

My mother has been a victim of police abuse in Darien. Darien's chief of police has committed heinous criminal and civil violations against her. He is not accountable for his actions or the extraordinary damage he has to my mother and family because he is indemnified from prosecution by QI. We will never have justice until QI is overturned at a state and federal level.

As a Connecticut resident, I believe Black Lives Matter. Police violence and racism are Connecticut problems, and I expect every elected official, including you, to work to end them. Please support LCO #3471, "An Act Concerning Police Accountability," including the bill's current language banning qualified immunity for police and prohibiting stop and frisk. Please also support the creation of an inspector general to investigate and prosecute police misconduct, and make changes to this bill to ensure that inspector general is truly independent from prosecutors who work with police.
