**Testimony:**

My mom pass away on 2020 and I went to an officer and asked could she call Mental Health for me and I told her I'm not feeling like I'm going to hurt staff or other inmates or myself! So when Mental Health came into the unit she never talk to me or evaluated me or anything, she just had officers come into the unit hot with K9 Dog and L.T supervisor holding mace on his right hand, and now at that time I was confused with disbelief of what's really going on here because I was just calling for help with my mental health struggles that Mental Health know about on my medical mental health records. I could of got hurt or killed by the officers that came into south block 2 unit!

Then when the officers got me to the B.O.S (behavioral observation status) where the location is in R.H.U, the cell I was in was Dirty with blood or some kind of poop or something on the Walls and still at that time Mental health staff never ask me what happen with me! I requested for the report from F.O.I and they have not gave it to me yet! and I put a request to the M.H worker asking her why she never ask me what happen or why she never interview me at the time when she came into the unit! and I also put a request to the doctor and she have not responded to my request! They know they was wrong how they handle my Mental Health issue and they not trying to hold anybody accountable for their actions for what happen to me on 12-29-25. I could of got hurt or killed that day! This is my testimony from Alain Leconte 341059
