

Hello, My name is Dawn, I had wonder why police when in danger use deadly force, why cant they shoot to wound, A man or women is shot in the leg, they will go down or limp, This way they dont die & will not be mistreated by them. I have seen so many that can shoot someone in the leg instead of the heart. I believe that some of these people should have not died if the police shot people in the leg, if the problem arises.
