

Ever since my incarceration there has been one concern I've had. I have also been impacted by this concern for many weeks at a time. Anytime my family has wanted to contact me through the mail I would be waiting weeks to months. The mail contained more paperwork that is required for me to have visits. Most of my family is out of state which means my most common way of seeing them will be over video. I have not seen my son in months. Yes I speak with him daily but it's not the same. My boy is only six. He asked me the other day if I was dead. I think it's because he hasn't seen me. I believe somewhere in his mind he believes I've died. I've tried explaining the situation to him but at his age I'm not too sure of what I was saying he understood. Even at the time of me writing this letter I have not seen my son. I was told that there is one person that checks all the mail. I've heard that the person that does check the mail does it voluntarily. I'm not sure if any of that has any ~~the~~ truth to it but it is what I was told. If I could suggest making this a position that come with pay and benefits. If this issue could be reviewed I would appreciate your time. Thank you.
