

Hello

1/12/2026

My name is Isaiah, D. Wash, and i'm currently incarcerated in MacDougall C.I and since i been here i haven't felt safe not because of the inmates, I don't feel safe because of the people that work here. On January, 3rd, 2026 around 10-11am I had a diabetic seizure due to low blood sugar, I been a diabetic since i was 11 years old, but on that I had a seizure they sent me to the outside hospital (St. Francis hospital in hartford, Ct) to make sure everything was alright and it was, but its what happened when i got back to the facility. I got back a little bit after dinner so it was like 4:30p.m I went back to my housing unit that they assign me to so around 7-7:30p.m i was called down to medical, I got dress and went to medical it was a nice 2minute walk. When i got there i gave my pass to the officer that was at the desk, I sat down waiting for one of the nurses to call me in, a couple minutes go by, so i go to the back to see what was going on, I see one of the nurses she asked me what was i doing there, I told her that i was called and that i have my pass and that the officer back at the unit said medical called for me then she said nobody from medical called for me,

not because of the people that I'm incarcerated with, it's the people that work in these facilities they're the ones that make us feel unsafe, Cause you never know what they gonna do or try to accuse of. to mess up your good time and make it look like you did something wrong when it's really them doing wrong so they could earn stripes and like Lt B. Milner she said "She would do whatever she has to do to keep her stripes" that's not right at all something should be done and then when we write them up all the officers are against you taking food from you taking your pictures etc Connecticut Doc Facilities are not safe at all and something needs to happen We need help and a change, these officers need body cameras so the state/world could see what's really going on inside Connecticut Department of Corrections.

If you have questions you could download the "Securus app" on your phones and eMessage me any questions that you have my information is #405468 Isaiah Wash

Thank you.
