

Gabe Hernandez

327 million in America and only 1000 people died by cops. This bill is legitimately a problem and it takes away multiple rights from officers. As a politician it is sad that you would ever consider this. A weak move made by the sense of fear The State Of Connecticut senses from its population. As leaders in power, and the governor this is a sad excuse to cover up your tracks and back actions. This bill is unnecessary, undermining officers and as a political office person, you have never experienced what cops do everyday. You're saved by 4 walls you sit in everyday and do nothing. Fix the problem, don't let the problem fix you. Get your shit together Governor and state of Connecticut. You make it sad to be part of this country.
