JOINT COMMITTEE

I would like you to pass the bill where constant
prisons do 60% of our sentence of 85% to make
parole or at least to get released to at halfway
house. I believe that bill was call 25 and under
where anyone come to jail under age 25 could
do 60% of their time to get released back to the
community. Right now you are only at 20 and
under.

Additionally, I would like you to
move the mental health D.O. spending hearing to
authorize involuntary psychiatric back into

the courtroom because here in the D.O.S
these mental health staffs are misusing
the mental health department by M.D.
diagnosing guys/girls and prescribing
or psychiatric involuntary parcel medication
R/ the wrong reasons such as for us
bring grievances on everybody staffs and
to justify their very tokened budgets.

These mental health staffs or
personnel in here should be losing their
jobs and hired to practices. More than
half of them need to get laid off
because there is much work here for
so many of them to do, so they are
just approving medication to whoever
doesn't need it to justify their budgets.

Take in mind that all staffs are
involuntary for all types of reasons and
David and Robert, the staffs don't see
why these D.O.S staffs should be
given away with it for so many de
they feel as though they are hired to
