

Dear State of Connecticut Legislatures,

I am extremely shocked, disturbed, and disappointed in how this bill has been sprung on the public. We have not had due process in the legislative process and this bill goes **against the rules** that the legislatures **are sworn to uphold**. Myself, my husband and children would be there on Monday at the Capitol fighting against this bill but since we are **public** school teachers here in the state of Connecticut we must uphold our duty to our students and educate them. When you look at the room on Monday envision four more bodies we are there in spirit to say **NO** to this bill.

If you are going to get suckered into the lies and the fear that is happening in this country and take away our rights to exercise our religious freedom **shame on this state**. I have been teaching for 11 years, my husband for 13 years, I know other families who share the same religious beliefs and do not vaccinate. Their children are no threat to other children in public school. And seriously let's think about this, my child who is healthy is a threat to children WHO HAVE BEEN VACCINATED and theoretically they are immune right?! How would my child or children who are not vaccinated be a threat?! This makes no sense to me. I know the science behind all this, and **I KNOW THE TRUTH**. This is against God. Read the bible, Do no harm to a healthy body.

The argument stating that children who are not vaccinated can still be educated, since they can be homeschooled is bogus too. Our children need to work as a community. We are meant to be together. We are always talking about diversifying, socio-economically, ethnically, etc. This is no different. Now you are severing and dividing our state further. Let's just go back to Nazi Germany times and put a yellow star on our children. This is discriminatory. What's next the state of Connecticut is going to tell us what to feed our children? Sounds ridiculous right?

I ask you to vote no on this bill on behalf of family and the other families in the state of Connecticut who have the same beliefs. We should have had due process. Put yourself into the role of one of these families, how would you feel? Vote NO on this bill.

Sincerely,

Elizabeth and Michael DiDomenic
