

1-21-20

I am Inmate Luis Hernandez # 354919

I can testify that I have seen

and been through all these type

of conditions that are being  
said about D.O.C just two  
months ago in Hartford H.C.I  
my food that I paid for was  
being eaten by the rats and  
everyday I would see a group  
of rats running around all over  
the place mice poop everywhere,  
the water was always cold  
where we had to take freezing  
cold showers this is a current  
issue here in C.R.C.I we  
are showing with freezing cold  
water when its already cold out-  
side most of us are getting sick  
because of it also we was on  
lockdown everyday because the co's  
claimed that they did not have  
enough staff so we had to  
be lockdown so many times my  
~~mental~~ mental health was  
affected because of this →

Also my visits was being canceled because of Doc not having enough staff I was not allowed to see my loved ones

I have also seen the slow response of medical <sup>more than</sup> gone time I seen this happen in codes for example I saw this inmate who was jumping on the floor and white stuff was coming out his mouth I knew it was medical because I knew this inmate and it took staff about 15 minutes to walk in and when they did this inmate was handcuffed

while on the floor still

this is my testimony we

are all concerned about these current conditions at Doc

and are loved ones as well

Thank you for giving us a chance to speak out ~
