

There follow some questions and suggestions regarding the proposal

13 What is the definition of stakeholder? Since the legislature is in the hands of the party of the Governor, the selections should not be by the legislature but by a bipartisan equally represented committee and they should appoint whomever and not be forced to seek out some activist "stakeholder"

17 The proposal for local a local review board should be mandated, not voluntary. It is most likely needed most in those locations which would choose to opt-out. The board should be composed of equal party affiliations or independents but most importantly they should be non elected persons from the town or city. They should act as an ombudsman to hear complaints from residents.

22 The no frisking policy seems to be putting officers at risk of an unnecessary surprise. When there is any reason to anticipate a surprise, frisking should actually be encouraged. No one gets hurt including the Frikee.

23 This part should include a statement from the accused as to how they saw the facts.

There should also be a rule that prohibits the issuance of infractions that were not actually witnessed by the officer. Basing infractions on someone else's supposed observation should never occur. All infractions should be reported by the local authorities not the DMV and reporting should be at the time of the incident not weeks later. The local officer issuing the citation should be readily identified in case testimony should be required. Infractions should never be issued by the DMV at the behest of a local officer.

Respectfully Submitted,

Don Hutchinson
