

Report on Total Revenue Used as Compensation for Student-Athletes

Public Act 25-1

January 2026

We are deeply grateful for the Connecticut General Assembly's steadfast support of legislation that permits student athletes to earn compensation through endorsement contracts and revenue sharing agreements with Connecticut colleges and universities.

This important change stems from the landmark *House v. NCAA* settlement, which has now been implemented nationwide. The General Assembly's proactive leadership on this issue is greatly appreciated, as it ensured that Connecticut student-athletes receive the same opportunities and benefits as their peers across the country while allowing institutions like the University of Connecticut to compete on a level playing field with programs in other states.

The following report is made pursuant to Section 13 of Public Act No. 25-1:

Amount of Total Revenue Used as Compensation for Student-Athletes From July 1, 2025 - December 31, 2025: **\$11,601,494.15**

Total Number of Student-Athletes Receiving Compensation:

536
