

For 1/29/26 Correction Advisory Meeting

My truth regarding my Connecticut prison persecution is stranger than fiction, but can be confirmed upon a reasonable investigation.

Involved parties include the Governor's office, the D.O.C. Commissioner's office, Cheshire Correction Inst.'s warden and officials under her direction, and even Ombudsman DeLaughin

L. Ward. Ignored inmate warnings finally resulted in an attempted rape and murder-averted by seconds. I now fear a recruited replacement assailant as I am an unexpected surviving witness.

The assailant's name and risk to myself was known to the above mentioned parties.

The Governor's office engaged an official for intervention, but this effort failed.

The warden personally arranged for the assailant to be housed in proximity on my tier level, providing opportunity to the means and motive.

The ombudsman had been informed in writing and by phone calls, but was ineffective in insuring safety.

A most sensational headline, as to follow, has factual support until proven otherwise.
