

Jennifer M. Kraft
Norwalk, CT

As a life-long resident, and a tax payer of Connecticut, I am extremely concerned, disappointed, and upset – at the thought of taking away the religious exemption and not allowing HEALTHY unvaccinated children to attend public school.

Do you really think that denying our perfectly healthy children a public education (that tax payer dollars have paid) is OK?

By taking away the religious exemption, you are stripping from us our religious, AND medical freedom. This completely goes against the Constitution of the United States, The Universal Declaration of Human Rights, and the Nuremberg Code!

There are very many children that are at a much higher risk of having severe, life-altering reactions to vaccines, if not death. As of right now, a medical exemption is still accepted; HOWEVER, the only way to get that is if you child has already been harmed by vaccines, and at that point -the damage has already been done!!! On top of that, many reactions and diseases that make vaccination dangerous STILL doesn't qualify for a medical exemption. They are extremely hard to get!

For instance, in my situation, my children have 2 half-sisters who were fully vaccinated according to fraudulent CDC's "suggested" vaccine schedule. The oldest was diagnosed with childhood Type 1 Diabetes. Type 1 Diabetes is known and listed for being a side effect of multiple vaccines. The CDC quietly added a new recommendation stating that any child with a sibling, mother, or father with an autoimmune disorder should NOT receive the MMR vaccine ! Type 1 Diabetes IS ONE of those autoimmune disorders, yet the medical exemption does not recognize this ! The other sister had severe gut and bowel issues since the start of vaccinations. Growing up, she always seemed to be sick more often than well.

Some families that have two parents in the household, do have the option to home-school (and should not be forced to!). Then there are many situations, such as mine; I am the only parent and provider in the home. These ridiculous bills being introduced has caused me an extreme amount of stress and anxiety. It threatens my beliefs, medical freedom, my children's health; as well as my well-being, and my ability to maintain an income if I have to home-school. This is a hardship forced by tyranny. I am NOT OK with this !

I am not okay with

Forcing the injection of human fetal cells (both male and female at that) from aborted babies, into my children!

injecting well-known neurotoxins and carcinogens and other dangerous and toxic ingredients into my children

.....only to HOPE that they will be healthier ?

when they were perfectly healthy in the first place!

NOONE, especially not the state, has the right to tell a parent that they have to go against their personal experiences, knowledge and beliefs. People are led to BELIEVE vaccines are safe and effective even though they have been PROVEN numerous times to be the complete opposite. Vaccines in fact can cause diseases (including the ones they are meant to prevent) and deficits - or DEATH. It would be one thing if you were trying to force something that has ACTUALLY and FACTUALLY been proven to be both safe and effective, but to force a dangerous, and ineffective medical intervention on HEALTHY CHILDREN, is absolutely irresponsible, an attack on our children, and just plain CRIMINAL!!

The United States has the highest vaccination rates, and also the highest infant mortality rate, AND the most chronically ill children of any developed country!!!! Explain to me, PLEASE, how these vaccines are keeping our children healthy and safe!!! Take a walk through the public schools and see how much they are rapidly flooding with special needs, learning disabled children, some with extreme behavioral issues, and severe food allergies! Talk to teachers who have been teaching for YEARS, and hear about how every year the conditions are getting worse and worse with numbers of these going higher and higher! Talk to Early Childhood Professionals who correlate immunization with loss of skills and benchmarks following immunizations. It is STAGGERING, SAD, and places a challenge to everyoneand irreversible heartache to parents, yet the companies who produce the toxins, medical professionals who push and administer vaccines - damage lives and get to walk away liability free. Parents deserve a choice!

This is NOT NORMAL. At least it wasn't before the vaccine schedules rapidly increased!!! Vaccines are a MULTIBILLION dollar PER YEAR(!) industry!!!! AND when they cause children's health conditions to need more pharmaceuticals, it only expands their profit - it is an inexcusably sad commentary on the well-being of our current and future generations!

Let's be really honest here, this bill doesn't benefit our children at all; It benefits the lobbyists and the pharmaceutical profits! I am NOT in favor of sacrificing the safety and well-being of my children - or anyone's else's, for this inexcusable greed !!
