

My name is Dr. Armand Gagliardi, proudly from Branford, CT.

I am for change to the status quo of policing, but I do not support taking protections away from our states law enforcement. I am specifically referring to qualified immunity. It is already extremely difficult for our law enforcement to be effective at their job with the political climate the way it is. We should not be offering a knee jerk over-reaction by removing all protections. Most of our law enforcement officers are good people looking to do good in our world. The more we forget about them, the less they are going to be able to help us. Please make changes, but make sure to help our officers as much as this bill is going to help the public. Thank you for your time and consideration.
