penn exempts lands then settled by any christians; but they are as to jurifdiction under the government of Penfylvania.

New-York and New-Jerfies at first were traded to, and fome fertlement made there, by the English and Dutch: the Dutch placed a governor there, of which the court of England complained to the flates of Holland; the ftates difowned it, and faid, that it was only a private undertaking of an Amsterdam Welt-India company, and K. James I. commillioned Edward Langdon as governor; and called the country New-Albion; the Dutch fubmitted to the English government: during the civil troubles in England in the administrations of K. Charles I. and of the republican party, the Dutch again eftablished a government there, till it was reduced by England 1664. When this reduction was upon the anvil. K. Charles II. made a previous grant of that country, called by the Dutch, NEW-NETHERLANDS, March 12, 1663-4, offproperty and government to his brother the duke of York. Duke of York, June 24, 1664, made a grant of that portion now called New-Jerfey, (fo called, in compliment to Sir George Carteret a Jerley-man) jointly - to lord Berkley of Straton, and to Sir George Carteret vice chamberlain, and of the privy council, a further account of this belongs to the fection of New-Jerlies.

, K. Charles II. anno 1664, fitted out an expedition for the reduction or recovery of New-Netherlands, fo called

by

by the Durch, conflicting of a squadron of ships commanded by Sir Robert Carr, and fome land forces aboard under the command of col. Richard Nicols. Upon their arrival at New Amfterdam, fince called New-York, the Dutch after some fiew of relifiance, but much terrified. upon the offers of protection for their perfons and properties, and liberty to remove with all their effects, if they faw fit, submitted to the English; articles were drawn up, figned and exchanged in September 1664; the English possessed of New-Amiterdam, called it New-York : in a fhort time thereafter, the English squadron entered Delaware bay and river, and all the fettlements there, followed the example of the Dutch capital New-Amilerdam, and possession of all New-Netherlands was taken for and in the name of the duke of York, to whom K. Charles his brother had previously given it by a royal patent; and all manner of jurifdiction, as well civil as military, was exercised throughout the whole country excepting in the Jerfies, which the duke of York had difposed of to Berkley and Carterer, by the sole appoint. ment of the duke and his deputies.

By the third article of the peace of Breda figned July 21, 1667, between England and the United Provinces, --the English were to remain in possession of that whole country, in exchange for the country of Surinam, which the Dutch had taken from the English. K. Charles in the beginning of 1672, having declared war against the United Provinces, the Dutch fent a squadron of thips to New-York, which they foon reduced with the reft of the country; but by a peace concluded at Westminster, February 9, 1673-4, in the fixth article it was again re-ftored to England in general terms, "that what loever countries, Mands, rowns, ports, caftles, or forts have or shall be taken on both fides, fince the time that the late unhappy war broke out, either in Europe or elfewhere, shall be restored to the former lord and proprietor, in the fame condition they shall be in when the peace itself shall be proclaimed; after which time there fhall

fhall be no fpoil nor plunder of the inhabitants, nor demolition of fortifications, nor carrying away of guns, powder, or other military flores which belonged to any caftle or fort at the time when it was taken."

This tract of land, as it had been taken and possel by a foreign power, though afterward delivered or furrendered back by treaty, to obviate or remove all disputes concerning the validity of former grants, K. Charles was advised to make a new grant of that country to his brother the duke of York by letters patent, bearing date, June 29, 1674.

Let us now proceed more particularly to the province of New-York, the fubject of this fection.

Anno 1664, K. Charles II. appointed commiffioners to fettle the boundaries of the feveral colonies : * from mifinformation they fettled the line between New-York and Connecticut by a N. N. W. line, as is mentioned in our vol. II. p. 161; they were made to believe that this N. N. W. line would leave 20 miles to New-York on the eaft fide of Hudfon's river; whereas it foon croffed Hudfon's river, and left many of the Dutch fettlements upon Hudfon's river, to the colonies of Maffachufetts-Bay, and Connecticut, but thefe colonies never took possible for the possible of the second second second second York and Connecticut.

The partition line of New-York with Connecticut was run February 24, 1684, by commissioners of both colonies, and figned at the town of Milford in Connecticut by col. Thomas Dongan governor of New-York, and by Robert Treat, Efq; governor of Connecticut, and confirmed by king William in council, March 28, 1700; but as this line was not well marked, diftinguished, or afcertained, especially as to the equivalent lands; not long fince, by both parties, it was finally run, well marked out,

• We formerly mentioned, their fettling of the boundaries between the colonies of Maffachufetts-Bay and Rhode-Ifland.

and

and afcertained, and confirmed by the king in council, as is related in our vol. II. p. 161. in the festion of Connecticut.

As to the eaftern boundary of the province of New-York; New-York hint at claiming fo far east as Connecticut river, because 1. By ancient Dutch maps published before the English royal grants of the colonies of Massachufetts-Bay and Connecticut, the Dutch had actually a fort at the mouth of Connecticut river, as appears by records. + 2. That part of New-Netherlands in the duke of York's grant, is defcribed, " and alfo all that island or " iflands, commonly called by the feveral name or names " of Mattowacks or Long-Island, fituate, laying, and " being towards the weft of Cape-Cod and the narrow "Highganfets, abutting upon the main land between the " two rivers, there called and known by the feveral names " of Connecticut and Hudson's rivers, and all the lands " from the west fide of Connecticut river to the east fide " of Delaware-Bay." 3. This island, now called Long-Island, remains with the province of New-York, by a mutual tacit confent of both colonies. In answer to thefe allegations it is obvious, 1. That the line lately fettled between New-York and Connecticut, and confirmed or ratified by the king in council, is at twenty miles east of Hudson's river, and cuts off all their claims of this nature upon Connecticut. 2. By the like parity of reafon, and precedent, the New-York claim to that part of Massachusetts-Bay, which lies welt of Connecticut river, is cut off; moreover, the Dutch never traded or fettled fo high upon Connecticut river. 3. Therefore in equity, New-York is bounded north of Connecticut N. W. corner, by a line parallel to and at twenty miles diftant eaft of

† The children of William Brown, Efq; of Salem in New-England, are great-grand-children of a grand-daughter of mynheer Provoit, at that time governor of this fort.

VOL. II.

Hudfon's

Digitized by Google

Hudson's river, to over-against the great crook *, elbow, or great falls of Hudson's river, and thence in a due north line to the fouth boundary line of the French Canada country; || this line with other disputable claims

• Great crooks of boundary rivers not well discovered and defcribed at the times of granting and bounding colonies, are now confirued as a termination of such lines; thus it was lately by determination of the king in council with respect to the line between the provinces of Massachusetts-Bay and New-Hampshire at Pantucket falls of Merrimack river, see vol. I. p. 423.

|| The various disputes between the courts of Great-Britain and France (I must once and again beg pardon for meddling in state affairs, or arcana imperii, by chance they fall in my way, and in fome manner I fcramble over them) concerning the national properties and jurisdictions of some disputable countries in America, which perhaps might have been fettled in the late definitive (fo called) treaty of Aix la Chapelle, more expeditiously and with better effect, confidering 1. That by meer dint of good fortune, providence feemed to be of our fide, and gave us possession of Louisbourg at the mouth or entrance of St. Laurence or Canada great river, the French Dunkirk of North America. 2. By our natural superiority at sea, we had entirely obftructed the French plantation American trade, which might have induced or forced the French to make us fome favourable conceffions; than by tedious and generally ineffective subsequent treaties by commiffaries, which frequently terminate only in a neutrality till next general rupture, or in fome mutual conceffions by way of equivalents detrimental to that fide who may have lately received the law; thus for inftance, if the court of Great-Britain at this juncture should guit claim, the neutral islands in the West-Indies to the French, as an equivalent for fome conceffions to be made in Nova-Scotia by the court of France to the British.

At prefent, 1751, the French with a confiderable military force, make a fland on the north fide of Chiconecto bay and river in about 45 d. 25 m. The parallel of 45 d. is the northern extent of king James I. grant 1606 to the North-Virginia company; this is perhaps the foundation of the French claim. If the partition line with France or Canada is to be fettled at 45 d. north lat. continued; it will fall in with St. Laurence or Ontario river, a little above Montreal; includiog the greateft part of Champlain or Corlaers lake with the formerly Dutch country adjoining. If the fouth limits of Canada are thus actied, New-York weft line will begin at this termination, and pafs along Ontario river to Ontario lake, along Ontario lake, and its communicating run of water to lake Erie, till it meets with Penfylvania north line.

. Digitized by Google

is now in agitation at Paris by British and French commissaries.

Unlefs there be fome general, but definitive articles of agreement, fee vol. I. p. 13, with the French, concerning boundaries, we ought to have a continued refidence of commiffaries at Paris or elfewhere; if the prefent commiffaries are fo happy as to fettle the boundary lines, between Canada on the French fide, and Nova-Scotia, New-England, and New-York on the British fide, -there will still remain further lines to be fettled, of which I can give fome inffances, which may occasion great contention, the symptoms whereof appear already; but as these things at prefent are in embrio, I shall touch upon them only by way of annotational amusement. *

There is a tract of valuable land weft foutherly from Penfylvania: Pensylvania in the grant extends 5 d. W. from Delaware river, and takes a confiderable share of lake Erie, and within which bounds fince the late peace the French have erected a fortification with a view of claiming that country, as formerly they built a fort at . Crown-point, to fix a claim to the country of lake Champlain. Our Indian traders inform us, that below lake Erie, upon the river Ohio, called by the French La Belle Riviere, and the great river Ouabache, which jointly fall into the grand river of Miffiffippi, are the most valuable lands in all America, and extend 500 to 600 miles in a level rich soil. Luckily for us, the French, last war, not being capable of fupplying the Indians of those rivers with goods fufficient, these Indians dealt with our traders, and a number of them came to Philadelphia to treat with the English ; hitherto they have faithfully observed their new alliance : these Indians are called the Twichetwhees, a large nation, much superior in numbers to all our Six nations, and independent of them. This gave the government of Canada much uneafinefs, that fo confiderable a body of Indians with their territory, trade, and inlet into the Miffiffippi, fhould be lopt from them; accordingly the governor of Canada in the autumn 1750, wrote to the governors of New York and Penfylvania, acquainting them, that our Indian traders had incroached fo far on their territories by trading with their Indians; that if they did not defift, he fhould be obliged to apprehend them, wherever they should be found within these bounds; accordingly in the spring 1751, some French parties with their Indians, feized three of our traders, and confined them in Montreal or Quebeck : the Twichetwhees, our late allies, refented this, and immediately rendezvouzed to the number of 500 to 600, Q 2

Digitized by Google

The north and fouth boundaries in North-America, dominions belonging or claimed by different fovereignties, and of feparate colonies under the fame fovereign, are best determined by parellels of latitude which may be supposed invariable; thus the boundary of Hudson's-Bay company by the treaty of Utrecht is well fixed at 49 d. N. lat.; perhaps that of Canada with Nova-Scotia, New-England and New-York, may be fettled at 45d; in New-England that of Maffachufetts-Bay with New-Hampshire, by the king in council is fixed at a parellel of about 42d. 50 m; Maffachufetts-Bay with Rhode-Island and Connecticut is in 42 d. 2 m; New-York with Penfylvania is in 42 d., compleated, or the beginning of the 43 d. which is 20 miles north of New-York station point with the Jersies; Virginia with the Carolinas as settled, 1739, is in about 36 d. 40 m. Some colonies are only bounded by rivers, the river Powtomack bounds Virginia from Maryland, the river Savannah divides South-Carolina from Georgia.

600, and fcoured the woods till they found three French traders, and delivered them up to the government of Penfylvania. Here the matter refts, and waits for an accomodation betwixt our governor and the French governor, as to exchange of prifoners; and as to the main point of the queftion, in fuch cafes the French never cede till drubb'd into it by a war, and confirmed by a fubfequent peace. However, it is probable that in a few years our fettlements, if well attended to, will be carried thither, if with the protection of the Indians of that nation, they are countenanced by our governments. With this view the governor of Penfylvania is labouring with the affembly to have fome place of ftrength, fecurity, or retreat for our Indian traders, under the name of a trading or truck-houfe; the Indians have given their confent to this fcheme, which they never granted to the French; it will be a difficult matter to perfuade a quaker affembly into any thing, where a military ftrength or fecurity is implied.

We may observe, that some part of these Indian lands W. southerly of Pensylvania, to the quantity of 600,000 acres, have a year or two ago, been granted by the crown to a company of gentlemen in Virginia, free of quit-rent for 21 years; in the prayer of their petition, they propose the fettling and cultivating the fame, as well as to carry on trade with the Indians. The whole of this affair is now represented at home to the ministry, by the governor of Pensylvania.

In

In all affairs the French act the hucksters, at first make great demands, but afterwards gradually recede. It is faid, that as the French are now in possession of Crown-Point fort and fettlement near lake Champlain in about 44 d. N. lat. their first demand of boundaries was a parallel of 44 d. lat. which cuts off from us part of New-York and New-Hampshire, almost the whole of the province of Main, all the good country upon Quenebeck river, all Sagadahock or the late property of duke of York, almost the whole of Nova-Scotia, including Anapolis-Royal in 44 d. 40 m. and Chebucto in 44 d. 10 m. and Canfo; the French court are fince faid to have ceded, and propofed to make a ceffion of one degree of latitude; that is, their bounding parallel of latitude shall be 45 d. as the grant of K. James I. anno 1606, to the North-Virginia company extended no further; and moreover, that the French governor Champlain had taken poffeffion of the gulph and river of St. Laurence before this, and before the Dutch occupied the New-York fettlement. This parallel of 45 d. in favour of the French includes all the Canfo islands with the northern parts of the bay of Fundy: and the good country upon St. John's river; leaving to Great-Britain the peninfula of Nova-Scotia, Crown-Point, and the greatest part of the country upon lake Champlain or the Dutch Corlaers lake; + the ceffion of Nova-Scotia to Great-Britain by the treaty of Utrecht, was underftood by the nation or people of Great-Britain to be according to the extent of the French commission so far as Cape-Rosiers, to Mr. Subercasse their last governor of L'Accadie; but by a parallel of 45 d. in the meridian of Cape-Rofiers in lat. of 50d. 30m. we give up 5d. 30m. of latitude; in the meridian of Quebeck in lat. 46d. 55m. we give up about 1 d. 55m. of latitude; in the meridian of Mont-

† This Corlaer was a principal man amongst the Dutch settlers, and this lake was called by his name; the French call it lake Champlain, and it generally has obtained that name; Champlain was the first governor of Canada.

Q 3

real,

Digitized by Google

real, a very fmall matter. Thus the French explain the loofe treaty of Utrecht, to our very great difadvantage, as if they gave the law, and were fupreme judges thereof; O tempora!

The north boundary of the province of New-York, may be, the fouth line of Canada when fettled; probably it will begin at a point in a meridian twenty miles eaft of the crook or great falls of Hudfon's river, and running weft will crofs lake Champlain, and terminate in Cataraqui river.

Its W. line runs up Cataraqui river, and lake called generally lake Ontario, and terminates on lake Erie in north lat. 42 d. complete. From Ofwego upon lake Ontario may be reckoned the width of the government of New-York, 220 miles, vize due W. from the lake 200 miles to Albany on Hudfon's river, and from Albany 20 miles due W. to the weft line of Maffachufetts-Bay province.

۵.

The fouthern line of the province of New-York is in feveral directions or flexures. I. From lake Erie along the north or head line of Penfylvania in lat. 42. to Delaware river. 2. Thence 20 miles down faid river to the north divisional point of New-York and New-Jersies on faid river in lat. 41 d. 40 m. 3. Thence in a streight line E. 42 d. S. to 41 d. lat. on Hudson's river. 4. Thence 12 miles down Hudson's river to north end of the island of New-York, then down faid Hudfon's river on the W. fide of New-York island to Sandy-point, the entrance of New-York road and harbour about 30 miles. 5. Thence along the fouthern fhore of Long-Ifland, - round the E. end of Long-Island, including Fisher's ifland and Gardner's ifland, which lie near the entrance of New-London harbour in Thames river of Connecticut colony; then along the northern fhore of Long-Island found to over-against the mouth of Byram river, where the weilern divisional line between New-York and Connecticut begins.

The eaflern line is from the mouth of Byram river, along along the Oblong as defcribed in the fection of Connecticut, vol. II. p. 161, to the N. W. corner of Connecticut colony or S. W. corner of the province of Maffachufetts-Bay, about 80 miles: thence in a parallel with Hudfon's river at 20 miles diftance E. from Hudson's river. along the western line of Massachusetts-Bay, about 47 miles to the N. W. corner of Maffachufetts-Bay, which is the S. W. corner of lands lately annexed, or crown lands put under the jurifdiction of the province of New-Hampshire pro tempore; thence in a like parallel from Hudson's river, about 40 miles upon the western line of New Hampshire, to the latitudes of the great falls or crook of Hudson's river; thence in a due meridian line on the weft line of the crown lands, + at prefent in the jurifdiction of New-Hampshire, to the fouth boundary line of Canada, when by much protracted and finally perhaps difadvantageous negociations it shall be determined. The reader may observe, that I have neither inclination nor interest to be of any fide, other than folicitous for a national concern.

We may observe, that as the dividing line between New-York and New-Jersies in duke of York's grant of 1664 to lord Berkley and Sir George Carteret, is from the N. latitude of 41 d. on Hudson's river, to the lat. of 41 d. 40 m. on the northermost branch of Delaware river; fo that the fixing of the two latitudes, and running of the line between them, was all that was required for the fettling

+ In a late final fettlement of the north boundary of the province of Maffachufetts-Bay; if the administration at home, for the interest of our mother country and its plantations, had been advised by gentlemen intelligent in the affair; the lands north of that line, being crown lands, might have been annexed to the province of Maffachufets-Bay, though not in property, yet in jurifdiction, as are the lands of Sagadahock; the infignificant impotent small province of New-Hampshire can never be capable of cultivating and defending it against the Canada French and their Indians; fo large a tract of wilderness lands as this, is, leaving a vast country uncultivated, or to the use and improvement of the French. é

Digitized by Google

of

Q4

of that line: accordingly 1719, by act of the general affemblies of both provinces, commissioners and furveyors were appointed; after many observations, the latitude of 41 d. 40 m. on the northermost branch of Delaware river was fettled, and executed by indentures under hands and feals; and to commemorate the fame, these indentures were recorded at Perth-Amboy in New-Jerfey, lib. D. No. 2, p. 280, &c, and in New-York in a book of entries beginning August 1739, p. 168, &c. then a streight line was run by the faid commissioners and furveyors to Hudson's river, and the furveyors made many observations there, of the meridian altitudes of the fun and proper stars, to difcover the proper latitude on Hudson's river; but the commissioners never met afterwards to fix that point; therefore it remains undetermined to this day, though frequently demanded by the East-Jersies.

The deed of the equivalent lands, (fee vol. II. p. 161) called the Oblong from Connecticut to New-York in the king's name, was not fealed or delivered until May 14, the grant of the greatest part of these lands to Sir Jofeph Eyles and company was next day after, being the 15th of May, and not put upon record till fome time thereafter. The controverfy between Eyles and company, and Hauly and company, concerning the property of these lands, is still fublishing; the contracted nature of a fummary does not allow us to infert it at large; only we observe, * that Sir Joseph Eyles and company, March 10, 1730-1, prefented a petition to the king in council for this land, by the name of " a certain " tract of land in your majefty's province of New-York " in America, &c." computed at 62,000 acres; on the fame day it was referred to a committee of the privy council, and 24th of that month, they refer it to the lords commissioners of trade and plantations; the

• This I infe t in fo minute a manner, by way of information, how plantation affairs are managed at the feveral boards in Great-Britain. lords lords of trade made their report to the lords of the committee, "We think it for his majefty's fervice to grant to them, their heirs and affigns, the lands they petition for," &c. and on the 30th March 1731, the lords of the committee make their report to the king in council, " apprehending that all reafonable encouragement ought to be given for the fettling of lands in your majesty's plantations, do agree with the opinion of the faid lords commissioners for trade, &c. and that it may be advifable for your majesty to grant to the petitioners the faid lands in the manner above proposed." April 8, 1731, the king in council approves of the report of the lords of the committee, and orders a grant accordingly, by ordering the lords commiffi-oners of his majefty's treasury to prepare a warrant for paffing it, and on the 4th of May 1731, the lords commissioners of the treasury directed the warrant for the grant to the attorney and folicitor general; the grant itself, under the great feal of Great-Britain, is dated May 15, 1731; after reciting the words of the petition, " are graciously pleased to gratify the peti-tioners of their request: know ye," &c.+—About the fame time the governor and council of New-York granted, by virtue of their royal instruction for granting of province lands, to Hauly and company the fame lands; which of these grants shall take place, is not as yet decided; it is certain, that the deed of these equivalent lands, from Connecticut to his majefty was not fealed and delivered until May 14, 1731, yet at the diftance of 1000 leagues was granted next day to Eyles, &c.

The extent of the province government or jurifdiction of New-York is as follows; from N. to S. that is, from Sandy-Hook in lat. 40 d. 30 m. to the fuppofed Canada line in the parallel of 45 d. lat. are 313 English miles;

Digitized by Google

⁺ There feems to be fome imposition in the petition of Sir Joseph Eyles and company, representing these lands, as productive of pitch, tar, other naval flores, mines, and furrs.

the extent from W. to E. is various. T. From the E. foutherly termination of the boundary line between the Jerfies and New-York in lat. 41 d. upon Hudfon's river to Byram river, where the colony of Connecticut begins, are 10 miles. 2. From the W. northerly termination of the faid boundary line between Jerfey and New-York on the north branch of Delaware river in lat. AI d. Am. to Connecticut W. line, including the Oblong, are 82 miles, whereof about 60 miles from Delaware river to Hudson's river, and 22 miles from Hudson's river to the prefent Connecticut W. line, Oblong included. 3. From 41 d. 40 m. on Delaware river, New-York runs 20 miles higher on Delaware river to the parallel of 42 d. lat. which by Penfylvania royal grant divides New-York from the province of Penfylvania; upon this parallel New-York is supposed to extend west to lake Erie; and from thence along lake Erie, and along the communicating great run of water + from lake Erie to lake Ontario or Cataraqui, and along lake Cataraqui and its discharge Cataraqui river to the aforefaid Canada fuppofed line with the British colonies; we shall instance the breadth of New-York province from Ofwego; || as being a medium

+ In this run of water or communicating river, are the noted great Niagara falls frequently mentioned, and a French pass to keep up the communication between Canada and Missifippi, called fort Denonville.

1 Ofwego, formerly mentioned, is a fort and Indian trading place in times of peace, with a garrifon of 25 foldiers from the four independent regular companies, to prevent any diforders in trade; this being in the feafon a kind of Indian fair: laft French war the garrifon confifted of 200 men of regular troops and militia, and the French did not find it convenient to moleft them. Our traders with the Indians fit out from Albany, and pay a certain duty upon what they vend and buy at Ofwego; their rout is; from Albany to Schenectady town or corporation upon Mowhawks river. 16 miles land carriage; thence up Mohawks river, in this river is only one fhort carrying place at a fall in that river; from Mowhawks river a carrying place of 3 to 5 miles according to the featons, here are convenient Dutch land carriages to be hired, to a river which falls into the Oneides lake; then from this lake down Onondagues river to Ofwego trading place dium in this line. Ofwego fort and trading place with many nations of Indians upon the lake Ontario, Cataraqui or Ofwego in lat. 43 d. 33 m. lies weft northerly from Albany about 200 miles, and 20 miles from Albany to the weft line of the province of Maffachufetts-Bay, in in all about 220 miles. Montreal lies N. by E. of Albany above 200 miles.

Besides, the main land country of New-York, there are fome islands belonging to it. 1. Long-Island, called by the Indians Matowacks, and by the Dutch, Nassau, it lies in length from E. to W. about 120 miles, and at a me-

place upon lake Ontario, there is a fhort fall in Onondagues river. Almost the whole of the east fide of the Ontario lake lies in the Onondagues country. From Ofwego fort to Niagara falls or French fort Dononville are about 160 miles, and from Ofwego fort 60 miles to fort Frontanac, also called Cataraqui fort, where the lake vents by Cataraqui river, which with the Outawae river makes St. Laurence river called the great river of Canada; this fort Frontanac is about 200 miles down that rocky river to Montreal.

By conjecture of the French Coureurs des bois in round numbers, the circumferences of the five great lakes or inland feas of North-America, are, Ontario 200 leagues, Erie, 200 leagues, Hurons 300 leagues, Mihagan 300 leagues, and the upper lake 500 leagues.

As I do not write this, as a rigidly connected piece, I mention feveral things as they occur, but without any confiderable deviation. 1. The Mohawk nation of our allied New-York Indians live on the fouth fide of a branch of Hudfon's river called Mohawks river, but not on the north fide thereof; as is reprefented in the French maps. 2. The Oneides nation lie about 100 miles W. from Albany, near the head of the Mohawks river. 3. The Onondagues lie about 130 miles weft from Albany. 4. The Tufcaroras, an adventitious or fixth nation (in former times they were called the Five nations) live partly with the Oneides, and partly with the Onondagues. 5. The Cayugas about 160 miles weft from Albany. 6. The Senecas who live upon the frontiers of Pentylvania are about 140 miles weft from Albany. A Frence noted writer M. de Lifle calls thefe Five nations by the name of Iroquois.

Formerly the French had popifh miffionaries with the Oncides, Onondagues, and Cayugas, and endeavoured to keep them in their interest.

There is fearce any beaver in the country of the Five nations; therefore their hunting at a great diffance from home, occasions frequent jarrings with other Indian nations; this trains them up by practice, to be better warriors than the other Indian nations.

dium

Digitized by Google

dium is about 10 miles broad; its east shore is a fandy flat, as is all the E. fhore of North-America from Cape-Cod of New-England in N. lat. 42 d. 10 m. to Cape-Florida in about 25d. N. lat. Upon this fhore of Long-Island are very few inlets, and these very shallow: its north fide is good water, being a found between it and the main land of Connecticut; the wideft part of this near New-Haven of Connecticut does not exceed 8 leagues. Two thirds of this island is a barren fandy foil. The eastern parts were settled from New-England, and retain their cuftoms; the western parts were settled by the Dutch, where many families to this day understand no other language but the Dutch. It is divided into 2 counties, Queen's county, King's county, and Suffolk county, and pays confiderably above one fourth of the taxes or charges of the government of the province. Hell-Gate, where is the confluence or meeting of the E. and W. tide in Long-Island found, is about 12 miles from the city of New-York. 2. Staten-Island at its E. end, has a ferry of three miles to the W. end of Long-Island; at its W. end is a ferry of one mile to Perth-Amboy of East-Jersies, it is divided from East-Jersies by a creek ; is in length about 12 miles, and about fix miles broad, makes one county, called Richmond, which pays fcarce one in 'one and twenty of the provincial tax; it is all in one parish, but feveral congregations, viz. an English, Dutch, and French congregation; the inhabitants are mostly English; only one confiderable village, called Cuckold's-town. 3. Nantucket, Martha's vineyard and Elizabeth islands were formerly under the jurifdiction of New-York, ; but upon the revolution they were annexed by the new charter of Maffachufetts-Bay, to the jurifdiction of Maffachuletts-Bay; not many years fince, fome of the freeholders of these islands when occasionally in New-York, were arrefted for the arrears of the general quitrents of these islands. 4. Manhatans, the Indian name. New-Amfterdam the Dutch name, or New-York the Englifh name, may be called an ifland, though it has a communication

munication with the main land, by King's bridge, the whole island being about fourteen miles long, but very narrow, is all in the jurifdiction of the city of New-York; it lies on the mouth of Hudson's river.

In the province of New-York are four incorporated towns, who hold courts within themfelves, fend reprefentatives to the general affembly or legiflature, with fundry exclutive privileges. I. The city of New-York and its territory, formerly eftablished by col. Dongan, fends four representatives. 2. The city of Albany probably had their charter also from col. Dongan, and is nearly the fame with that of New-York, fends two reprefentatives. 3. The borough of West-Chester; and 4. The township of Schenectady; it feems these two corporations had their charters before the revolution, and each of them fend one representative to the general assembly.

As a specimen of town corporation charters, in the plantations, I thall infert an extract of the charter of the city of New-York; it is the fulleft and the most exclufive of any of them. It begins by mentioning or reciting feveral grants of privileges which they have enjoyed by patents and charters. "Whereas the city of New-"York is an ancient city, and the citizens anciently a " body politick with fundry rights, privileges, &c. as well " by prefcription as by charters, letters patent, grants and " confirmations, not only of divers governors and com-" manders in chief in the faid province, but also of feve-" ral governors, directors, generals, and commanders in " chief of the Nether Dutch nation, whilft the fame was " or has been under their power and fubjection. That Tho-" mas Dongan, Esq; lieutenant governor of New-York, " under king James II. August 27, 1686, by a charter " confirmed all their former grants not repugnant to the " laws of England and province of New-York, with fome " additions, granting to them all the unappropriated lands to " low-water mark in Manhatan's island, under the yearly " quit-rent of one beaver fkin, or the value thereof; their "jurifdiction to extend all over the island, &c." That this charter was confirmed by a fublequent charter from lord

lord Cornbury governor, April 19, 1708, with fome additions granting to them the ferries, &c. That as fome queftioned the validity of their former charters, becaufe they were in the governor's name only, and not in the name of their kings and queens, they petition governor Montgomery for a new charter, confirming all their former privileges, with fome additions; granting to them four hundred feet below low-water mark in Hudfon's river, &c.

Governor Montgomery's charter by which they now hold, is dated January 15, 1730, and afterwards confirmed or corroborated by an act of the provincial affembly or legiflature of New-York, and declared to be a publick act, relating to the whole colony. The fubflance of this charter is as follows.

" They are incorporated by the name of the mayor, al-" dermen and commonality of the city of New-York .--" The city to be divided into feven wards, viz. west-ward, " fouth-ward, duck-ward, east-ward, north-ward, Mont-" gomery-ward, and the out-ward divided into the Bowry " division and Harlem division .- The corporation to con-" fift of one mayor, one recorder, and feven aldermen, " feven affiftants, one fheriff, one coroner, one com-" mon clerk, one chamberlain or treasurer, one high con-" stable, fixteen assessors, feven collectors, fixteen con-" stables, and one marshal. The mayor with confent of " the governor, may appoint one of the aldermen his de-" puty. The governor yearly to appoint the mayor, fhe-" riff, and coroner, and the freeholders and freemen in " their respective wards to chuse the other officers, ex-" cepting the chamberlain, who is to be appointed in coun-" cil by the mayor, four or more aldermen, and four or " more affiftants. The mayor to appoint the high con-" ftable ; all officers to take the proper oaths, and to con-"tinue in office till others have been chofen in their " rooms; when any officer dies, the ward is to chufe an-" other; upon refufal to ferve in office, the common " council may impose a fine not exceeding 15 l. for, the " use of the corporation. The mayor or recorder, and <f four

" four or more aldermen, with four or more affiftants, to " be a common council to make by-laws, to regulate the " freemen, to leafe lands and tenements, &c. but to do " nothing inconfistent with the laws of Great-Britain or " of this province; fuch laws and orders not to continue " in force exceeding 12 months, unless confirmed by the " governor and council. May punifh by disfranchifing, or " fines for the use of the corporation. The common coun-" cil shall decide in all controverted elections of officers. " The common council may be called by the mayor, or " in his absence by the recorder; fine of a member for " nonattendance not exceeding 20 s. for the use of the " corporation. The corporation may establish as many " ferries as they may see fit, and let the same. To hold a " market at five or more different places every day of the "week, excepting Sunday; to fix the affize of bread. " wine, &c. The mayor with four or more aldermen " may make freemen, fees not to exceed 51.; none bur " freemen shall retail goods or exercise any trade, penalty " 5 l.; no aliens to be made free. To commit common vagabonds, erect work-houses, goals, and alms-houses. " The mayor to appoint the clerk of the market, and " water bailiff; to licence carmen, porters, cryers, sca-"vengers and the like; to give licence to taverns and " retailers of ftrong drink for one year, not exceeding " 30 s. per licence; felling without licence 51. current " money toties quoties. The mayor, deputy mayor, re-" corder, and aldermen for the time being, to be juffices " of the peace. The mayor, deputy mayor, and re-" corder, or any one of them, with three or more of the " aldermen, shall hold quarter fessions, not to fit exceed-" ing four days. Mayor, recorder, and aldermen, to be " named in all commissions of over and terminer, and " goal delivery. The mayor, deputy mayor, recorder, " or any one of them, with three or more of the aldermen, " fhall and may hold every Tuefday a court of record, to " try all civil caufes real, perfonal, or mixt, within the " city and county. May adjourn the mayor's court to any " time not exceeding 28 days. The corporation to have a " common 1

" common clerk, who shall be also clerk of the court of " record, and feffions of the peace, to be appointed " during his good behaviour, by the governor ; eight at-" tornies in the beginning, but as they drop, only fix to " be allowed, during their good behaviour, for the mayor's " court; the mayor's court to have the direction and " cognizance of the attornies, who upon a vacancy shall " recommend one to the governor for his approbation. " The mayor, recorder, or any alderman, may with or with-" out a jury determine in cafes not exceeding 40 s. value. " No freeman inhabitant shall be obliged to ferve in any " office out of the city. A grant and confirmation to all " the inhabitants of their hereditaments, &c. paying the " quit-rent referved by their grants. The corporation " may purchase and hold hereditaments, &c. fo as the " clear yearly value exceed not 3000 l. fterl. and the " fame to difpose of at pleasure. To pay a quit-rent of " 30 s. proclamation money per ann. befides the beaver " Ikin, and 5s. current money in former charters re-" quired. No action to be allowed against the corporation " for any matters or caufe whatfoever prior to this char-" ter. A pardon of all profecutions, forfeitures, &c. " prior to this charter. This grant or the inrolment there-" of (record) shall be valid in law, notwithstanding of " imperfections, the imperfections may in time coming be " rectified at the charge of the corporation."

As I am now to relate the French and Indian wars which concern the British province of New-York, with their other Indian affairs; as also fome account of the fucceffions of governors and governments in the colony of New-York; instead of fummary references, as we proposed, for the ease of the reader I shall use a connected and fluent short recapitulation, which will point out fundry of our claims in North-America.

French and Indian wars, with other Indian affairs.

Sebastian Cabot, a subject of England, employed by K. Henry VII. to difcover a N. W. paffage to China, ann. 1496,

I

1496, touched at all the confiderable inlets on the eaftern coaft of North-America from Cape-Florida in N. lat. 25d. to N. lat. 67 and half d. and took a NOMINAL poffeffion of the whole for the crown of England (fee vol. I. p. 273) but making no fettlements, he made no title by occupancy, or purchase from the Indians.

Sir Walter Raleigh, a native of England, anno 1 584, with people fettlers, landed at Roanoak in the prefent North-Carolina, fettled and took poffeffion for queen Elizabeth, and called all the North-America coaft by the name of Virginia, * in honour to the virgin queen Elizabeth. After fundry fmall adventures to Virginia in general, April 10, 1606, two companies were incorporated in one letter patent by K. James I. called the South and North-Virginia companies. The South-Virginia company began a fettlement in Chefapeak-Bay 1607; the North-Virginia company carried on (but in feparate adventures) fome fmall trade in fish and furr, but made no / fettlement with continuance till 1620 + when they began to fettle Plymouth in New-England; being late in the feafon, the weather obliged the defigned fettlers to put up with the first land or harbours, accordingly they landed in Plymouth-Bay of Massachusetts, and have continued there ever fince.

Capt. Henry Hudson 4 in some Dutch company's fer-

* Some pedantick criticks, in imitation of fome annotators upon the Greek and Roman clafficks, imagine that he meant a young virgin country, never before occupied by the Europeans.

+ The defigned fettlers had made a fort of contract with the council of Plymouth or North-Virginia company, for a territory upon Hudfon's river: this evinces that in these times, the Dutch or any other European nation by prior discovery, occupancy, prescription, or any other claim, had no equitable right to that country.

4 This Hudson was a great enthusiattick projector of N. E. and N. W. passages, and gave name to Hudson's Bay, and Hudson's river of New York; he perished in one of his passage adventures, being never heard of more.

It is faid by the French, that Canada was first settled by the French under Champlain their first governor 1603; being five years before Hudion took possession of New-Netherlands for the Dutch.

VOL. II.

vice,

Digitized by Google

ļ. vice, but an Englishman, anno 1608, came to the mouth of Hudson's river (as it is fince called) though in the limits of both faid corporations or companies, and without licence from the king of England, purchaled (as it is faid) of the Indians that certain territory, and disposed of his rights to the Dutch West-India company, or rather to fome merchants of Amsterdam; and the Dutch made fome imperfect irregular fettlements there. Sir Samuel Argol governor for the South-Virginia company 1618 drove the Dutch from their usurped settlement : however, the Dutch obtained 1620 of that pacifick eafy prince K. James I. leave to make a small settlement there. for wooding and watering of their Brazil fleets, and 1629 the Dutch made a regular colony of it, and their commander in chief was called director general of New-Netherlands.

Carr, fea commander, and Nichols land commander, arrived before New-Amfterdam, fince called New-York. with an armed force August 20, 1664, and furmoned the Dutch governor to furrender; accordingly 27th following, articles were agreed upon; New-Netherlands was furrendered to England, and col. Richard Nichols was appointed lieut. governor by the duke of York, who had obtained a previous grant thereof from his brother K. Charles II. New-Netherlands was confirmed to England by the treaty of Breda 1667 : but as England, March 17, 1671-2 proclaimed war against the Dutch, the Dutch eafily reconquered it from the English 1673, col. Lovelace governor; but afterwards by the treaty of London 1673-4 the Dutch made an absolute ceffion thereof to England, and in confequence thereof as New Netherlands had been conquered fince the first grant, to prevent difficulties in titles, K. Charles II. made a fecond grant, June 29, 1674, to his brother the duke of York, with the right of government to him, his heirs and affigns. shall not anticipate what matters of this grant belong to the fections of the Jerfies and Penfylvania. Governor Andros by letters of October 31, 1674, acquaints the neighneighbouring governors, that he had received poffession of New-York, &c. No act of government appears upon record from July 19, 1673, to November 6, 1674; then were published the second royal letters patent to the duke of York of New-York and the Jersies, dated June 29, 1674.

The Dutch interlopers at their first arrival in this country 1608, entered into alliance with the Five Nations called by the French Iroquois; it continued without interruption, and remains to this day a firm alliance with the English II who fucceeded the Dutch in the European jurifdiction of these countries.

Thefe five tribes of Indians are called nations, though properly all of one nation; they are diftinguished by the names of Mohawks, Oneides, Onondagues, Cayugas, and Senecas. In the North-Carolina war with the Tuscaroras Indians 1711, many of these Tuscaroras were obliged to fly their country, and fettled with the Onondagues and Cayugas, and are now called the Sixth nation. The several small villages of Sesquahanna and Delaware river Indians, are under the protection of the Senecas; the Senecas are by far the largest of the Six nations, and lie upon the frontiers of Pensylvania. Several of the renegadoes of the Five nations have settled above Montreal, and are called Cohunagos or praying Indians.

Why do we not fend military officers amongft the Indians to inftruct them in the European arts of war. The French with good fuccess follow this practice. Some fay that the officers of the four independent companies of fufiliers * in New-York live like military monks in idleness and luxury.

The French use an argument with the Indians to be of their fide, viz. that they do not covet their lands, as the English do.

If The reader may excuse my frequent inadvertent impropriety of writing in times fince the union, English instead of British; it is the common speech expression, but very improper.

• Fufiliers are to called, because they are supposed to be armed with light mulquets called suffers.

During

During K. William's war, the inhabitants of Canada lived in continual fears of thefe Five Indian nations, their feed time and harvest were much neglected. Canada is a tyrannical government and barren foil. Their lands fcarce produce sufficient for the sufference of the inhabitants.

We may observe, that amongst the abovefaid Six Indian nations or tribes, the Onondagues refemble that canton, where the deputies of the feveral Swifs cantons meet upon alfairs of great concern. The Onondagues, Oneides, and Cayugas, have frequently been in the French interest, by the management of the French missionary priests. Our missionary priests, instead of this laborious, but vastly useful publick duty, are indulged in a fort of fine cures, in our most opulent and well provided fettlements; they labour only in confounding the fober and industrious well-meaning prefbyterians, congregationalists, &c. to the great detriment of the publick good; a new regulation amongst our missionaries is much wanted.

1665, Sept. Courfal arrived governor of Canada; next fpring with 28 companies of regular troops, and all the marching posse of Canada that could be spared, marched perhaps 250 leagues into the country of the Five nations; they did little or no execution; and 1667 a peace was concluded between the French and their Indians, and the province of New-York with their Five nations of Indians: this peace continued till 1683.

1684, De la Barre governor of Canada, with all the posse of Canada, marched and rendezvouzed at Cataraqui fort, + while at the same time he was only amusing the

† It is now called fort Frontenac, being built by count de Frontenac governor of Canada, on Cataraqui lake, near the mouth of Cataraqui river, which runs to Montreal, and with the Ouatawaes river forms the great river of Canada called the river of St. Laurence.

M de la Salle upon Cataraqui lake built a bark of 60 tuns, bat the neighbouring Indians in jealoufy foon burnt her.

For

the government of New-York, with fome trifling complaints against the Five Indian Nations, to lull them asleep. 1684, in July, lord Howard of Effingham, governor of Virginia, and col. Dongan lieut. governor of New-York, had an interview with the Five Indian nations at New-York.

1685, marquis de Nonville, who fucceeded the governor general de la Barre, with 1500 men, regular troops, Canada militia, and Indians, rendezvouzed at fort Frontenac or Cataraqui, defigned against the Five Indian na-, tions; they did no execution.

1687, governor general Nonville with 1500 French and Indians infulted the Seneca nation. In return for this the Five Iroquois nations to the number of 1200 men, July 26, 1688, invaded the island of Montreal; the governor general with his court, were there at that time; they ravaged the country, killed many people, and carried off captives; the Mohawks lost only three men; the French abandoned their fort upon Cataraqui lake, and left 26 barrels of gun-powder.

In February 1689-90, the French, confifting of 500 Coureurs des bois (in New-England they are called Swampiers,) with as many Indians or favages, made incurfions upon the province of New-York; they burnt Corlaer's village called Schenectady, and murdered 63 perfons.

In the memory of man the Mohawks never received fuch a blow as in the winter 1692-3; col. Fletcher with 300 volunteers marched to Albany, and the French with their Indians returned home.

1696, the French with a large force made an incurfion upon the New-York Indians, with a defign to deftroy the fettlements of Albany and Schenectady, but were repulfed by governor Fletcher.

During queen Anne's war, the Five Indian nations

For the Indian nations where the English and French have particular concerns, see vol. I. p. 179

For the Iroquois or bix nations of Mohawk Indians, fee vol. I. p. 185; they may confift of about 1500 marching men.

had

had a neutrality with the Canada French and their Indians, and by this means the province of New-York carried on a continued advantageous trade with Canada.

New-York had no concern in the New-England Indian war 1722 to 1725.

The French had lately erected a fort at Crown-Point near the lake Champlain upon the frontiers of New-York government; during the late French war from 1744 to 1747 inclusive, Crown-Point was the rendezvouz of the Canada French and their Indians, confequently their onfets were mostly upon the province of New-York and the N. W. corner of the province of Maffachusetts-Bay: 1745 from Crown-Point they destroyed Saratoga settlement, about 30 miles above Albany. The New-York frontier places where militia were posted, are Schenectady, Albany, and Kinderhoek. Anno 1745, 1746, and 1747, the French and their Indians, above Albany, killed and captivated above 320 of our people.

Toward that chargeable amufement, called the intended expedition against Canada of 1746, New-York province contributed 15 companies of 100 men per company; the 61. New-York currency in levy money, and victualling for 16 or 17 months, was a confiderable load.

The four independent regular companies of 100 men each, flationed at New-York many years, are an advantage to the country; they draw from Great-Britain, about 7,5001. fterl. per ann.

Succession of governors in the province of New-York.

I shall not enumerate the commanders in chief, during the possession of the Dutch, they were shiled variously, viz. directors, generals, governors, &c. The present stille of the British governor, is, "Captain "general, and governor in chief in and over the province "or colony of New-York, and territories thereon de-"pending, and vice admiral of the same." Before the revolution, the commanders in chief had only the title of lieutenant governor under the duke of York, as

he
he was principal governor by patent. Upon K. James / II. abdication, the property and government of the colony ' of New-York, and the territory of Sagadahock in New-England, reverted to the crown.

The first English governor was col. Richard Nichols, his commission bore date April 2, 1664, he was commander of the land forces in the reduction of New-Ne-. therlands, and one of the commissioners for settling the boundaries of our colonies in North-America. He continued governor to 1683, and was succeeded by

Sir Edmond Andros, * he was governor only for a fhort time, and was removed to the government of New-England; the feveral charter colonies of New-England having from the iniquity of the times, either by a courfe in law had their charters taken from them, or tacitly dropt; he arrived in Bofton in December 1686 with lieut. governor Nicholfon and two independent companies of foldiers. See vol. I. p. 413. In April 1689, by a revolution in New-England, in confequence of the general revolution at home, he was difqualified and went home; excepting his bigotry † to popery and the arbitrary power of his prince, he was a good moral man. He was appointed governor of Virginia 1692; he died in London 1714, of a good old age.

Andros was fucceeded by col. Dongan 1684; he was..... a Roman catholick, but much of a gentleman and patriot,

• Sir Edmond Andros 1672 had fome command in New-York, and after him col. Lovelace.

+ The Roman catholick religion or popery feems to be requifite where an arbitrary power in the king and his miniftry are endeavoured after. An enthuliaftick implicit faith as to religion in the pope and his clergy, is in a political way, a natural introduction of a paffive obedience in civil affairs, to the king and his miniftry; and perhaps in all politias, an enthuliaftick (man is an enthuliaftick animal) fuperflitions deference for the clergy is a fine qua non in civil government; therefore the clergy ought to be facred, and not ridiculed by the inconfiderate wits of the age; the famous Dr. Swift is here much to be faulted, his fort was in this fort of ridicule. The devotion we pay to the clergy introduces a proper fubmiffion to civil authority; and it is the clergy's bufinels to labour this point.

he

247

he was irreconcilable to a French intereft; upon the revolution, being a papift, he was in confequence difmiffed from his government; but as a reward for his merits, he was created earl of Limerick. He made feveral grants of lands in Sagadahock, the duke of York's property, at prefent under the jurifdiction of the province of Maffachufetts-Bay; thefe grants in time, when claims are to be fettled, may occafion much confusion.

Upon the revolution, col. Benjamin Fletcher was appointed, he came over 1692 with fome regular troops, and was very industrious in repulsing the Canada French and their Indians. In his time, 1696, the church of England in New-York (called Trinity church) was built; it is the only church of England upon the ifland.

After this col. Leslie usurped the government (as his partifans faid, for a publick good) for which he and his friend Milburn suffered as traitors, having held out for fome time the fort against col. Slaughter, who was appointed governor by the king, and upon this kind of interregnum, succeeded Slaughter, he died foon in New-York.

Col. Dudley, as prefident, fucceeded in the chief command of the province; he was afterwards governor of the province of Maffachufetts-Bay for many years, fee vol. I. p. 478. He was a cunning man, and fome fay, a notorious time-ferver.

Lord Bellomont was appointed governor 1697; in his very late paffage to his government of New-York, the fhip by ftrefs of weather was obliged to bear away to Barbadoes, and did not arrive in New-York till May 1698. He was at the fame time governor of New-York, Maßachufetts-Bay and New-Hampfhire: he did not proceed to Bofton till June 1699, and after obtaining a generous allowance of 10001 and a gratuity of 5001. from the affembly, he returned to New-York. In New-York he was allowed 15001. currency yearly falary, and the lieut. governor capt. Nanfon was allowed 5001. lord Bellomont died in New-York, February 1700-1.

Lord .

Lord Cornbury, fon to the earl of Clarendon, fucceeded; he arrived in New-York 1701: upon the proprietors of the Jerfies refigning the government into the hands of queen Anne, he was likewife 1702 appointed governor of the Jerlies. Earl of Clarendon, formerly lord Cornbury, went home by way of Virginia, and was fucceeded by

Lord Lovelace; he arrived November 13, 1708, and died in May 1709.

1710, April, col. Ingoldíby, capt. of one of the independent companies, by a letter from the queen to the council of New-York, was difmiffed from being lieut. governor of New-York and Jerfies.

1710, June 14, arrives col. Robert Hunter with 2700 Palatines to fettle in the province of New-York; thefe Palatines were allowed only 10 acres of land to one family, therefore they generally removed to Penfylvania, where they had better encouragement. 1707, col. Hunter had been appointed lieut. governor of Virginia, but was taken by the French in his voyage thither. From New-York he went for England 1719. + Upon K. George II. acceffion, he was continued governor of New-York and the Jerfies. Upon account of his health, he obtained the government of Jamaica, he arrived in Jamaica, February 1727-8; by this advice of his phyficians he certainly obtain'd a reprieve of his life for fome years.

Col. Hunter was fucceeded in the government of New-York by William Burnet, Efq; a worthy fon of the celebrated bishop Burnet; 11. he arrived in autumn 1721.

Upon the acceffion of K. George II. col. Montgomery, a favourite, was appointed governor of New-York, and Mr. Burnet was removed to the government of Massachufetts-Bay commonly called New-England, where he died Sept. 7, 1729. Governor Montgomery arrived in New-York, April 28, 1728, and died there July 1, 1731.

[†] His wife, lady H1y, died August 1716. || See vol. 1. p. 480.

In January 1731-2, col. Cofby was appointed governor of New-York and the Jerfies: after a few years he died in New-York.

August 1736, George Clarke, Esq; lieut. governor of New-York succeeded in the administration, and continued some years.

George Clinton, Efq; * uncle to the earl of Lincoln, was appointed governor of New-York in May 1741, he did not arrive in his government until September 21, 1743; he continues governor at this prefent writing, July 1751.

Concerning the legislature and laws of New-York.

It is a fundamental in the British constitution both at home and abroad, in all the plantations, to make no laws, nor to raise any money without the consent of the people.

The legislature of the colony of New-York confifts of three negatives.

1. The governor or commander in chief for the time being,

2. The council; their complement is twelve in number, appointed by the king; when by death or other circumftances they fall fhort of a certain number, the governor may pro tempore fill them up to that number.

3. The 27 reprefentatives of the people elected by themfelves; they are all county reprefentatives, excepting the reprefentatives of four towns, and of three great mannors, viz. For the county of

* The hon. George Clinton Esq; is at present admiral of the white. In

In each of our colonies there are fome fundamental conflitutions which may be reckoned as invariable. 1. In the charter governments, their charters are their direction. 2. In the proprietary governments of Maryland, Jersies, + and Pensylvania, there are the proprietors original concessions to the people, not to be varied, but under certain restrictions; for instance, in Pensylvania, no article in the law of Mr. Penn's concessions can be altered without the confent of fix in feven of the alfembly men or reprefentatives. 3. In the royal or. crown governments, the governor's commission with the instructions, are the magna charta of the colony. during that commission; moreover, fome of the assemblies in king's government at their first congress or formation, make fundamental laws for themfelves; I shall, for instance, adduce that of New-York. Amongst : our colonies we have very confiderable variations in their conftitutions. In Penfylvania there are only two negatives in the legiflature, the council having no negative. In Virginia no bill can originate with the council. In , fome colonies the governor and council are the fupreme court of judicature; in others they are no court of judicature.

The New-York printed law-book begins April 1691 with a magna charta or fundamental conflictution, viz. That the kings of England only, are invefted with the right to rule this colony; and that none can exercife any authority over this province, but by his immediate authority under his broad feal of the realm of England. That the fupreme legiflative power and authority (under the king) fhall be in the governor, council, and reprefentatives of the people in general affembly; the exercife and adminifiration of the government fhall be in the governor and council, with the confent of at leaft fiveof the council; to govern according to the laws of the

province, or in defect of them, by the laws of England. Upon the death or absence of a governor, the first in nomination of the council to prefide. That every year there be held an affembly, and every freeholder of 40s. per ann, and freeman of a corporation, shall have a vote in chufing reprefentatives; here the reprefentatives are enumerated, and as many more as his majesty shall think fit to establish. That the representatives during their feffions, may adjourn themfelves and purge their own houfe; no member going, coming, and during the feffions, to be arrefted or fued, except for felony and treason. Their laws to continue in force till difallowed by his majefty, or till they expire. That every man shall be judged by his peers, and all tryals shall be by the verdict of 12 men of the neighbourhood; that in all capital and other criminal cafes there be a grand inquest to prefent the offender, and afterwards 12 men to try the offender. That in all cafes bail by fufficient fureties be allowed, unlefs in cafe of treafon, and of fuch felonies as are reftrained from bail by the laws of England. That no tax or imposition be laid but by the general affembly. That no freeman, tavern-keepers excepted, be compelled to entertain any foldier or mariner, unlefs in times of actual war with the province.-That all lands in this province be accounted as freehold and inheritance in free and common foccage, according to the tenure of East-Greenwich in England. That all wills attested by three or more witness, and registered with the office of the county in a fet time, be a fufficient conveyance for lands, &c. That any christian religion not disturbing the peace of the province, be freely allowed of, the Roman catholick excepted. + The enacting stile is, " By the governor, council, and general affembly of " the province of New-York."

A fummary cannot enumerate many of their municipal

+ In Penfylvania and Maryland, by the royal patents, by the proprietors conceffions, and by the fublequent provincial laws, Roman eatholicks are not excepted.

laws.

laws. The juffices of each county shall yearly summon all the freeholders in January to chufe two church wardens and 10 veftry men to affels, and the minister to be called, chosen and appointed by the wardens and vestry, Elections for representatives to be in the sheriff's court of the county or city, qualification for a voter 40s. at least freehold per annum improved land, no perfon to be chosen but who refides in the place. An. 1-00 there was no act to prevent all vexatious fuits or actions against those who at the happy revolution in England, did here begin fuch another revolution; they appointed capt. Jacob Leysler their commander in chief till his majefty K. William's pleafure should be known; and did feize the perfons and goods of feveral difaffected people. In each county or town, at the feffions of the peace, the justices of the peace, or at least five of them, whereof two of the quorum, shall appoint the rate for their county, as also a treasurer and collector. All men from 16 to 60 æt. to be lifted in some company of militia; each foot-man to have a cartouch box and fix charges, the horfe 12 charges; at their habitation to keep one pound powder, three pound bullets each foot; and two pound powder, and fix pound bullets each horfe.

In the province of New-York, to obtain a good title to vacant lands, first there must be produced an Indian deed, which must be approved of by the governor and council; by warrant it is furveyed by the provincial furveyor, and patented by the governor and council: the fees are very high.

The quit-rents for lands lately taken up are 2s. proclamation money per 100 acres. Two thirds of the government pay finall or no quit-rents, effectially for old grants, the larger grants on Hudfon's river called mannors; their quit-rents are only a pepper-corn, buck-fkin, or the like, when demanded.

The valuations of the feveral counties may be taken from

Digitized by Google

from the quotas allowed each of them, in proportion to their respective taxes, when paper money was emitted upon loan; for inftance 1738, they emitted 40,0001. currency upon loan, whereof.

To New-York city and county	10,0001.
Albany city and county	5,000
Queen's county	6,000
King's county	2,400
Suffolk county	3,000
Richmond county	1,600
Ulfter county	4,000
Orange county	2,000
Dutchefs county	2,000
Weft-Chefter	4,000

40,0001.

As to their paper currencies they are referred with other things of that nature to the appendix. At prefent I shall only observe, that towards the charge of an intended expedition against Canada 1709, they emitted 13,0001. publick bills of credit at \$s. currency per oz. filver, bearing interest; in the after emissions, no inserest was allowed, the contrivers of this fraudulent paper money currency, perceived that a reasonable interest would prevent its depreciation, and obstruct the advantages which they proposed from its depreciation. If They plausibly and fallaciously alledged, that the allowing of interest, occasioned their being hoarded up as common bonds bearing interest, and did not ferve as a

If This was the cafe in the enormous multiplied emiffions of paper credit or money, as it was called, in a neighbouring province; as the governor happened himfelf to be of the debtor fide of the queftion, and for valuable confiderations, as it is faid, inflead of borrowing the money already emitted, from the merchants at a reafonable intereft, which they generoufly offered, and which would have prevented further depreciating emiffions; he chofe rather, though with the confequence of involving the country in confusion and ruin, in favour of the land bank (an aflumed name) and other fraudulent debtors, to depreciate the debts by valt multiplied emiffions bearing no intereft.

common

common currency. In answer to this, the anti-depre-ciators may observe, 1. That any confiderate good man will allow, that money not payable or cancellable till after fome years, if only upon note bearing no interest, is not fo valuable as the fame fum of money upon bond bearing interest, payable after the same number of years; that is, these bills upon note only, in the nature of things must admit a depreciation or discount, and still a greater difcount if these notes ftretch too much their credit : this is the genuine mercantile nature of our depreciating plantation paper currency. 2. In the beginning they were not emitted as a tender in law, or common currency; but as government bonds or debentures bearing interest as are the transferable stocks of publick debts in Great-Britain, which by reason of the interest allowed, do increase to a valuable premium upon a transfer, and cannot depreciate as the plantation publick notes of credit have done.

As the plantations are at a vast distance from parliamentary enquiry, fome of our colonies have from time to time been loaded with amufing feint expeditions, the original and continuing causes of the plantation fraudulent paper credit called paper currency; the fraudulent debtors finding their advantage in depreciations, contrived fundry methods of further paper credit emisfions : thus in Massachusetts-Bay in the course of some years in the administration of governor Sh-, one fhilling was depreciated to the value of one penny fterl. New-York did reftrain itself from running much into a multiplied depreciating paper currency, fo that their exchange with London never did exceed 1901. New-York currency for 1001. fterl. N. B. When L any where mention exchange, I mean private punctual bills of exchange; government bills admit of a dilatory payment, and are bought cheaper; for inftance, upon, the Cuba or Spanish West-India expedition, government bills were fold in New-York and East-Jersey at 140 to 150; in West-Jersey and Pensylvania at 130 to 135; when

when at the fame time private punctual bills were fold at 190 in the first, and at 180 in the other places.

The militia of the province of New-York, are nearly upon the fame regulation with the militia of New-England; befides there are four regular independent companies of fufiliers, 100 private men to a company; their pay, cloathing, and accoutrements from Great-Britain, amount yearly to upwards of 78001. fterl. they are under the immediate direction of the commander in chief for the time, and are a confiderable perquifite: they are principally flationed at the city of New-York, Albany, and Ofwego; New-York was fo called from the duke of York's Englifh title, and Albany (formerly Orange Fort, by the Dutch) by his Scots title; the battery at New-York is called Fort George.

Befides the 5 or 6 nations of Iroquois or Mohawk Indians, there are feveral fmall parcels of Indians, upon the upper parts of Hudson's river, called River Indians or Mohegins; this was the Indian name of the great river, now called Hudson's river.

At fundry times in the city of New-York there have been negro confpiracies, more than in the other colonies; this I cannot account for; April 1712, a negro confpiracy kills many white men, and fets the town on fire.

Courts of judicature are much the fame as in New-England. + The judges of the fuperior or fupreme court are appointed by the king in council, and fometimes pro tempore by the governor; they are called first, fecond, &c. judges: the first judge is called chief juftice, and feems to have a confiderable authority or influence above the other judges. The prefent chief juftice is James Delancy Efq; of a regular liberal education,

+ This furmary if not check'd, is like to become too bulky, therefore I shall avoid repetition of things which bear a semblance to things already said.

and

and good eftate; he was appointed by governor Cofby, 1733, in place of Lewis Morris, Efq; who fucceeded an eminent lawyer Roger Mompession, Efq; chief justice of New-York and the Jersies, who furrendered that of the Jersies 1709.

Here is a court of chancery, a court not known in New-England, the governor is chancellor. In many of our colonies it renders the courts below of lefs authority; as it is very chargeable, and may be arbitrary, the chancellor ought to be a diftinct perfon from the governor (as are the intendants of the French colonies) and upon mifdemeanor, liable to the governor's infpection by fufpenfion, or the like.

The general affembly is no court of judicature, but they examine into the erroneous proceedings of the courts of judicature, and grant re-hearings.

Concerning New-York produce, manufactures, trade, and navigation.

Wheat and flour are the most confiderable articles of their produce and manufactures; fee their exports of provisions, in the clauses of custom-house entries and clearances.

Skins and furrs are a good article, but not fo large as formerly.

The article of iron in pigs and bars is a growing affair.

Schuyler's copper ore is from a mine in Jerfies, but exported from New-York, therefore it is mentioned in this fection. In the beginning of its difcovery it feemed to be very rich: it appears that it was formerly wrought by the Dutch, because in new working of it, were found hammers, wedges, &c. it fold in Bristol the ore at 40 l. fterl. per tun. The cartage to Hudfon's river is flort, and their first agreement with the miner, was to allow him one third of the ore for raising and laying it above ground; it was done up in quarter barrels, whereof fix made a tun. The richness of this copper Vol. II.

mine made fo much noife in the world, that a few years fince, to engrofs this ore for the benefit of Great-Britain, it was by act of parliament enumerated; but lately it has not been wrought and exported, as appears by the quarterly accounts of the cuftom-houfe of New-York; I cannot account for this.

By a late act of parliament, falt may be imported directly from any parts of Europe to New-York.

In queen Anne's reign there were three government packet boats, which alternately failed monthly between England and New-York, to tarry fourteen days at New-York, for the plantations or colonies benefit of trade, and for the government difpatches; these have been laid afide many years.

Governor Burnet (his head was well turned) obtained an act of assembly 1727, afterwards confirmed by the king in council, prohibiting all trade with Canada, that the French might not be fupplied with goods (in one year 900 pieces of strouds have been carried from Albany to Montreal) fuitable for promoting a French civil as well as trading interest with the Indians, and that the Indians may be induced to go a trading to Ofwego, + a late well projected and well executed English mart for Indian trade; governor Burnet always and effectually minded the business of his destination. The Indian trade is now in the hands of many; before governor Burnet's time it was engroffed by a few, and the Indians are become more dependent upon the English than formerly. From Albany to Ofwego, is a much eafier conveyance, than from Montreal, 200 miles up a rapid ftony river to fort Frontenac on lake Ontario, called alfo Ofwego.

In the province of New-York there is one collection or cuftom-house diffrict, kept in the port of New-

+ The carriage or communication between Albany and Ofwego is fo commodious, that at a time in relieving the garrifon of Ofwego, 40 people came in one birch canoe, 45 feet in length, 7 feet in breadth, from Ofwego to Schenoctady 183 miles, carrying places included.

York;

Of New-York.

York ; the twelve months accounts from September 29, 1749, to September 29, 1750, ftands thus :

	· · · · · · · · · · · · · · · · · · ·			
	232	,	286	

Here are included all veffels both on foreign voyages, and on coafting voyages of the neighbouring colonies; whereas in the collections of New-England the foreign voyages are only to be underflood; for inflance, Bofton cuftom-house from Christmas 1747 to Christmas 1748, foreign veffels cleared out 540, entered in 430; the fishing and coafting veffels of the adjoining colonies of Maffachusetts-Bay, New-Hampshire, Connecticut, and Rhode-Island, amounted to about as many, and are not included.

N. B. No copper ore was exported in these twelve months.

Entered in from Great-Britain and Ireland 16 veffels; cleared out for Great-Britain and Ireland 21 veffels; cleared out for Holland 5 veffels.

Cleared out 6731 tun provisions, chiefly flour; befides grain estimated or shipped by number of bushels, and not by tuns.

Imported about 800 pipes Madeira wines, whereof reexported 226 pipes. The Madeira wines shipped to New-York are reckoned better than what are shipped to any other of our colonies, therefore some are re-shipped to the other colonies.

Cleared out, tar 2008 barrels, pitch 156, turpentine 20, which were imported to New-York from the Carolinas. The colony of New-York does not produce naval ftores fufficient for their own ufe.

S 2

Mountains,

Mountains, rivers, and fome mifcellanies.

The most confiderable high lands are the Catkill mountains west of Hudson's river, and about 90 miles N. from New-York. What I mentioned vol. I. p. 454, 455, by way of annotation, concerning the runs of water from the Catkill mountains, en passent; now in its proper place requires to be corrected, and ought to be underftood as On the east and fouth east fides of Catkill follows. mountains, feveral streams run, and fall into Hudson's river below Albany; on their N. W. fide proceeds Schorie river, and falls into Mohawks river, a branch of Hudson's river, at fort Hunter about 20 miles above Albany; and this Schorie river in its courfe comes within three or four miles of the main branch of Delaware river; from the S. W. fide flows a confiderable branch of Delaware river. Conajoharie river falls into the Mohawks river about 10 miles above fort Hunter, and comes very near to a branch of Safquahanna river; this branch of Safquahanna is to large, that at 18 miles from the Mohawks river, the Indians go down in canoes to all the Indian fettlements upon Safquahanna river. From this fituation of these rivers, no runs of water from the Catkill mountains can fall into lake Ontario, into river Ohio, or into the Safquahanna river.

Excepting Long Island and Staten-Island, the main land fea line, from Byram river to New-York island, is very short.

The only confiderable river in this province is Hudfon's river; from the elbow where is the great carrying place to Wood-Creek towards Canada, to Sandyhook at its mouth, are near 200 miles; the tide way reaches upwards of 150 miles to Cohoes at the mouth of Mohawks river, about fix or feven miles above Albany church, its courfe is about S. 12 d. W; the tides, that is, the floods and ebbs, are about 12 hours later at Albany than at New-York; a little above the high lands at about 50 miles above the city of New-York, the water of the river becomes

Digitized by Google.

comes fresh; at about 100 miles comes on the W. fide Efopus or Soaper's river; the S. line of the province of Maffachusetts-Bay continued 20 miles, strikes Hudson's river a little below the mouth of Efopus river; this Efopus river is noted for the manufactures of iron pigs and bars, flour, malt liquor, &c. a little further on the E. fide of the great river, is the camp or Palatine town in the mannor of Livingston about 40 miles below Albany; at 125 miles on the E. fide falls in Kinderhock river after receiving Claverhock river; the great Ranflaers mannor, or Ranflaer Wyk, reaches along the great river, and 20 miles each fide of the river from Kinderhock mannor to Mohawks river; in this mannor is the city of Albany, and many peculiar tracts of land; at 150 miles as the river runs is the city of Albany; at 157 miles on the W. fide is Cohoes, or the mouth of Mohawks river; at 162 miles is Houfuck river's mouth, where live a fmall tribe of Indians called Scatacooks; this Houfuck river is on the E. fide of the great river, and comes from the north west parts of Massachusetts, and the S.W. parts of New-Hampfhire; the north line of Maffachufetts-Bay province continued 20 miles, falls in with Hudfon's river a little below Cohoes; at 200 miles from New-York is the elbow or flexure of this great river at the great falls. From these great falls the route to Montreal in Canada is 10 to 15 miles land carriage to Wood-Creek, then along the Verdronken drowned or overflowed lands to Crown-point a French fort and pass near lake Champlain, then along this lake to Chamblais river, and a little above Chamblais, I another French fort and pass upon Chamblais river, cross la Prairie to Montreal. There is another route up Hud-

As we formerly hinted, from fort Chamblais down the river of that name are 17 leagues to cape Sorel upon the great river of Canaca; this fort Sorel is 15 leagues below Montreal, and 35 leagues above Quebec the capital of Canada, the ordinary refidence of the French governor general of Canada. Quebec, from the accurate obfervations of des Hayes, is 70 d. W. from London. Bofton, the metropolis of British America, by the good observations of Mir. Robio, is 71 d. 30 m, W. from London.

fon's

fon's river above the elbow falls, to a carrying place to lake Sacrament, and thence to the fouth end of lake Champlain.

The city of New-York from governor Burnet's obfervations, lies in 40 d. 50 m. N. lat. 4 h. 58 m. W. long. from London. Here the variation 1723 was 7 d. 20 m. W. decreafing.

Upon the acceffion of a new governor, the general affembly of New-York generally iettle the falaries and other ordinary articles in fupport of the government, for five or more years.

For their fectaries in religion, see the Rhode-Island sectary, vol. II. p. 156.

As I find that the defigned appendix or fupplement may prove out of proportion too large, with refpect to the principal hiftory, I shall in each subsequent section annex by way of miscellanies fome matters which might have been referred to the appendix. These miscellanies are of the nature of digressions, and like change of diet, may relieve a palled stomach or appetite in reading.

Good iron is diffinguished by its ringing amongst other bars. The best iron bars break fibrous and bearded; if they break glassy and shining, the iron is brittle, and not good.

The inconveniencies of small governments or provinces, fuch as is that of New-Hampshire in New-England, is that perhaps they are below the notice of the ministry and boards in Great-Britain; their governors and other officers are of little confideration, have little or nothing to lose, and therefore act impune.

The plantation legislatures are so far circumscribed, that they can make no laws inconfistent with the laws of Great-Britain.

If the French be allowed to become mafters of the river of St. Laurence, of the great inland lakes, and of the great river Miffifippi; they are in confequence mafters of all the inland trade of North-America; an incredible prejudice to the British pation.

The

The back of Long-Island was the first place of the English whale fishery, small whales affect flats; and at this time whalers make voyages upon the flats of Virginia and Carolinas.

It is faid that the common laws of England extend to the plantations; that the ftatute laws made fince the plantations had a being, do not include them unlefs they are particularly mentioned in the act of parliament.

In all our colony affemblies of representatives, there ought to be a limited fmall quorum of members to meet, adjourn, and to fend for abfent members, and a much larger quorum to proceed upon bufinefs : this regulation may also take place with relation to the judges of the feveral executive courts of law.

To obviate any prejudices which a reader may entertain against this historical fummary, composed with much labour, merely for a publick good; the writer thinks it convenient at times to explain himself in ge-1. He has endeavoured a laconick stile, which neral. by many is reckoned harfh, and not fluent or fonorous; the good judges, the mathematicians and merchants, ufe use it as the strongest, the most concise and expressive. 2. The writer is of no party, and fubjected to no dependence; he is neither whig nor tory, a temporary courtier nor anti-courtier: a tory is for rendering that branch of the prefent legislature called king or monarch, fole and independent, with a paffive obedience and nonsefistance; a republican is for lowering or annihilating the prerogatives of a king, and for an unlimited extension of the privileges of the people in their reprefentatives; but a genuine whig is for maintaining the ballance of power among the feveral orders or negatives of the legiflature; I profess myself of this politia, as it is no faction; all the others are factious. 3. Religion, as it was in all times, and in all countries, defigned for the benefit of fociety; it naturally is fubordinate to the civil government; and a refident, whether native or adventitious, ought occasionally to conform to the established S ∡ manner

manner of the fectaries tolerated by the laws of the country, though not rafhly to renounce that form of worfhip which was parental or educational, which generally tends to libertinifm and licentioufnefs in religion. 4. As in my courfe of the colonies I continue to increase my diftances, it is not to be expected that I can be fo particular and copious, but shall endeavour strictly to investigate the truth, though the further from my place of residence my view becomes more contracted and lefs distinct.

In the British plantations or colonies all grants of lands made by the governor and council, are declared to be good in law, against his majesty and successfors.

As the king and his ministry in Great-Britain, though they do not chuse the parliament, yet have a very great influence in the choice; so it is with respect to the governors and assembly men in our colonies.

The reprefentatives from the feveral counties and townships are not their peculiar or separate agents, but their quota in their provincial representation; hence it is that they are not under the cognizance of their county or town, but under that of the general affembly.

The North-America trade confifts in fifth, naval flores, other timber and lumber, fkins, furrs, tobacco, and rice; I do not mention copper ore though enumerated, becaufe at prefent it is not wrought or exported.

The publick taxes in our provinces, are the province and county rates; and the township or parochial rates for the ministers of the gospel, called pastors, priests, rectors, and other denominations, as also for the school, poor, highways, and fundry other small articles.

By act of parliament, 1731, there may be imported from the British plantations "into Ireland in British shipping, all forts of plantation goods excepting those goods commonly called enumerated commodities, viz. sugar, tobacco, cotton wool, indigo, ginger, speckle wood or Jamaica wood, suffick or other dying woods,

rice,

rice, moloffes, beaver-fkins and other furrs, copper ore, pitch, tar, turpentine, mafts, yards, and bowfprits.

The fugar act (as it is called) of parliament 1733, and fince continued, is concerning foreign plantation produce or manufacture, imported into the British plantations, viz. rum, duty 9 d. sterl. per gallon, molosses or syrups 6 d. sugars and paneeles 5 s. per ct. wt.

In North-America, hunting, fifting and fowling, with fundry berries and earth-nuts are the principal food or fubfiftence of the Indians; the more civilized, cultivate. Indian corn and kidney beans, called Indian beans. The bread grain in Europe, is generally wheat, rye, oats, and barley for baking and malting.

The * wool in our northern plantations is of as good a ftaple, but coarfer than the English wool; the further fouth in our colonies, the wool becomes coarfer, even to a lana caprina, as in our fugar islands; therefore the plantations are not capable of rivalling England in fine woollens.

In our northern colonies after the middle of Sept. fcarce any fpecies of fpontaneous plants make a feafonable appearance; confequently botanick fimpling is then over.

In our new wilderness colonies, the timber and other forest wood of the first clearing is generally doted, because ancient or old; the following growths are good and found.

In the price of grain and other provisions there is a fort

* There are certain ports only, allowed in Great-Britain and Ireland, for the exportation and importation of wool and woollens. No cloths, excepting of the manufacture of Great-Britain, can be imported into any of his majefly's dominions.

The woollens from Great Britain exported annually are computed at about three millions flerling; but being free of duty, they for fome felfish ends are not entered exactly, therefore the value cannot be accurately afcertained.

The woollens of Great-Britain are above one third of the universal export. At a medium, wool manufactured is double the value of the wool itself, and deducting all charges, one third of the neat profit goes to the landlord.

of

of natural ftandard, whereby the hufbandman may have a living profit, and the labourers in manufacture, &c. may not have provisions fo cheap, that the earnings of a few days work will afford fome days of idlenefs; in this respect our produce and manufactures have fome kind of a natural dependence.

SECT

SECTION XIII.

Concerning the PROVINCE of

New-Jerfey or Nova-Cæfarea.

W E have in the fection of New-York * given fome general account of the first fettlement of New-Netherlands or Nova-Belgia, which comprehended the prefent New-York, New-Jersey, and the three lower counties of Penfylvania upon Delaware river.

Upon a defign formed by the court of England to reduce New-Netherlands, + K. Charles II. made a previous grant of the property and government of the fame to his brother the duke of York, March 12, 1663-4; it was not reduced by fettled articles until September 1664, and confirmed to England by the treaty of Breda, 1667.

The duke of York by commission April 2, 1664, appointed Richard Nichols, Esq; deputy governor of all New-Netherlands, but did not enter upon his government till Aug. 27, 1664, which was posterior to the duke of York's assignment, June 24, 1664, of the property and government of New-Jersey to lord Berkley and Sir Geo. Carteret,

The duke of York, June 24, 1664, made a joint grant of that part of New-Netherlands (now called New-Jerfey)

* P. 220, &c.

† Stuyvesand was at that time Dutch governof of New-Netherlands. His commission from the States General was dated July 26, 1646.

This grant was called New-Jerfey, from the name of the illand of Jerfey in the channel of England, the country of Sir George Carteret one of the first affignees. It is fometimes called Nova-Cæsarca.

ta

to lord Berkley of Stratton, and Sir George Carteret; they appointed Philip Carteret, Efq; their lieut. governor; he entered upon his government in Aug. 1665, where he remained only fix months, and returned to England, and back again to his government of the Jerfies. This grant of the duke of York, was from the Noorde Rivier, now called Hudfon's river, to the Zuyde Rivier, now called Delaware river; and up Hudfon's river to 41 d. N. lat. and up Delaware river to 41 d. 20 m; and from thefe two ftations headed by a ftrait line acrofs.

By the intrigues of France, England was perfuaded to proclaim war against the Dutch, March 17, 1671-2, and a Dutch expedition reconquered New-Netherlands from the English July 30, 1673, col. Lovelace was at that time governor; by the treaty of London, February 19, 1673-4, New-Netherlands was reftored by the Dutch to the crown of England, and Sir Edmond Andros appointed governor.

As New-Netherlands had been conquered, that is, alienated from England, fince the crown of England's former grant to the duke of York; to obviate any difficulties in the validity of that grant, king Charles II. made a new grant of property and government to his brother the duke of York, June 29, 1674, which was published Nov. 6 following. No act of government in the Jerfies is to be found upon record from July 19, 1673, to November 1674.

Duke of York by leafe and releafe, July 28 and 29, 1674, conveyed to Sir George Carteret the eastern division of New-Jersies, divided from the western division of the Jersies by a strait line from the S. E. point of Little-Egg harbour in Barnegate creek, being about middle between Sandy-Hook and Cape-May, to a kill or creek a little below Rencokus-Kill on Delaware river, and thence (about 35 miles) strait course along Delaware river up to 41 d. 40 m. N. lat. the north divisional point or station of the divisional line between New-York and the Jersies. N. B. The first effort of the rioters for fetting up Indian purchases against the title of the crown was 1672, to evade paying quit-rents which commenced March 25, 1670; they threw off the government of the proprietors, and the people choie a governor for themfelves; governor Carteret and his fecretary went tor England to complain, but the Dutch conqueit happening foon after, governor Carteret did not return till November 1674, with new concessions, being the third parcel of conceffions, and from that time all remained quiet, and the rules of property were well observed until Sir Edmond Andros broke through all these rules; he ufurped the government of all New-Jerfey 1680, and carried governor Carteret prifoner from Elizabeth-town to New-York; upon complaints to the duke of York, he with refentment recalled Sir Edmond Andros, and the property and government of the Jersey proprietors was re-established 1683, and continued till some months before the revolution 1688, when K. James broke through the rules of property, and also feized the government of . New-Jerfey and of the neighbouring provinces, and put them under the command of Sir Edmond Andros; upon the revolution the proprietors re-affumed the right of government. +

Upon the revolution the proprietors appointed John Totham, Efq; their lieutenant governor, and afterwards col. Dudley, * but the people fcrupled to obey them, and the proprietors appointed col. Andrew Hamilton, who continued governor fome years; but by fome defigning men the people received a notion that col. Hamilton, as a Scots man, could not be governor of an English colony; they difmissed him, and constituted Jeremiah Basse governor 1697, but as Basse had never been approved of by the king, the proprietors in a short

+ For fake of connection I continue this thread, and leave fome intervening mamers to be afterwards related.

* Col. Dudley was afterwards deputy governor of the Ifle of Wight, a member of parliament of England, and governor of the provinces of Massachusetts-Bay and New-Hampshire in New-England.

time

Digitized by Google

time difmiffed him, and reinftated col. Hamilton, but he never was confirmed by the crown, and col. Hamilton was fuperfeded by Mr. Baffe a fecond time, and Baffe was finally fuperfeded by Andrew Bowne, Efq; the laft governor for the proprietors.

The people of the Jerfies continued for fome years fo mutinous, that the proprietors for their own eafe, by their agents, Sir Thomas Lane for Weft-Jerfey, and Mr. William Dockwra for Eaft-Jerfey, in the name of the proprietors, found it expedient by a proper inftrument, April 17, 1702, in concert, to furrender the government to the crown, referving to themfelves all their other rights, and they jointly with the crown formed fome fundamental articles by way of a magna charta. Lord Cornbury, governor of New-York, was by queen Anne conftituted the firft crown governor of the united Jerfies.

Lord Berkley, fome years after his grant from duke of York 1664, affigned his right to William Penn, Efq; Gawen Laurie of London, merchant, Nicholas Lucas, and Edward Byllyng; fhortly after this, thefe affignees agreed upon a partition with Sir George Carteret, and Sir George obtained of duke of York, July 1674, a confirmation of this partition grant, as is above related—July 1, 1676, Sir George Carteret gave to the affignees of lord Berkley a quit-claim of the Weft-Jerfies, as thefe affignees gave to Sir George a like quit-claim of the Eaft-Jerfies; this partition was confirmed by an act of the general affembly of the Jerfies, 1719.

Sir George Carteret made over the East-Jersies to certain trustees December 5, 1678, to be fold by them after his death. After Sir George's death, the trustees assigned the East-Jersies to 12 proprietors, February 2, 1681-2.

William Penn, Robert Weft, Thomas Rudyard, Samuel Groom, Thomas Hart, Richard Mew, Thomas Wilcox Ambrole Riggs, John Hayward, Hugh Hartshorn, Clemens Plumsted, Thomas Cooper.

By

By an inftrument amongft themfelves, they declared that the purchase was equal, and no advantage should be taken of survivorship. These first proprietors by 12 separate deeds, separately conveyed one half of their interest to 12 other persons separately,

Robert Barclay, Edward Byllyng, Robert Turner, James Brien, Arent Soumans, William Gibson. Gawen Laurie, Thomas Barker, Thomas Warner, James Earl of Perth, Robert Gordon, John Drummond

William Gibson, John Drummond, in fee fimple. The duke of York, March 14, 1682, by patent or grant confirmed the East-Jersies to those 24 proprietors in property and government; and July 17 following the famous Robert Barclay + the quaker, was agreed upon, and under him pro tempore Mr. Laurie with a council. Mr. Barclay continued governor until 1685. He was succedeed by lord Neal Campbell of the Argyl family; about this time came over the quaker so called, George Keith. *

From the duke of York's first grant of all the Jersies to lord Berkley of Stratton, and to Sir George Carteret knight and baronet, vice chamberlain of his majesty's houshold, and one of his majesty's most honourable privy council, jointly; Philip Carteret, Esq; was governor of their joint concern, that is, for all the Jersies until 1672, when the people, especially of Elizabeth-town, began to mutiny upon account of the demand of quitrents, which according to the concessions took place March 25, 1670. These mutineers assumed the go-

† In king Charles II. reign there was a kind of perfecution of the nonconformilts in religion, and Robert Barclay head of all the quakers in Great-Britain, with his family removed to the Jerlies; from this perfecution the Jerlies is fettled chiefly with quakers, anabaptifts, and prefbyterians.

• George Keith was a noted quaker, he came over to the Jerfies, taught ichool, and was land furveyor general; he returned to England, and for his conveniency, accepted of a church of England benefice, and wrote against the quakers.

vernment,

2

vernment, and conftituted James Carteret, a diffolute for of Sir George Carteret, their governor; and governor Philip Carteret was obliged to go to the court of England with complaints against the mutineers; col. Lovelace at this time was governor of New-York; the Dutch, conquest intervening, he did not return until 1674, when upon a peace the Dutch refigned to the crown of England the country of New-Netherlands, and the duke of York had made a divisional or separate grant of East-Jerfies to Sir George Carteret; governor Carteret brought over fome additional concessions, which were called the third conceffions; as he had bought fome fhares in the Elizabeth-town Indian purchase, the Elizabeth-town men gave him no uneafinefs, he refided in Elizabeth-town till death; he made it the feat of government. Robert Barclay the noted quaker writer, was the first governor for the 24 proprietors.

. Upon the Dutch peace 1674, Sir Edmond Andros was appointed governor of the Jerfies, but by virtue of the duke of York's fecond or divisional grant, Sir George Carteret appointed Philip Carteret, Eiq; his lieut. governor for the East-Jersey, in which station he continued to the time of his death, November 1682; he received fome infults from Sir Edmond Andros. From 1674, Sir Edmond Andros was governor of the Weft-Jerfies for the duke of York, who had twifted the government out of the hands of lord Berkley's affignees, and upon proper representations the duke of York quitted the government of West-Jersies to the affignees of lord Berkley, and they appointed Edward Byllyng, one of the affignees or proprietors, governor 1680, having obtained a new grant of the West-Jersey; at the same time the duke made a new grant or confirmation of East-Jersey to the grandfon of Sir George Carteret. In the Welt-Jerfies to Mr. Byllyng, 1690, fucceeded | doctor Daniel Cox of the

The affairs of this colony have always been in a confused state, which occasions an unavoidable confusion in the history thereof.

college

college of phylicians in London, he having purchased the greatest part of the property of West-Jersey, was governor thereof; but as his professional business did not allow him to leave London, he appointed a deputy go-vernor, and at length fold his interest to Sir Thomas Lane and others for 9000 l. sterl. a great price at that time.

The original 24 fhares of East-Jersey by fales of small parts of the shares and succession of children, became very much fubdivided; for inftance, fome proprietors had only one fortieth part, of a forty-eighth part, of a twentyfourth share; the West-Jersey was in the same condition; this occasioned much confusion in management amongst these general proprietors, particularly in appointing of governors; therefore the proprietors in good prudence refigned the government to the crown, referving all their other rights as we formerly mentioned; the proprietary government continued until August 14, 1703, when lord Cornbury published his commission from the crown as governor of all the Jerlies; thus the East and West-Jerlies, which had been separate governments from 1674 to 1703, became united in one government or jurifdiction, and continued under the fame governor with the province of New-York, until 1736, when the government of New-York devolved upon lieutenant governor Clarke; as he had no command in the Jerfies, the government of the Jerfies devolved upon the prefident of the council, and ever fince the command in chief has been in a diftinct perfon from that of New-York.

Upon the proprietors furrendering of the government to the crown, they obtained of the crown a fet of perpetual inflructions to all fubfequent governors by way of conceffions, or magna charta, for the proprietors and people, particularly in favour of the proprietors. 1. Not to confent to any tax upon unprofitable or vacant lands. 2. None but the general proprietors to purchase any lands of the Indians. 3. To take care that all lands pur-chased, be improved by the possess. VOL. II.

After

Digitized by Google

After the Dutch peace there was (upon cealing of head-land bounties) 1685, a council of proprietors appointed for the East-Jerlies; they ordered a dividend of 10,000 acres to be taken up at pleasure, to each of the 24 proprietorships of the East-Jersies; there was a second division of 5000 acres to each of the 24 proprietorships, Feb. 21, 1698; and a division of 2500 acres, Dec. 2. 1702. To enforce the affair of a council of proprietors, there passed an act of general assembly, March 25, 1725, that a certain number of the general proprietors, or their proxies, having the value of eight whole fhares in themfelves, shall be a council of the proprietors of the eastern division, to divide lands, examine claims, &c. and to have two stated yearly meetings at Perth Amboy about the times of the fittings of the fupreme court of judicature. 1737, the council of proprietors advertised, that after 1739 there should be a further dividend of 2000 acres per ann. to each of the 24 proprietorfhips, until all vacant lands shall be divided.

In the first concessions, February 10, 1664-5, the proprietors Berkley and Carteret promise to all adventurers and fettlers who should plant there, fundry privileges, particularly of head-lands for each head of settlers; this promise was only designed to be of sour years continuance, but from time to time was extended to January 13, 1685-6, and then ceased; the general proprietors then began to make dividends amongst themselves as above. The head-lands were to settlers in any place exceeding ten miles from the sea, eighty acres per head, and to those who settle nearer, fixty acres.

In the beginning, the general lots were laid out, none lefs than 2100 acres, and none more than 21,000 acres; whereof one feventh to be referved to the general proprietors, the remainder to perfons who fhould come and plant the fame.

In taking up of lands either by purchafe, and agreement with the general proprietaries as at prefent, or as formerly

formerly by way of head-lands, the governor and ma-jority of the council gave a warrant to the furveyor general or his deputies, to furvey and lay out the fame; next the furveyor is to certify the furvey, upon which the governor and councill make a grant in the form following, "The lords proprietors of Nova-Cæfarea, or "New-Jerley, do hereby grant to A. B. of — in the "province aforefaid, a plantation containing — acres "English measure, to him or her, to his or her heirs or " affigns for ever; yielding and paying yearly unto the faid lord proprietors, their heirs or affigns, every 25th " day of March, according to the English account, one " half-penny, lawful money of England, for every one of faid acres; to be holden as of the mannor of Eaft-" Greenwich in free and common foccage, the first pay-"ment of quit-rents to begin the 25th — Given under the feal of the province, the — day of — in the year " of our Lord ——figned by the governor and a majo-" rity of the council. N. B. One half part of the " mines of gold and filver are referved; and if in three " years, the conditions stipulated are not fulfilled, the " grant to be void."

. We may observe, that there are three forts of proprietors in the Jerfies. 1. The general proprietors. 2. Purchasers under the general proprietors. 3. Claimers under patents for head-lands from the general proprietors on quit-rent.

A DIGRESSION concerning Indian deeds, and proprietors quit-rents in the plantations.

In our plantations the cafe of perfons holding lands by Indian deeds only, without the approbation of the crown, or of the respective legislatures who may be deemed to have the exclusive regnatures who may be deemed to have the exclusive prerogatives of granting the right of pre-emption to subjects; as also the affair of paying quit-rents to the crown, or to general pro-prietors grantees of the crown, as a matter of confiderable T_2 concern, concern.

concern, feems to require a digreffion article : as the colony of New-Jerfies is the most noted for these disputes, * we shall here give the incidents of claims by Indian deeds only, in Elizabeth township.

In both Jerfies feveral possessions and claims of land are founded upon Indian deeds only; the Indian Elizabeth-town grant is the most noted, and has been the most vexatious, formerly containing upwards of 400,000 acres of the most valuable lands in New-Jersey, bounded by Raritan river, Amboy-Sound, Arthur Cul-Bay, and Passick river; Daniel Pierce, and associates, purchased one half of these lands for 801. sterl. and laid out the townships of Woodbridge and Piscataway, for which they foon after obtained sufficient patents from the rightful proprietors under the crown, at one half-penny per ann. quit-rent, and peaceably enjoy the fame to this day.

The first Indian grant of these lands was to Augustin Herman, a Dutchman, in 1651; upon the Dutch furrender to the crown of England, he relinquished these lands, and therefore they escheated to that crown as derelicts, and consequently could not be conveyed again by the Indians to any person or community.

Notwithstanding of this, fix perfons with their affociates, September 26, 1664, petitioned governor Nichols for liberty to purchase of the Indians, and settle certain

* Where the peace and tranquility of a country or colony cannot be maintained by the civil power, which it feems to have happened at fundry times in the Jerfies, a military force is abfolutely requifite. Some young regiment, inftead of being in courfe difbanded in Great-Britain or Ireland, may be fent to the feditious colony, they will foon quell the rioters, and when the fpirit of mutiny is drove out, the regiment may be difbanded in the colony; they will contribute towards peopling the colony; and moreover, as being ufed to a regular and proper fubmifilon to authority, by their example, they will teach the fame to the people of the colony. Thus the regiment of Carignan fome years fince was fent over from France to Canada, and difbanded there; thus in the time of the government of lord Colpepper, a regiment was fent from England to Virginia, to quell the riots under Bacon, and afterwards diffolved there.

tracts

tracts of land upon Arthur Cul-Bay, which he granted September 30, 1664; accordingly these affociates made a purchase from the Indians, October 28 following, in the name of John Bailey, Daniel Denton, Luke Watson, of Long-Island, husbandmen, and their affociates, of a tract of land bounded as above: the confideration was, paying to the Indians 20 fathoms of trading cloth, two made coats, 2 guns, 2 hatchets, 10 bars of lead, 20 handfuls of gun-powder; and after one year's expiration, the remainder of the purchase was 400 fathoms of white wampum (value 201. sterl.) or 200 fathoms of black wampum: in confequence of this, governor Nichols granted to these affociates a patent for said lands, with a liberty to purchase further of the Indians so far as Snake-Hill, dated December 2, 1664.

That the reader may have fome conception of the difpute concerning the property and quit-rents of thefe lands, between the proprietors who hold of the crown,' and of the people who hold by fuppofed Indian purchafes, which has occasioned much diffurbance in this government; we shall make the following observations.

1. Nichols, lieutenant governor of New-Jerfey for the duke of York, being informed of the duke's affignment to lord Berkley and Sir George Carteret, fufpecting that he would foon be fuperfeded by a lieutenant governor of their own appointment, and perhaps for other confiderations, September 30, 1664, gave licence to certain perfons (as is above related) to purchafe lands of the Indians, which they did October 25; and 3d of December following, Nichols gave them a patent for the fame, fubjected to certain quit-rents. This patent, though pofterior to the aforefaid affignment, was conform to his inftructions, and before any proper notice received of that affignment, + and therefore in equity alledged to be good, T 3 effectively

+ The difpute concerning the equivalent lands called the Oblong, made over by the colony of Connecticut to the province of New York,... between affociates who had a grant of them from the king in council.

especially confidering, 2. That Philip Carteret, Efg; lieutenant governor for the affignees, did foon after his entering upon the government of the Jerfies, (he entered August 1665.) as it is faid, under hand and seal gave licence to a company of fundry perfons to purchase of the Indians within his government what quantity or lands they should think convenient; and accordingly, as the Elizabeth men fay, their anceftors with advice and confent of faid governor, made fundry purchases of the Indians. 2. Governor Carteret for his own use purchased some of these Indian grant rights, particularly that of Bailey, May 21, 1666; only four families were fettled at Elizabeth-town (afterwards fo called) before governor Carteret's arrival; Carteret died governor of the East-Jersey, Nov. 1682; during his government the provincial general affemblies, the council, the superior or supreme courts of judicature, and general offices of the government were kept at Elizabeth-town, which was fo called by the name of Elizabeth, wife of Sir George Carteret ; it was the first English settlement, and the most ancient town of the province.

¢

Moreover, the proprietors who hold by Indian grants, fay, as a precedent, although the courts at law in the Jerfies, May 14, 1695, gave judgment of ejectment in favour of James Fullerton, who held under the general proprietors, against Jeffrey Jones, who held by the Indian grants; Jones upon his appeal to the king in council, the judgment was reversed and set aside February 25, 1696: the general proprietors fay, that the judgment was reversed only because of some errors in the proceedings. A petition or complaint of Elizabeth-town Indian grant proprietors, was read before the king in council, July 19, 1744, representing the hardships they software from the general proprietors. 1. That gene-

cil, and affociates who had, conform to inftructions, a grant of them from the governor and council of New York, is of this nature, but hitherto not determined. See vol. II. p. 232.

rally

rally the council and judges are interested in the generalproprietors fide of the queftion, and are therefore become judges in their own caufe. 2. By act of affembly they have procured part of the county of Somerfet, who are mostly of the general proprietors fide, to be an-nexed to the county of Effex, where the lands of the Indian grant proprietors generally lay, for the fake of having juries in their interest. 3. For a fix-penny damage, we are fometimes brought in for two or three hundred pounds proclamation money cofts; and we are daily threatened with great pretended damages and heavy costs: therefore they pray, that the king would take them under his immediate protection, and either determine the affair in your majefty's most honourable privy council, or appoint difinterested commissioners out of fome of the neighbouring colonies, and by a jury from thence also to be taken, to hear and finally decide in faid cafe; or that your majefty would be gracioufly pleased to appoint commissioners, to hear, enquire into, and determine faid controversy; or grant such relief as to your majesty may seem meet. This was referred to the committee of council for plantation affairs. August 21, 1744, this committee refer the petition to the lords commissioners for trade and plantations, to report to the committee, what they conceive proper for his majesty to do therein. The board of trade and plantations report to the faid committee of privy council, &c. &c. &c. The character of a fummary obliges us to ftop; and only further to observe, that this affair hitherto is not iffued.

In anfwer, the general proprietors reprefent to the board of trade and plantations, τ . That they humbly conceive, the complaint is not fent from the whole body, or from any confiderable number of inhabitants there, but from a few factious and mutinous people impatient of any government. 2. The rioters pretend a fole right in the Indians, but no right in the king and his grantees, with a defign to deprive the proprietors of their T_4 right

right to the foil and quit-rent, and with a defign to ftrip his majefty of his royal right to that and the other plantations, and to render them independent of the crown.

- Complaints dated April 13, 1745, were filed in chancerv of the Jerfies, against the Elizabeth proprietors called Clinker right men, confifting of 124 folio pages; and was followed by a long bill from the council of proprietors of the Eastern division of the New-Jerfey met in Perth-Amboy March 25, 1746, in behalf of themfelves, and the reft of the general proprietors of the Eastern division of New-Jersey, whom they represent. In these instruments they seem to alledge, 1. That as the Indians had granted these lands to Herman 1651, they could not grant them to Bailey, &c. as is above faid. 2. Confidering the long pofferfion of the Elizabeth men, and the great charge and labour in clearing these poffeffions, governor Nichols's patents upon Indian deeds are in equity deemed good; this does not excufe the poffeffors from paying quit-rents and other acknowledgment conform to the grants; and that in fact March 11, 1674-5, the Elizabeth men offered to pay to the lord proprietor 20 l. fterl. per ann. quit-rent for eight miles fquare, this offer was refused by the governor and council infifting upon the half penny fterl. per acre g. The riotous proceedings of the Elizabeth per ann. men and others claiming by Indian deeds, viz. goals broke open, people forceably turned out of the poffeifion of their lands, this they call clubing them out, and the officers of the government publickly infulted and beat; fome of the rioters have come fifty miles and upwards to join in a riot.

The late riots in the Jerfies are between the proprietors who hold by a town right, and those who hold by patents from the general proprietors.

The general proprietors fay, that the only good title in the province is under the crown; and all pretences from Indian purchases only are void.

The

Of New-Jersey.

The boundaries of New-Jersey, rivers, and some distances of noted places.

It is bounded eafterly by the province of New-York from 41 d. N. lat. on Hudfon's river to Sandyhook, about 40 miles; from Sandyhook E. foutherly upon the ocean 40 leagues to Cape-May, at the entrance of Delaware Bay; from Cape-May it is bounded wefterly on Penfylva nia along the various turnings of Delaware river to 41 d. 40 m. north lat. which if in a ftreight line, would be about 200 miles; the N. eafterly line of New-Jerfey with New-York was determined by the duke of York in his grant of New-Jerfey to Berkley and Carteret, to be from a point in the main branch of Delaware river in lat. 41 d. 40 m. to a point in Hudfon's river in lat. 41 d. the point on Delaware river is fully agreed upon and afcertained by both governments, the other on Hudfon's river is not fo fully agreed upon; the line from point to point may be about 80 miles long, E. 41 d. S.

Anno 1676, by agreement between the four affignees of lord Berkley on the one fide, and Sir George Carteret on the other fide, (perhaps this is the reafon of the name quinquipartite line) New-Jerfey was divided into two provinces, called the Eaft and Weft-Jerfey, and confirmed by the duke of York 1680, and 1682; and by act of affembly 1719; this line as run by Mr. Laurence, November 1744, was in length 150 miles 20 chains, N. 9 d. 19 m. W. from Little-Egg harbour in the ocean, to 41 d. 40 m. N. lat.; the S. point of this line was fettled 1676, the north point of the line was fettled 1719, but the line itfelf was never run till 1744, and that only by the proprietors of the Eaft-Jerfey ex parte; in this line fome errors have been difcovered and require to be rectified; as there is a confiderable difference in the variations of the compafs, at the north and fouth terminations of this divisional line, this divifional

fional line cannot be ftreight; the first falls in Delaware river in Trent town are opposite to the 47th mile of this divisional line.

In order to difcover the main branch mentioned in the grants, and the largeness of some other branches of Delaware and Sefquahanna rivers, there was lately a furvey line run nearly due weft from Minifinck island on Delaware river about 12 miles above the divisional line croffing the N.E. branch of Delaware river, to Sefquahanna river were 85 miles, and where it fell in with Sesouahanna, that river was about 30 chains (4 rod to a chain) wide, and near this there was a branch which fell into the principal river of Sefquahanna about 300 feet wide, and in the fork was an Indian village called Solochka: the weft branch of Delaware river was only 25 feet wide, the N. E. branch where the station point of the division line between New-York and Jerfey is fixed at 41 d. 40 m. lat. is above 500 feet wide, the fork to called, of Delaware river is about 70 miles upon a streight line below this station point; at this station point anno 1744 the variation of the compais was W. 6 d. 25 m. anno 1719 it was observed to be about &d. as is before mentioned; the station point at Egg-Harbour 1744 was 5 d. 25 m. Mr. Serjeant Hook fome time fince made a purchase of 3750 acres upon Delaware river in the West-Jersey, and gave one tenth of it as a glebe to the church.

The principal rivers in the province of New Jerfey are the Noorde Rivier or Hudfon's river, which we have already delineated in the fection of New-York, and Zuide Rivier or Delaware river, which we shall deferibe in the fection of Penfylvania; only we shall observe, that in the Jerfey fide of this river are feveral short creeks, these of Cohansy, and of Salem 20 miles higher, make one district of custom-house; at Bridlington 20 miles above Philadelphia is another custom district: these two custom-house districts, their quarterly entries and clearances

ŧ
clearances of veffels, are generally nil, and fcarce deferve the name of preventive creeks. The main branch of Delaware river comes from Cat-kill mountains, a few miles weft of the fountains of Scoharie river a branch of Mohawks river. Raritan river falls into Sandyhook bay at Amboy point, the tide flows 12 miles up to Brunfwick; at the mouth of this river is the only confiderable fea port and cuftom-house of New-Jerfey; here is the city of Perth-Amboy, it is the capital of the province of New-Jerfey, and here are kept the provincial records; here is a good deep water harbour and promising country; but notwithstanding, it has only the appearance of a mean village; the name is a compound of Perth the honorary title of the late Drummond earl of Perth, and Amboy its Indian name.

The fea line of New-Jerfey is Arthur Cul-Bay and Amboy-Sound between Staten-Island and the main about 20 miles S. thefe receive the rivulets of Hackinfack Paffaick, Bounds-creek, and Raway, from Amboy point to Sandyhook (Sandyhook is in the Easte-Jerfey) 12 miles E. from Sandyhook to Cape May 120 miles S. wefterly, a flat double fandy fhore, having fome inlets practicable only by fmall craft.

There are feveral chains or ridges of hills in this province, but of no confideration.

Perth-Amboy is the provincial town of East-Jerfey, Bridlington in the province town of West-Jerfey, distance 50 Miles, where the general assembly of all the Jerfies fits alternately, and where the distinct provincial judicatories or supreme courts fit respectively. Bridlington, commonly called Burlington, is a pleasant village. Elizabeth-town is the most ancient corporation and confiderable town of the province. Brunswick in East Jerfey is nearly the center of East and West Jerfies; here is lately established a college * for the instruction of youth, by

• Formerly by miftake, I wrote, that this college was by royal charter.

a char-

a charter from governor Belcher, October 22, 1746, with power to confer all degrees as in the universities of England: the present trustees are generally presbyterians, a majority of seven or more trustees to have the management; each scholar to pay 4 l. per ann. at 8 s. per oz. silver; Mr Jonathan Dickenson was their first president, Mr. Burr is their present president; in this college October 5, 1749, commenced 7 batchelors of arts.

The road as in prefent ufe, from New-York city to Philadelphia, is, from New-York to Elizabeth-town 17 miles, thence to Brunfwick 22 miles, thence to Trent town ferry 30 miles, thence to Briftol oppofite to Bridlington 15 miles, thence to Philadelphia 20 miles, being in all from the city of New-York to Philadelphia 104 miles.

From Cape-May to Salem are about 60 miles, thence to Bridlington 50 miles, thence to Trent town falls 15 miles. These are the first falls of Delaware river, and the tide flows fo high, below these falls when the tide is down and no land floodings in the river, the river is fordable.

In the province of the Jerfies are five corporations with courts; whereof three are in Eaft-Jerfey, the city of Perth-Amboy, the city of New Brunfwick, and the borough of Elizabeth-town; and two in the Weft-Jerfey, the city of Bridlington, alias Burlington, and the borough of Trent town; of these only two, Perth-Amboy and Burlington, fend representatives to the general assembly.

There is not much to be faid concerning their wars with the Indians and Canada French; the Five nations of Iroquois which we call Mohawks, have always been in our intereft; they, efpecially the large tribe of Senecas, cover the provinces of New-Jerfey, Penfylvania, Maryland, and Virginia. Ever fince the first fettling of this province, the publick has never been put to one penny charge for keeping the Indians in peace. The fham Canada Canada expeditions of 1709, and 1711, led this province and all the other British provinces to the northward of it, into a pernicious paper currency, called publick bills of credit; their first paper currency was emitted 1709 of 30001. to be cancelled by taxes the same year, and 1711 they emitted 50001. to be cancelled by taxes 1712 and 1713, and afterwards many emissions for charges of government + and loans amongst themselves, but never did run such depreciating lengths, as has been done in New-England. See the article of plantation currencies in the appendix.

At prefent the West-Jersey money of currency is in value equal to that of the adjoining province of Pensylvania; the East-Jersey currency is the fame with the adjacent province of New-York; their respective dealings, being almost folely with the respective adjoining provinces. Pensylvania paper currency was at first emitted at the value of proclamation money; which is 6s. currency equal in value to a heavy Spanish piece of eight; but at prefent a mild piece or Spanish dollar passes for 7s. 6d. currency, a heavy pistole 27s. a guinea 34s. and moidores 44s. New-York paper currency was at first emitted at 8s. per oz. filver: at prefent a dollar or mild piece of eight being 7 8ths of one oz. filver, is 8s. currency, pistoles 28s. if not under 4d. 6 grains wt. guineas 35s. moidores 45s.

Their various fectaries, not in religion, but in religious modes of worship, may be found in a general article of the section of Rhode-Island; we shall only observe that this colony was first settled by presbyterians, anabaptist, and quakers, who to this time still prevail; notwithstanding of the great charge of missionaries from the society for propagating the gospel,

+ The forces raifed there towards the late Cuba or Spanish West-India expedition, and afterwards of 5 companies of 100 men each, towards a feint expedition against Canada 1746, was a confiderable charge to them in levying and victualling.

who

who by mistake seem to embarrass the christian religion in general, more than to cultivate it. Why fhould religious, pious, and fober christians, industrious, frugal, and orderly common-wealths men, be thus difturbed and perplexed, in their legally tolerated way, differing from the miffionary eftablished church, not in doctrine, but in some ancestorial innocent modes of worship; while at the fame time the heathen Indians, the principal object of their miffions, as may well be imagined, neither civilized nor christianized, are wholly neglected by them?

Inhabitants of the Jerfies, men, women, and children, are reckoned at about 50,000, whereof 10,000 may be reckoned a training militia.

The valuation of the feveral counties, that is, their proportions in every thousand pound tax, a few years fince, flood thus,

The two new out counties of Morris, and Trent, feem hitherto not reduced to any regulations.

Succeffion of governors in the province of New-Jerfey.

The affair of governors is above intermixed with the history of the various changes of the property and jurifdiction ; we shall now recapitulate what relates to government and governors in a connected and concise manner.

The duke of York had a grant of the property and government of New-Netherlands from his brother Charles II. March 12, 1663-4. Duke of York by commission, April

April 2, 1664, appointed Richard Nichols, Efq; his lieut. governor or deputy of the whole New-Netherlands, but did not enter upon his government until August 27, 1664.

Upon the duke of York's affignment, June 24, 1664, of that part called the Jerfies to lord Berkley and Sir George Carteret, they appointed Philip Carteret their governor; after fix months refidence he went to England, and foon returned to his government; but 1672, a turbulent people, to evade paying quit-rents, alledge that they did not hold of the proprietors Berkley and Carteret, but by Indian grants; they relinquifhed governor Carteret, and chofe a governor of their own; governor Carteret went home with complaints, and did not return till November 1674, a Dutch jurifdiction upon a reconqueft intervening from July 1673, to November 1674; Berkley and Carteret had a divisional feparate grant from the duke of York 1674, and Sir George Carteret fent over Philip Carteret, governor of Eaft-Jerfies; duke of York kept the jurifdiction of Weft-Jerfey in his owa hands by deputies. Nichols and Andros were governors of New-York and Weft-Jerfey for the duke of York.

Becaufe of fome differences between governor Andros of New-York and governor Carteret of Eaft-Jerfey, Andros ufurped the government of Eaft-Jerfey 1680, and fent from New-York to Elizabeth-town fome foldiers, they ufed governor Carteret rudely, they broke open his houfe, carried him from his naked bed on board of the floop to New-York, where he was kept prifoner the greateft part of the year: governor Andros favoured the Indian grant proprietors, with a defign to foment divifions and confusion, divide et impera: upon complaints fent home to the duke of York, Andros was difmiffed from that government with a fhew of refentment, and the duke of York gave new deeds to the proprietors of the Eaft and Weft-Jerfies, with express grants of thefe powers, which Sir Edmond Andros pretended were wanting, the better to justify his former conduct;

conduct; by virtue of these new grants dated 1680, the proprietors were next year re-established in the New-Terfies; Philip Carteret died governor of East-Jersey, November 1682; to prevent irregular purchases of the Indians, the affembly of East-Jersey, 1683, passed an act " forbidding the taking of any Indian deeds but in the " name of the lords proprietors, upon the pain of be-ing profecuted as feditious perfons, and as breakers of "the king's peace, and of the publick peace and fafety "of the province;" the fame act, but fomething more fevere, was passed in West-Jersey.

In the Weft-Jerfey, upon the duke of York's quitting the government to the affignees of lord Berkley, 1680, one of the affignees or proprietors was by them appointed governor, and to him, 1690, fuceeeded Dr. Daniel Cox, who had purchased the greatest part of the West-Jerfey.

In the East-Jersey upon the duke of York's new deed to the proprietors, Robert Barclay, a noted quaker writer, was made governor; fometimes he officiated by a deputy, 1684 Gawen Laurie was his deputy, and continued till 1685; foon after this, king James affumed the government, but upon the revolution, the proprietors were reftored to their former rights, and appointed John Totham, Efq; for their governor, who was fucceeded by col. Dudley; but the people fcrupled to obey them, and the proprietors appointed col. Hamilton for governor.

After fome time the people alledged, that as a Scotsman he could not be governor of an English colony, and a party of the proprietors appointed Mr. Baffe governor; foon after, another party of the proprietors did again appoint col. Hamilton, August 14, 1699, and not long after, fome of the proprietors appointed Mr. Baffe again; these appointments were not confirmed by the king, Mr. Bowne fuperfeded them; these times in the Eaft-

Digitized by Google

Collected of Of New-Jersey.

East-Jersies were called the revolutions, \dagger and was governor when the proprietors of both Jersies, because of diffensions amongst themselves in appointing governors, and from the confusions occasioned by the Indian grants men, found it advisable to refign the government, but no other of their rights, to the crown, 1702.

Thus both Jerfies were united in one jurifdiction, and had for their governor the fame perfon who was governor of the province of New-York; fee the fection of New-York, vol. II. p. 249, viz. lord Cornbury, col. Hunter, * William Burnet, Efq; col. Montgomery, and col. Cofby.

Upon Cofby's death, lieut. governor Clarke, 1736, fucceeded in the command of New-York, but not in . that of the Jerfies, which in courfe fell into the hands of the prefident of the council of the Jerfies; ever fince, the governors of New-York and of the Jerfies have been in diffinct perfors.

Lewis Morris, Efq; formerly chief justice of the province of New-York, was the first distinct governor of the Jerlies; he died May 14, 1746; to him succeeded

Jonathan Belcher, Elq; formerly governor of the provinces of Maffachufetts-Bay and New-Hampshire, fee vol. I. p. 481, was nominated by the king for governor of the Jersies, and arrived there soon after: he continues governor at this present writing, August 1751. His

+ During the revolutions in the alternate administrations of Hamilton and Baffe from 1698 to the refignation of the government to the crown, there were in the province continued confusions, mutual breaking of goals, refcuing of prifoners, beating and abusing of civil officers; fometimes the chief command was in the council; the refignation of thole governments to the crown by Sir Thomas Lane knight and alderman of London, agent for West-Jersey, and of William Dockwray, the famous projector of the useful, and to the publick revenue of Great-Britain beneficial, penny post office, agent for East-Jersey.

* Governor Hunter was allowed by the general affembly of the Jerfies, during his administration, 5001. per ann. currency, and 1001. for contingencies.

Vol. II.

first

289

first meeting with the provincial alienably was August 22, 1746.

The legislature, and some municipal laws of New-Jerfev.

Their legiflature confifts of three negatives; the enacting ftile is, " Be it enacted by his excellency the governor, council, and general affembly."

The three negatives are, 1. The governor, fliled governor in chief, vice admiral, and cancellor of the province of New-Jerley.

2. The council nominated by the king, their complement is twelve, as it generally is in all our colonies. The governor and council are a court of error and chancery.

3. The house of representatives in this province, they are particularly called the affembly; though in propriety the governor, council, and house of representatives of the people, met in a legislative capacity, are the general affembly of a province or colony. This house of m prefentatives or affembly confifts of 24 members, whereof 20 are representatives of counties, the other 4 from the cities, to called, of Perth-Amboy and Burlington. viz.

* I cannot account for fuch improprieties in our colonies ; thus in Virginia, the house of representatives, is very improperly called the house of burgeffes, because Virginia is represented by counties. In the province of North-Carolina adjoining to Virginia, they are guilty of the fame impropriety.

The

The new counties of Morris county, and Treat county, hitherto do not fend reprefentatives.

All the acts of the assembly of New-Jersey must have the royal assent.

The house of representatives is no court of judicature, but have the privilege of enquiring into the male adminiftration of the courts of justice.

The magna charta or fundamental confitution of the province of New-Jarley, confifts of three indicquent fets of concessions from the proprietors, and of the perpetual instructions for all successive crown governors as agreed upon 1702 at the proprietors relignation of the government to the crown. These are reckoned of a higher nature, than the acts of their affemblies, and are termed by the affembly, the laws of concessions. The first concessions were 1664, from lord Berkley and Sir George Carteret, joint proprietors of New-Jersey by affignment from the duke of York. The second concessions 1672 were from the faid proprietors jointly; the third concessions were only for the East Jersey by Sir, George Carteret 1674, upon the duke of York's granting him a divisional grant; these were only additional and explanatory of the first concessions,

The bounty lands to the first fettlers called head-lands, being to many acres per head of fettlers at one half penny sterl per ann per acre quit-rent. The quit-rents of the Jersies began March 23, 1670; the whole arrears of quit-rents from the beginning to 747, did not exceed 150001. The bounty by the first concessions was only for heads imported in the first four years, but by subsequent concessions, it was continued to January 13, 1685. In other patents to purchasers the quit-rents were various as per agreement, v. g. in Newark there are some patents at fix pence sterl. per ann, per 100 acres.

The fundamental law of concessions is, that all varcant lands are to be purchased only by the governor and council in the name of the proprietors; and all U_2 cialms claims to lands otherways than by warrant of furvey, by the furvey of a ftated furveyor, and patent from the governor and council are deemed void. There have been only two remarkable times of purchafe from the Indians 1664 under governor Nichols, prior to the acts of conceffions; and 1672 under governor Carteret, but fublequent and contrary to the first conceffions. Several tracts of land have from time to time been purchafed of the Indians by the general proprietors. By act of affembly 1683, no perfon to contract for, or accept of deeds of lands from the Indians, but in the name of the proprietors.

In the revolution times, as they were called, in New-Jerley from 1698 to 1703, all rules of property were flighted, many riots and much diforder enfued, and by remonstrances to king William all established rules of property were endeavoured to be everted, and Indian purchases established, but in vain. Upon the refignation of the government to the crown, and by an act of affembly 1703, declaring all pretences by Indian purchases only, to be penal, (penalty 40s. per acre) criminal, and void; and by an act 1713, a penalty is imposed of 20s. for every tree cut by any person upon lands which are not his own property; order was reftored to the great improvement of New-Jersey, and which was enjoyed till 1745, when Indian purchases were fet up again. Several actions of ejectment being brought by the council of general proprietors against the tenants, fo called, in possession of the Elizabeth rights, as holding only by a groundless right of title by Indian deeds; anno 1746 the Elizabeth men petition the general affembly, that a way may be made for their relief in the province, or that they may have liberty of application to the head and fountain of justice. Upon this enfued a fuit in their provincial chancery, as before related.

•

Some articles in the concessions were, that the general affembly shall raise and pay the governor's salary and all all charges of government; and that the quit-rents shall be paid to the proprietors free of all charges, no quitrents to be applied for that purpose.

To prevent interfering claims and fraudulent fales, there are only two deputy furveyors in a county, under a general furveyor of the province, and all furveys are to be recorded as approved of by the furveyor general.

Titles of land are to be tried only in the fupreme court of judicature.

Courts of judicature,

The feveral courts of judicature are nearly of the fame conftitution with the courts in the colonies already related. There is a fupreme court (in New-England they are called fuperior courts) for the East-Jersey division held at the city of Amboy two terms yearly, the third Tuesday in March, and second Tuesday in August, each of these with only eight days continuance. The supreme court for the West-Jersey division is held at Burlington first Tuesday in November, and second Tuesday in May, under the fame regulations.

There are in each county once a year, a court for tryal of caufes brought to iffue in the fupreme court; those for West-Jersey are in the spring, those for East-Jersey are in the end of autumn.

In each county there are courts of quarter feffions, and county courts for holding pleas; in New-England they are called inferior courts for common pleas.

Produce, manufactures, trade, and navigation of New-Jerfey.

New-Jerfey is a good corn country: it raifes more wheat than any one of our colonies; but their wheat and flour is mostly shipped off from New-York and Pensylvania; they raife fome hemp and flax.

Ų 3

They

They have not wrought their copper ore mine for fome time.

They manufacture fome iron ore into pigs and bars.

In the province of New-Jerfey there are three cuftomhoufe diffricts, whereof two are in Weft-Jerfey on Delaware river; Salem (this includes Cohanzey) about 9 miles below Newcastle, and Burlington about 20 miles above Philadelphia; these, as we have already observed, are of no confideration, scarce deserving the name of preventive creeks; the third is in East-Jersey at Perth-Amboy. The 12 months accounts of entries and clearances at the port of Perth-Amboy; from June 24, 1750, to June 24, 1751, stand thus,

both foreign and coafting voyages included. I shall only mention fome of the most confiderable articles of their exports and imports in that time.

Exported.	Imported.	
Flour 6424 bar. Bread 168,500 wt. Beef and pork 314 barrels Grain 17,941 bufh. Hemp 14,000 wt. Some firkins butter, fome hams, beer, flax-feed, bar-iron, fome lumber.	Rum 39,670 gal. Moloffes 31,600 gal. Sugar 2,089 ct. wt. Pitch, tar, and turpent. 437 bar. Wines 123 pipes	

Some miscellanies on various subjects.

The copper ore of the Jersies is very good, but the mine has not been wrought for some years, the difficulty culty in draining requires a fire engine. The copper mines in Simfbury hills in New-England, about 90 miles N. E. from the copper mine in New-Jersey, have been neglected for some years, because they not only dip too quick, and therefore are not easily drained, but also the ore is of a hard nature not easily fluxed, it is too much internaixed with spar, the veins or loads very uncertain and unequal, and frequently only shoads or fragments.

In British North-America, hitherto no discovery has been made of tin ores, nor of lapis calaminaris, very little lead ore, and that not good.

All over North-America is much iron ore, both rock and bog ore. Three tun of bog or fwamp ore gives about one tun caft iron ware, which can be afforded cheaper than that which is imported from England or Holland. The bars of bog ore have too much fcorize or drofs, and are much inferior to the bars refined from the pigs of rock ore.

In the American rivers there are many cataracts, precipices, pitches, or falls; generally from the river pating over a ledge or ridge of rocks; that of Niagara, formerly mentioned, between lake Ontario and lake Erie, is the most noted. There are some cataracts or great falls, not from a precipice of rocks, but from a very narrow pass in a tide river; that near the mouth of St. John's river on the N. W. fide of the bay of Fundy in Nova-Scotia is the most noted; in this case, from the narrowness of the pass, the water not confined below falls off faster than the water confined above, the water above is not only what the tide of flood brought in, but also the river water damed up.

The higher up a tide river, the duration of flood is lefs, and that of ebb is more; for inftance, in the great river of Canada, or river of St. Laurence, anno 1748, a flag of truce was fent for exchange of prifoners from Bofton in New-England to Quebec in Canada; in this great river by order of the general governor of Canada they were ftopt at Lifle des Bafques, (5 U Δ leagues

leagues below Tadoufack, and 35 leagues below Quebec) where was good anchorage + in 10 fathom water, the tide flowed 5 hours and ebbed 7 hours.

Amongst the many hardships which the first fettlers of new raw colonies and plantations fuffer, one of the most confiderable is, their fitting down in wilderness. forest, or wood lands; where by the exhalations from the trees, there is a continual damp, which does not continuedly difperfe, but hovers about, and may be faid in fome refpect to ftagnate and putrify, and confequently produce in these human bodies many kinds of putrid diforders, fuch as putrid lingring fevers, putrid dyfenteries, all forts of fcorbutick complaints, and the like distemperatures. The damp or vapour from wood lands, is much more confiderable than from the fame lands when cleared of trees and fhrubs. It is notorious in these countries, that many ftreams of water which in the beginning came from wood lands, and carried grift mills and faw mills; when these lands were cleared of wood, their ftreams vanished and became dry, the mills ceased, and in fome parts the cattle could not be conveniently watered. In the philosophical transactions of the royal fociety in London, we find many observations and experiments made relating to this fubject; for inftance, two veffels containing each a certain equal quantity of water, in one of these vessels were set some living plants, after a certain fpace of time, the veffel containing water with plants did evaporate much more of the water, than the veffel of water only.

+ The French by their representations of the difficult and dangerous navigation of this river, endeavour to intimidate all other nations from attempting the river; but now we find that it is fafely practicable.

SECTION XIV.

Concerning the PROVINCE of

PENSYLVANIA,

And its TERRITORIES.

W E have already deduced these settlements from their first European discoveries, and from their transition by the name of New-Netherlands under the Dutch, to the duke of York's property by patents from the crown of England.

This province and territories are by three diftinct grants. 1. The province of Penfylvania by patent from K. Charles II. dated March 4, 1680-1. 2. The duke of York, 1683, August 24, fold to William Penn the elder, his heirs and assigns, the town of Newcastle alias Delaware, and a district of 12 miles round Newcastle. 3. Duke of York by another deed of fale August 24, 1683, made over to faid William Penn, his heirs and assigns, that tract of land from twelve miles fouth of Newcastle, to the Whore-Kills, otherwise called Cape-Henlopen, divided into the two counties of Kent and Suffex; which with Newcastle district, are commonly known by the mame of the three lower counties upon Delaware river.

As the three lower counties or territories are by diffinct deeds or grants from that of the royal grant of the province of Penfylvania, when it was by the proprietary left to their option to be united with the jurifdiction of the province of Penfylvania, or to continue a feparate jurifdiction; they chose to be a feparate jurifdiction, and not

not to be as it were annihilated by a prevailing jurifdiction : thus they continue at prefent two diffinct legiflatures, governments, or jurifdictions, under the direction of one and the fame governor; but their municipal laws and regulations are nearly the fame.

K. CHARLES IId's patent of the province of PENSYL-VANIA is dated March 4, 1680-1, of which an abstract is,^{14*}To our trusty and well beloved subject William Penn, Efq; fon and heir of Sir William Penn deceased, to re-duce the favage nations by gentle and just manners to the love of civil fociety and the christian religion (with regard to the memory and merits of his late father in divers fervices, particularly in the fea-fight against the Dutch 1665, under the duke of York) to transport an ample colony towards enlarging the English empire and its trade, is granted all that tract of land in America, bounded eastward on Delaware river from 12 miles northward of Newcastle to the 43d. of northern lat. and to extend 5 d. in longitude from faid river; to be bounded northerly by the beginning of the 43d. of N. lat. and on the fouth by a circle drawn at 12 miles distance from Newcastle northward and westward unto the beginning of the 40d. of northern lat. and then by a strait line westward to the limits of longitude abovementioned; faving to us and our fucceffors the allegiance and fovereignty, to be holden as of our caftle of Windfor in the county of Berks, paying quit-rent two buck-fkins to be delivered to us yearly in our cattle of Windfor on the first of January, and the fifth of all gold and filver ore, clear of all charges. Erected into a province and feignorie, to be called Penfvlvania. Said William Penn, &c. and his lieutenants, with the affent of a majority of the freemen or their delegates affembled, to raile money for publick uses, to establish judges, juffices, and other magistrates, probate of wills and granting of administrations included; to pardon or remit all crimes and offences committed within faid province,

province, treafon and wilful munder excepted, which however they may reprieve until the king's pleafure is known; the judges by them conflituted to hold pleas as well criminal as civil, perfonal, real and mixt: their laws to be confonant to reason, and not repugnant to the laws of England, referving to us, &c. a power to hear and determine upon appeals. In all matters the laws of England to take place, where no politive law of the province appears. A duplicate of all laws made in faid province shall in five years be transmitted to the privy council; and if within fix months, being there received, they be deemed inconfistent with the prerogative or laws of England, they shall be void. A licence for our subjects to transport themselves and families unto the faid country A liberty to divide the country into towns, hundreds, and counties, to incorporate towns into boroughs and cities, to conftitute fairs and markets. A liberty of trade with all our other dominions, paying the cuftomary duties. A power to conftitute fea ports and keys, but to admit of fuch officers as shall from time to time be appointed by the commissioners of our cuftoms. The proprietors may receive fuch impofitions upon goods as the affembly shall enact. The proprietors to appoint an agent or attorney to refide near the court in London to answer for the default of the proprietors, and where damages are afcertained by any of our courts, if these damages are not made good within the space of one year, the crown may refume the government until fuch damages and penalties are fatiffied, but without any detriment to the particular owners or adventurers in the province. To maintain no correfpondence with our enemies. A power to purfue enemies and robbers even to death. May transfer property. To erect mannors, that may hold courts baron, That the crown shall make no taxation or imposition in faid province without confent of the proprietary, or affembly, or by act of parliament in England. Any inhabitants, to the number of twenty, may by writing

ŧ

ing apply to the bifnop of London for a preacher or preachers."

An abstract of Mr. Penn's charter of liberties and privileges to the people, 25th day of the fecond month, vulgarly called April, 1682. "The government shall be in a provincial general affembly composed of the governor and reprefentatives of the freemen, to make laws, raife taxes, constitute courts and officers, &c. The freemen of the province shall meet on the twentieth day of the twelfth month 1682, to elect 72 perfons for a council, whereof 24 shall fall off yearly, and another 24 be elected in their room, that many perfons may have experience in government; in matters of confequence two thirds to be a quorum, and the confent of two thirds of fuch quorum is requilite; in affairs of leffer moment 24 members shall be a quorum, and a majority of these shall determine: the governor or his deputy to prefide and have a treble vote. This council is to prepare and deliberate upon bills to be paffed into laws by the general affembly, to erect courts of justice with their officers, to judge criminals, to have the executive power; fhall model towns, ports, markets, publick buildings, and highways; to infpect the management of the provincial treasury, to order all publick schools: this council to be divided into four diffinct committees for diftinct branches of business. The freemen shall yearly chuse representatives not exceeding 200, to meet 22d day of the fecond month (1683 for the first time) and to continue eight days, may appoint committees to confer with committees of the council concerning amendments of bills, and the ninth day shall give their affirmative or negative to the bills prefented; two thirds to be a quorum in passing of laws and choice of officers; the enacting stile to be, "By the governor, with the affent and approbation of the freemen in provincial council and general affembly." The first year the general assembly may confist of all the freemen

freemen of the province, and afterwards of 200 to be chofen annually, which as the country increases may be enlarged, fo as never to exceed 500, at the difcretion of the legislature. The provincial council shall on the 13th day of the first month yearly, present to the governor or his deputy a double number for provincial officers; and the freemen in the county courts shall prefent a double number to ferve for fheriffs, juffices of the peace. and coroners for the year next enfuing; out of each prefentment, the third day following, the governor or his deputy shall commissionate one; but Mr. Penn to appoint the first officers to continue ad vitam aut culpam. The general affembly may be called upon by the gor vernor and provincial council to meet at any time: When the governor shall be under the age of 21; and no guardians appointed by the father, the provincial council shall appoint guardians not exceeding three, with the power of a governor. No article in this charter to be altered without the confent of the governor and fix. parts of feven of the freemen in provincial council and general affembly." · 6 · 70 / 9 g - 1 g

• : : Befides thefe, there were fome other fundamental laws agreed upon in England. Every refident who pays foot and lot to the government, shall be deemed a freeman capable of electing and of being elected. The provincial council and general affembly to be fole judges in the elections of their respective members. 24 men for a grand jury of inquest, and 12 for a petty jury, to be returned by the fheriff. All perfons wrongfully imprifoned or profecuted at law, fhall have double damages against the informer or profecutor. Seven years posses fion shall give an unquestionable right, excepting in cases of lunaticks, infants, married women, and perfons beyond the feas. A publick register established, The charter granted by William Penn to the inhabitants is confirmed. All who acknowledge one almighty GOD, shall not be molested in their religious persuasions in matters

ters of faith and worfhip, and shall not be compelled to maintain or frequent any religious ministry. Every firsh day of the week shall be a day of reft. None of those articles shall be altered without confent of the governor or his deputy, and fix parts in seven of the freemen met in provincial council and general affembly. This was figned and sealed by the governor and freemen or adventurers in London 5th day of the third mouth called May, 1682.

There were certain conditions agreed upon by the proprisepr, and the adventurers and purchasers, July 11, 1681; for instance, convenient roads and highways be laid out before the dividend of acres to the purchasers land shall be laid out to the purchasers and adventurers by lot. Every thousand acres shall settle one family. All dealings with the Indians shall be in publick market.

All differences between the planters and native Indians fhall be ended by fix planters and fix natives. Laws relating to immorality fhall be the fame as in England. In clearing of land, one acre of trees fhall be left for every five acres, to preferve oak and mulberries for fhipping and filk.

None to leave the province, without publication thereof in the market-place three weeks before.

By a new charter from the proprietary fecond day of the fecond month 168g, there are fome alterations made in his first charter, principally as to the numbers of the provincial council and assembly; that is, the provincial council shall confist of 18 perfons, whereof 3 from each of the fix counties; the assembly to confist of 36, that is, fix from each county; as the country increases, the provincial council may be increased to any number not exceeding 72; and the assembly may be increased to any number not exceeding 200; the other articles are much the same as in, the first charter : the enacting flile to be, "By the governor, with the approbation bation of the freemen in provincial council and affembly met;" and the general affembly shall be called, "The meeting, settions and proceedings of the general affembly of the province of Penfylvania, and the territories thereunto belonging." Nothing in this charter to be altered, but by confent of the governor and fix 7ths of the provincial council and affembly.

This charter of 1689, as inconvenient, was furrendered to Mr. Penn in the third month of 1700 by fix 7ths of the freemen of the province and territories, and a new charter granted; as this is now their flanding charter. we shall be more particular. The preamble runs thus, "WHEREAS K. Charles II. granted to William Penn the property and government of the province of Penfylvania, March 4, 1680; and the duke of York granted to faid Penn the property and government of a tract of land now called the territories of Penfylvania, August 24, 1683: and whereas the faid William Penn for the encouragement of the fettlers, did, anno 1683, grant and confirm to the freemen by an inftrument entitled. The frame of the government, &c. which charter or frame being found, in some parts of it, not so fuitable to the prefent circumstances of the inhabitants, was delivered up as above; and at the request of the assembly another was granted by the proprietary Mr. Penn, in purfuance of the rights and powers granted him by the crown, confirming to all the inhabitants their former liberties and privileges, fo far as in him lieth. 1. No perfons who believe in one almighty GOD, and live peaceably under the civil government, shall be molested in their religious perfuations, nor compelled to frequent or maintain any religious worship contrary to their mind. That all perfons who profess to believe in JESUS CHRIST, are capable of ferving the government in any capacity 1 they folemnly promifing, when required, allegiance to the crown, and fidelity to the proprietor and governor. 2. That annually upon the first day of October for ever, there

١,

there thall an altembly be cholen. to fit the fourteenth day of the fame month, viz. four perfons out of each county, or a greater number, as the governor and affembly may from time to time agree, with all the powers and privileges of an affembly as is usual in any of the king's plantations in America; two thirds of the whole number that ought to meet shall be a quorum; to fit upon their own adjournments. 3. The freemen at their meeting for electing reprefentatives to chufe fheriffs and coroners; the justices in the respective counties to nominate clerks of the peace. 4. The laws of the government shall be in this stile, "By the governor, with the confent and approbation of the freemen in general af-not to keep an ordinary or tavern but fuch as are recommended by the justices of the county. 6. No alteration to be made in this charter without the confent of the governor and fix parts of feven of the affembly met. Signed William Penn at Philadelphia in Penfylvania, October 28, 1701, and the twenty-first year of my government." Notwithstanding any thing formerly alledging, the province and territories to join together in le-giflation, Mr. Penn hereby declares, that if at any time hereafter within three years, their respective affemblies fhall not agree to join in legiflation, and fhall fignify the fame to me; in fuch cafe the inhabitants of each of the three counties of the province shall not have less chan eight reprefentatives, and the town of Philadelphia when incorporated, shall have two representatives. The inhabitants of each county in the territories shall have as many perfons to reprefent them in a diffinit affembly for the territories, as be by them requefted. Province and territories shall enjoy the fame charter, liberties and privileges. This charter of privileges was thankfully received the fame day by the affembly, and figned by their order; and figned by a number of the proprietary and governor's council

The

The report is probable, that Mr. Penn, befides his royal grant of the province of Penfylvania, had moreover a grant of the fame from the duke of York, to obviate any pretence, that the province was comprehended in a former royal grant of New-Netherlands to the duke of York.

Mr. Penn's first charter concessions, or form of government to the fettlers; feems Utopian and whimfical; conftituting a legislature of three negatives, viz. the governor, and two diffinct houses of representatives chosen by the freemen; one called the provincial council of 72 members, the other was called the provincial affembly of 200 members; the council had an exorbitant power of exclusive deliberating upon and preparing of all bills for the provincial allembly; the executive part of the government was entirely with them. The provincial affembly, in the bills to be enacted, had no deliberative privilege, only a yes or no; these numbers of provincial council and provincial affembly feem to be extravagantly large for an infant colony; perhaps he was of opinion with fome good politicians, that there can be no general model of civil government; the humours or inclinations, and numbers of various focieties must be confulted and variously fettled : a fmall fociety naturally requires the deliberation and general confent of their freemen for taxation and legiflature; when the fociety becomes too numerous for fuch universal meetings, a representation or deputation from feveral difricts is a more convenient and easy administration. His last and prefent standing charter to the inhabitants of the province and territories of Penfylvania, Oct. 28, 1701, runs into the other extreme; the council have no negative in the legislature, and only ferve as the proprietary's council of advice to the proprietary's gover-not : 1746, by act of parliament, the negative of the board of aldermen in London, for certain reasons was abrogated. A council chosen by the people, to negative refolves of reprefentatives also appointed by the people, Vol. II. х feems

feems to be a wheel within a wheel, and incongruous: but a council appointed by the court of Great-Britain as a negative, feems to be good policy, by way of controul upon the excelles of the governor on the one hand, and of the people by their reprefentatives on the other hand.

The province of Penfylvania some years fince was mortgaged to Mr. Gee, and others, for 6600 I. sterk. In the year 1713, Mr. Penn by agreement made over all his rights in Penfylvania to the crown, in consideration of 12,000 l. sterl. but before the instrument of surrender was executed, he died apoplectick, and Penfylvania still remains with the family of Penns.

Upon the first seulement of Pensylvania, Mr. Pean flipulated with the aboriginal natives the Indians, that that they should fell no lands to any perfon but to kimfelf or his agents; this was confirmed by fubfequent province laws : on the other fide, Mr. Penn's agents were not to occupy or make grants of any lands, but what were fairly purchased of the Indians; for inftance, a few years ago, the delegates of the Six nations of Iroquois, for a certain confideration in goods, released their claims to all lands both fides of the river Sefquahanna, fo far fouth as the province of Penfylvania reaches, and fo far north as the Blue or Kittatinny mountains, and received pay in part. Beginning of July, 1742, the Six nations had a congress with governor Thomas and eight of his council at Philadelphia, to receive the other moiety as per agreement; we shall take this opportunity of prefenting this as a specimen of an affortment of goods in demand with the Indians.

The flory of William Penn's obtaining the grant of Pemfylvania is in this manner. Admiral Penn an gemerable Vonable were fent 1655 by Oliver Cromwelt with a confiderable fea and land force to reduce Hilpaniola in the Spanish Weft-Indies, which they did not effect, but reduced the Spanish island now called Jamaica, which remains in policilion of the crown of Great-Britain to this day. Admiral Penn upon the refloration became a royalify was knighted, and commanded the English fleet under the duke of York against the Dutch, commanded by admiral Opdam' roog. Admiral Pem's fon, William Penn, perhaps in fome whim, put himfelf at the head of the quakers, and upon his petition to the king, in conflideration of his father's fervices, and arrears due from the crown, he obtained a royal patent for the province of Penfylvania, and a grant from the dake of York, of the three lower counties on the west fide of Delaware bay and river, being part of New-Netherlands by royal grant to duke of York, his heirs and affigns. This William Penn was much in favour with king James II, as being head of a confiderable body of fectaries called quakers; by reason of this particular countenance, Mr. Penn was suspected to be a papist, and a jesuit in the diff guife of a quaker. At the revolution, upon fufpicion. king William deprived Mr. Penn of the privilege of appointing a governor for Penfylvania, and col. Fletcher was appointed by the trown, but upon Mr. Penn's vindication of himfelf, he was reftored to his right of government, and continued to appoint lieutenant governors or deputies as formerly.

The boundaries of the province and territories of Penbylyania, rivers, and diffunces of fome noted places.

The northern boundary of the province is the 42 d. parallel of latitude, from Delaware river (about twen y miles above the flation point on Delaware river, where the north eafterly divisional line between the provinces of X 2 New-

New-York and New-Jerfey begins) weft, to the extent of 5 d. in longitude, being about 250 English statute miles; thence in a line parallel with the river of Delaware at 5 d. longitude W. from the faid river, to a parallel of latitude 15 miles south of the most southern part of Philadelphia, being about 153 miles strait courfe; along this parallel 15 miles south of Philadelphia to the river Delaware — miles: thence up along Delaware river to 42 d. N. lat. which in a strait line may be about 153 miles.

The territories of Penfylvania called the three lower counties upon Delaware river are bounded eastwardly by Delaware river, from the north part of Newcastle territorial circle, to cape Henlopen at the entrance of Delaware-Bay, about 80 miles strait, but much more as the thore or country road runs : fouthwardly and weftwardly they are bounded as per agreement between lord Baltimore of Maryland, and the Penns of Penfylvania, 1732, and confirmed in the chancery of England, 1750, in these words, "That a due east and west line be run from cape Henlopen to the middle of the peninfula, and the faid strait line to run from the westward point thereof, northwards up the faid peninfula (and above the faid peninfula, if it required) till it touched, or made a tangent, to the western part of the periphery of the faid twelve miles circle, and the faid due fouth and north line to run from fuch tangent, still it meets with the upper or more northern east and west line, and the faid upper east and welt line to begin from the northern point or end of the faid fouth and north line, and to run due westward, (N. B. + this is a delineation of the fourh line of the province of Penfylyania) at prefent crofs Selquahanna river, and twenty-five

+ In the furvey 1739, of the E. and W. divisional line (about 15 miles fouth of the fouthermost part of the city of Philadelphia) between Penfylvania and Maryland, the surveyors allowed a variation of 5 d. 30 m. W. and found there was about one degree variation for every twenty late years.

2

e . .

English

English statute miles at least on the western fide of faid river, and to be 15 English statute miles south of the latitude of the most southern part of the faid city of Philadelphia, were, and shall, and should at all times for ever hereaster be allowed and esteemed to be the true and exact limits and bounds; between the faid province of Maryland, and the faid three lower counties of Newcastle, Kent, and Sussex, and between the faid provinces of Maryland and Penfylvania." +

As the controverly of a long ftanding, concerning boundaries, between lord Baltimore of Maryland, and the Penns of Penfylvania, has made much noife; we fhall infert a fhort abstract of the fame, for the amufement of the curious.

Lord Baltimore's royal grant of Maryland was about 50 years prior to Mr. Penn's grant of Penfylvania, but in Baltimore's grant there was an exception of lands then belonging to the Dutch, which are at prefent the three lower counties upon Delaware river; when Mr. Penn took pofferfion he found one Dutch and three Swedes congregations.

The grand difpute was concerning the conftruction of the expression 40 d. of latitude; Maryland grant 1632, fays, to the 40 d. of lat. which Maryland fide of the question construe to be to 40 d. compleat; Penfyl-

+ They mutually quit elaim, viz. Charles lord Baltimore quits claims to John Penn, Thomas Penn, and Richard Penn, and their heir and affigus, all his pretentions to the province of Penfylvania, and the three lower counties of Newcattle, Kent and Suffex, to be fo bounded as aforefaid free of all incumbrances by Cecilius baron of Baltimore, great grand-father, Charles grand-father, Benedict father to faid Charles, and by him the faid Charles, his heirs and affigns. And on the other fide, John Penn, Thomas Penn, and Richard Penn, for themfelves and their heirs, quit claim unto Charles lord Baltimore and his heirs, all their pretentions to the province of Maryland, to be fo bounded as aforefaid, free of all incumbrances, by William Penn the grandfather, William Pen, Thomas Penn and Richard Penn, William Penn the fon, John Penn, Thomas Penn and Richard Penn, william Penn the fon, John Penn, Thomas Penn and Richard Penn, william Penn the fon, John Penn, Thomas Penn and Richard Penn, their heirs or affigns.

vania

vania grant 1682, lays, to begin at the beginning of the 40th d. which the Penfylvania lide confinue to be just after 39 d. is compleated, * thus there was a difpute of the extent of one degree in latitude, or 63 Haglish miles.

Confidering Maryland grant was prior, and that the Manyland people had made confiderable improvements by pollestions, within that depres of Jaritude : the affair was compromiled feelingly in favour of Marvland by a written agreement May 10, 1722, as is above related : and that is two calendar months from that date, each party shall appoint commissioners not more than seven, whereof three or more of each fide may act or mark out the boundaries aforefaid, to begin at furthest some time in October 1732, and to be compleated on or before 25th December 1733, and when fo done, a plan thereof shall be figned, sealed and delivered by the commissioners and their principals, and shall be entered in all the publick offices in the feveral provinces and counties; and to recommend to the respective legiflatures to pais an act for perambulating these boundaries at least once in three years.

The party defaulting, to pay to the other party on demand fix thousand pounds sterling; accordingly the commissioners respectively appeared, but upon some differences in opinion, the boundaries were not made in the time limited; the failure was in lord Baltimore's fide, who alledged that he had been deceived in fixing cape Henlopen 20 miles south westerly of the western cape of Delaware-Bay, whereas cape Henlopen is the western cape itself; the Penns affirm, that the western cape is cape Cornelius, and cape Henlopen is about four hours southwardly of it, according to the Dutch maps and descriptions published about the time when lord Baltimore obtained his grant.

• Thus in other affeirs; for inflance, in political computation, after 1700, it is called the eighteenth century.

- Becaule

Becaufe of nonperformance, the Penns 1735 exhibited a bill in the chancery of Great-Britain against long Baltimore, praying that the faid articles may be decreed to subfift and be carried into execution, and that any doubts arifen may be cleared by faid decree.

After tedious delays, at length May 15, 1750, lord chancellor decreed cofts of fuit against Baltimore, and that the articles of May 10, 1732, be carried into execution; and that before the end of three calendar months from May 15, they should execute two several pronet infruments for appointing commissioners, not more than feven of a fide; any three or more of a fide may run and mark the boundaries, to begin fome time in November next, and to be compleated on or before the last day of April 1752, to be figned, &c. recorded, &c. and enacted, &c. as per agreement of 1732 above related. Lord chancellor decreed concerning the late disputes, 1. That the center of the circle be fixed in the middle of the town of Newcastle, 2. That the faid circle ought to be of a radius of twelve English miles. 2. That cape Henlopen ought to be deemed at the place laid down in the maps annexed to the articles of 17:22.

The commiffioners appointed by each party met at Newcastle, Nov. 15, 1750; they agreed on a center in Newcastle, from whence the twelve miles radii are to proceed; but a dispute arose concerning the mensuration of these twelve miles. Lord Baltimore's commissioners alledged, that these miles ought to be measured superficially; the Penns commissioners alledged, that confidering the various inequalities of the ground, such radii could not extend equally, consequently from them no true arch of a circle could be formed, and infissed upon geometrical and astronomical mensurations. Thus the proceedings of the commissioners stopt, and they wrote to their respective principals for further instructions relating to that point, and adjourned to April 25, 1751.

The confiderable rivers in Penfylvania are Delaware X 4. (Schyl-

(Schyl-Kill river falls into Delaware at Philadelphia) and the Sefquahanna. Delaware-Bay begins at Lewis's near cape Henlopen; # from thence with the various turnings of the bay and river or publick road to Newcastle are about of miles; from Newcastle to Philadelphia are 25 miles; from Philadelphia to Trent-town falls are 35 miles, these are the first falls in this river, and the tide reaches up to high; these falls are practicable, and the river navigable with boats that carry 9 or 10 tuns of iron 40 miles higher to Durham iron works; this river proceeds from the west fide of the Cat-kill mountains of the province of New-York. From Trent-town falls, this river is practicable upwards of 150 miles for Indian cance navigation, feveral fmall falls or carrying places intervening. Mr. W--- d, a late noted vagrant enthusiastick preacher, purchased a confiderable quantity of lands in the fork of Delaware river, about 50 miles above Trent-town falls, for the education and civilizing of negroes, as he presended; but as he could not answer the purchase money, he was obliged to relinquish it. All his schemes were ill projected and ill founded : his grand church or meeting-house in Philadelphia, by him declared to be free to all christian itinerants, as he was a man of no penetration, he was not capable of finishing it, and it was transferred to a fociety for propagating of literature, a much more laudable inflitution than that of propagating enthulialm, idlenels and fanctified amours. His orphan house in Georgia in South-Carolina, in a barren infalubrious country, his first project, pretence for itinerant begging, is almost come to nothing.

The other confiderable river is part of Sefquahanna; fee vol. II. p. 282. Its main branch comes from fome ponds a little fouth of Mohawks river in the province of New-York; from the head of this branch to the

At cape Henlopen 1748, the variation of the compass was 4 d. W. decreasing.

falls

falls below Wioming * there is no obstruction, and good Indian cance navigation; and thence to Paxton are 5 or 6 falls which may be shot pretty safely with a fresh: this river has many good branches for Indian skin trade, some of these branches communicate with the countries beyond the mountains. Sesquahanna river is wide but shallow. Delaware, Sesquahanna and Potomack are fordable by the Indian traders in the summer season.

The Indian traders fet out beginning of May, and continue 3 or 4 months out; they buy the fkins not of the Indians, but of fettlers who deal with the Indians, called by the Dutch name of handelaars or traders; they purchase only with gold and filver, and carry their fkins in waggons to Philadelphia; the road is about 20 miles below the foot of the blue mountains. They travel from Philadelphia to Lancaster 60 miles (Lancaster is 10 miles east of Sesquahanna river) thence 40 miles to Paxton or Harris's ferry, thence 40 miles to Shippens. burg in the province of Penfylvania, thence 45 miles to Potomack, river (the, width of Maryland is here about, 20 miles) which divides Maryland from Virginia. A few miles weft of Potomack river in Virginia for fome years have been used with good effect, by bathing and drinking, fome tepid medicinal waters, they have no mineral tafte, and do not offuscate the glass like Briftol hot well water.

In Penfylvania there is no real fea line excepting the weft weft fide of Delaware bay. The navigation of Philadelphia is almost every winter stopt up by ice for two or three months. The coast of New-York, Jersies, and Penfylvania is free from ship-worms or teredines. Land winds blow almost three quarters of the year.

The Blue or Kittatinny mountains begin in Penfylvania, are about 900 miles in length and 70 to 100 miles

• About 50 miles below Wioming is the Indian tribe of Shamokin in the fork of Sefeguahanna, and about 50 miles below Shamokin is Paxton or Harris's ferry.

acrofs,

,

across, not in feattened peaks, but in uniform ridges; the further ridges are much the largest and highest.

Concerning Indian affairs,

I shall here mention some additional observations concerning the Indians in general, and some of their lare treaties with the British governments, particularly that of Lancaster and Pensylvania, anno 1744, as consisting of the greatest variety of articles negotiated with three difunct British provinces or colonies.

When tribes or nations of Indians go to war againft one another, they feldom make it up (the Indians are the moft implacable of mankind) but by the destruction of the one or the other fide, or by a flavilla fubmission. The Iroquois or Six nations of Mohawks, as we call them, have for many years been at war (these wars are only clandestine incursions with massacres and depredations) with the Catawbas and Cherakees; the Cherakees and Six stations as being too distant to annoy one another much, have come to some accomodation, but the state of war with the Catawbas continues.

The Penfylvanians never loft one man by any French or Indian war, but in perfonal broils and encounters perfons have loft their fives on both fides.

The Mohawks by the English give name to all the Six nations, though the finalless of the tribes. The Tuscaroras are an adventitious tribe, being emigrants or profugi in the North-Carolina wars 1712 and 1716, they were allowed to settle by the ancient five confederate nations amongst them.

For fome time paft, a kind of party division hath subfifted among the Six nations: the Mohawks, Onondagues and Senecas formed one party; the Oneides, Tufearoras and Cayugas the other party.

The Six nations fay that the Delaware and Sefquahanna Indians were conquered by them, and therefore have no right to difpose of lands.

The Indian delegates at the congress of Lancaster well

well observed to the committioners from Virginia, Maryland, and Penfylvania, that what the Indians received of them were goods foon perifhable, but what they reorived of the Indians were lands which endured for ever.

The Indians are supplied by the English with provisions coming and going in all treaties. * They have their guns, hatchets, and kettles mended gratis:

In all congresses the Indians approve of each article by a Yo hah, the English use a huzza,

The Indians use peculiar appellations for the governors of the several provinces or colonies; for instance, the governors of Virginia are called assaged; those of Pensylvania, onas; those of Canada, onando; and lately they have fixed the name of tocarry hogan (signifying excellent) for the governors of Maryland.

We may here observe the great variety in the humours of diffant nations; we shall here instance that of their speech or words: in the East-Indics and China, their words are generally monofyllables; in the West-Indics their words are generally polyfyllables of an uncouth length; thus the Six nations at the Lancaster congress fay, all the world knows, that they had conquered (confequently their lands at our disposal) feveral nations on the back or west fide of the great mountains of Virginia, viz, the Conoy-uch-such-roona, Coch-now-was-roonon, Tohoairough-roonon, and Conutskin-ough-roonaw.

The Six nations by natural inclination are difposed to warlike enterprizes, and are never at peace with all their neighbours. In a speech at a congress with the English,

• In the appendix to a late hiftory of the Five Indian nations, we have a pleafant or ludicrous flory of this nature; in the Lancaster congress with the Indians, 1744, the commissioners of Virginia, Maryland, and Penfylvania, having told the Indian delegates of the Six mations, that the king of Great-Britain had lately beat the French both by fea and land; the Indian delegates observed, that in confequence, the English must have taken a great deal of rum from the French, therefore you can the better spare fome of that liquor, to make us rejoice with you in these victories.

they.

315

they faid, that if christians go to war against one another, they in time make peace together; but it is not so with the Indians.

The Indians when they pais by a friendly fort march in a fingle line, and falute the fort by a running fire.

Nanandagues is a fecond settlement of deserters from the Six nations; they live near Montreal.

The British northern colonies are the frontiers and defence of all other British colonies, against the warlike robust northern Indians; thus it has in all times been in Europe and Afia, the hardy robust Goths, (Getæ of Afia) Vandals, &c. from the northern climates, over-run the effeminate, indolent, relaxed foutherly people if not check 'd; the Indians of the higher latitudes in North-America, and in Chili in South-America, make a much better frand against the European intrusions, than the Indians of Mexieo and Peru, who live between or near the tropicks.

It is conjectured that fix hundred fighting men may be afforded by the Indian fettlements on Sefquahanna river and its branches.

In all our northern colonies, there are or have been referved lands for feveral bodies or villages of intermixed Indians,

Although the northern Indian tribes as to numbers are contemptible, when compared with the European nations, they ought to be kept in a political awe to prevent their fkulking incurfions and depredations upon our frontiers when pufhed on by a rival European power; this cannot be done by ridiculous feints; for inflance, when we tell the Indians in fome congrefs, as it happened 1746, that all the united force of our colonies with fhips of war and foldiers from Great-Britain, are to mufter to reduce Canada; but foon after nothing is done, or fo much as attempted: thus we lofe our credit with the Indians, and in fact they have impune infulted us ever fince, in Nova-Scotia and New-England, at the infligation of the Canada French.

The Indians are a false but crafty people. In our late

OF PENSYLVANIA.

late war with the French nation and their American colonies, feveral diftant tribes of Indians in expectation of prefents, faid they would, though really did not defign to relinquifh the French intereft; fuch were the Shawances town upon Ohio river, the Maffafegues near Les Etroits between lake Erie and lake Huron, confifting of five caftles or villages of about 800 men, and the Twightwees on the Oubeck river in a treaty at Lancafter, July 1748.

The most noted congress with the Indian delegates for many years, was that in June 1744, held at Lancaster in Pensylvania, confisting of commissioners from the three provinces of Pensylvania, Maryland, and Virginia, concerning a great variety of articles, such as quit-claiming of large tracts of lands to these governments respectively, and receiving of presents upon their promise to affist the British interest in the war lately commenced against the French.

1. They confirmed to the proprietors of Penfylvania all the lands each fide of Sefquahanna river fo far north as the Blue mountains. They fettled the affair of forme Delaware Indians killing and robbing of Mr. Armstrong, a trader, and his two fervants.

2. The Indians complain, that the Maryland and Virginia people had fettled fome land back of Virginia and Maryland, without confent of the Six nations, or of any purchase made from them, which lands belong to the Six nations by their conquest over the ancient Indian possession. Hereupon the Indians by an instrument in writing released all their lands in Maryland + to the Maryland commissioners for 300 l. in goods valued in Penfylvania currency; we shall here give this

† About 100 years fince, the Sequahanna or Conastagoe Indians, by treaty granted all the land now possessed by the people of Maryland to them and their heirs from Pataxen river on the west fide of Chesapeak-Bay, and from Choptank river on the east fide of said bay.

2. The commissioners of Virginia gave the Indians 2001. Penfylvania currency in goods, and 2001. in gold, as a confideration for their deed, recognizing the king of Great-Britain's right to all the lands that are os shall be by his majefty's appointment in the colony of Virginia: and the Indians defire that they may have a further confideration when the fettlements increased much further back, which the committioners agreed to. The Six Indian nations complain, the treaty above 20 years fince made at Albany was not observed, viz, the middle or ridge of the hill on the back of Virginia was fixed as a boundary between the Indians who live upon referved lands in Virginia, and the Indians of the Siz nations. Another article was to fettle an Indian road to pais fouthward on the back of Virginia. Another article was to bury in oblivion, a fkirmifh which happened is in the back parts of Virginia, between fome of the Virginia militia there, and a party of the Indian warriors of the flix nations; upon this account the committioners of Virginia prefented the Indians with goods to the value of 100 l. fterl.

As the French about this time were declaring war against Great-Britain; to retain the Six nations in the British interest; after a proper speech to the Indians, Pentylvania made them a present in goods value gool. Penfylvania currency: Virginia gave them goods to the value of 1001. sterl. and 1001. in gold, with a defire that they would fend fome of their children to be educated in Virginia, who might serve as interpreters in times to come; the Indians answered, that they were not
not inclined to bring their children up to learning 5 the commissioners of Maryland prefented the Indians with 100 l. in gold.

. There are frequent congreffes of the British provinces with their neighbouring tribes or nations of Indians, especially of the provinces of New-York and Penfylvania with the Six nations of Iroquois or Mohawks, to retain the Indians in the British interest; these have a good effect, though generally they are only a piece of formality with this conclusion, that the Indians were pleased with their prefents and promised fidelity ; fometimes affairs of confequence are transacted; thus at Albany in August and September 1746, there was a treaty between governor Clinton and council of the province of New-York, with commissioners from the province of Maffachuffetts-Bay, on the one part, and the Six united nations of Indiana depending upon the province of New-York on the other part; to engage thefe Indians in the British interest, against our enemies the French. to be affilting in the expedition against Canada, to be furnished with arms, ammunition, cloathing, and provisions and in their absence their wives and children to be taken care of. 1749, middle of August, there ar-rived in Philadelphia the deputies of many different nations, in order to transact some affairs with the government. The deputies were of the Mowhawks, Oneides, Onondagues, Cayugas, Tuscaroras, Senecas, Shawanees, Nanticokes, Delawares, Mohagins, and Turlos, the whole number of Indians arrived in Philadelphia, women and children included, were about 260.

Concerning the city and port of Philadelphia, the numbers of the Inhabitants in the province and territories of Penfylvania.

Mr. Penn's charter erecting Philadelphia (laying between Delaware and Schuyl-kill rivers,) into a corporation

Digitized by Google

ration and city; is ligned in Philadelphia, by William Penn, October 25; 1701; the thirteenth year of the reign of king William the third; and the one and twentieth year of my government, to conflift of a mayor, recorder, sheriff, and town elerk, 8 aldermen and 12 common council men, by the name of the mayor and commonalty of the city of Philadelphia; the fuft fet to be appointed by Mr. Penn; and yearly thereafter on she first day of the third week in the eighth month, the corporation to meet, the mayor or recorder prefent with five or more of the aldermen, and nine or more of the common council, to chufe one of the aldermen to be mayor for that enfuing year, and to fill up vacancies of aldermen and common council; all officers to take - the declarations and professions directed in the provincial charter. The mayor, recorder and aldermen, to be justices of the peace and of over and terminer; any four or more of them (whereof the mayor and recorder to be two) to hear all cafes capital or otherwife criminal, and with the fheriff and town clerk to hold a court of record quarterly for determining of pleas and . other matters. The mayor and recorder shall be of the quorum of the juffices of the county courts, quarter feffions, over and terminer and goal delivery in the faid county of Philadelphia; and shall have power to take cognizance of debts there according to the statute of merchants, and of action burnel. The mayor to appoint the clerk of the market. The sheriff to be the water bailiff of the province. The corporation have power to remove any officer of their own for mifbehaviour. No meeting shall be deemed a common council unlefs the mayor, recorder, at least three of the aldermen, and nine of the common council, be prefent, a power to admit freemen into the corporation, to make by-laws for the government of the city, to impose fines for the use of the corporation; none to be admitted freemen, but fuch as have been refident in the city for two years, and shall-have an effate of inheritance

tance or freehold therein worth fifty pounds in money. To have two market days every week, the fourth and fewenth day, two yearly fairs (each to continue three days) May 16, and November 16. Philadelphia shall be a port comprehending all creeks and landings of the province.

The fituation of Philadelphia is bad, being at the confluence of two large fresh water rivers, Delaware and Schuyl-kill, which renders their people obnoxious to pleuritick, peripneumonick, dyfenterick, and intermitting fevers; communibus annis, in proportion, they bury near double the number of people that are buried in Boston of New-England. It is well plan'd or laid out, in a plain, confifting of 8 long ftreets of two miles, and 16 crofs streets of one mile each, at right angles, with proper spaces for publick buildings. As we observed before, the long ftreets were laid out with much exactnefs 1682. N. 18 d. E; and anno 1742, in fome law controversies, Mr. Parsons surveyor general of Pensylvania, found them to be 15 d. E which is a difference of a d. in fixty years, decreasing.

Philadelphia is nearly in 40 d. north lat. and about 5 hours or 75 d. west from London. In the spring 1749, the dwelling houles in Philadelphia, in curiofity were numbered by 12 perions, who each undertook a part; publick buildings, ware-houfes, and out-houfes not included; in the leveral wards, they were as follows, in all 2076.

I fhall here intersperse fome account of a laudable academy in Philadelphia, * with a publick fpirited defign of encouraging literature; that is, political and mtural knowledge; fome good deferving gentlemen, by voluntary fubscriptions, promise to pay annually for five years, in proportion to each fubscription; which fum in groß may amount to 50001. Penfylvania currency. The subscribers elect out of their numbers 15 trustees to manage the flock, appoint masters with their falaries, make visitations, &c. At prefent they have three masters and one usher; the first master is called rector, with an usher under him, he teaches latin in all its gradations, even from the rudiments if required, with a falary of 2001. Penfylvania currency per ann. besides the perquifites from his scholars, which is 20s. entrance, and 41. per ann. for each boy's fchooling: his ufher has 601. per ann. with fome perquifites of schooling fees. There is an English school-master at an allowance of 1501, per ann. besides perquisites from his scholars at the fame rate with the latin school. A mathematical and writing master in the fame perfon, allowed 1001. per ann. with perquifites from scholars as the other masters have. The boys at this time (May 1751) are 60 to 70, increasing confiderably. The English master teaches in some manner grammatically to conftrue fentences, to point out the verb with its proper antecedents and relations. 'They have purchased at a cheap rate, a fine commodious building, it is that meeting-house upwards of 100 feet long and 70 feet wide, built in the enthusiastick times of Whitefield. The truftees at the beginning were chiefly presbyterians of the new-light kind, but in a few years one half of them became moravians, and a difpute arofe amongst them, which party should establish a minister. but as the prefbyterians had it originally, they kept it

* As this is a kind of common-place, the reader may excuse my deviating from the first formal fliff rules of some pedantick historians. it to the laft: this division subsisting, and the workmen not above half pay'd, both fides agreed to dispose of it for the use above-mentioned, and the workmen were pay'd off. The subscribers and their trustees hope before the expiration of the five years, to fall on ways and means to render it perpetual; they have applied to the chief proprietor Thomas Penn, Efq; to render it perpetual, begging his affistance and countenance; but it feems Mr. Thomas Penn had in view the establishment of such a seminary, entirely on his own foundation, but not in the city; therefore it's doubted whether he may ingraft his scheme with this, or pursue his sirst intentions. There is little or no hopes of receiving any encouragement from the publick legissificature, the majority of the association of such a purpose, and have finished a good commodious house of their own for a school; the preceptor is a quaker, with 1001. Sterl. per ann. besides fees for teaching, he is to teach twelve of the poorer fort gratis. +

That the reader may make fome estimate of the proportions of the various sectaries in Philadelphia, I shall here observe that in the last fix months of 1750, there were buried in Philadelphia,

Swedes	13	Dutch lutherans	28
Prefbyterians	2Ğ	Dutch calvinifts	39
Baptifts	9	Roman catholicks	15
Quakers	104		

Burials for the 12 months of 1750, Chrift church parish, church of England 129. Negroes 84.

+ As I formerly mentioned, vol. II. p 283, in New-Jerfey there is a college lately erected by governor Belcher, with ample charter privileges, but without any support from the publick, they depend ensizely on donations and benefactions, excepting that by means of lottery they raifed 1000l. to 1200, to make a beginning; a fixed place has been much controverted. They have a divinity professor, a professor of natural philosophy, and a master of a grammar school, all poorly provided for.

Anno

١,

Digitized by Google

Anno 1751, in Philadelphia were estimated about 11,000 whites, 600 blacks. In the province of Penfylvania and its territories, no regular estimate can be made of the inhabitants, because there is no poll tax, nor any militia list allowed for alarums, or common trainings, as in the other colonies, to form estimates by.

There is only one custom-house collection in the proper province of Penfylvania, called the port of Philadelphia; to form fome notion of the extent of its trade and navigation, I have inferted the following table by way of a specimen of what may be composed for each custom-house port in British North-America, from the custom-house quarterly accounts fent home.

Delaware river or the port of Philadelphia is generally frozen up, and has no navigation in the months of January and February.

The following is an account of entries and clearances of veffels at Philadelphia, from March 2, 1748-9, to December 25, 1749.

As in the province of Penfylvania, there is no poll tax, neither any militia incorporated and regulated; we can give no estimate of their numbers of whites and flaves, by proportional calculations.

Digitized by Google

There never was any militia within this colony on a legal establishment; what not long ago appeared and made such a show by their numbers, were only voluntiers commissioned by the governor. The quakers have always been about three quarters of the assembly, though in number perhaps not exceeding one quarter of the people; the quakers artfully perivade the Dutch and Germans, that if they chuse others than quakers for their representatives, they would immediately have a militia law imposed on them, which would subject them to greater shavery, than what they suffered in their own gountry.

This colony by importation of foreigners and other ftrangers in very great numbers, grows prodigioufly; by their laborious and penurious manner of living, in confequence they grow rich where others flarve, and by their fuperior induftry and frugality may in time out the British people from the colony. The greatest year of importation of Germans, Irish, a few Welch and Scots; was from December 25, 1728, to December 25, 1729, being about 6200 perfons. In the year 1750, Germans imported into this province and territories, were 4317; British and Irish passengers and fervants above 1000.

We omitted to observe, that some Palatines who came over to New-York by queen Anne's bounty, 1707, in the province of New-York, they were not allowed a fufficient encouragement of quantities of land; and by encouragement of Sir William Keith governor of Penfylvania, they removed to Penfylvania.

The numbers of foreigners, principally Germans, imported into this province or colony, in the course of about 25 years last past, has been so excessive; that if it is not limited by a provincial act, or by the dernier resource, an act of the British parliament, the province and territories of Pensylvania may soon degenerate into a foreign colony, endangering the quiet of our adjacent colonies.

The

The legislature,

In the colony are only two negatives in the legiflature. the governor and house of reprefentatives, called the affembly. The council fo called, is only the proprietor's council to the proprietor's governor, but not a king's council; they have no concern in the legiflature otherways than by advising the governor in his negative. The acts of legiflature run thus; "Be it enacted by the "honourable —— Efq; lieutenant governor of the pro-"vince of Penfylvania, and of the counties of New-"caftle, Kent and Suffex on Delaware river; by and "with the confent of the representatives of the freemen "of faid province, in general affembly met."

The governor of Penfylvania is only the proprietary Penn's deputy, and is fliked lieutenant governor and his honour; his falary in late years has been per annum 1000l. currency out of the excife duty for the province of Penfylvania, and 200l. per ann. from the territories called the three lower counties. By act of parliament, all lieutenant governors or deputies nominated by lords proprietors, or principal hereditary governors of British colonies in North-America, must have the royal approbation.

The proper province of Penfylvania was at first divided into the three counties of Philadelphia, Bucks and Chefter, each fending eight representatives to the affembly; about 20 years fince was added the county of Lancaster, fending four representatives; and lately an addition is made of two new counties back inland, by the names of York and Cumberland, they are allowed only two members each; with two representatives from the city of Philadelphia, make thirty-four representatives, which compose the house of affembly. The qualification for an elector or elected, is, a freeman refident in the country for two years, and worth in real or personal effate, or both jointly, the value of fifty pounds their eurrency, which if required, is to be declared upon oath' or affirmation.

The

The three lower counties on Delaware river called the merritories, are a diffinct jurifdiction, and their affembly of reprefentatives confifts of fix members from Newcastle county; fix from Kent, and fix from Suffex counties, in all eighteen members.

Their general affemblies are annually elective on the first day of the month of October. The representatives are not by towns or parish elections (Philadelphia excepted) as in New-England colonies, but by county elections. Penfylvania proper, called the province, for many years, confifted of only three counties called the upper counties, viz. Buckingham county, chief town Entitol, nearly over-against Burlington of the Jersies; Piuladelphia county, chief town Philadelphia, in about 40 d. N. lat. and Chefter county, chief town Chefter, about 15 miles (on the river) below Philadelphia; and a few years fince was made the inland county of Lancaster, chief town Lancaster; laying both fides of Sefquahanna river; and very lately two more inland counties, York and Cumberland. The territories are called the three lower counties on Delaware river, viz. Newcastle county, chief town Newcastle, about 35 miles below Philadelphia; Kent county, chief town Dover; and Lewis county, chief town Lewis or Hore-kill, near cape Henlopen of Delaware bay.

Courts of judicature.

Juries are all returned by the theriff, excepting in particular cafes, but not often, there may be a ftruck jury by confent of parties, and that must be in the prefence of one of the judges, the theriff, and the parties.

The theriffs and coroners are annually elected at the fame time with the reprefentatives, by a county election; the people elect two for each office, out of which the governor chufes one, who in the fame manner may be re-elected fornthnee years running, but after three years, cannot be re-elected, but by the intervention of three years out of office, and then is capable of a new election. Justices

Digitized by Google

İ

Juffices of the peace, are all of the governor's appointing, and fit in quarter feffions, conformable to the laws and inftitutions of England.

The judges of the common pleas are the juffices of the peace in each respective county, when the quarter fessions are finished, they continue to fit in quality of the judges of common pleas by commission from the governor. Their present times of sitting are,

For the county of Philadelphia, at Philadelphia, the first Monday in March, June, September, and December.

For the city of Philadelphia, the mayor's courts are the first Tuesday in January, April, July, and last Tuesday in October.

For the county of Buckingham, or Bucks, at New-Town (11 miles weft from Briftol) on the eleventh day following the courts of Philadelphia county.

For the county of Chefter, at Chefter, the last Tuefday in May, August, November, and February.

For the county of Lancaster, at Lancaster, first Tuesday in February, May, August, and November.

For the county of Suffex, at Lewis, the first Tuesday in February, May, August, and November.

For the county of Kent, at Dover, the fecond Tuesday of the last faid months.

For the county of Newcastle, at Newcastle, the third Tuesday of said months.

The fupreme court confifts of a chief justice and two affistant judges commissioned by the governor: they have all the authority of the King's Bench, Common-Pleas, and court of Exchequer in England, in the words of the provincial law; they not only receive appeals, but all causes once commenced in the inferior courts, after the first writ, may be moved thither by a habeas corpus; certiorari, writs of error, &c.

The judges of this fupreme court have also a ftanding and diffinct commission, to hold as to them shall feem needful, courts of over and terminer, and general

go

\$3

goal delivery throughout the province, and are justices of the perce in every county.

The fupreme courts in Penfylvania are held at Philadelphia, tenth day of April, and the twenty-fourth day of September.

There is an afficer called the register general, for the probate of wills and granting letters of administration, whole authority extends all over the province, but executed by a deputy in each respective county, except at Philadelphia, where he is obliged to reside himself. He er his deputies in case of any dispute or caveat entered, may call two of the justices of the peace to affist him in giving decisions. The authority of this officer, and of all the others above-mentioned, is founded on acts of affembly, impowering the governor to commission and appoint such as seem to him qualified for that purpose.

The court of vice-admiralty, is, as in the other colonies, by commission from the admiralty in England.

The justiciary court of admiralty, is, as in the other colonies, by commission under the broad seal of England, fome of the neighbouring provinces being ineluded in one and the fame commission; the judges are the governors, councils, captains of men of war, prindipal officers of the customs, and some justices of the peace.

The prefent taxes, or provincial revenue.

This confifts of, 1. Excife, which is 30s. per pipe of wine, and 4d. per gallon of rum fold in publick houfes; may amount to about 3000l. currency; it would be much more if properly collected. 2. The interest money of their paper currency let out by the loan office on land security, which may be about 5000l. per ann. These two articles have hitherto been sufficient to pay the governor and other officers of the government, to defray the charges of treaties and prefents to to the Indians, and in general for all publick charges whatfoever.

Moreover, there is in each respective county, a county tax towards their courts of justice, high-ways, bridges, &c. and a poor tax. Yearly at the fame time with the election of representatives in each county, are elected fix affefiors, and three others, called a court of delegates; these delegates are to fit and receive appeals from people who think themselves aggrieved in their affeffments. The affeffors without any further enquiry, by the affistance of the former years books, make what judgment they think proper of every man's effate and faculty, and rate them from 2d. to 3d. in the pound; they can not go higher by law. Here, as every where, the affeffed are under rated; thus a perion in truth worth 10,0001. is returned upon their lift worth 2001. to 3001. and to pay 2 d. in the pound; thus this tax falls heaviest upon the lower fort of people.

Produce, manufactures, trade, and navigation.

Their produce is all forts of British grain of the bread kind, Indian corn, buck wheat; hemp, and flax; flax-feed is a confiderable exportation to Scotland and Ireland; fome tobacco, and bees-wax.

This may be called a grain or corn country, and adapted to flax and hemp.

They manufacture wheat into flour, and flour into bifket; the largest branch of their export is flour, which bears a better price abroad, than that of New-York. Five bushels wheat yields about one hundred and three quarters merchantable flour; the garnel or second flour pays for cask and all other charges. They manufacture their barley into malt, and malt into beer and ale for export.

The

The Irifh manufacture confiderably of * linen cloth for fale, belides for home confumption; perhaps in this country, the farmers, that is, the hufbandmen, make nine tenths of all their wearing apparel.

At prefent the flax-feed from Penfylvania, Jerfey, New York, Connecticut, and other parts of New England, answers better at home, in cultivation, than what has been imported for many years from Holland.

Befides the above-mentioned commodities of exportation, the Penfylvania Indian traders purchafe deer-fkins and a few furrs from the Indians of Delaware and Selquahanna rivers, and from the handelaars, back of Maryland and Virginia; they export confiderably of iron in pigs, bars, and pots: fhip building, but their oak is not durable: cordage, lintfeed-oil, ftarch, foap, candles; fome beef, pork, butter, ftaves, heading and hoops, walnut logs and plank.

The commodities imported for confumption and reexportation, are dry goods from Great-Britain; wines from Madeira, and the other wine iflands; falt from

* Concerning the British confumption of linen cloth, we may observe, t. That the linen cloth stampt in Scotland for fale, is very much upon the increase, as appears by estimates made in the following periods, N. B. The cloth at a medium is valued at 8 d. to t.d. sterl, per yard.

Years	Yards	1.
1720.	2,183,978	value 103,312 flerl.
1739.	4,801,537	196,058
1 49.	7.360,286	322,045

2. Irifh linen imported into England for feven years from Christmas 1741, to Christmas 1748, as per cultom-house books, at a medium, is about fix millions of yards per ann. 3. Eefides all thefe, the Bristh demand or imports of foreign linen is about 30 millions of yards per ann. Here is a large field of encouragement for our northern American colonies, proper for the production of flax and hemp, to fuperfede this large importation of German linen : this cannot be effected, but by a great encouragement of our grain and patture colonies to lower the too great plantation price of labour, and the better manuring of their lands.

Great-

Great-Britain, France, + Spain, Lifbon, Mediterranean, and Weft-India islands; from the Weft-Indies or fugar islands and other colonies, fugar, rum, moloss, cotton, indigo, coffee, dying woods, mahogany plank, &c. from the Spanish coast and Carolinas, hides, rice, pitch, tar, turpentine, &c. they import many black or horned cattle far and near, from South-Carolina fouthward, and from 300 miles westward, and from the Jersies.

Moit of the Dutch husbandmen have stills, and draw a spirit from rye malted, from apples and peaches. There may be from 7000 to 8000 Dutch waggons with four horses each, that from time to time bring their produce and traffick to Philadelphia, from 10 to 100 miles distance.

Their navigation may be diffinguished into small craft, that keep within the capes, and only bring produce to market: as the produce of Penfylvania reaches only 15 miles below Philadelphia, most of this fort of trade is carried on from the three lower counties on the west fide of the great river of Delaware, and all the West-Jersies which lies along the east fide of that river: these are not comprehended in the custom-house entries and clearances of the port of Philadelphia.

To illustrate the gradual increase of the trade of the port of Philadelphia, we observe, that anno 1736, the entries were 212, clearances 215 veffels; a little before the late French war, anno 1742, entries were 230, clearances 281. The number of vessels cleared from that port for twelve months preceding March 12, '1750-1, is 358; those that were bound to the northward of Delaware capes, viz. to New-York, Rhode-

† By an act of parliament for the encouragement of the fiftery 1727, falt is allowed to be imported in Penfylvania, from any part of Europe. There is a like act of parliament for the encouragement of the curing of fifth in New-York. Though there may be a miftake in alledging the fiftheries of New-York and Penfylvania, becaufe there are no fifth cured there; yet in fundry other things it may be beneficial.

Ifland.

Digitized by Google

Itand, Botton with its out ports, Hallifax, and New foundland, make about 90 of that number; to Virginia, Maryland, North and South-Carolina, and Georgia, abour 29; the remainder fail for Europe and the Weft-India fugar illands and colonies; the craft that go to the fouthward, Virginia, Maryland, &tc. are of no great value, but those who go to the northward, especially to Boston and Rhode-Island, are generally of more value than the vessels that go to the West-Indies, fome of them carry 500 to 600 barrels of bread and flour.

They build about 20, or upwards, vessels that go to fea from Philadelphia.

The custom-house officers in this colony, have the largest falaries of any in North-America: the collector of the port of Philadelphia is a patent officer; in the proper province this is the only collection; in the territories called the three lower counties are two collections, Newcastle and Lewis.

I cannot account for the many cultom house collections upon the river of Delaware, there are two on the Jersey fide, and three on the Pensylvania fide; excepting the cultom-house of Philadelphia, the others are nominal and fine cures, and might have been called branches and creeks of Philadelphia; besides usual officers, there is on the Pensylvania fide, an extraordinary officer who may be called a comptroller general, a riding officer to examine and fign the accounts of the respective collectors.

Before any bills of publick credit were emitted, the currency of Penfylvania was proclamation money, a heavy piece of eight was 6s. in denomination; but by the emiffions of publick credit bills, + as in all the colonies, who went into a paper currency, their deno-

+ The publick bills of credit in the plantations were called a paper currency, because they were transferable; and in feve al of the colonies enacted to be a tender in law.

minations.

minations did depreciate, and at prefent a dollar or weighty piece of eight paffes for 7 s. 6d. denomination; but by the good management of their paper loan office, the intrinsick value of their denominations, has not depreciated further. The interest of this loan money produces about 50001. currency per ann. which with the 30001. excife, defrays the charges of government. Their first emission of a paper currency was about 27 years ago.

Religion fectaries.

The various plantation fectaries have been already mentioned, in a general digreffion in the fection of Rhode-Ifland; but as the moravians and dumplers are peculiar to this colony, what is further to be observed concerning them, is here inferted.

In vol. II. p. 155, we mentioned that the moravians had lately obtained a Britifh act of parliament indulging them in many things; particularly, that their affirmation, quaker-like, shall be equivalent to an oath, but with fome reftrictions. There are about 800 to 900 moravians who have already transported themselves to this colony, and many more may be expected, because fince the passing the act of parliament in their favour, the feveral tolerations they had in Germany, Holland, and Denmark, are taken from them; the reasons for fo doing, I have not as yet learned; but by edicts, their books, hymns, and publick worship, are ordered to be suppressed.

In vol. II. p. 150, we mentioned a branch of the German anabaptifts called dumplers; they are generally ignorant people, but fome of their heads are not fo; for inftance, Peter Miller, a German, writes elegantly in Latin upon religion and mortification: they have a printing prefs, and are continually printing; they are very curious in writing fine, and delight much in fcrolls of writing on religious fubjects, fluck up in their halls and cells, the initial letters are beautifully illuminated

minated with blue, red, and gold, fuch as may be feen in old monkish manuscripts.

I am again fallen into the difagreeable fubject (where offence to fome or many is unavoidable) of fectaries or parties in religious affairs : what here follows was defigned for the appendix; but as I now find that a long appendix containing many loofe, not connected matters, may be tedious to the reader; I fhall in the feveral fections following, occasionally intersperfe many things defigned for the appendix.

Some years fince, viz. 1722, there was a confiderable feceffion in the S.W. parts of Connecticut, of congregationalist ministers and candidates, to better themselves in livings by church of England miffions : from this incident, there has lately been revived a fophiftical difpute, whether the established old congregationalist ministers, or the late new converts, church of England miffionaries, are to be deemed the feparatifts. The decifion feems to be easy, by relating only matters of fact. By a fundamental, in the articles of union, 1707, of England and Scotland, the church of England in expre s plain words, is declared to be established in all the English plantations; but this feems to be only as to church government, and that only amongst the people of the church of England; the other fectaries can have no ecclefiaftical jurifdiction even amongst themselves, as appears by the annexed determination of the lords juffices anno 1725; but in their various modes of worship (Roman catholicks excepted) all christian professions are tolerated in perpetuity, and in as ample manner, as if they were churches established by law. If any sectary who prevail in the legislature of any colony, impose upon the other fectaries, they are checked by the king in council, all the colonies being under the immediate infpection of the king in council; we here adduce the annexed cafe of the act of the affembly of Connecticut, against quakers, &c.

A true

Of PENSYLVANIA.

A true copy of a letter from their excellencies the lords juffices, to the hon, W ----- D-----, Efq; lieutenant governor of his majesty's province of the Masfachusetts-Bay.

Šır,

es C

Whitehall, October 7, 1725.

" from the charter and laws of your colony, they cannot " collect that there is any regular establishment of a na-" tional or provincial church there, fo as to warrant the " holding of convocations or fynods of the clergy; but " if fuch fynods might be holden, yet they take it to be " clear in point of law, that his majefty's fupremacy in " ecclesiastical affairs, being a branch of his prerogative, " does take place in the plantations, and that fynods can-" not be held, nor is it lawful for the clergy to affemble " as in fynods, without authority from his majefty : they " conceive the above-mentioned application of the faid " ministers, not to you alone, as representing the king's " perfon, but to you, and the council, and the house of " reprefentatives, to be a contempt of his majefty's pre-" rogative, as it is a publick acknowledgment, that the " power of granting what they defire refides in the legif-" lative body of the province, which by law is vefted " only in his majefty. And the lieutenant governor, " council, and affembly intermeddling therein, was an " invation of his majefty's royal authority, which it was " your duty as lieutenant governor, to have withstood " and rejected; and that the confent of the lieutenant "governor, the council, and house of representatives, " will not be fufficient authority for the holding of fuch " a fynod."

"Their excellencies, upon confideration of this opi-"nion of the attorney and folicitor general, which they "have been pleafed to approve, have commanded me to acquaint you with, and to express to you their furprife, "that no account of fo remarkable a transaction, which fo nearly concerns the king's prerogative, and the welfare of his majefty's province under your government, has been received from you, and to fignify to you their directions, that you do put an effectual fop to any fuch proceedings; but if the confent defired by the ministers above-mentioned, for the holding of the fynod, fhould have been obtained, and this pretended fynod fhould be actually fitting, when you re** ceive there their excellencies directions, they do in
** that cafe, require and direct you, to caufe fuch their
** meeting to ceafe, acquainting them that their affembly
** is againft law, and a contempt of his majeity's prero** gative, and that they are forbid to meet any more;
** but if notwithftanding fuch fignification, they fhall
** continue to hold fuch an affembly, you are then to
** take care that the principal actors therein be profecuted
** for a mifdemeanour. But you are to avoid doing any
** formal act to diffolve them, left it be conftrued to
** imply that they had a right to affemble. This, Sir, is
** what I have in command from their excellencies to
** fignify to you.

And I must observe to you, that the precedent quoted in the above-mentioned memorial of fuch a fynod,
being held forty-five years ago, falls in with the year
1680, and that the former charter, upon which the
government of your province depended, was repealed
by fcire facias in the year 1684, and the new charter
was granted in the year 1691; from whence it appears,
that if fuch fynod was holden as is alledged, it happened
a fhort time before the repealing of the old charter,
but none has been fince the granting the new one.
I am, Sir, your most humble fervant,

CHARLES DELAFAYE.

3

At the court at Kenlington the eleventh day of October 1705, prefent the queen's most excellent majesty, his royal highness prince George of Denmark, lord archbishop of Canterbury, lord keeper, lord treasurer, lord president, earl of Ranelaugh, Mr. Boyle, Mr. secretary Hedges, Mr. secretary Harley, lord chief justice Holt, lord chief justice Trevor, cuke of somerset, duke of Ormond, Mr. Vernon, Mr. Earle.

** A Reprefentation from the lords commiffioners ** A of trade and plantations, being this day read ** at the board upon an act, passed in her majefty's Z 2 ** colony

340 A SUMMARY, HISTORICAL and Political, &c.

" colony of Connecticut, entitled (only) HERETICKS, " whereby it is enacted, that " all who fhall entertain any quakers, fanters, adamites, and other hereticks, are made liable to the penalty of five pounds, and five pounds per week for every town that fhall fo entertain them; that all quakers fhall be committed to prifon or be fent out of the colony—That whofoever fhall hold unneceffary difcourfe with quakers fhall forfeit twenty fhillings; that whofoever fhall keep any quakers books, the governor, magiftrates and elders excepted, fhall forfeit ten fhillings, and that all fuch books fhall be fupprefied; that no mafters of any veffel do land any quakers without carrying them away again, under the penalty of twenty pounds."

⁴⁴ And the faid lords commiffioners humbly offering, ⁴⁴ that the faid act be repealed by her majefty, it being ⁴⁵ contrary to the liberty of conficience indulged to dif-⁴⁶ fenters by the laws of England, as alfo to the charter ⁴⁷ granted to that colony, her majefty with the advice ⁴⁶ of her privy council, is pleafed to declare her dif-⁴⁷ allowance and difapprobation of the faid act; and ⁴⁶ purfuant to her majefty's royal pleafure thereupon, ⁴⁶ the faid act, paffed in her majefty's colony of Con-⁴⁷ necticut in New-England, entitled Hereticks, is hereby ⁴⁶ repealed, and declared null and void, and of none ⁴⁶ effect.

Signed JOHN POVEY.

In the feffions 1751, of the British parliament; was passed an act extending to the American colonies, as well as to the kingdom of Great-Britain, and its other dominions; entitled, an act for regulating the commencement of the year, and for correcting the calendar now in use. The abstract of the act runs thus,

Whereas the legal fupputation of the year in that part of Great-Britain called England, beginning the 25th of March, has been attended with many inconveniencies, as

OF PENSYLVANTA. 341

as it differs from the usage of neighbouring nations, and the legal computation of that part of Great-Britain called Scotland, and thereby divers miltakes happened in the dates of deeds and other writings; and our Julian calendar having been difcovered to be erroneous; that the fpring equinox; which at the general council of Nice, anno dom. 325, happened about the 21ft of March, now happens the ninth or tenth of the fame month, which error is still increasing; and to the end, that the feveral equinoxes or folftices may for the future fall upon the fame nominal days as at the time of the faid general council, and is now generally received by almost all other nations of Europe, and to prevent difputes with foreign correspondents of almost all other nations of Europe in their letters and accounts, be it enacted, that in all his majefty's dominions in Europe, Asia, Africa, and America, the old supputation is not to be made use of, after the 31ft of December 1751, and the year for the future to commence January 1st, and the days to be numbered in the fame order, and the moveable feafts to be afcertained as they now are until September 2, 1752, inclusive; and the day following, (that is, the 3d of Sept. 1752) to be accounted the 14th of Sept. 1752, omitting at that time the eleven intermediate nominal days. All writings after 1ft of January 1752, to be dated according to the new ftile, and all courts after Sept, 2, 1752, shall be held in the fame nominal days they now are; (courts held with fairs or marts excepted) that is, eleven days fooner than the refpective day wherein the fame are now kept. Every hundledth year, excepting every fourth hundred, whereof anno 1800 shall be the first, to be deemed tho' a leap year or bissextile confifting only of 365 days, but all other biffextile or leap years shall confift of 366 days. — And whereas the method of computing the full moons now used in the calendar of the common prayers of the church of England, to find eafter, is become confiderably erroneous; therefore the faid feaft of eafter and others de-Z 3 pending ÷

Digitized by Google

pending thereon, shall after the 2d of Sept. 1752, conform to the decree of the faid general council, and the practice of foreign countries, shall be observed according to the annexed table; and the former table, in all future additions of the book of common prayer, shall be suppressed; but the courts of session and exchequer in Scotland, and all markets, fairs and marts, shall be held upon the same natural days as if this act had not been made, that is, eleven days later, than according to this new computation, notwithflanding that by this new computation, the nominal days are anticipated or brought forward by the fpace of eleven days, the natural days and times for the opening and closing of commons of pasture and the like, not to be altered by this act, that is, eleven days later than the new fupputation. -The natural days and times of payments of rents, annuities, fums of money, delivery of goods, commencement or expiration of leafes, and the like, shall not be by this act anticipated or accelerated; and the time of attaining the age of 21 years shall not be altered by thise, act, or the determination of any apprenticeship of fervice. *

Proprietors

* Julius Czefar began his year about the hybernal or winter folfice, (the equinoxes and folfices are proper periods in fuch matters) the Julian or O. S. began 45 years before CHRIST: this flile was reformed by pope Gregory 1582, but was not carried back to the nativity of our Saviour, which in church preciseness ought to have been, but only to the time of the council of Nice, which was held anno dom 325, by Constantine the great, to examine and condemn the doctrines of Arius. At the time of the council of Nice, the vernal equinox was on the 21st of March, but in strictness and according to the precision of devotionalist observers of days, it should have gone back to far as the nativity or first year of Christ, the vernal equinox was then on the 23d of March: but as the Gregorian stile is at present the general practice of christian European nations, the British legislature in their wonted prudence have acceded thereto, as being a convenient civil, but not a jure divino affair. Instead of being too minutely precise in striking off 13 days, which is the truth of the cafe in conformity to other European countries, they only struck off 1 i days, for the fake of mutual conveniency i

Of PENSYLVANIA.

Proprietors or principal governors, and their refident deputies or lieutenant governors.

The first proprietor and governor was William Penn, fon of admiral Penn, fee vol. II. p. 307; he carried over many quakers with him to that country; his patent included that part of new Swedeland, which lies on the west fide of Delaware river, fome part of the Swede fettlements lay on the east fide of the river, and is part of west New-Jersey. Mr. Penn continued two years in Pensylvania, and upon his father's death returned to England, and left the government in the hands of Thomas Lloyd, with a council. Mr. Penn being esteemed a favourite of K. James II. was suspected to be a Roman catholick and jesuit in the affumed mask of a quaker, and upon the revolution K. William was advised to suspend his privilege of appointing a deputy governor for Pensylvania. And

The crown appointed col. Fletcher, governor of NewYork, to be alfo governor of Penfylvania; but upon
Mr. William Penn's vindication of himfelf, he was reftored to his privilege of government, and appointed

Mr. Blackwell, his deputy or lieut. governor; he was fucceeded as lieut. governor by Thomas Lloyd, Efq; upon his death

Mr. Penn appointed his nephew col. Markham his

ency; it is more eligible to err with the generality of Europe, than affectedly to conflitute a peculiar British file, which would be running from one inconvenience into another; the main intention is to produce an uniformity in the computation of time throughout the christian part of the world; the agreeing with the reft of Europe, ought to prevail over any argument deduced from the nicety of calculation.

Peter Deval of the Middle Temple, fecretary to the royal fociety, drew the bill and prepared most of the tables under direction of the earl of Chesterfield, the first former of the design; and the whole was carefully examined and approved of by Martin Folkes; Esq; president of the royal fociety, and Dr. Bradley, his majesty's astronomer at Greenwich, who computed the tables at the end of the bill.

Z 4

deputy

deputy or lieut. governor; he had the government or direction until the fecond arrival of Mr. Penn, 1698.

Mr. William Penn principal governor and proprietor arrived a fecond time in Penfylvania, 1698.. He returned to England 1700, and nominated col. Andrew Hamilton for his deputy; in his administration was much confusion in the province; upon his death

1704, col John Evans was appointed lieutenant governor.

1713, died in London William Penn, the first proprietor and principal governor, much in debt, occasioned by his whimfical disposition; he had agreed with the crown to relign his property and government for a certain confideration (to extricate himself from debt) but died suddenly before the instrument was executed, and the government and property remains in the family to this time.

The first principal governor and proprietor was called William Penn, the grand-father; he was fucceeded by his fon William Penn, called the father; and he was fucceeded by Springet Penn, William Penn the fon; and lastly in the three brothers, John Penn, Thomas Penn, and Richard Penn, co-heirs in the fuccession; these brothers by a written agreement with lord Baltimore proprietary of Maryland, their adjoining neighbour, 1732, fettled boundaries to be afterwards confirmed in form of law; but lord Baltimore receded and occasioned a tedious controverfy in chancery, as is above related.

John, the eldeft of the three brothers, died October 28, 1746, a batchelor, and by will, October 24, 1746, left his fhare to his fecond brother Thomas, with remainders, as is expressed in the will.

William Penn (fon to the first proprietor) in law called the father, (the first proprietor, in law instruments, was called the father) died at Liege, 1720.

1708-9, in January arrived capt. Gookin, lieut. gogovernor.

OF PENSYLVANIA.

1717, May 30, arrives Sir William Keith, lieut. governor.

1726, Major Gordon fuperfeded Sir William Keith.

Major Gordon died in October 1736, and Mr. Logan was in courfe prefident for a fhort time; but was foon fuperfeded by col. Thomas, a planter of Antigua; Mr. Logan died much lamented Nov. 1751. After nine years government, col. Thomas refigned 1747, and was fucceeded by James Hamilton, Efq; the prefent lieut. governor, fon of Andrew Hamilton, a noted lawyer in thefe parts.

A medical DIGRESSION

Concerning the perfonal conftitutions of people born in British North-America, of the endemial diffempers prevalent there, and of their prefent medical practice.

As this digreffion will not be much read by ordinary capacities, where things cannot fo well be expressed in vernacular words, I take the liberty of using technical or professional expressions, and some classical phrases, and generally in a concise or aphoristical loose, but practical manner.

Their children or youth are more forward * or precoce than

* It is observed that in the West-Indies there are no boys, all being either children or men.

Perhaps the most noted inflance of forwardness in a boy, is what Montagne of Gascony in his effays 1550 writes of himself; his father educated him in his childhood in the learned languages of Greek and Latin, in the same routine that from nurses we learn our vernacular or mother tongue: we had a remarkable instance of such routines in Boston; a worthy English gentleman, Richard Dalton, Efq; a great admirer of the Greek classicks, because of the tenderness of his eyes, taught his negro boy Cæsar to read to him dittinetly any Greek writer, without understanding the meaning or interpretation. Montagne with much vanity and peculiar pedantry, fays, that Buchanan was afraid to accost him when only 6 æt. in Latin, and that Buchanan copied his instruction or education of a child from his education. Buchunan was a first rate master of the Latin classicks, and preceptor to

345

than in Great-Britain. 2. The virility of the men, and fecundity of their women, or child-bearing fex, are much the fame as in Great-Britain, their mother country. 2. Their longevity falls much fhorter.

The

to king James VI. of Scotland; in his travels in France, hearing of the forwardnefs of this boy, he went to fee him. As Montagne is a noted writer, I shall for amufement mention another instance of his Gascon pedantry; that in his younger years he refolved not to enter into any matrimonial partnership or contrast, not even with the goddes of wildom, but married æt. 33.

As the education of children, is not fufficiently attended to in many of our colonies, I shall here infert the beginning of an experiment of this nature. I delight in promoting of children in town and country; accordingly I have in Boston taken a promising boy entirely at my own charge of subsistence and education, under my fole direction, to form a practical (not notional) scheme of management and education ob ovo, or rather ab utero, because of some difficulties I was present at the birth; I did not allow him to be rocked in a cradle, sufficiently impair his judgment; he never had diascordium, mithridate, or other opiate, or strong drink, to compose him to stere); a pernicious indolent practice of nurses and old women, because thereby convulsions may be induced, or the child rendered stupid for life.

To accommodate his organs of speech while flexible, and in the parrot or prattle period of life, not only to the pronunciation of our English or vernacular words, but also to the pronunciation of other languages; before he was full five years of age, he did diffinctly repeat and pronounce the Lord's prayer in the five languages familiar to me, Greek, Latin, English, French and Dutch : he did well exprefs and define many harsh and long foreign words, such as the Indian names of fome ponds, rivers, and tribes in our neighbourhood. Chabonamungagog, a large pond joining to Douglass, Winipifiackit, a great pond or lake in the province of New-Hampshire, Papacontaquash or Millers river, which falls into Connecticut river on the east fide a little below North-field, Arowfaguntacook, a tribe of French Abnaquie Indians called the miffion of St. Francis, on the Touth fide o Canada river, Missilimakanack, a tribe of French Indians, between the great lakes Hurons and Ilinois, Tatamaganahaw, a fmall tribe of Mikmake Indians of Nova-Scotia, in the bay Verte of the gulph of St. I an ence; some Dutch words, Achtentachententigh, eightyeight, &c. some Latin words, Honorificabilitudinitatibus, Honourablenesses, &c.

Inflead of the abstrusely profound catechisms, which preposteronsly are taught children, he is initiated in things and words which are easily comprehended, and subjects of common conversation, such as, Q. What The remote causes or predispositions to most chronical distempers are, 1. Mala stamina vitæ. 2. Malus locus.

Q. What is your name?

A. I am known by the name of William Douglass.

Q. Where was you born ?

A. In the town of Boston, in the province of Massachusetts-Bay, in the British dominions of New-England in North-America.

Q. When was you born ?

A. I was born July 25, 1745; but how I was made, and how I came into the world, I have forgotten, and cannot tell.

Q. What is your religion ?

A. A catholick christian protestant; to fear God and keep his commandments, to honour and obey the civil government.

Q. What is God ?

A. The supreme being, who created and manages the universe, in some manner inconceivable to us created beings.

Q. What is civil government ?

A. The laws and cuftoms of the country I live in, as executed by certain appointed magistrates.

Q. Why do you every feventh day go to a place of publick worfhip?

A. Because (as my grandmother tells me,) one day in feven is by most civil governments found requisite to abstain from labour, for the refreshment of the labouring part of mankind and cattle.

Q. Why do you in ordinary attend the affembly of Mr. Welfted and Gray?

A. Becaufe it is the neareft, and neighbours naturally join in their publick devotions; these two ministers or pastors are exemplary in their lives, and agreeable in their publick discourses.

What fectary of publick worfhip do you follow ?

A. That of my father natural or adopting. My grandmother tells me, that by law and cuftom I must follow the example and precepts of my father till 21 zet. or till affigned.

We may observe that of all animals, mankind attain to the greatest perfection of knowledge, but after the longest time arrive to the full growth of body and mind : therefore as this boy is too exuberant in the growth of mind, I check or retard him by allowing him more play than schooling, that the impressions may not be too slight or transitory; and allow him to allociate with active wild boys, not wicked or vicious, that by his puerile flow of spirit, he may practise activity of body and mind. The Dalrymples, a family in Scotland, noted for acuteness, wisdom, and knowledge; allowed their boys at a certain age to associate with wild, but not wicked boys, and after fome time took them.up to a regular fober education.

At times I fend him to any tolerated place of publick worfhip, to prevent party, bigotry, and a narrow way of thinking. I afk him

locus, that is,⁷ a³ bad air and foil. 3. Indolence or inactivity. 4. Intemperance. Concerning all these we finall intersperse fome aphorisms.

During the time or period of my practice in New-England, we have had no confiderable epidemicks excepting fmall pox, meafles, and fome fpecies of putrid fevers and dyfenteries; the varieties in our endemials were from the viciffitudes of feafons and weather. To write a hiftory of epidemick yearly conflicutions, in Sydenham's manner, for a continued fuccession of years, would be writing of a novel: our chronical ails, by the practice of our common physicians, particularly by the routine indolent palliative repetitions of V.S. and opiates, which fix all diftempers, and render their patients valetudinary and fhort-lived. Opiates and inebriating liquors have the fame effects, they carry the peccant humours to the nerves, from whence they are fcarce to be removed; they are flow poifons, they enfeeble both body and mind, and produce mala stamina vitæ in the progeny.

As New-England lies in the leeward of the wefterly extended continent of North-America, the winds (being generally wefterly) glading continuedly along this vaft

him his natural remarks upon the different modes of worfhip, to make him obfervant; I fhall give one inftance which I hope the candid reader will not judge ludere cum facris, I have a great veneration for the church of England. In a common prayer day he went to a church of England, when he came home he faid, that he obferved the minifter come into the church in a black gown, and retire into a clofet (the veftry) and come out again with a clean fhirt over his gown. His grandmother as ufual afked him where the text was; he faid that the could not tell, becaufe every body preached promifcuoufly; men, women, and children fpake in publick (meaning the refponfes) his grandmother told him that the quaker fectary allow their women, (but no children) to fpeak in publick, though contrary to St. Paul's admonition.

He is taught the hours of the day, the days of the week, the months in the year, the mariner's compass or corners of the wind; the varieties of fhipping, schooners, floops, brigantines, snows, and ships; he reads the sign posts, and news-papers.

traft

tract of land much heated in fummer, and much cooled or frozen in winter, occafion the country to be much hotter in fummer, and much colder in winter, than in Great-Britain; reciprocations, but not to extremes, are falutary to the conftitutions, where the transitions are gradual; thus we may observe in nature; that for the benefit of the earth's produce, there is a reciprocation of fummer and winter, day and night, &c. In countries where the feasons are upon the extremes in fummer and winter, as in New-England, conftitutions do not wear well, analogous to the timber and plank of a fhip between wind and water. Longevity appears moftly in island countries, where with a fmall latitude or variation the temperature of the air continues nearly the fame.

I shall here infert a few lines concerning the constitution and medical practice of our northern Indians. See vol. I. p. 174.

The Indians north of Canada river, the Efquimaux and Outawaways, are generally affected with pforas, fcurvy, or itch; from the cold intemperance of the climate. As the Indian manner of life is much more fimple than that of Europeans, they are not fubject to fo many various difeafes: their modern intemperance in drinking rum and other fpirits, kills more than all their other diftemperatures.

The Indian food is from their hunting, fowling, and fifting; their bread-kind is from mays or Indian corn, phafeoli or kidney beans of feveral forts, tuberofe roots of feveral kinds, mafts or nuts of various forts, great variety of foreft berries.

The varieties of national constitutions and habits are not eafily to be accounted for; the American Indians, by keeping principally their feet warm, the Africa negroes by keeping their heads warm, without any regard to the reft of their body, preferve their health and ftrength.

· · · I ·

The

The American aboriginal Indians naturally are of weak conftitutions, they are impubes & imberbes; but by habit from their infancy, can fuffer hunger and wood damps, better than Europeans of ftronger conftitutions: their natural temper is cruel and vindictive.

Their phyficians in ordinary are the powowers clergy or conjurers, and fome old women. In their medical practice they take no notice of pulfe or urine, they do not use blood letting; they chiefly use traditional herbs; bliftering with punk or touchwood, and the blifters are converted into iffues; fweating in hot houses (an extemporary kind of bagnio) and immediately thereupon immersion in cold water, this practice has killed many of them in eruptive fevers. The American Indians are noted for their traditional knowledge of poisonous herbs and antidotes; but I do not find that our Indian venifici are fo expert in the venificium art, as the negroes of Africa, who give poisons, which in various, but certain periods, produce their mortal effects, fome fuddenly, fome after a number of months or years.

They cure feveral poifons, for infrance, the bite of that American viper called rattle-fnake or vipera caudifona, by proper antidotes, before they produce their ufual difmal effects. +

I hope these medical observations may be of some use to our colonies; as they are in my professional business, by some they may be thought pedantick, by others

+ May we not hope, that in future times, fome epidemical contagions diftempers, fuch as the plague, fmall-pox, and the like, may be prevented or extinguished in feminio by proper antidotes: time produces surprising discoveries in nature, such as the various phænomena of magnetism and electricity; in the small-pox the late improvement of conveying it by inoculation, is found more favourable than the receiving of it the chance or natural way, as fruit from trees inoculated, surpasses natural fruit; the spractice of inoculating for the small pox, was introduced in a very rash indifferent manner, and by weak men; we may observe that many of the juvantia or lædentia in medicine were discovered or rather introduced by rash fools and madmen, instance, Paracelsus's mercurial remedies.

they

they may be called a quackish oftentation; once for all, I declare, that I have no lucrative views, because mihi tantum suppetit viaticæ quantum viæ.

I here infert fome remarks upon the medical practice in our colonies; as no man's name is expressed, and fome gentlemen practitioners of candour, probity, ingenuity, and good practical knowledge are excepted, these reflections may be taken in good part without further apology.

In our plantations, a practitioner, bold, rafh, impudent, a lyar, basely born and educated, has much the advantage of an honeft, cautious, modeft gentleman. In general, the phyfical practice in our colonies is fo perniciously bad, that excepting in furgery, and fome very acute cafes, it is better to let nature under a proper regimen take her course (naturæ morborum curatrices) than to trust to the honesty and fagacity of the practitioner; our American practitioners are fo rafh and officious, the faying in the apocrypha, Ecclefiafticus xxxviii. 15. may with much propriety be applied to them. "He that finneth before his maker, let him fall into the " hands of the physician." Frequently there is more danger from the physician, than from the distemper; a country where the medical practice is very irregular, is a good school to learn the lædentia, a good article in practice; but fometimes notwithstanding of male practice, nature gets the better of the doctor, and the patient recovers. Our practitioners deal much in quackery, * and quackifh

• I shall mention one remarkable instance of colony quackery, advertifed in the New-York gazette, December 16, 1751. "In July "1751, was committed to the care of doctor Peter Billing, an expe-"rienced physician, and man mid-wife, and formerly in the king's "fervice, the most extraordinary and remarkable cafe that ever was "fervice, the most extraordinary and remarkable cafe that ever was "performed in the world, upon one Mrs. Mary Smith, fingle woman, "fifter to capt. Arthur Smith, on James river, in the county of "Surry in Virginia, æt. 46; she had been upwards of 18 years out of her fenses, (most of the time raving mad) eat her own excre-"ments, and was compleatly cured by him in two months, contrary to "the

quackish medicines, as requiring no labour of thought or composition, and highly recommended in the London quack bills (in which all the reading of many of our practitioners confists) inadvertently encouraged by patents for the benefit of certain fees to fome offices, but to the very great damage of the subject. How difmal is it to obferve fome apothecaries shops wainfcotted or papered with advertifements, recommending quack medicines for "the profit of the shop, but destruction of their neighbours? this is vending of poisons for gain.

In the most trifling cafes they use a routine of practice: when I first arrived in New-England, I asked G. P. a noted facetious practitioner, what was their general method of practice; he told me their practice was very uniform, bleeding, vomiting, bliftering, purging, anodyne, &c. if the illness continued, there was repetendi, and finally murderandi, nature was never to be confulted, or allowed to have any concern in the affair. What Sydenham well observes, is the cafe with our practitioners; æger nimia medici diligentia ad plures migrat.

Blood-letting and anodynes are the principal tools of our practitioners, these palliate any diffemper for a fhort time; while at the fame time they confound the intentions of nature, and fix the malady; they follow Sydenham too much in giving paregoricks, after catharticks, which is playing fast and loofe.

"the opinion of all that knew her, no doctor in the province daring "to undertake her. N. B. The contagious diftemper fo frequently "happening to the bold adventurers in the wars of Venus, when re-"cent, will be cured by him for three piftoles in hand, though the common price is five pound all over North-America. And all "other cafes curable in phyfick and furgery, proportionable accord-"ing to the circumftances of people." He has all other matters to publish, particularly an elegant medicine to prevent the yellow fever, and dry gripes in the Weft-Indies; this is incomparable, if we except a quack advertifement published in Jamaica (immediately after the last great earthquake) of pills to prevent perfons or their effects fuffering by earthquakes.

1

SECT-

Of MARYLAND.

353

SECTION XV.

Concerning the PROVINCE of

MARYLAND.

A Lthough recapitulations or repetitions are reckoned tedious and not elegant; I find that our fections or colonies may be more agreeably introduced by fome general accounts or transactions with a little variation, than by an abrupt entrance into the colony affairs.

The Cabots of Venetian extract obtained 1495, a patent from king Henry VII. of England, of all lands to be by them difcovered weft of Europe, as to property; with a refervation of a certain royal perquifite; this king underftood perquifites; the father John, and afterwards the fon Sebastian, fitted out from Bristol; in their first voyage upon the difcovery of a N. W. passage to China, and the East-Indies, being obstructed by the ice, the failors mutinied and returned to England, without effecting any thing of confequence.

Anno 1498, Sebastian ranged the continent of North-America from 40 d. to 67 d. N. lat. and at feveral places took a nominal occupancy from discovery, without making any fettlement; thus notwithstanding of the discoveries, we had no possession for near a century of years.

Sir Walter Raleigh, a noted difcovery projector, fee vol. I. p. 111, anno 1584, March 25, obtained of queen Elizabeth a patent for difcoveries and fettlements in America; upon the return of the veffels of the first adventure, in honour to the virgin queen Elizabeth, the name of Virginia in general was given to the North part of the continent fo far as the gulph of St. Laurence north, to Florida fouth. In process of time the French Vol. II. A a made

made fome fmall fettlements in the north parts of North-America, and called them Nova Francia, or Nouvelle France; at this time known by the name of L'Accadia, (Nova-Scotia) and Canada. The Swedes, Fins and Dutch introduced by Hudfon, made fettlements upon Hudfon's or Rord rivier, and Delaware or Zuyd rivier, and called it Nova-Belgia or New-Netherlands. Thus in the beginning of the laft century the eaftern coaft of North-America was divided into, 1. Nova-Francia, 2. North-Virginia, comprehending the colonies of Nova-Scotia and New-England. 3. Nova-Belgia or New-Netherlands, at prefent known by the names of New-York, New-Jerfies, and Penfylvania. 4. South-Virginia, which does comprehend Maryland, Virginia, North-Carolina, South-Carolina, and Georgia.

Upon the new difcoveries, many feparate grants of diffricts were made to private proprietors; but afterwards for the regularity and eafe of jurifdiction, the crown affumed the jurifdictions, and reduced them to more convenient models of government.

Maryland is properly a fprout from Virginia, therefore the connection of this fettlement with the first discoveries must be referred to the fection of Virginia; here we shall only observe how and when it did sprout. See vol. I. p. 288, the Newfoundland section.

Towards the end of king James I. reign, Sir George Calvert principal fecretary of flate, afterwards lord Baltimore, obtained a patent for fome fifting harbours in Newfoundland; by reafon of the civil troubles in England, thefe fettlements were discontinued; being a zealous Roman catholick, with other diffenting zealots of various fectaries, he left England and retired to Virginia: as the Virginians were generally bigots to the church of England fectary, they did not ufe him fo well as he expected; and as the Virginians had not fettled further north than Potomack river, lord Baltimore went home and obtained from king Charles I. a grant of all the lands from the mouth of Potomack river in about 38 d. 10 m. N. to the Swede and Finland fettlements, which were reckoned
reckoned to the bottom of Chefapeak bay, in about the latitude of 39 d 45 m. or 15 English miles south of Philadelphia parallel; the account of the controversies concerning the boundaries between the properties and jurifdictions of Maryland and Penfylvania, we refer back to the section of Penfylvania.

The banditti Dutch, Swedes, and Fins, were prior to the English in their settlements upon Delaware river and westward inland. Upon a new royal regulation in Virginia, several families went over from England to settle there, amongst those were lord Baltimore, a rigid Roman catholick; for the advantage of a more free exercise of his religion, he retired thither; but being ill used by the church - of England fectary, and finding that the humour of petitioning for large tracts of land was encouraged by the court at home, and that the Virginia fettlers had not extended further north than Potomack river, lord Baltimore petitioned for a grant of vacant lands from north of Potomack river to the Swedish and Finlanders settlements between the bottom of Chefapeak bay and Delaware river, and obtained the promife of a grant for the fame; but dying foon, his fon and heir obtained the patent, dated June 20, 1632; that part of the patent which regards the boundaries, in the English translation from the original Latin inftrument runs thus. " Know ye therefore that " we, favouring the pious and noble purpoles of the faid " baron of Baltimore, of our special grace, certain know-" ledge, and mere motion, have given, granted, and con-" firmed, and by this our prefent charter for us our heirs 46 and fucceffors do give, grant and confirm unto Cecilius " now baron of Baltimore, his heirs and affigns, all that " part of a peninfula lying in the parts of America, be-** tween the ocean on the east, and the bay or gulph of " Chefapeak on the weft, and divided from the other part ** thereof by a right line drawn from the promontory or " cape of land called Watkins-point (lituate in the afore-" faid bay or gulph near the river of Wighco) on the weft, " unto the main ocean on the east, and between that bounds A a a 44 on

" on the fouth as far as to the æstuary of Delaware on the " north, where it is fituate to the 40th d. of northern la-" titude from the equinoctial where New-England ends, " and all that tract of land within the bounds underwritten, " viz. paffing by the aforefaid æftuary called Delaware-" Bay in a right line, by the degree aforefaid, unto the " true meridian of the first fountain of the river Potomack, " and from thence tending or paffing toward the fouth to " the further bank of the faid river, and following the " weft and fouth fide thereof unto a certain place called " Cinquack, fituate near the mouth of faid river where it " falls into the aforefaid bay or gulph of Chefapeak, and " from thence by the shortest line that can be drawn unto " the aforefaid promontory or place called Watkins-point. " So that all the tract of land divided by the line afore-" faid drawn between the main ocean and Watkins-point, " unto the promontory called Cape-Charles, and all its " appurtenances, do remain intirely excepted to us, our " heirs and fucceffors for ever. We do alfo grant and " confirm unto the faid now lord Baltimore, his heirs and " affigns, all lands and iflets within the limits aforefaid, " and all and fingular the iflands and iflets which are or " shall be in the ocean within ten leagues from the eastern " fhore of the faid country towards the east, &c." Lord Baltimore called it Maryland, from the name of the queen confort.

For the north bounds of this province, fee the Penfylvania fection, vol II. p. 308, being a parallel of fifteen Englifh miles fouth of the fouthermost part of the city of Philadelphia in about lat. 39 d. 45 m. Its east line is the west line of the three lower counties of Penfylvania, already delineated, to cape Henlopen, and from cape Henlopen by the ocean to a parallel or east and west line drawn from Watkins-point near Wighco river in Chesapeak bay in about the lat. of 38 d. 10 m: its fouthern bound is this parallel on the east fide of Chesapeak bay, and further on the west fide of faid bay up Potomack river as the river runs; here are forme disputes difputes with lord Fairfax, proprietor of the north neck of Virginia: its vaft line is a fmall opening between the properties of the Penns and of lord Fairfax as fettled by treaty with the Six nations of Indians known by the name of Mohawks, June 29, 1744, at Lancaster in Penfylvania, viz. that the boundaries shall be at two miles above the uppermost falls of Potomack river, and run from thence in a north line to the sounds of Penfylvania, and the Indians gave a quit-claim to all the lands in Maryland east of that line for the confideration of 3001. currency paid to them by Maryland.

Virginia and Maryland are an open country with many navigable rivers and creeks, without any battery defence, and the inhabitants much difperfed; therefore much exposed to the incursions and depredations of enemy armed vessels; searce any towns, general harbours and barcadiers; because most planters or traders have navigable barcadiers of their own; after some time there must be general barcadiers at the falls of the several rivers for the benefit of the inland country.

Upon the grant and patent 1632, lord Baltimore had a defign to go to Maryland in perfon, but altered his mind and appointed his brother Leonard Calvert, Efq; to go governor in his ftead, and joined Jeremy Hawley, Efq; and Thomas Cornwallis, Efq; in the commission. The first colony confisted of about 200 perfons, fent by his lordfhip in the autumn 1633; they were chiefly gentlemen of good families and Roman catholicks; the principal were,

Leonard Calvert, governor.

lq; } Affiftants.
Mr. Edward Cranfield,
Mr. Henry Green,
Mr. Nicholas Fairfax,
Mr. Thomas Dorrel,
Mr. John Medcalfe,
Mr. William Saire,
Capt. John Hill.
Aag They

They failed from Cowes in the ifle of Wight, November 22, 1632; after touching at Barbadoes, and St. Chriftophers, arrived in Virginia, February 24th following, and 3d of March arrived in Potomack river; after ranging the country about Potomack river, they at laft fettled with the confent of the Indians, at the Indian town called Yamaco at the mouth of the river, to which they gave the name of St. Mary's. It is faid that in the first two years this fettlement of a colony cost lord Baltimore about 40,000 l. sterl. by bringing over people, provisions, and other stores.

During the civil wars in England, lord Baltimore was deprived of the government or jurifdiction of Maryland. About the reftoration 1661, Charles lord Baltimore, fon of Cecilius, obtained a confirmation of the grant 1632, and made feveral voyages thither, but the proprietor being a Roman catholick, the crown retained the jurifdiction, and appointed the governor and all other civil officers: the prefent proprietor is a protestant, and enjoys both government or jurifdiction and property.

In the trading road by Harris's ferry on Sefquahanna river, the breadth of Maryland from Penfylvania boundary line to Potomack river does not exceed 8 miles, but higher it is faid to widen again. N. B. Paxton on Sefquahanna river, is the trading place in this road.

The lords Baltimore referve in each county fome mannors not granted, as the Penns do in Penfylvania, and as proprietors of large tracts of land in New England referve fome part to themfelves, when they fell off parcels; these parcels when improved, rife the value of the referved lands.

Maryland was fo called from K. Charles I. queen Henrietta Maria, a daughter of France; it was held of the crown in common foccage as of his majefty's honour of Windfor, paying yearly two Indian arrows to the caftle of Windfor when demanded. By an act of affembly for liberty of confcience to all perfons who profess chriftianity, protestant differents, as well as Roman Roman catholicks, were induced to fettle there. The prior fettlement of Virginia was of great advantage to the fettling of the colony of Maryland, in fupplying them with fundry necessfaries.

In Maryland and Virginia, the publick rates or taxes for province, county, and parifh, are called levies: it is a capitation or poll tax, upon all tytheables, that is, upon all males of whites, and upon all negroes, males and females, of 16 æt. and upwards to 60 æt.

In Maryland the tax is generally from 90lb. to 120 wt. of tobacco, according to exigencies, per ann. for each poll, whereof 40 wt, to the rector of the parifh; the reft is for the poors rate, affemblymen's wages, &c. The clergymen of Maryland are upon the moft profitable lay of all our plantation clergy; they are not confined to a fixed falary (in Virginia the parifh minifters are fixed to 16,000 lb. wt. of tobacco per ann. falary) but in this growing country as they are paid in proportion to the number of taxables, the more that the colony increases in people, the larger is their income, until the parifhes become fo large as to require to be fubdivided : there are at prefent near 40,000 taxables in Maryland.

In Maryland the affembly at times fixes produce at a certain price as a legal tender for the year; for inftance, anno 1732, tobacco was fixed at 1 d. per lb. wt. Indian corn at 20 d. per buthel, wheat at 3 s. and 4 d. per buthel, pork 2 d. per lb. wt. Quit-rents and king's duties were excepted, and were payable in proclamation money, 6 s. per heavy piece of eight, now called a Spanish dollar.

The people of Maryland have been happy, in not being exposed to the incursions and rapines of the outland Indians; they are covered by the neighbouring provinces; their opening between the provinces of Virginia and Penfylvania is very small. Anno 1677, the Indians at war with Virginia, by mistake committed A a 4 fome

fome outrages in Maryland. A few years fince, the Indians upon referved lands, principally in the county of Dorchefter, eaft of Chefapeak bay, upon fome difguft feemed to be mutinous, but being fentible of their own inability, that humour foon fubfided. Therefore we can have no article of their wars with the French, Spaniards, and Indians.

The hiftory of the vicifitudes in grants and confequential governments or jurifdictions is of permanent ufe; but the provincial or municipal acts as to divisions of districts and counties, are variable and fluctuating according to the humours of the affembly men. During the civil wars, the Baltimore family were deprived of. their jurifdiction in Maryland; after the reftoration 1661, they obtained a confirmation of their royal patent, but the proprietor being a Roman catholick, the court of England appointed the governor and other civil officers. Upon the revolution, the crown or court of England retained the jurifdiction of the province of Maryland. The present lord Baltimore is of the protestant denomination, and is vefted in the jurifdiction as well as property of Maryland.

Into Maryland and Virginia are imported about 4000 negroe flaves per ann, fome planters have 500 flaves; col. Carter of Virginia is faid to have had 900, and Mr. Bennet of Maryland 1300 at one time. A peck of Indian corn and fome falt is their weekly allowance of provision for each negro; they are reckoned to raife 1000 lb. wt. of tobacco befides fome barrels of corn per head, 6000 tobacco plants are reckoned to yield 1000 lb. wt. of tobacco. The planters by act of affembly in Virginia and Maryland, are inhibited from planting more than 6000 plants of tobacco per negro.

It is reckoned, there may be 300 to 400 felons or milcreants imported yearly to Maryland from England; this importation of vile levies is fufficient to corrupt any 'any plantation fettlement or improvement; it is expected that the government at home are contriving a more falutary method of punifhing fome criminals, than by fowing them in the colonies.

As the colonies or provinces of Virginia and Maryland lie in the fame long bay of Chefapeak, we cannot avoid giving a joint account of them upon fome occasions, principally with regard to their trade and navigation.

Rivers and mountains.

The gradual foundings in the ocean before veffels enter Chefapeak bay, render the navigation of Virginia and Maryland very fafe; by the many navigable rivers, bays and creeks, which communicate with the great bay, the water carriage is very commodious. This fine bay reaches from cape Henry at its entrance in about 37 d. lat. to the bottom of the bay where it receives the river Sefquahanna in about 39 d. 45 m. lat. Virginia lies upon this bay from cape Henry in lat. 37, to the mouth of Potomack river, which divides Virginia from Maryland in lat. 38. Maryland lies upon the other part of this long bay.

Upon the east fide of this great bay are many fmall bays, creeks, and rivers, but of fhort courfe, becaufe the neck of land between this bay and the ocean is narrow; in the Virginia part, there are no rivers; in the Maryland part there are feveral fhort navigable rivers, which generally and naturally ferve as boundaries of counties, viz. Pokomoke, Witomoco, Nanticoke, Chaptank, Wye, Chefter, Safaphras, Elke, and north east rivers.

Upon the weft fide of this long bay are many long navigable beautiful rivers; in the Virginia part are James river, York river, Rapahanock river, and the fouth fide of Potomack river; by these the western shore of Virginia is divided into four necks of land; the

the property of three of these necks is in the crown; the property of the northern neck is in lord Fairfax, who married the heiress of lord Colpepper, as shall be related more at large in the section of Virginia; in the Maryland part are the north side of Potomack river, Pataxen river, South river, Severn river, Patapsco river, Gunpowder river.

The two capes of Virginia which make the entrance of the bay, are about 20 miles diftant, and were called by capt. Smith, Henry and Charles, the names of king James I. two fons; the direct courfe of the bay is N. by W. and S. by E. From Bahama landings at the bottom of the bay to Newcastle on Delaware river, are 30 miles good travelling.

Selquahanna river, as we mentioned in the fection of Penfylvania, comes from fmall ponds a little fouth of Mohawks river in the province of New-York, croffes the province of Penfylvania, and falls into the bottom of Chefapeak bay in the northern parts of Maryland.

The other great rivers of Virginia and Maryland all lie W. fide of the bay; only James river and Potomack river reach the great Apolacian mountains, called the Blue hills. In Virginia and Maryland the tides are very fmall.

Maryland and Virginia are flat countries, excepting the Apolacian great mountains to the weftward, which begin in the province of Penfylvania, and run 900 miles S. W. at about 150 or 200 miles diftance from the eaftern fhore of the Atlantic ocean, and terminate in the bay of Apolaxy near Penfacola, in the gulph of Mexico. Col. Spotfwood, lieut. governor of Virginia, was the first who paffed the Apolacian mountains, or great Blue hills, and the gentlemen his attendants were called knights of the horfe-fhoe, having difcovered a horfe-pafs. At prefent there are two paffes crofs thefe mountains; the north pafs is in Spotfylvania, the fouth pafs is near Brunfwick. Some rivers have been difcovered on the weft fide of the Apolacian mountains, tains, which fall into the river Ohio, which falls into the river Miffifippi below the river Ilinois.

For fome further account of the Apolacian mountains, fee the fection of Penfylvania, vol. II. p. 313. The Irifh who had made fettlements in the weftern parts of Penfylvania, are exceeded by the Germans of late years imported into Penfylvania; thefe Germans by a fuperior induftry and frugality (notwithftanding of the north of Ireland protestants being noted for industry and frugality) have purchafed most of the Irifh fettlements there, and the Irifh move further into Maryland, Virginia, and North-Carolina, along the foot of the Apolacian mountains, where the land is good and very promising, being the wash of these hills and mountains : the Indian traders travel this road, to head many of the rivers; here are feveral congregations of Irish prefbyterians, to be described in the section of Virginia.

The alarum lift, and the training militia, are nearly in the fame manner, and under the fame regulations as in the colonies already mentioned.

As to the numbers of white and black people in the province, we may make fome effimate from the polls of taxables as found 1734 upon an exact forutiny, when every taxable was allowed 30 s. out of a large emiffion of paper currency; they were at that time about 36,000 perfons of white men 16 æt. and upwards, and blacks men and women from 16 æt. to 60 æt. perhaps at prefent the taxables may be about 40,000.

The proprietor's quit-rents are 2 s. fterl. per ann. for every 100 acres, he in time patented vacant lands at 4 s. per 100 acres; lately he has endeavoured to let vacant lands at 10 s. quit-rent per 100 acres, but it did not take; he manages the patenting of lands, and collecting of the quit-rents, by agents. Not many years fince, the affembly, with confent of the lord proprietor, by way of experiment, during the term of the three years, granted their proprietor in lieu of quit-rents, a revenue a revenue of 3 s. 6 d. fterl. duty per hogfhead of tobacco, to be paid by the merchant or fhipper; thus the planters or affembly to eafe themfelves, laid the burthen upon trade; this amounted to about 5000 l. fterl. per ann. but upon the expiration of the three years, this projection was dropped, and the proprietor found it more for his intereft to revert to the revenue arifing from his quitrents.

The governor's allowance of falary is as per agreement with the proprietor. The council are paid by the country 180 lb. tobacco per diem, which is much grumbled at, because they are of his appointment, and his creatures. The representatives are paid by the country, or publick revenue, 160 lb. tobacco per diem.

The proprietor has feveral referved good mannors in many parts of the province, which he lets to farm. By his patent the proprietor is not obliged to transmit the provincial laws home for approbation.

Anno 1704, the affembly laid a duty of 2 s. per hogfhead tobacco, one half to the proprietor, the other half toward the charges of the government.

There is an impost upon negro flaves of 20 s. fterl. and 20 s. currency.

As in other British colonies, they have diffinct province, county, and parish rates or taxes. The provincial taxes are polls of taxables at 90 lb. of tobacco per head or upwards, according to exigencies; upon the Cuba or Spanish West-India expedition, it was 120 lb. impost upon fervants, flaves, and liquors, excife, &c.

Currencies. The principal currency of Maryland and Virginia is tobacco per lb. or hundred weight, as it is ftated from time to time by acts of affembly, or tacit general confent of the people. In Maryland, before 1734, the currency was reckoned at proclamation value, 6 s. per heavy piece of eight; but that year the affembly went into the iniquitous fcheme of paper currency, which fraudulently had been practifed in many of our colonies; colonies; they emitted 90,000 l. in bills of publick credit, whereof 30 s. to every taxable, being 36,000 tax-ables, is 54,000 l. the remaining 36,000, was to build a governor's houfe, and to be let upon loan : the fund for calling in these bills of publick credit was a duty upon liquors, &c. to be paid in sterling, and lodged in the bank of England; all these bills to be cancelled in the fpace of thirty years. These bills were not (by the act of affembly) receivable in the proprietor's quit-rents, and fundry publick fees, becaufe an enfuing depreciation was obvious to people of forefight; and accordingly from thirty-three and three quarters difference of exchange with London, it gradually did rife to one hundred and fifty difference. Anno 1740, the Penfylvania 8 s. was equal to 12 s. Maryland; but as the fund for cancelling these bills of credit was regularly transmitted to the bank of England, they gradually recovered their value, and anno 1748, 200 Maryland was equal to 100 flerl.

The first period for calling in and cancelling one third of these bills was in September 1748; and by act of affembly there was allowed from September 29, 1748, to March 29, 1749, to bring in all the bills to be burnt; accordingly of the 90,000 l. 83,962 l. 16 s. were brought in (the remaining 6000 l. was supposed to be annihilated by being torn, lost, &c.) and burnt, the posfessors were paid one third in bills of exchange upon the bank of England, and two thirds in new bills; after 16 years more, the possessors of the two thirds will receive 15 s. sterl. for every 20 s. currency.

Courts, legislative and executive.

The first fettlement was at St. Mary's, near the mouth of Potomack river; the legislative court or general affembly, and the provincial supreme court of judicature, were kept there many years; but anno 1699, for the better conveniency of the whole province, they were removed to Annapolis at the mouth of the river Severn, as being nearly the center of the province.

A٤

At first the province was divided into ten counties, being five each fide of the great bay.

St. Mary's, Charles, Calvert, Anne Arundel, Baltimore,	weft fide.	Somerfet, Dorchefter, Talbot, Kent, Cecil,	}eaft fide.
--	------------	--	-------------

Anno 1695, Prince George, an additional county, was conftituted on the west fide of the bay, and all the counties were divided into thirty parishes.

At prefent 1752, the province of Maryland is divided into fourteen counties, that is, feven counties each fide of the great bay.

Formerly in Maryland, the affembly or legislative lower house (the council is called the upper house of affembly) was triennial; at present they are called, adjourned, prorogued, and diffolved at the governor's pleafure; the representatives are called the lower house of affembly.

In the government of Maryland, there are four negatives in the legiflature, viz. the lower houfe or houfe of reprefentatives where all bills for acts do originate, the governor's council, the governor, and lord proprietor.

Of the four negatives in the legislature, the proprietor may be faid to have three, viz. the proprietor's own negative, that of his governor or deputy, and that of the council nominated by himfelf.

The complement of the council is twelve, appointed by the governor general, principal, or proprietor; but paid by the province, 180 lb. tobacco per diem.

The

The lower houfe of affembly, or houfe of reprefentatives, confifts of four from each of the prefent 14 counties, and two from the metropolis or provincial town of Annapolis, paid 160 lb. tobacco per diem.

With regard to the executive courts, we may begin with the parish vestries, who not only manage the affairs of the parish church, but also manage the prudential matters of the district, as the felect men, so called in New-England, manage their township affairs; they are also affestors of rates or taxes. In each parish they are 12 in number for life, and upon a demise, the survivors supply the vacancies after the manner of Urædschap, of the towns in Holland.

The county courts in Maryland are held in the months of March, June, August, and November; at present they are as follows,

,, (Talbot co.		Dorchefter co.
1 ft tuefday of	Baltimore	2d tuefday of	Cecil

In the months of April and September, there is a circuit court of affizes for trying titles of land, and of criminal cafes : one diftinct court each fide of the bay confifting of a chief judge, an affiftant judge, and proper juries, who fit in the refpective county court houfes.

From the county courts, there is appeal to the provincial court of Annapolis, which is held 3d Tuefday of May, and 3d Tuefday of October, in perfonal debts of 50 l. or upwards.

In the city of Annapolis are held quarterly mayors courts, viz. last Tuesday in January, April, July, and October.

From the provincial courts, held at Annapolis, there is allowed an appeal, in cafes of 300 l. fterl. value

or

or upwards, to the king in council; the appeal is first brought under the deliberation (this is a regulation for all the colonics) of a committee of council called the lords of appeals, and from thence reported to the king in council for a final determination.

The commiffary, a place of about 1000 l. per ann. is not a superintendant of the clergy; he is a judge concerning the probate of wills, granting of administrations, and the like.

The lieut. governor is chancellor, he grants licences for marrying, which are given out or fold at 25 s. by a minifter or parfon in each county, whereof 20 s. to the governor, and 5 s. to this parfon; he has fees for the great feal of the province, and fundry other perquifites; the falary allowed him by the proprietor is per agreement and feldom known; the country generally gives three half-pence per hogfhead tobacco exported.

The court of vice admiralty is of the fame nature as in the colonies already defcribed; as is alfo

The jufficiary court of admiralty for trying cafes of piracy, robbery, and other felonies committed on the high feas, appointed by a commission from queen Anne, pursuant to an act of parliament, 11 & 12 Gul. calledan act for the more effectual suppression of piracy.

, The proprietors and deputy governors.

We have already hinted, vol. II. p. 355, that Sir George Calvert, afterwards lord Baltimore, obtained from king Charles I. a promife of a grant of these lands now called Maryland; and afterwards his fon Cecilius lord Baltimore had a royal patent for the fame, 1632.

During the civil wars in England, and the ufurpation of Oliver Cromwell, the concerns of the Baltimore family in Maryland lay dormant, the family being bigotted Roman catholicks. Soon after king Charles II. reftoration, 1661, Charles lord Baltimore, fon of Cecilius, obtained a royal confirmation of the 1632 grant; he went to Maryland, and continued there fome time.

Not-

Notwithstanding of the Baltimore family being rigid Roman catholick zealots, K. James II. superfeded their jurifdiction there; the scheme of the English court at that time was, to reduce all proprietary and charter governments to the jurifdiction of the crown.

After the revolution of K. William III the Baltimore family had better ufage, and at prefent they are become good protestant subjects; for the succession of the lords Baltimore, see vol. II. p. 309. Charles lord Baltimore, member of the British parliament for the county of Surfey, died in April 1751, and was succeeded by his fon Frederick lord Baltimore.

Upon the revolution, Sir Edmond Andros was appointed governor of Maryland, and was fuperfeded by col. Nicholfon: Andros died in Lond. 1714, in a great age.

Col. Nat. Blackiston, fucceeded col. Nicholfon. *

Col. Blackiston was succeeded by col. William Seymour 1704: Seymour put into Barbadoes by stress of weather, and had an eight months voyage.

Col. Corbet fucceeded as lieut. governor in place of col. Seymour.

Col. Hunt arrives lieut. governor 1714, and upon K. George's acceffion he was continued governor.

* Col. Nicholfon was a knight errant governor; by his curfing, fwearing, and hypocritical devotional exercises, he was at times made use of by the court in dirty affairs; particularly when any new encroachments upon the privileges of a people were defigned with harsh usage; for instance 1686, he was appointed lieut. governor of the dominions of New-England under Sir Edmond Andros : 1710, upon the much faulted revolution in the ministry of queen Anne, he was fent to the northern colonies of British North-America, with an unprecedented commission as inspector general of all affairs, ecclesiaffick, civil, and military; and in that capacity did much intimidate, fome governors and their councils: governor Hunter of New-York, a gentleman of fpirit, told me, that if col. Nicholfon had proceeded to New-York, and acted in the fame manner as he did in the province of Maffachusetts-Bay; he would at all risks have sent him home, to be tried by the judicatories there, as a difturber of the peace of the colony under pretext of an anticonstitutional unprecedented commiffion.

I shall only mention the fuccession of governors of note.

Benedict Leonard Calvert, Efq; homeward bound, died at fea 1732, and was fucceeded by Samuel Ogle, Efq;

1746-7 in March arrives Samuel Ogle, Efq, appointed lieut. governor of Maryland in place of Thomas Bladen, Efq, Mr. Ogle continues lieutenant governor at this writing, 1752.

Produce and manufactures.

These are nearly the same in the provinces of Maryland and Virginia, this article may serve for both.

Tobacco * is an aboriginal American plant or herb, and is faid to have been first found among the Florida Indians,

* As the use of this plant or herb by an unaccountable whim is become the general amusement of Europe and of the European settlements on the eastern fide of North-America, by smoaking, fnuffing, and chewing; and as no authors hitherto have given us an exact defoription or icon of this plant; I do here describe it from the life, by my own observations as it grows.

There are many curious Virginia gentlemen planters, who as botanists cultivate varieties of tobacco; but as this is not a botanical essay, I must drop them, and shall only describe that species which is cultivated and manufactured for exportation in trade.

Nicotiana major latifolia. C. B. P. M. H. 2, 492. Nicotiana major, five tabaccum majus. J. B. 3, 629. Hyofcyamus Peruvianus. Dod. p. 450, tobacco: the icons of John Bauhine and of Morifon are not exact. It is an annual plant; when it is at its full growth, it is about the height of an ordinary man; the ftalk is ftreight, hairy, and clammy, like that of the hyofcyamus niger vel vulgaris. C. B. P. common black henbane; the whole habit is of an obfolete yellowifh green; leaves alternate, fome of the lower leaves are a cubit long and nine inches wide entire, but waved; the lateral coftæ of the leaf arch into one another near the margin; the leaves have no pedicles (the major anguftifolia has long pedicles) and by an auriculated bafe embrace the ftalk; towards the top, the ftalk branches from the finus's of the leaves, and higher from the finus of a flender foliculum proceed fafciles of flowers: the flower is flender and tubulous, one and half inch long, yellowifh, with an obfolete diluted purple brim. Indians, who fmoak to fatisfy their hunger; fome write, that it came from the ifland Tobago, one of the Weft-India iflands of nearly the fame name; but moft probably it came from Peru, becaufe in North-America it is not fpontaneous; the aboriginal Indians of North-America do not cultivate it, they purchafe it of the English planters and smoak it with pleasure. Its classical or tribe name is Nicotiana, so called trom John Nicor, a Frenchman, embassador to the court of Portugal, he fent fome of its feed, which he had from a Dutchman, to the court of France.

It has been faid by fome writers, that Sir Francis Drake firft brought it to England from the island Tobago of the Weft-Indies. The name is Indian; we have no certain account of tobacco, till Sir Walter Raleigh's + arrival in England from Virginia, 1585; it was called Indian henbane: it was used by the aboriginal American Indians, both in North and South-America, before the Europeans arrived there.

brim, not divided but expanded into 4 or 5 angles; the calix is tubulons of 4 or 5 narrow fegments; the piftillum becomes the feed veffel conoidal, 5 or 6 lines diameter at bottom, and near an inch long, bicopfular with a middle fpungy double placenta, and contains many finall round brownifh feeds; the feed is ripe end of September. In New-England it is planted in cows pens, it is hotter and does not fmoak fo agreeably as that of Virginia.

In trade there are only two species of tobacco, viz. Aranokoe from Maryland, and the northern parts of Virginia, and sweet-scented from the south parts of Virginia, whereof the best kind is from James and York rivers; the first is the strongest, and is in demand in the northern markets of Europe; the other is milder and more pleasant; the difference scenes to be only from the soil; sweet-scented which grows in fandy lands is best for smoaking when new, or only two to three years old; that from stiff land if kept five or fix years, much exceeds the former.

+ Sir Walter Raleigh upon his return from Virginia to London 1585, having practifed tobacco fmoaking, in a gay humour in his clofet, ordered his fervant to bring him fome fmall beer; in the mean time having lighted his tobacco pipe, and collected a mouthful of fmoak, let it fly in the fervant's face to furprize him; the fervant imagining that his mafter's face was on fire, threw the fmall beer in his face, and innocently returned the jeft.

Bb 2

Imported

Digitized by Google

Imported com. annis to Great-Britain from Virginia about 25,000 hogheads of 800 lb. to 950 lb. wt. per hogshead; from Maryland about 30,000 hogsheads of 700 lb. and upwards. It is an enumerated commodity, and cannot be exported from British America to any ports than Great-Britain, and its plantations. The neat duty upon tobacco imported into Great-Britain is about 200,0001. fterl. per ann. and 14,0001. feizures. Anno 1733, when Sir Robett Walpole, firft commissioner of the treasury, was projecting a reduction of fundry cuftoms or imposts upon goods to an excife, he proposed in parliament, that the duty upon tobacco, which at that time was 6d I third per lb. should be only 4d 3 farthings per lb. whereof 4d excife and three farthings duty, this scheme did not succeed. 4

By a convention or agreement between the courts of Great-Britain and France, during the late war with France, the farmers of tobacco in France did contract with merchants in Great-Britain, (Mr. Fitz-Gerald was the general French agent in Britain,) for fome British tobacco ships with passports, and to return to Great-Britain in ballass; the shipping ports in Great-Britain were London, Bristol, Liverpool, Whitehaven, and Glasgow: the delivery ports in France were Diepe, Havre-de-Grace, Morlaix, Bourdeaux, Bayonne, and Marseilles.

Virginia and Maryland fometimes produce more tobacco than they can vent to advantage, by glutting the markets + too much, and occasions a mutinous dispofition among the planters, as happened in Bacon's rebellion in Virginia; and at times to keep up the price

* Sir Robert Walpole was very intense upon bringing most duties partly into excise, and partly into customs, the better to multiply revenue officers, creatures of the ministry, towards carrying parliament elections, &c.

† This is fometimes the cafe with the Dutch East-India spices, and the West-India sugars.

__of

of tobacco they burn a certain quantity for each taxable, as was done in Maryland upon the first emission of paper money.

The tobacco is generally cultivated by negroes in fets, feven or eight negroes with an overfeer is a fet; each working negro is reckoned one fhare, the overfeer has one and a half or two fhares. The charge of a negro is a coarfe woollen jacket and breeches, with one pair of fhoes in winter; victualling is one peck of Indian corn and fome falt per week. To prevent tobacco from becoming a drug, no taxable is to cultivate above fix thousand plants of tobacco, befides grain.

The plantation duty is 1d. fterl. per lb. upon tobacco exported to the other colonies, and is about 2001. towards the revenue of the college of Williamsburg in Virginia.

Tobacco is not only their chief produce for trade, but may also be called their medium or currency, it is received in taxes and debts; the inspector's notes for tobacco received by him, may be transferred, and upon sight of these notes the inspector immediately delivers to the bearer so much tobacco.

Formerly the tobacco affair was managed by receivers at culling houfes near the fhipping places, where the planter delivered his tobacco to the merchant; at prefent in every river there is a certain number of country flores where the planters tobacco is lodged, every hogfhead is branded with the marks of the planter, flore, and river.

The common culture of tobacco is in this manner. The feed is fowed in beds of fine mould, and transplanted beginning of May; the plants are fet at 3 or 4 feet intervals or diftances; they are hilled and kept continually weeded; when as many leaves are shot out as the foil can nouriss to advantage, the plant is shopt and it grows no higher; it is worm'd from time to time; the success which put forth between the leaves are B b 3 taken

taken off from time to time till the plant arrives to perfection, which is in August, when the leaves begin to turn brownish and spot; in a dry time the plant is cut down and hanged up to dry, after being sweated in heaps for one night; when it may be handled without crumbling (tobacco is not handled but in moist weather,) the leaves are stript off from the stalk, tied up in little bundles and packt up in hogsheads for transportation. No success nor ground leaves are allowed to be merchantable.

An industrious man may manage 6000 plants of tobacco, and 4 acres of Indian corn.

The fmall quantity of tobacco which fome people raife in Penfylvania and North-Carolina is generally flaipt off from Maryland and Virginia.

Tobacco is injurious to the nerves, it is formewhat * anodyne, and intoxicates perfons not used to it.

Pork. Valt numbers of fwine or hogs run wild or ramble in the woods of Maryland, Virginia, and North-Carolina; they are generally fmall; falted and barrelled they make a confiderable branch of the export of these colonies; they feed mostly upon nuts of all kinds, called mast, they eat oily and rank.

Maît + or foreft nuts of many kinds are very plenty every fecond or third year, and the following year not fo plenty; thus it is with apples and cyder in New-England; the plenty and confequently the price of pork from Maryland, Virginia, and North-Carolina, depends upon the goodnefs of their mafting years; anno 1733,

* The Europeans use wine, and other fermented liquors, as also spirits diffilled from them; the Turks, Perfians, and other oriental nations, use opium, bang, betel, &c. all which occasion a fort of indolence or relaxation of mind : thus mankind by a natural tacit confent allow, that the intense application of mind, the cares and inquietudes of life, require fome such expedients of alleviation.

7 This word or term feems to proceed from the latin word ma-

a good

-

a good maît year, one man a planter and merchant in Virginia, falted up three thousand barrels of pork. Next to the pork fed with Indian corn as in New-England, acorns make the firmest pork; beech nuts make fweet pork, but flabby, fost and oily. In Westphalia, the hogs in the woods feed mostly upon chestnuts.

Grain. Wheat in Maryland and Virginia is fubject to the weevel, a fmall infect of the fcarabeous kind, which fometimes takes to it in the ear when a growing. The Maryland and Virginia wheat weighs fome 56 lb. to 60 lb. wt. per bushel, and cafts white; that from Penfylvania does not weigh fo much; the wheat formerly imported from Nova-Scotia was light and caft dark like rye; at prefent the prairies, as they are called, or the dik'd in wheat lands are wore out. May the prefent political diverting publick amufement of improving Nova-Scotia, become intentionally real, towards a fishery, a place of arms for our navies, a nurfery of husbandmen, and a northern frontier for the protection of our British colonies!

Good land in Maryland and Virginia may yield per acre 15 bushels wheat, or 30 bushels Indian corn, which casts whiter than that of New-England.

Calavances are exported to feveral of the other colonies. Phafeolus erectus minor femine fphærico albido et rubro, hilo nigro. C. B. P. white and red calavances, or Virginia peafe; they yield better than the common peafe of Europe, and are good profitable food for the poorer fort of white people, and for negro flaves.

Mays or Indian corn has been already defcribed.

They raife in the uplands, quantities of hemp and flax. Anno 1751, in October, from the back fettlements of Maryland, there came into Baltimore town near the bottom of Chefapeak bay, fixty waggons loaden with flax feed. In fome counties of Maryland are erected charity working fchools.

Towards

Towards the mountains there are fome furnaces for running of iron ore into pigs and hollow caft ware, and forges to refine pig iron into bars.

Timber and other wooden lumber. Their oak is of a ftrais grain, and eafily rives into ftaves; in building of veficies it is not durable, they build only fmall craft; fome years fince they built a very large fhip called the British merchant, burthen one thousand hogsheads; with many repairs she kept in the Virginia trade 36 years.

Their black walnut is in demand for cabinets, tables, and other joiners work.

Maryland and Virginia produce large beautiful apples, but very mealy; their peaches are plenty and good; from these they diftil a spirit, which they call cyder brandy and peach brandy.

The Maryland affairs, concerning their cuftom houfes, and naval officers, the number of entries and clearances of veffels, the quality and quantity of their exports and imports, and the tribe of officers thereto belonging, are not hitherto fully come to my knowledge: I do not chufe to infert any thing that is not in fome regard perfect, therefore at prefent, I fhall only copy a few lines from the lateft prefent flate of Great-Britain. I observe their falaries are fmall.

MISCEL

MISCELLANIES.

As many things defigned for a general appendix, muft be loofe, incoherent, and not fluent; for the eafe of common readers, we fhall annex fome parts of it to each of the fubfequent fections by the name of mifcellanies, being of things omitted, or that were not come to my knowledge at the times of writing, or not reduceable to particular fections. As I have all along given it the character of common-place, the fummary in propriety may admit of this latitude.

In the Rhode-Ifland fection was omitted an authentick eourt paper, dated Windfor, Sept. 13, 1686, concerning the furrender of Rhode-Ifland charter, "His majefty "has gracioufly received the addrefs of the colony of "Rhode-Ifland and Providence plantations in New-Eng-"land; humbly reprefenting that upon the fignification "of a writ of quo warranto against their charter, they "had refolved in a general affembly not to stand suit "with his majesty, but wholly to submit to his royal "pleasure themselves and their charter : wherefore his "majesty has thought fit to accept the furrender." N. B. As the Rhode-Island charter was not vacated by any process in the courts of law, and the voluntary furrender not properly recorded; upon the revolution of K. WILLIAM they reassure their charter, and their actings in pursuance of that charter are deemed good by the court of Great-Britain,

In the miscellany article of the section of Pensylvania, vol. II. p. 337, was inferted a letter from the lord justices of Great-Britain to Mr. D. _____ commander in chief of the province of Massachusetts-Bay, concerning an illegally projected synod or consistory of the congregational + ministers in that colony; in this letter

+ Befides other inconveniencies, there feems to be an impropriety or inconfistency in congregationalist or independent religion for etics

letter Mr. D —— feems to be faulted as conniving at fuch anti-conflictutional proceedings; as this gentleman was noted for his fidelity to the crown, and probity towards the people under his direction, when in the adminifiration of that colony; I cannot avoid publishing his windication of himself in a letter to the board of trade and plantations.

" My Lords,

"By a fhip lately arrived, I received from their ex-" cellencies, the lords juffices, an inftruction for my " future proceedings with respect to a synod proposed " to be held by the ministers of this his majesty's pro-" vince, which shall be punctually obeyed as there shall be occasion; their lordships were also pleased to cen-" fure the proceedings already had in that affair. Where-" fore I think myfelf obliged to acquaint your lord-" fhips, that I did not pass a consent for a synod, but " only to a vote of the council and affembly, referv-" ing the confideration thereof to the next feffions, " as you will fee by the copies of the votes of that " fellions transmitted to you foon after the rising of the " court; and I was then of opinion it would not come " on the carpet again, as it never did, notwithstand-" ing the prefent fellions had been litting for fome weeks s before their lordships orders concerning the fame " was received; nevertheless I should have taken myself " obliged to have asked your lordships directions "therein, if I had apprehended it to be of a new and " extraordinary nature; but I must observe, that a vote s in the fame words was passed on the like occasion ⁵⁶ by his majesty's council here in the year 1715, and ⁶⁶ never as I have heard of, cenfured by your lordships; " and here I humbly take leave to fay in behalf of

ties petitioning for a fynod, or fuperior collective authority: it feems to intimate that the fubordinate claffical way of fubordination in church government with the prefbyterians, is natural in its tendency.

" the

** the minifters of this province, that I know them to be ** a body of men most loyal and inviolably attached to ** his majefty, and to his illustrious house, and there-** fore I did not apprehend any inconvenience could arise ** from their affembling, especially fince they make no ** pretences that I know of to do any acts of authority, ** in fuch meetings, though they call them by the name ** of fynod."

From the accounts we have from time to time received from Penfylvania, of the moravian fectary there, and of a late act of the British parliament in their favour; it was imagined that they were inoffensive in their devotional way; but their late character from Germany, feems to caution against their proceedings.

A continuation from the moravian affairs, vol. II. p. 154, 335. The moravian indiferent zealots * have been continually endeavouring to part members from all the three established professions, (papists, lutherans, and calvinists) in the holy Roman empire, especially of tender minds. The Bohemia and moravian brethren, by scandalous songs, sermons, and writings, obtruded as gospel truths, under the count of Zinzendorf, a new soft of religion; not to be tolerated in the laws of the holy Roman empire; they used Herenhutish songs, method, and books of institution, count of Issenburgh and Badingen.

In Maryland and Virginia there is a general toleration to legally qualified ministers, to officiate in places legally licenfed.

Hanover is 60 miles from Williamsburg. A minifter qualified, and a meeting licensed, may claim the

* The vermin is all religions, have been enthufiaft, indifcreet zealots or bigots, and political managers to ferve the court ministry in their projections.

liberties

liberties of toleration, taking the ufual government oaths, getting the meeting-houfes recorded, and fubfcribing the articles of the church of England, except the 34, 35, 36, and this claufe in the 20th article, "The church hath "power to decree rites and ceremonies, and authority in "controverfies of faith." Thefe prefbyterians voluntarily put themfelves under the immediate care of the prefbytery of Newcaftle, and fynod of New-York; which they may caft off at pleafure.

Mr. Davies a prefbyterian minister came into this colony 1748, and obtained licenses for seven meetinghouses, an extravagant plurality; among these he divided his time, viz. three in Hanover county, one in Henrico county southward, one in Carolina county northward, one in Louisa county westward, and one in Gooch land to the S. W. of Hanover; these assessment generally called new lights, and may consist of about 300 communicants. Mr. Davies wrote anno 1751; there were not ten differences within a hundred miles of Hanover when he arrived there.

There is an immense quantity of land unsettled westward between Hanover county, and the rivers which fall into the Mississippi river. The three frontier counties in Virginia, of Frederick, Augusta, and Lunenburgh, are prodigiously large, and generally settled by Irish presbyterians, as is also Amelia and Albemarle counties. In Virginia to the westward, they are continually making new counties, as they do new townships in New-England.

The county courts grant meeting-houfe licenfes, but may be negatived by the fuperior or fupreme court. Sometimes the county courts deny the granting of licenfes, and fometimes county licenfes when granted, are negatived by the council, alledging that it does not belong to a county court to proceed in fuch affairs, and that a differing minifter can have no legal tolerated right to more meeting-houfes than one.

The

The * frontier counties of Maryland and Virginia are generally inhabited (as I hinted before) by north of Ireland Scots prefbyterians, who landed in Penfylvania, but fold their improvements there to the more industrious German fettlers: their pulpit discourses are (generally new-lights fo called) against the modifh fystem of arminianism, moral duties, and speculative truths: some of them are under the care of the imaginary synod of Philadelphia, some belong to the fynod of New-York; but under the immediate care of the prefbytery of Newcastle; in this prefbytery there are 12 members, and two or three candidates upon probation.

Roman + catholicks abound in Maryland.

* Mr. D-ies, a diffenting prefbyterian minister of Hanover county in Virginia, in a piece which he printed 1751, concerning the state of religion among the protestant diffenters in Virginia, gives some informations concerning these affairs, but with a new-light or enthufiastick turn. He writes, that there has been a confiderable revival, or rather fettlement of religion, in Baltimore county of Maryland, which lies along Sefquahanna river and borders on Penfylvania; as also in Kent county, and queen Anne's county between Chefapeak bay and Delaware river. He fays there have been in Maryland and Virginia a great number of Scots merchants, (he means merchants clerks, fuper-cargoes, and fubfuper-cargoes) who were educated in the prefbyterian way; but generally prove a fcandal to their religion and country, by their losse principles, and immoral behaviour, and become indifferent in religious professions, and affect politeness in turning deifts, or fashionable conformists. N. B. Young perfons of any nation, after being fettered with peculiar religion modes, when turned loofe, they become wanton, and indulge themfelves in irregularities.

+ It is not eafily to be accounted for, that the British government are not more sedulous, in purging off by lenitives, not by drafticks, the pernicious leaven of popery (their doctrine of no faith to be kept with hereticks or differents from them, destroys all society) which prevails in Montserrat, Maryland, and Ireland. The lift of protestants and papists in Ireland, as computed (in all cases, I use the last computations that are in my knowledge) anno 1732 and 1733. Protestant families. Popish families.

+ An indolent way of reading their publick prayers and fermons prevails in our colonies.

The medical digreffion continued.

The fcience or art of medicine will ever remain weak in theory, and must be supplied by experience, and some specificks (I do not mean quack nostrums) whose falutary operations or effects in some diseases have been discovered not by investigation but by chance, such as the Peruvian bark, mercury, opium.

Experience and fedulous observation are too much neglected by the indolent practitioners of our colonies; they chuse to practise from authorities, whereas authorities must always give way to experience; the nature of medical affairs allow of no other demonstration than that of good observation; Sydenham on the small-pox is reckoned his master-piece. *

+ The churches where the minister reads the prayers and fermons may be called reading houses, and the minister may be called the reader, but at prefent only the affishant minister is called the reader and lecturer: in Scotland, and in the foreign churches of all denominations, reading of fermons and discourses is not practifed.

* From my practice relating to the fmail-pox, which prevailed in Boston 1721, and 1730, for the benefit of the publick, especially of my neighbours or townsmen; I beg the reader's indulgence in allowing me to observe, that in the management of the spreading imall-pox, it may be adviseable for perfons much advanced in years, and confequently their juices rancid, and perfons infirm and of a bad habit of body, to avoid the infection by retining into the country for a few months, confidering that the fmail-pox does not prevail in Bofton, but after long periods; fince the first fettlement of Boston the small-pox was epidemical or popular only 1649, 1666, 1677 and 1678, 1689 and 1690, 1702, 1721, 1730, the prefent fmall-pox 1752, perhaps may fpread or not fpread. All other perfons, especially children, may continue in town and run the risk in the natural way or by inoculation, after a previous proper regimen: this regimen, according to the best of my judgment, is a mercurial purge or two, a foft diet; avoid catching of cold, nfe no violent exercise of body or perturbation of mind; upon feizure, if the patient is plethorick, and the fever runs high, blood-letting is advileable (but not upon or after eruption) and gives room for nature

In our colonies, if we deduct perfons who die of old age, of mala stamina vite or original bad constitutions, of intemperance, and accidents, there are more die of the practitioner than of the natural course of the distate state of the practitioners generally without any considerate thought fall into some routine of method, and medicines, such as repeated blood-lettings, opiates, emeticks, catharticks, mercurials, Peruvian bark.

In our various colonies to prevent a notorious depopulation from male practice in medicine or cure of difeafes; there may be acts of affembly for the regulation thereof, which at prefent is left quite loofe. A young man without any liberal education, by living a year or two in any quality with a practitioner of any fort, apothecary, cancer doctor, cutter for the ftone, bone-fetters, tooth-drawer, &c. with the effential fundamental of ignorance and impudence, is efteemed to qualify himfelf for all the branches of the medical art, as much or more than gentlemen in Europe well born, liberally educated (and therefore modelt likewife) have travelled much, attended medical profeffors of many denominations, frequented city hofpitals, and camp infirmaries, &c. for many years.

In the expressions of Hippocrates, this is literally an ars longa, it requires long experience and observation with a peculiar fagacity; in practice a dull application (we cannot much boast of application) does not anfwer, there must be a suitable genius, and sometimes a particular paroxysm of imagination, as is remarkable in poets and painters, and as I have observed in myself,

ture to act her part at more liberty; in the beginning a gentle emetick or vomit is of good use, it renders the habit of the body more meable in circulation, by its shocks; during the course of this diffemper, dilute plentifully, use a cool but not cold regimen; in the declension use gentle catharticks: by this management many of my small-pox patients have suffained the distemper with ease, and without decumbiture or confinement.

in

in the diagnostick part of our profession. Knowledge, that is, observation, and fagacity are the two great requifites in a physician.

In our colonies, how can a young man of no previous liberal education, or difpolition to a peculiar knowledge in the affair, in a few years attendance in an apothecary's fhop, and a few months travel, without practical knowledge, attain to any degree of perfection in this profeffion? These things are not mysteries or infpirations of particular perfons in the case, but an impudent delusion and fraud. I shall not call upon any man's name in the question, left it should appear a malicious or invidious referentment for secret injuries done, not in the way of medical practice, but in ——— fuch things we may in a christian spirit forgive, but naturally we cannot forget.

The practice of phyfick requires much circumfpection and difcretion, only to be attained by a long and attentive practice. The conftitutions and other circumftances occasion the fame species of a distemper to appear variously; for instance,

Inebriation, an illnefs very obvious and too common in our colonies; fome it renders more vigorous, in others the tongue and limbs faulter; fome are ferious, that is, praying or crying drunk; fome are mad or furious, fome dull and fleepy; fome gay and witty, fome dull and filly. Thus it is in all diftempers, the fymptoms vary according to the conftitution, and in the general indications of cure ought to be allowed for.

In aftronomy the inequality of the motions of the feveral planets are many and various, but by indefatigable observations they are reduced to equations or rules; but it is to be feared that in our microcos or animal œconomy, there are so many inequalities as not to admit of any fixed rules, but must be left to the fagacity of some practitioners, and to the rashness of others.

SECT.

SECTION XVI.

Concerning the COLONY and Dominions of

VIRGINIA.

Olumbus's difcoveries of America, fet all trading or navigating nations into the humour of difcoveries weftward of Europe. The Cabots of Briftol, Italian mariners, obtained a patent from king Henry VII. (fee vol. I. p. 110.) anno 1495, for all lands they fhould difcover weft of Europe, with certain royal refervations : they ranged the eaftern fhore of North-America, and took a formal, but imaginary poffeffion without occupancy of fundry parts thereof. From that time, for near a century, that coaft was not fo much as navigated by the Englifh; until Sir Walter Raleigh obtained a patent from queen Elizabeth, March 25, 1584, for difcoveries and fettlements in America. See vol. I. p. 111. Raleigh and his affociates fitted out two veffels, in a round-about courfe by way of the Canaries and Caribee Weft-India illands to the coaft of Virginia, they fell in with the illand Roanoke upon the North-Carolina fhore, at the Roanoke inlet (about 36 d. N. lat.) of Albemarle found or river.

Sir Richard Greenville, the chief of Sir Walter Raleigh's affociates, 1585, at his return to England, left 108 men upon Roanoke island, under Mr. Ralph Lane; from imprudent management they were in danger of being starved, but Sir Francis Drake in his expedition to the West-Indies, had instructions upon his return to England, Vol. II. C c to

to touch in there, and carried thefe miferable people home to England. At the fame time Sir Walter Raleigh in a fhip, and about a fortnight after Sir Richard Greenville with three fhips, failed thither. Sir Walter fell in with cape Hatteras a little fouthward of Roanoke; having no intelligence of the people left at Roanoke, he returned to England; Sir Richard found the island, but no people; he left 50 men upon the island with two years provisions, and returned to England; thefe 50 men were all killed by the Indians.

Next fummer, 1587, three fhips with men and women fettlers and provifions arrived at Roanoke, and formed themfelves into a government, confifting of a governor, Mr. John White, and 12 councellors, incorporated by the name of the governor and affiftants of the city of Raleigh in Virginia: this fettlement when Mr. White returned to England, confifted of 115 perfons.

It was two years before Mr. White could obtain the neceffary recruits of fupplies; after a tedious paffage with three fhips, he arrived at cape Hatteras, August 1590, but in a violent form they parted from their cables, drove to fea, and returned to England, without visiting the poor fettlers, to whom no visit was attempted for the 16 following years, and perhaps cut off by the Indians, being never heard of afterwards.

In purfuance of the new-charter of 1606, capt. Newport, vice admiral, with fettlers, (fome Poles, and Dutch to make tar, pitch, pot-alhes and glafs,) arrived at cape Henry beginning of May 1607; he failed up Powhatan or James river many miles, founded James-town, and at his return for England left about 200 perfons there; thefe may properly be called the firft fettlers of the colony; many of them died, and were much molefted by the Indians. 1619 there arrived a large fupply of 1216 people, they made many fettlements; and 1620 an affembly of reprefentatives called burgeffes was inftituted, and in the year following courts of judicature were appointed.

4

We may observe, that capt. John Smith, called the traveller, defigned for Roanoke where Mr. John White had left 115 perfons, fell in between the capes of Virginia, the fouthernmost he called cape Henry, the northernmost cape Charles, in honour of the king's fons; the Indian name of the bay was Chefapeak; the first great river they met with was on the fouth fide of this bay, by the Indians called Powhatan, and by the English named James river, the king of England's name : about 50 miles up this river, they made a fettlement upon a peninfula, being convenient for navigation, trade, and easily fortified, and called it James-town. From that time we have had an uninterrupted possibility of that country.

Capt. Smith in his hiftory relates many mifadventures of the first Virginia settlers, viz. a third supply was fent from England 1609, being 9 ships, and 500. people, under Sir Thomas Gates, Sir George Somers, and capt. Newport; the fleet was scattered in a storm, and only 7 veffels arrived; the commission or patent was in one of the miffing thips; this Virginia fettlement from 500, were foon reduced to 60 perfons, almost famished by mismanagement; but Sir Thomas Gates, and Sir George Somers, who faved themfelves with 150 more people in Bermudas, built two finall cedar barks, fet out May 10, 1610, and arrived in Virginia the 20th, to the comfort of the remaining Virginia fettlers; foon finding much mifery, they all embark to abandon the country, but in falling down the river, they were met by lord Delaware with three fhips, and all neceffaries; Sir George Somers returned to Bermudas in his former cedar bark of 30 tuns, to fetch provifions, and soon died there, æt. 60. Lord Delaware returned to England, and left capt. George Percy commander. 1611, May 10, arrived Sir Thomas Dale with 3 ships, men, cattle, and provisions : August 4, arrives Sir Thomas Gates, governor, with 6 tall fhips, 300 men, 100 kine, and other cattle, provisions, and ammunition. C c 2 1612

1612, arrives capt. Argol, with men and provisions. † 1614, Sir Thomas Gates and capt. Argol return to England, and capt. Yearly is left commander.

1617, capt. Yearly returns for England, capt. Argol being fent over governor by the council and company; * of the company's people, there remained 54 men, women, and children; about this time the tenants brought into the flore about 400 bushels of corn per ann. rent; tobacco fold from 18 d. to 3 s. per lb. 1618, the council and company fent over lord Delaware with 200 people, in a ship of 250 tun, he died in the passage. 1619, arrives Sir George Yearly as governor.

In a book printed 1620, by the treasurer and council we find, that there were many noblemen and knights concerned, earl of Southampton was treasurer.

1621, Sir Francis Wyat is appointed governor, and arrives with 9 fhips. Every perfon was to plant 1000 plants of tobacco, with eight leaves each plant, which is about 100 lb. of tobacco; corn fold at 2 s. 6 d. per bushel.

To refume the thread of occurrencies. Sir Wal. Raleigh by his attainder, having forfeited his patent, an. 1606, [] feveral

+ 1613, Mr. John Rolfe married Pocahantes, daughter of Powhatan, the king of the Indians, and peace with the Indians continued many years; 1616, Mr. Rolfe with his Indian wife went for England, where being upon return the foon died at Gravesend; Powhatan her father died in April 1618.

* Sometimes they are called the treasurer, council, and company.

Capt. Smith, called the traveller, fome time prefident of Virginia, continued the hiftory of Virginia down to 1624; he was fo volatile, that after 19 years expence of time in America, he had not one foot of land there.

Capt. Argol, 1613, carried off two French vessels from Port-Royal in La Nouvelle France, or North-Virginia, now Annapolis-Royal of Nova-Scotia.

• || Upon the reports of fome private traders to North-America, there was a royal grant or patent obtained April 10, 1606, by two companies in one charter, fee vol. I. p. 365. The northern company infenfibly vanished, and a new company by the name of the council, feveral adventurers petitioned the king for grants with jurifdictions, and the firft collective fettlements were made (the French at the fame time were making fettlements in Canada) and 50 miles up Powhatan or James river, capt. Newport laid out James-town; the government was in a prefident and council fent from England, they had fundry fupplies from England about that time, but the fettlement did not thrive: at firft they were called the honourable or right worfhipful company of Virginia. Sir Walter Raleigh upon his attainder neglected Virginia, and by a fort of connivance of the court went to Guiana a mine hunting for gold and precious ftones.

The company of 1606, did not thrive; and anno

council of Plymouth had a patent or grant, Nov. 18, 1 20, (fee vol. I. p. 366, with a power to convey their granted lands to any of his majefty's subjects, without any formal power of government or jurisdiction.

Capt. Gofnol, a former adventurer in a fmall veffel with 32 men from Dartmouth, effaying a more diffinct courfe to Virginia, than had been formerly practifed, fell into the bite of Cape-Cod, (he got much cod-fift there) in New-England fome Bifcayers had been a fifting there; he traded with the Indians to advantage, and gave names to fundry places, Martha's Vineyard becaufe overgrown with wild vines, Elizabeth iflands, &c. which they retain to this day; he returned the fame year to Dartmouth. This profitable voyage encouraged fome merchants of Briftol to fend two veffels 1603, in the fame tract; they made a good voyage. 1605, a fingle fhip from London fell in with the eaftern parts of Long-ifland in New-York government, and traded up Connecticut river. From thefe fucceffes, fome traders petitioned the court for the charter which they obtained 1606 as above.

Capt. Smith, 1608, with fundry veffels, being the fixth voyage to these parts, coasting along the eastern shore of North-America, he writes, that Virginia lies from Cape-Fear 34 d. N. lat. to 45 d. or New-France; he failed up Chesapeak-bay, so far as Sesquahanna river, in quest of mines, but in vain. 16:09, many people were sent over with cattle, artillery, and stores, but were much harrassed by the Indians and fickness. 16:19, in the compass of one year, eleven ships with 12:16 men, women, and children, arrived from England, and made many settlements upon James and York rivers.

Cc3

1609,

1609, the fettlers were not exceeding 277; they furrendered their charter, being tired out with charges, and no profpect of profit, and a new patent was iffued in the name of the treafurer and council. This new company appointed lord Delaware general or governor by approbation of the crown; by miftake of the mariners he fell in with Penfylvania-bay, inftead of Chefapeak or Virginia-bay, and gave name to it, this was before the Dutch fettled, which it retains to this day; he foon returned to England. Lord Delaware in his fecond voyage to Virginia 1618, died in the passage; in his first voyage-he arrived in Virginia June 9, 1610, and continued governor until March following.

1626, becaule of the bad conduct of the managers, and hardfhips fuftained by the fettlers, by a quo warranto the patent was fued out, both property and jurifdiction became vefted in the crown, where it remains to this day; the fettlers pay 2 s. fterl. per annum quit-rent per 100 acres, under the direction of a king's governor and council, with an affembly or house of representatives chosen by the people; these three negatives compose the legislature or general court.

When capt. Smith, fome time prefident of Virginia, wrote his hiltory 1624, within 60 miles of James-town, the principal fettlement, there were not above 1500 fencible men, and for want of railing provision fufficient, they could not upon any exigency bring above 700 men together.

Becaufe of notorious bad management, the company was diffolved by king Charles I. and the colony was brought under the immediate direction of the crown as above, and fettlers flocked over; particularly fome of good condition to enjoy the liberty of worfhipping God in their own manner; lord Baltimore, a Roman catholick, retired thither, but the people of Virginia, rigid proteflants, did not use him well, and he was discouraged from continuing in Virginia, as we have more at large related in the fection of Maryland.
The first fettlers intent upon taking up large tracts of land, occasioned the several settlements to be dispersed at confiderable distances from one another, and not in towns or villages.

At present the jurisdiction or government is bounded fouth by a line W. by compass (the variation there being fmall, is neglected) dividing Virginia from North-Carolina, beginning at a certain great tree in the N. lat. of about 36 d. 40 m. (in its progrefs it interfects the river Roanoke many times in its meanders,) and continues west indefinitely; the western boundary is the South-Sea, or lands in a prior occupancy of any christian prince; it is bounded northerly, on the east fide of Chefapeak bay by a line running due east from Watkins-Point, near Wighco river on Chefapeak in about the lat. of 38 d. 10 m. to the ocean; on the west fide of Chefapeak bay it is bounded by Potomack river to a certain head thereof, and thence by a weft line indefinitely in lat. - This Maryland line of jurifdiction with the province of Virginia, and of property with lord Fairfax, is not hitherto finally fettled; east and fouth, Virginia is bounded by the great ocean.

K. Charles II. having gratified fome noblemen with two large grants called the northern and fouthern grants or necks; when these noblemen claimed them, it gave great uneasiness to the fettlers, and the colony agents in England agreed with these grantees of two necks, for a small confideration.

Virginia is divided by the great rivers of Potomack, Rapanahock, York and James, into 4 necks, the two counties east of Chefapeak bay makes the fifth great division; the division between Potomack and Rapahannock rivers, is called the northern neck, and is at prefent the property of lord Fairfax of Cameron, an Englishman with a Scots title.

Lord Colpepper, who came over governor of Virginia 1679, was one of K. Charles II. patentees of the northern neck; having got affignments from the other pa-C c 4 tentees.

tentees 1688, 4th Jac. II. he obtained a patent for all the northern neck; and by inveigling the tenants to pay the quit-rents to his agents, he became poffeffed of all the quit-rents, and his heirs at prefent enjoy them by a kind of prefcription, but without any fhare in the jurifdiction, becaufe chargeable: he relinquifhed the government thereof to the crown. Lord Colpepper of Thorfway in England died 1719, having no male heir, the heirours are extinct, his daughter and heirefs married lord Fairfax: thus Virginia confifts of two properties in one government.

Here we must observe that the continuation of this hiftorical estay was interrupted for fome months, by the unlucky incident of an epidemical distemper, the small-pox, after about 22 years absence, being imported, and prevailing in Boston of New-England: the printer and his people in fear of the small-pox, left their printing office in Boston, and retired into the country.

We may also observe that the writer from an intire and unavoidable avocation of mind from all other matters but those of his profession, finds the thread of his narration affected, which with the growing remoteness of the provinces to be treated of, will render the following accounts lefs minute, but always avoiding any deviation from truth.

A DIGRESSION

Concerning the fmall-pox.

The appendix + according to our first scheme would have been out of proportion too large; therefore we

+ This hiftory or rather these minutes (as we have frequently hinted) were originally defigned as a common place loosely put together, but in an hiltorical manner; if they prove informing and useful, some subfequent writers may digest them; it is as much as my leisure time does allow, to draw the plan, and lay in the materials, a good artificer may with ease erect the edifice.

shall

fhall occafionally interfperfe fome things defigned for the appendix, more especially relating to diffempers at times epidemical or endemial in the British North-America colonies: as the fmall-pox has lately been epidemical or very general in Boston of New-England, from the begin-ning of April, to near the end of July 1752, I shall here infert fome particular obfervations concerning the fame, while recent in my mind.

I. There are many things infcrutable in the nature of this diftemper. 1. Why it did not emerge, or at least why it is not mentioned in history fooner than the beginning of the Saracen conquests? 2. Seeing it is univerfally agreed that a perfon who has had the fmall-pox once, is not liable to it again, the feminium thereof being fuppofed exhausted: how is it that parents who have procreated after having had the smallpox, their progeny is notwithftanding liable to receive the fmall-pox infection? 3. How is it that a woman having the small-pox when pregnant, the foetus does not receive the fmall-pox from the mother, but may receive it many years after being born? this was the cafe of capt. B----doge of Salem and others in my knowledge. 4. How is it that the disposition of the air (Sydenham calls them, various fmall-pox conflictutions) in fundry years is more or lefs conducive to propagate the fmallpox infection, and to render that diftemper more or lefs deletorious; thus we find by the bills of mortality of London, Edinburgh, and other great towns where the fmall-pox is never absent, that the number of smallpox burials in various years differs much, + without regard to the varieties of feafons and weather, and without regard to the more or lefs pernicious modes and fathions of managing the finall-pox; modes or au-

+ Within the London bills of mortality there died anno 1746, of the small-pox 3236. anno 1751, there died of the small-pox 998: in Edinburgh and West-Kirk parish, there died anno 1743, of the small-pox 249, anno 1747, there died 71.

thorities

thorities of leading phylicians have from time to time perniciously been introduced into medicine, witnefs in the fmall-pox, Morton's alexipharmicks, Sydenham's opiates, and the repeated blood-lettings of fome prefent noted practitioners in Great-Britain. May phylicians in writing avoid all fashionable whims and cant of the times; such as were formerly occult and specifick qualities, chemical reasonings, mechanical powers, and the like: they are of no use, and soon become obsolete.

II. I have been a fedulous attendant and observer of the fmall-pox, which in Bofton happened to be epidemical anno 1721, 1730, and 1752. In the year 1721, being a fort of novice in the imall-pox practice, I confided too much in the method of the celebrated Dr. Sydenham, particularly his cold regimen, and frequent use of vitriolicks and opiates, but from their bad fuccess I gradually corrected myself: 1730 I abandoned the cold regimen, and fublituted a moderately cool regimen: I laid alide the frequent ule of fp. vitrioli, as occalioning nauseas in the stomach, and of opiates as a remora or clog of the course of any diftemper, and as it folicits the morbid affection to the brain; with fuccefs I followed the purging method in the declenfion of the small-pox, I had the hint from the accidental natural purgings in that period which faved the lives of many, and was confirmed therein by the observations of Freind and Mead. 1752, I depended almost intirely upon the fund or stock of my own observations, and my principal indications were from the juvantia and lædentia. +

III.

+ Where thefe are not followed, medicine becomes a mere whim, and a ludibrium of the people; as in the fmall-pox, fome follow a hot regimen, fome a cold regimen, fome ufe repeated blood-lettings, fome a frequent ufe of opiates; others declare them pernicious; fome keep the body coftive, fome ufe the purging method, &c. it is

III. I am perfuaded that during the last 22 years absence of the small-pox in Boston, from 1730 to 1752, if it had been allowed its free courfe, confidering that perfons when children would have been the fubjects of it, fewer would have died of it, than have died of it in a few months 1752. If it is not allowed its free course when it does invade Boston epidemically, particular per-fons not qualified to receive it may avoid it, by retiring into the country for a few months. The not qualified are infants, their stamina vitæ are too tender; pregnant women; pubefcentes and for a few years after puberty, while their juices are in a juvenile fret; perfons upwards of 45 æt. (I write from observation, not from abstracted imagination) because their juices become rancid; and all perfons under any conflitutional or habitual diftemperature of body, particularly the fcrophulous or flrumous, who generally fuffer much in this diftemper; we may remark that the fmall-pox fometimes leaves fcrophulous difpositions in perfons formerly not fcrophulous. All others to render the fubfequent parts of their life more easy, may run the risk in the natural, that is, accidental way (by the pores of the fkin, by infpiration, deglutition, &c.) or by the more favourable way of inoculation.

IV. Before I proceed further, I shall give a general numerical history of the Boston New-England periods, &c. of epidemical sinall-pox. From the first fettling of the province of Massachusetts-Bay the small-pox has been epidemical in Boston only eight times, 1649, 1666, 1678, 1689, 1702, 1721, 1730, and 1752: I shall enumerate the periods which happened in this current century.

is only the juvantia and lædentia can determine the queffion, as they have in the inftances of Sydenham's grand miftakes of keeping the body bound, and frequent ufe of opiates. The miftakes of the moft celebrated practitioners ought to be more canvaffed, as their authorities are dangerous precedents.

1702,

Digitized by Google

1702, beginning of July, the fmall-pox appeared after thirteen years absence; the alexipharmick method and hot regimen were used; about 300 white people died of this fmall-pox; + the most burials were in the month of December, 74.*

1721, it was imported (from Barbadoes) by the Saltortugas fleet middle of April; it continued fkulking about until the middle of June, when the eruptions appearing in many families, the watches appointed to prevent its spreading were discontinued, and it was allowed to take its courfe. In the next parcel of decumbents, the eruptions appeared about the 7th or 8th of July. In the end of July it fpread much; in October was the higheft number of deaths, and about the middle of October fmallpox burials begin to decrease. Æneas Salter, employed by the felect men of Boston (the prudential managers of town affairs) to make a fcrutiny after the fmall-pox ceafed, by a book in feveral columns of lifts, he found that the number of perfons who continued in Boston (many fled into the country) were 10,567, whereof about 700 efcaped; the small-pox decumbents had been 5989, whereof 844 died, which is nearly one in feven. ---- This fmall-pox continued in Boston 8 months, about 80 died with purples and hæmorrhages, which is about one in ten of the deaths. ---- In and about Bofton 286 were inoculated, whereof the inoculators acknowledge fix to have died, which is about one in forty-eight. The small-pox of 1730 was imported from Ireland

+ Hitherto petechiæ (purple fpots) and hæmorrhages, of which many died, were called a mortal fcarlet fever invading the town at the fame time with the fmall-pox, but an entirely diffinct diffemper: 1721 I was the first who in New-England introduced them as deletorious fymptoms in the fmall-pox.

* In the beginning of this century, the inhabitants of Boston, blacks included, were about 6750, and the burials communibus annis about 230. Anno 1720, the inhabitants were circiter 11,000, and burials communibus annis about 350. Anno 1735, (1729 and 1730 were measure and statistic field inhabitants were about 15,000, and burials communibus annis 500. in the autumn 1729, and was fhut up in a few families during winter; beginning of March following it fpread much, the watches were removed, and 4th of March 1729-30 it had a free course, and inoculation was allowed. The highest number of burials after nine years absence was in June, it ended with the month of October. The decumbents were estimated at about 4000 (no exact fcrutiny was made) whereof about 500 died. which is nearly one in eight, and of these about 75 with purples and hæmorrhages. Of not quite 400 inoculated in Boston twelve died, is about one in thirty-three; the inoculated fmall-pox was not fo favourable as 1721, they were more loaded, and a more protracted confinement; many of their incifions fuffered much, and required the fpecial care of a furgeon for a confiderable time; of the twelve deaths three proceeded from the incifions ulcerating and putrifying, S-ry W-d's child, col. Ch-ley's child, Mr. G-e's foreman.

The fmall-pox of 1752. A fhip from London, capt. Coufins, with the fmall-pox aboard, was bulged Dec. 24, 1751, in Nahant bay near Boston; the people of Chelfey, the adjacent town, compafiionately affifting to fave the fhip's crew, received the small-pox; about one in four or five died; v. f. or blood-letting was blamed and happily loft its reputation in the fubsequent Boston fmall-pox. It arrived in Bofton in January following, by a failor belonging to the fhip, and got into five or fix families, but did not much fpread till 20th of March 1752, and Monday 23d inoculation was let loofe; fome greedy practitioners indifcriminately inoculated any perfons who could be perfuaded to receive it, even pregnant women, puerperas, old negroes, and the like; upon a fcrutiny made July 24, by the felect men and the overfeers of the poor in the feveral wards, the felect men request the practitioners to inoculate no more after 27th of July. To take at one view the ftate of the fmall-pox in Boston from Jan. 1752, to July 24, the following table may ferve.

S.mall-

398 A SUMMARY, HISTORICAL and POLITICAL, &c.

	Whites	Blacks
Small-pox in the natural way	5059	485
Whereof died	452	62
By inoculation	1970	139
Whereof died	24	7
Sick in 17 families	23	-
Perfons who have not received it	1 74	

There died of inoculation 31 perfons, not including the dubious deaths of Mr. Coleman's fon, who died by fubfequent nervous diforders and fore eyes, and the two daughters of Mr. Goldthwait who died under inoculation, but as it is faid by the fore throat illnefs. The forutiny reported, that the total of refidenters, fo called, at that time were 15,734, including 1544 negroes, and about 1800 abfentees who had fled from the imall-pox. Died of an inoculated fmall-pox, about one in eighty-two whites, and one in twenty blacks.

V. The fmall-pox in cold countries is more fatal to blacks than to whites. In the Bofton fmall-pox of 1752, there died whites in the natural way about one in eleven, by inoculation one in eighty; blacks in the natural way one in eight, by inoculation one in twenty. In hot countries it is more fatal to whites than blacks. In Charles-town of South-Carolina, when the fmall-pox prevailed 1738, upon a fcrutiny, it was found that in the natural way, of 647 whites, died 157, is one in four; by inoculation of 156 whites, died nine, is one in twenty : of 1024 blacks in the natural way there died 138, is one in feven and half; of 251 blacks by inoculation there died feven, is one in thirty-fix.

VI. In autumn the fmall-pox is the most deleterious; in all autumnal fevers there is a putrid complication from the declining and lefs vegete feafon; in winter the feafon does not allow it to fpread; the fpring, if not tco

Of VIRGINIA.

too wet, and the fummer, if not too hot, are the most favourable feafons for the fmall-pox.

VII. We improve in the management of the fmallpox: in the natural way 1721, died about one in feven; 1730 about one in eight; 1752 nearly one in eleven. which may be attributed to the gradually relinquishing alexipharmicks, and a hot regimen formerly recommended by many, being one extreme; and of a cold management the other extreme : by this Sydenham has done much damage ; as nature's helmimen, we have varied from a more cool to a more cordial regimen, according to the conftitutions of different patients, and the various stadia, and other circumstances of the same patient : v. s. or blood-letting, was feldom ufed; fcarce any use of opiates : the patient was kept in a natural temperature with a plentiful use of diluters; the body kept folable in all the stadia, and when the maturation was compleated, cordial purges for two or three days.

VIII. The greater or fmaller mortality in the fmallpox is not principally owing to the feafons, regimen, and the like; but fomewhat infcrutable in the various conftitutions of families and individuals; 1721, Mr. Bond, a carpenter, and five of his children, died with purples and hæmorrhages in Bofton; 1752, four children of Mr. Wier of Charles-town died, whereof one was inoculated. The commonly received notion of the fmall-pox being fatal to the New-England born, is not true and just, and is of bad effect in depressing the spirits. of New-England men when feized abroad; 1752 of the. fmall-pox decumbents in Boston died about one in eleven; it is feldom to favourable in any part of Great-Britain.

The fmall-pox is a malignant contagious eruptive puftulary fever, obferving certain stadia; communicable only by perfonal infection : it is not known to be endemial T

mial in any country as the plague is in Turkey, it was not known in America until the colonies from Europe introduced it. In the natural way, from infection received to the first eruptions, allowing a latitude for varieties of ages and conflitutions, are 14 to 21 days; in the inoculated way, are 7 to 14 days; but I suspect these of 14 days, to have received the infection in the natural way from the inoculator, or from the effluvia of his variolated doffils. The small-pox generally is not infecting, until a concocted pus is formed. In the small-pox time 1752, the chicken or fpurious pox was frequent, and fometimes paffed for the small-pox, and some perfons have ineffectually been inoculated from thence : but if there has been an apparatus of two or three days, though the pultules are watery or ichorous with a thin cyftis, if the bases be red with a circular florid cuticular expansion, we may pronounce it a genuine small-pox. There are valt varieties of the genuine fmall-pox; in general, the fooner the feveral stadia are accomplished, the more benign is the fmall-pox, and frequently the danger is in proportion to the number of puftules, efpecially in the face. In the fmall-pox natural and ingrafted, fome patients a few days before decumbiture, have transient intermitting complaints; fome after the genuine fmallpox puftulary eruption is compleated, have eruptions of spurious pustules.

To form a general idea of the fmall-pox, we may take the diffinct plump kind as a STANDARD. It begins with the common fymptoms of a fever (in the apparatus of many, there are no chills, rigors, and horripulations perceivable; a cough is no fymptom) particularly with a pain in the head, back, and limbs; opprefilion e regione ventriculi, naufea, or vomitings, fore throat in general, but no dangerous fymptom, it gradually vanishes after maturation; nervous affections, deliria, deliria, phrenfies, and fometimes convulfions in children; † the end of the third or beginning of the fourth day, the finall-pox pufules begin to appear; in fome few, the eruptions make their appearance without any apparatus fymptoms; generally, the younger the fubject, the fooner all the ftadia of any diftemper, particularly of the fmallpox, are performed; the fifth day they are round and inlarge their bafes of a lively red; the fixth day they come to a point; the feventh day the points or apices turn white; the eighth they turn yellow; the ninth there is a laudable digefted pus; the tenth they begin to cruft or fcab; the twelfth they are dry fcabs.

X. There are fo many varieties of the fmall-pox appearances, they cannot be reduced to claffes; we may observe that the very young and very old are scarce fusceptible of the small-pox, perhaps their vis vitæ is too feeble for bringing the variolous leaven received, to leaven the whole lump. I shall enumerate some of the most noted varieties. I. A distinct dry fort, few, not large, basis scarce inflamed, very small digestion, being warty or horny; the fifth or fixth day from eruption, they begin to dry and foon vanish, leaving no pittings, only freckles. 2. The distinct plump kind as above defcribed for a standard. 3 The coherent, not well defcribed by the writers concerning the fmall-pox; I - fuppofe they mean a frequent or cluftered fmall-pox depreffed, generally pitted or umbilicated in the center, and upon the maturation frequently attended with a fecond or fecondary fever. 4. The confluent, which are very irregular in their first appearances and fubsequent stadia; frequently they appear eryfipelas like, and after

+ Sydenham and fome others reckon them a good prognofick, whereas many fuch die in the apparatus and beginning of eruption; all practitioners obferve that purgings and convultions are generally the most fatal diftempers of children, therefore they must be bad fymptoms in the apparatus of their fmall pox; I know of no diftemper where convultions are a favourable prognostick.

Vol. II.

the

the period of maturation, they become an afh-coloured cruft or white fkin; their fecond fever frequently becolnes a hectick, not mortal until after forme weeks, months or years. 5. The fmall-pox interfperfed with perechiae, veliculae miliares, or fmall blifters of a limbid or biuish ferum ; with purple spots more or lefs diluted. and immorrhages, which are more mortal than the plague itself. N. B. In forme there is at first, a full or rashlike formidable appearance, but foon difappearing, the fmail-pox looks favourable. N. B. A round turgid fmailpox with florid interflices is the beft.

X'. Among the bad fymptoms in the fmall-pox, we may enumerate the following: + mild fymptoms in a finall-pox of a bad appearance; univerfal feeblenefs or prostration of strength; pain from the nape of the neck all along the spine; nausea, and aversion to any drink : fetid anhelous breathings ; groans, vigiliz, inquietudes or languid toffings, comas, a sparkling piercing bright eye threatening a phrensy; colliquations of any kind in the eruption, fuch as profule fweatings, many ftools. menstruatio tempore non debito, purples and hatmorrhages. A miliary eruption, or like rank meastes, or eryfipelas like; a spanish brown unequal eruption, a crystaline small-pox; a filiquous small-pox, where the puftules of a cream colour run together, waved of various figures, spungy not mellow; a seffile small-pox; where the confluent fort dry in the beginning of maturation; after the eruption is compleated, miliary blifters or purples appearing in the interflices containing a dark red ferum; a fudden subfidence of the pultules

+ Excepting in bad cafes of the small pox, in Europe, physicians are feldom called upon ; it is left in the management of the matrons and to nature : it is reckoned a diffemper of children, fuch as are red gum, toothing, worms, and the like; the Datch with good propriety call it kinderen packies, but few of the adults are to receive it, because when children they are allowed to have it in com-mon course.

• • • • • • • •

and fwelling of the face; the eyes flut up, opening fuddenly; pultules fessile dry subfiding in the center; interstices livid or pale, in the defquamation or declenfion, where a fanious gleeting fcab returns with a tedious expectoration of vifcid phlegm, and hectick; a cold refpiration; carrion like fetid ftools; a ftrong vibration of the carotide arteries; the first eruptions more general in the extremities than in the face and neck : scarce any die but in the drying defquamation or declension period; this drying fometimes happens in the first of maturation, or any time of the maturation protracted but not perfected; indigo coloured itains in the pultules; scabs or crusts of a bees-wax colour are the most laudable, the ash-coloured are bad, the black are very bad; where the puftules after maturation feem to be at a fland, and do not fcab or corrugate, the patient is weak, and the cafe dubious.

The management of the fmall-pox in general.

To receive the fmall-pox, when expected, in the natural or inoculated way; keep an eafy undifturbed mind, avoid catching of cold, refrain from violent exercife, ufe a foft dier, take a mercurial purge or two. 1. In the beginning * of the apparatus fever, give a gentle vomit (a rude vomit hurts as much as does violent exercife) it not only cleans the ftomach, but by its fhocks removes obftructions, renders the œconomy meable for a regular circulation. 2. When the defign of nature is obvious, and her intentions laudable, give no diffurbance by medicines, dilute plentifully becaufe of the cauftick acrimony, let nature 'keep its courfe; if any extra-

• When the fymptoms of the fmall-pox appear; the temper ought not to be too much lowered by a cold regimen, by v. f. or any unneceffary evacuation: occafioning a late imperfect, unequal, fecond crop eruption of bad confequence; neither fhould the temper be raifed by cordials and a hot regimen to force the circulating juices to a feparation of a greater load of fmall-pox than nature intended.

ordinary

Digitized by Google

ordinary fymptom happen, as is the cuftom in Great-Britain, call in the advice of a neighbouring honeft practiling apothecary or furgeon; or rather of fome experienced difcreet physician. 2. During the eruption and maturation periods, keep the belly rather foluble than bound, (Sydenham by a grand miftake recommends coftiveness even to the thirteenth day) and upon maturation, a purging natural or procured, are falutary and have faved the lives of many, particularly in rigors and anhelous breathings. 4. In the whole course of the diftemper, the patient is to be kept in a moderate or natural temper, an increased heat inflames the habit, cold depresses the spirits too much. 5. Give vegetable acids (mineral acids I have found too rude, and do hurt by occasioning a nausea or vomituition) because there is a notorious animal or urinous acrimony in the cafe. 6. When the maturation is compleated, to prevent or alleviate a fecond fever, from fome part of the variolous pus being abforbed by the circulating fluids, give fome cordial purges + for two or three days; upon any unlucky tranilation, it is easier to folicit the intestines to a discharge, (as being more under command, than any other fecretion or evacuation) than the falivary ducts or urinary passages: this purging moderates the fuppuration, and confequently prevents much pittings and fcars, moreover it procures fleep like an anodyne, and more benignly, because opiates protract all the stadia; a protracted delquamation, with a sharp fanies or corrolive

† In the fmall-pox of 1730, I observed fome patients with violent fecond fever symptoms, upon maturation compleated, feized with a natural purging which gave great relief; but as a blind follower of Sydenham. I check'd it by opiates, which occasioned a return of the violent threatning symptoms; until the effect of the opiate being over, the purging returned with great relief, and fo toties quoties : this gave me a throng hint, that purging upon maturation compleated was falutary : I used it with fucces, and introduced the good opinion of it with many practitioners, to the faving of many lives; foon after I found this purging method recommended by Dr. Mead, Freind, and other physicians in England.

ichor,

ichor, gleeting from under the fcabs, occasion pittings and fcars; fo does picking and fcratching of the fmall-pox fcabs, before a new fcurf fkin is formed underneath to prevent the injuries from the external air. 7. Towards the end of the defquamation give a mercurial purge or two to defecate the blood and other juices. +

We may further observe, 1. That there are such anomalies in conftitutions, that a few extraordinary inftances proof against all pernicious management, are by no means to be adduced as precedents for forming of a regimen : Dr. Fuller in his Exanthematologia, writes, that a fon æt. 15, of Dr Hooper, bishop of Bath and Wells, in a very bad fmall pox, for twelve days when awake, every half hour drank a bumper of ftrong beer, mountain wine, or brandy; he recovered: fome drank only cold water and did well : Sydenham's hiftory of a young man, who in the absence of his nurse was thought by the standers by to have died and was laid out on a cold board, the nurse upon her return, perceiving some signs of life, put him to bed and he did well. 2. Let not numbers of decumbents be put up in one close room, the congeries of putrid effluvia, renders the ambient air a puddle of corruption, and without a proper fpring to continue the circulation of our juices, which is the life of 3. Let not nature or the fpirits (this ought animals. to be regarded in all acute diftempers) be difturbed by noise or contabulation. 4. Where medicines are required, administer no medicine that continues to be difagreeable to the ftomach. 5 Any violent fymptom appearing, must be immediately obviated; delays here are dangerous. 6. Let the belly be kept foluble; formerly from an implicit faith in Sydenham, I lapfed into that error, that the belly ought not to be kept foluble, left nature fhould be confounded in her proper courfe; whereas in truth, nature is thereby alleviated. 7. Avoid

+ Sometimes a heltick fever remains to the 2cth, 3cth, 4cth day or longer, and the patient dies heltick or confumptive; fometimes a fcrophulous difposition remains for life.

grief,

Digitized by Google *

grief, intense thinking, or the like, particularly avoid fear; they hinder perspiration, and all other tendencies to the furface or ad extra of the body. 8. Upon the maturation, where the circulation is much crowded, the fwelling of the face and arms, a ptyalism, a diabetical profluvium are of great relief; cordial purges anfwer the fame intention, and are more at our command; spirting frequently begins with the eruption, and ought not to decline until about eleventh day of illness; it gradually becomes thick and ropy and requires pientitul diluting. 9. Purples and hæmorrhages are more mortal than the plague itself.

Concerning inoculation of the imall-pox.

The novel practice of procuring the small-pox by inoculation, is a very confiderable and most beneficial improvement in that article of medical practice. Iŧ is true, the first promoters of it were too extravagant, and therefore fulpected in their recommendations of it; and fome medical writers inflance fundry diforders arifing in the animal æconomy from fome foreign liquids being directly admitted into the current of blood : thefe confiderations made me, 1721, not enter into the practice, until further trials did evince the fuccess of it; but now after upwards of thirty years practice of it in Great Britain, and the dominions thereto belonging, we found that the fmall-pox received by cuticular incifions has a better chance for life and an easy decumbiture; that is, the imall-pox fo received is lefs mortal, and generally more favourable, than when received in the accidental or natural way, by infpiration, deglutition, pores of the skin, and the like. We must still acknowledge, that it falls fhort of the recommendations given by its first promoters, being no absolute fecurity against death and other calamities of the fmall-pox; it produces all the varieties as in the natural way, from the most favourable dry horny distinct kind.

kind, to the most deleterious attended with purples and harmorrhages; the confequential boils and impoflumations are more than in the natural way, besides their incisions ulcerating and purifying. We histed before, that in Boston 1730 of the twelve inoculated deaths three were occasioned by their incisions; two in three a few days after inoculation complain in their axillary, inguinal, or parotid glands, * before the apparatus fever makes its appearance. We are informed that of the first inoculations in England, nine in ten were afflicted with fores, fo as to require the immediate care of a furgeon or dreffer for fome time. †

To alleviate the crifis and deleterious fymptoms of the fmall-pox, 1. We find good fuccess in the Circassian way of procuring it by variolous pus applied in any manner to fresh cutaneous incisions. The manner which I happen to use, is a small cuticular facrification by the point of a crooked bistoury or scalpel, in the inside of the upper arm, and in this incision I lodge a very small variolated dossil in the form and bigness of a barley corn, 11 contained or secured by some sticking

* Where the circulation labours, the glandular parts are the moft liable to complain.

+ If the imall pox procured by inoculation was fo favourable as at first pretended, it would require only a barber surgeon or cuppers the incition or fcarification is done with less risk than common bloodletting, and requires only a fort diet and short confinement under the simil care of a nurse or attendant, and a practitioner's large bill would appear ridiculous and imposing.

At prefent in London, they generally use a finall formatch, or fourification in one arm, and lodge therein a finall bit of variolated thread. There is no proportion or dose of variolous matter requifits for inoculation; Pylarini writes, that by pricking the fkin with needles dipt in variolous matter or pus, people have been inoculated: the variolous mattin is inconteivably fubtle; 730 l accidentally inoculated Mr. W. Phips, by using in v. f. inadvertently a lancet (wiped clean and dry as usual) by which I had the preceding day taken fome variolous pus for inoculation; it is true I inoculated him afterwards in the common manner, but all the itadia of the fimalf-pox took their date from the v. f. and the orifice feftered accordingly. l

plaifter

plaister for 48 hours, and afterwards dressed daily with fome gentle digeftive. 2. More incifions than one, is an unneceffary running the rifk of more ulcerating incifions. 3. Hitherto we have not perceived any difference in the small-pox received from a laudable diffinct kind, and that from a difmal confluent kind, which fome of our audacious inoculators have used in want of a better, that they might not lofe the benefit of an inoculated patient. Dr. Wagstaffe writes, that the criminals in Newgate 1721, were inoculated by pus from a fluxed fort of a perion who died before the inocu ations were performed. 4. The caution that perfons who are to be inoculated take, not to receive at the fame time the infection in the natural way, is a vulgar error; the receiving of infection upon infection does not add to its intenfeneis, as we may observe in perfons who receive it in the natural way and are continuedly expoled to repeated infections, because whatever infection first takes place, renders the subsequent infections effect or abortive, and as the inoculated smallpox is more expeditious in its course, any other infection would prove abortive.

The hiftory of inoculation relating to New-England, is briefly as follows. The Circaffians living between the Euxine and Cafpian feas, time out of mind, have carried on a confiderable branch of trade with Turkey and Perfia, in felling their own children and young flaves taken by excursions from their neighbours; but more especially their young women, they are beautiful, and in great request in the seraglios and harams of the Turks and Perfians; while young they give them the fmall-pox by inoculation or otherwise, and they who retain their beauties are carried to market. This Circaffian traffick conveyed the practice into Turkey; the Turks at first from their principle of predestination would not come into it, the old women of the Greek church practifed it for fome time among the meaner fort of people; Pylarini writes, that 1701, it first began to be uled among the better fort in Constantinople.

توا

1713,

ł

1713, Timonius from Constantinople fent to the royal fociety in London incredible recommendations of this practice, " that for the preceding eight years fome thousands had been inoculated, and none died, while at the fame time, half of the affected in the common way died in Conftantinople; and what is valued by the fair. inoculation never leaves pits or fcars; children have no convultions." Pylarini, the Venetian conful at Conftantinople, 1714, fent to the royal fociety a more modeft account of the fame. " I was not an eye-witnefs to all that I now relate; inoculation fometimes does not take place; with fome, in the glandulous parts and emunctories, absceffes do arise after some time." Dr. Le Duc, a native of Constantinople, and who was himself inoculated, affured Dr. Jurin, that out of many thousands, in the space of about forty years past, who had been inoculated in and about Conffantinople by one Greek woman, not fo much as one perfon had mifcarried.

1721, I lent these communications to Dr. Cotton Mather, a clergyman of Boston; being very credulous, that is, of great faith, when the small-pox appeared in Boston, that he might have the imaginary honour of a new tangled notion, surreptitiously without my knowledge set a rash undaunted operator + to work, and by three practitioners in town and country, about 286, were inoculated, whereof about one in forty-eight died in Boston.

These communications were regarded in England, only as virtuoso amusements, until 1721, Mr. Maitland, a surgeon in the retinue of Sir Robert Sutton, the British ambassador at Constantinople, upon his arrival in London, from some scanty observations, but mostly from

+ This undaunted operator imagined, that by going to London with a quack-bill of his inoculation performances in New-England, he might acquire a fortune in London; but io it happened, that void of common difcretion to couch his ignorance and filly mean aflurance, he returned to Boiton without being called upon to perform any inoculation.

hear-fay,

409

here fay, with the merveilleux of a traveller, broached shis novel practice, and a few were inoculated with fuccess ; which induced the royal family to think well of it, and by way of experiment fome condemned criminals were inoculated in Newgate with their own confent. In the foring following by direction of the princels of Wales, fix holpital children, and foon after five more holbital children from zet. 14 weeks to 20 years of age were inoculated; fome did not receive the infection, as having had it formerly, or from fome other impediment, but none died or 'fuffered much : upon this encouragement, Mr. Amyand, ferjeant furgeon, was ordered to ingraft the small-pox on princes Amelia, set. 11, and prince's Carolina, set. 9, they had them favourably; this encouraged the practice; and from the accounts of Dr. Jurin, fecretary to the royal fociety (a great promoter of inoculation) in the first three years, 1721, 1722, and 1723, of the practice, in all Great-Britain were inoculated 477 perfons, whereof nine are fufpected to have died, and as of these twenty-nine did not receive the infection (this is one in fixteen) the deaths were nine in 448, or two per cent. in this period of three years; the principal inoculators in England, were Dr. Nettleton in Yorkshire eighty patients, Mr. Amyand, serjeant furgeon, fixty-two, Mr. Maitland eighty-five, &c.

The first promoters were fo incredibly marvellous in their accounts, as would have difcouraged any fober man to have attempted it, if the fubfequent more moderate accounts of its fuccefs had not given a reafonable encouragement. Timonius wrote, that of many thoufands inoculated in the fpace of eight years none died. Le Duc writes, that in the fpace of about forty years, out of many thoufands inoculated by one Greek woman in and about Conftantinople, not fo much as one perfon had mifcarried, as is before hinted. Mr. Maitland in his printed account fays, "Dying is a cafe which never happened in ingrafting; that the giving of the fmall-pox by inoculation never yet failed, nor ever

ever can; no head-akes, thirst, inquietudes, and other fever fymptoms, not one in a thousand, the pultules never leave any pits behind them." Dr. Brady of Portfmouth writes, " not one ever died of inoculation rightly "performed, it always is favourable." Dr. Harris says, that " inoculating is a certain remedy against the confluent kind." Mr. Colman, a clergyman, and principal promoter of the practice in Boston of New-England, published, that " none die, no blains or boils follow the practice." Mr. B ----- ton the first operator, published, "there is no truth in the reports of people dying under inoculation;" his accounts are fo abfurd they invalidate themselves, and require no other animadversion .-- Other inoculators have published, the inoculated small-pox is always favourable,-never infecting ;- to fafe as to require no physician ; - the puftules never exceed ten to a hundred, and do not pit +

Dr. C. Mather, who first fet up inoculation in Boston, in his published recounts of it, shows what finall dependence there is upon weak authorities, "fome cats 1721, in Boston, had a regular small-pox, and died of it." * —— During the small-pox, the pigeons and dunghill fowls did not lay nor hatch.—He never knew blistering mits of faving life in the small-pox.—The patient is more healthy after inoculation, it is useful to women in child-bed,—it dries up tedious running ulcers, makes the crazy confumptive people hearty,—and rids people of their former maladies.

Īп

+ It would be idle in me, formally to confute these unguarded affertions, daily experience evinces the contrary.

• He had not ditcretion fufficient to obferve, that the fmall-pox is a contagious diftemper, peculiar to mankind, as is alfo the meafles, and plague;, that other animals have their peculiar epidemical or malignant diftempers, murrain among neat cattle, rot among fheep, and the like : we may alfo obferve, that fome fpecies of trees only are fusceptible of peculiar blafts; that male animals only imprgenate females of their own fpecies.

] Dr. Berkley's tar-water is lately recommended in the fame manner

In making of medium eltimates, we ought to take large numbers in a long feries of time, but not the cales of fingular families, where fome may fay that notorious circumilances were not avoided or attended to, fuch as pregnant women, child-bed women, old negroes, and the like; we had a remarkable inftance in the inoculations of Bofton, 1752, of five perfons in one family, Mr. Sherhurn's inoculated by Mr. G—r * three died; of 72 or 73 perfons inoculated 1721 in Roxbury and the adjacent country towns by Mr. B—n, five died; which is about one in fourteen.

In short, the risk seems to be only two to three per ct. and by the purging method, and some prudential cautions, might be further reduced.

I am at a loss for the reasons, why inoculation hitherto is not much used in our mother country, Great-Britain; confidering that it has with good fuccess been practifed in our colonies or plantations, particularly in Boston, New-York, Philadelphia, and Charles-town of South-Carolina.

.

The advantages of inoculation are, 1. The choice of fuitable feafons. 2. A previous proper regimen. 3. A laudable (this is the most eligible) variolous pus or leaven. 4. We have no inflance of any who received the finall-pox by inoculation, receiving the fmallpox again. 5. By many trials for upwaids of 30 years in the dominions of Great-Britain, it must be acknowledged a more favourable manner of receiving the fmallpox. 6. In a place of trade, it gives the fmall-pox a quick courfe, and the interruption of commerce flort; in the very general fmall-pox of Boston 1752, the ti-

ner as a panacea: the principal advantage I found in it, is, when a physician is tired out with some tedious chronical case to turn the patient over to the use of the bishop's tar-water; valeat quantum valere potest.

* This is not defigned as a perfonal reflection upon my friend Mr. G_____r, but to illustrate that inoculation is very far from being a prefervative against death, as was alledged by fome of its promotors.

morous

morous fled from the fmall-pox beginning of April, and with the trade generally returned beginning of September.

The difadvantages of inoculation, whereof fome are obviated. I. Inoculated deaths being criminal: the royal family by their example, have removed this fuspicion. 2. Procuring of abortion to women with child, is a fin in foro divino, though consided at by us. 3. A fordid mercenary manner of perfuading childbed women to receive the finall-pox by inoculation, upon pretext of cleanfing: whereas the puerpera fret in the circulating juices, is by this leaven increated, colliquative purgings enfue, and finally death: I can adduce fome notorious inftances in Boston. 4. The communicating + of perfonal or family chronical and conflitutional diffempers to the inoculated (a man has or ought to have a proper regard for his progeny and fucceeding generations) has been a confiderable flumbling block with me : on the other hand, from many trials in the fpace of upwards of thirty years practice of ino-culating the fmall-pox in the British dominions, no fuch communications have been observed; the itch itself, a notorious cutaneous diftemper, is not faid to have been

+ Chronical differences have been received by cutaneous or external applications: we have a notorious inftance of this, fome years fince in Cork of Ireland; a nurfe reputed for drawing of child bed women's breafts; from a venereal ulcer under her tongue, infected the nipples of her women; these women in coition infected their hufbands, and the city became generally poxed. All constitution diftempers have tome idea or feminium in every drop of our jucies; the acute diffemper according to its nature foon fhews itfelf, the chronical ails act imperceptibly and flowly in the body; the diffempers ex traduce, fometime-intermit a generation or two, and again appear in fucceeding generations, fuch as the plora of North-America, called a falt rheum, that is, a fcurvy, negro yaws, fcrophulous diforders or king's evil, venereal difeafes, manias and other hereditary nervous disorders, arthritick or gouty ails, nephritick cases, and the like, which may occasion inquietudes in the minds of the inoculated, and render them incapable of the greatest happiness in life, mens sana ia corpore fano.

thus

414 A SUMMARY, HINTORICAL AND POLITICAL, &C.

thus communicated : and if after a feries of years or geperations any fuch fears flould become real, fuch diffant views cannot affect much where the prefent relief or better chance are in the cafe. r. It foreads infection very quick, and endangers the neighbourhood not prepared to receive it: this is one of the reasons that it is felony or criminal for a man to fet his own house on fire, because it endangers the vicinity : it is a hardship upon the publick, to oblige people abruptly to leave their habitations and business; some civil regulations feem requifite to obviate fome difficulties which occur in this practice. 6. It promotes the practice of Pfraudes, as bifhop Tillotfon in another cafe writes, that fome men had got a fourvy trick of lying, in favour of what they imposed upon people as truth, as lately happened in the Boston inoculations; upon an actual furvey it was found that in about 2000 inoculations, 31 had died (others including fome difputed cafes, fay 34) the promoters gave out 3500 inoculated, but gradually reduced the number to 3000, and afterwards to 2500, (fee the Bofton gazettes published in June 1752) and at last acquiesced in the actual scrutiny of about 2100: in policy of infurance offices, this take reprefentation would be reckoned an imposition, because people who would ran a rifk at 1 per ct. may not run the fame rifk at 2 or 3 per ct.

Virginia settlements.

At first there were only a few general patentees, but at present every freeholder may be reckoned a patentee.

The government of Virginia pretend to extend their fettlements fo far back weitward as the great lake Erie; and fome branches of the Miffliflippi river, comprehending an immenfe quantity of land unfettled; and as their fettlements extend gradually towards the mountains, they create new counties from time to time, for the conveniency of attending inferior courts of judicature.

The

. Of Versona.

The frontier or furthelt back counties being of great extent, no navigation, and not much foreign trade, hald quarterly county courts only; all the others have monthly courts; there are variations from time to time; at this time anno 1752, they are as follows.

Quarterly county courts.

Brunfwick, } Laf Fairfax, Sep Lunenburgh, Fir Frederick, Seco Albemarle, Augusta, Fou Monthly Henrico, Richmond, Firf Williamsburg, James city, Northumberland, Seco Nanfemond, This

Last Tuesdays in March, June, September, December.

First Tues. in Jan. April, July, Oct. Second Tuesdays in February, May, August, November.

Fourth Tuesdays in faid months.

Monthly county courts.

First Mondays in every month. Second Mondays. Third Mondays. York, Prince William, Fourth Mondays. Cumberland, Middlefex, First Tuesdays. Elizabeth city Spotsylvania, Prince George King and Queen, Second Tuesdays. Northampton, Stafford, Effex, Gooch land, Third Tuesdays. Princefs Anne, Surrey, Louifa. Fourth Tuesdays. Weft-

Westmoreland, Accomack, Charles city,	Laft Tuefdays. Firft Wednefdays.
Warwick Ifle of Wight, Hanover,	First Thursdays.
New-Kent, Southampton, Norfolk, Culpepper, Gloucefter, Orange, Chefterfield, King George, Lancafter, Carolina, King William, Amelia.	Second Thurídays. Third Thurídays. Fourth Thurídays. Firft Fridays. Second Fridays. Third Fridays each month.

Thus the government is divided into forty-five counties, whereof fix hold quarterly courts, and thiry-nine hold monthly courts; fee the proper article of legislative and executive courts.

The country between James river and York river is the best inhabited, cultivated, and produces the best tobacco.

Lunenburgh, their remotest settlement, is about 100 miles S. W. from Hapover; Hanover is 60 miles from Williamsburg, the metropolis.

The lands welt of the Virginia fettlements are claimed by the Six nations, called by the French Iroquois, and by the British, Mohawks; they are also claimed by the fouthern Indians; fee vol. I. p. 187; and by the French of Canada. The best lands are above the falls of the rivers; the first falls of each river must be the barcadiers for the back or inland countries, and in time become great towns or corporations.

The END.
