

Dear Mr. Ombudsman (Devaugh Ward),

I was just made aware of your scheduled Correction Advisory Meeting. And your request for written testimonials by those who have been negatively impacted by the neglect and total disregard for needed medical treatment.

My name is Fredrik Holmgren and I have a story like no other that would aid in getting to the truth of the matter at hand. Which is that many people have been overlooked when they need medical attention.

I had cancer in 2019 on the tip of my kidney, they waited an entire year before they decided to send me for surgery. During the year that they stalled I kept asking them to send me for the surgery. However, by the time I was seen the doctor had no choice but to remove the entire right kidney.

This is only one instance of the ongoing neglect I am presently experiencing. I had a stroke in 2022, never got therapy, loss of use of left arm. Writing lots of paperwork. I am suffering. I have much more to share with you. Please contact me ASAP.

Sincerely Fred Holmgren 61865 L-2 = 61
