To whom it may concern

I am an inmate who has endured 16 plus years of incarceration in ct prison, The living conditions we are subjected to are extremely harmful and unsafe. We have done wrong, yes! But we shouldn't feel as if we may not make it home due to the hazardous and uninhabitable living situations, such as black mold in showers because, we are not allotted the proper time to clean our living space or not provided the proper cleaning materials.

Ceilings leaking, wet fiber glass floating over heads, going weeks without our showers, sinks and toilets because they're broken and the C/Os takes their time to fix these things. Being laughed at when asking C/Os for a covid mask due to flu outbreaks and comments are many such as "you will be OK!!"

I personally have had covid three times in prison and have feared for my life greatly due to medical mistreatment and the C Os blatantly not caring!

Not being provided with clothes, boxers, socks and the like in a proper timely fashion. How can we rehabilitate when we are not given proper treatment to take care of ourselves, mentally and physically but are just forced to follow sets of rules without any positive reinforcements whatsoever. Thank you for your time eye/ears.
