| 12:30 - 1:00  | Office of Policy and Management                      | Dan Dilworth        | 12   |
| 1:00 - 1:30   | Department of Energy and<br>Environmental Protection | Marcy Ritsick       | 13   |

#### General Bonding Subcommittee Hearings on Tuesday, March 15, 2016

# **II. Glossary of Bonding Terms**

<u>Authorized</u> – The amount approved by the General Assembly for a specific project or program.

<u>Allocated</u> – The amount that has been approved by the State Bond Commission for a specific project or program. Allocated funds are available for expenditure by the agency, town or organization that has received the allocation.

<u>Allotted</u> – The amount approved by the State Bond Commission and specifically set aside to cover expenditures and encumbrances. The Office of Policy and Management allots funds.

<u>Unallocated Balance</u> – The amount that has been authorized by the General Assembly but has not yet been approved by the State Bond Commission. Unallocated funds are not available for expenditure.

<u>**Unallotted</u>** – The amount approved by the State Bond Commission but not yet allotted.</u>

## **III. Agency Write-ups**

| Infrastructure repairs and improvements,<br>including fire, safety and compliance with the<br>Americans with Disabilities Act<br>improvements, improvements to state-owned<br>buildings and grounds | PA 13-<br>239 | 21(c)(2)             | 10,000,000                                   | 25,000,000                          |
| Land acquisition, construction,<br>improvements, repairs and renovations at fire<br>training schools  | PA 14-98      | 2(f)(1)              | 10,000,000                                   | 15,777,672                          |
| Capital construction, improvements, repairs,<br>renovations and land acquisition at fire<br>training schools  | PA 12-<br>189 | 2(b)(2)              | 10,000,000                                   | 28,200,000                          |
| Infrastructure improvements including the<br>engineering and construction of an offsite<br>storm water improvement related to the<br>construction of a new courthouse in<br>Torrington.             | PA 14-98      | 2(f)(3)              | 800,000                                      | 800,000                             |

#### 3. New Authorizations Recommended by Governor

The following new authorizations have been recommended for this agency:

| Project Reference  | Governor's<br>Recommended<br>Authorization \$ |
|--|---|
| Alterations, renovations and improvements, including installation of air | 181,000,000                                   |
| conditioning, development and demolition, to the State Office Building   |   |
| and associated parking facilities in Hartford                            |   |

The State Office Building project was authorized in PA 11-57 with \$25.5 million. Approximately \$1.8 million of that authorization remains unallocated after the January 29, 2016 State Bond Commission meeting.

#### **Grant-in-aid Programs**

**Grants-in-aid to sponsors of school readiness programs and state-funded day care centers for facility improvements and minor capital repairs** – The funding supports grants to programs and day care centers for facility renovations and improvements including minor capital repairs. In SFY 13-15, the program had 115 applicants requesting approximately \$17.6 million. In SFY 14-16, the program had 108 applicants requesting approximately \$7.9 million. The State Bond Commission made two allocations totaling approximately \$7.6 million in 2015 for the program.

Interested applicants respond to competitive requests for proposal (RFPs) of which there have been two (SFY 13-15 and SFY14-16). Submitted proposals that pass basic eligibility criteria are evaluated by early care and education experts based on agencydeveloped evaluation criteria.

**Grants-in-aid for minor capital improvements and wiring for technology for school readiness programs** –These grants support upgrades to: (1) enable high-speed and secure communications (2) promote increased operational efficiencies and greater student learning outcomes. Examples include, but are not limited to: upgrades to network infrastructure in the facility through servers, switches, routers, and cabling that allow for high-speed and secure Internet access; wiring of common areas in support of wireless devices; wiring for smart boards and projection devices; and improvements necessary to establish compatibility with local public school's accountability systems

Interested applicants respond to competitive RFPs. The proposals are evaluated based on agency-developed criteria.

**Smart Start Competitive Grant Program** – The program provides grants-in-aid to reimburse local and regional boards of education for capital and operating expenses related to establishing or expanding preschool programs. The Smart Start funding will provide funding for 200 pre-school spaces.

#### 2. Cancellations Recommended by Governor

#### **Agency Projects and Programs**

**Departmental facilities** – The funds are used for infrastructure improvements needed to maintain the agency's facilities in compliance with Connecticut Life Safety Codes and its accreditation and certification with regulatory bodies to receive federal reimbursement and revenue. Please see Appendix E for a list of projects associated with these funds.

**Connecticut Children's Place** – The funds were intended to be used to expand the dining hall and kitchen in Albert J. Solnit Psychiatric Center – North Campus (formerly Connecticut Children's Place). The agency estimates the total cost of the project at \$2.2 million. The project is on hold until additional bond funds are authorized however, the

agency continues to maintain, repair and improve areas as required to meet new OSHA, Health and Safety Requirements. The existing funds were to be returned last year as this project has been closed out.

**Reimbursement for environmental remediation at the former Long Lane School in Middletown** – The funds have been used to reimburse Wesleyan University for the cost of environmental remediation at the former state-owned Long Lane School property in Middletown. The reimbursement is required under the agreement between the state and Wesleyan. It was signed in 2000 when the University purchased the approximately 140 acres property for \$15 million. The DAS division of construction services has been responsible for administration of the bond fund account to make these reimbursements. DCF was notified by the DAS division of construction services that the work is still being performed, but Wesleyan University has not submitted a requisition for these funds. Nevertheless, the remaining balance is needed as reimbursement is required under the terms of the agreement and needs to be available for such purposes. The funding and oversight of this project is now under the control of DEEP, according to DCF.

**Grants-in-aid for construction, alterations, repairs and improvements to residential facilities, group homes, shelters and permanent family residences** – The funds will used to address a backlog of major projects at facilities because access to bond funds has been restricted over the last few years, according to the agency. It is anticipated that some funds may be needed to prepare facilities to accept children returning from out-of-state placements.

**Grants-in-aid to private nonprofit mental health clinics for children for fire, safety and environmental improvements, including expansion of an existing clinic** – The funds support construction, alterations, repairs and improvements to residential facilities, group homes, shelters and permanent family residences.

**Grants-in-aid to private, nonprofit organizations for construction or renovation for recreation or education**– Though DCF does not have any grant-in-aid applications at this time, the agency requests that the funds remain because they are still needed to assist private, nonprofit community youth centers with neighborhood recreational or educational construction or renovation projects.

Subsequent to the DCF grant-in-aid application review process, applications are prioritized by a DCF Bond Fund Advisory Committee that is composed of members selected by the Commissioner or her designee. Proposals are evaluated and prioritized based on the following categories:

Priority 1. Fire, health and safety code compliance requirements.Priority 2. Upgrading or additions to existing systems that are presently in compliance with fire, health and safety codes.

**Priority 3.** Essential renovations and improvements to prevent further deterioration of buildings. **Priority 4.** Energy conservation.

#### 2. Cancellations Recommended by Governor

#### Unallocated Bond Report Department of Administrative Services February 2016

# Development, including acquisition and equipment, of a new thermal facility, including extension of the distribution pipeline, for the capitol area district heating and cooling system in Hartford (\$28,000,000 unallocated)

#### Background:

The Capitol Area District heating and Cooling System (CAS) is a state owned thermalenergy (heated and chilled water) transport system. The thermal plant (referred to in the map below as CEDECCA) itself is owned by the Canadian company Maxim Power Company.

Each year CAS purchases and delivers hot and chilled water to 18 public and private buildings totaling 3 million sq. ft. with over 150 million BTU's of thermal energy through 2 miles of pipeline. DAS manages the billing and day-to-day operations of the CAS. A map of the CAS in on the next page.

The costs to manage and maintain the CAS are **not** paid from the General Fund but rather from fixed amounts added to each customer's bill. These fixed fees cover:

- State personnel costs,
- Repair costs (emergency and planned),
- Engineering studies for the existing system operation,
- Engineering studies for future expansion and
- Upgrades and system enhancements to provide greater reliability and efficiency.

At present these fees represent less than 15% of the total bill. The fees are accessed through a revolving account.

#### Update:

Maxim currently provides steam and chilled water to CAS for redistribution under a contract that expires in March of 2019. The State and Maxim entered into a Term III Contract Amendment this past year which revised some billing points but maintained the contractual end date of March 2019.

In order to reduce heating and cooling energy costs, DAS has explored the option of owning its own thermal energy plant. In order to avoid extending the contract with Maxim, such new plant would need to be fully operational before the March 2019 contract expiration date.

The State had engaged in discussions with Maxim about purchasing the thermal plant, however, efforts to purchase the thermal plant have halted due to New England ISO revisions to its pricing structure that have made it economically more beneficial for Maxim to continue plant operations. Maxim has now chosen to retain its US assets rather than sell them. CAS is therefore pursing the alternative plan of building its own thermal plant.

CAS continues to coordinate with DOT regarding the I-84 Viaduct Project. The current conceptual project design plan show that the proposed highway structure would impact the existing thermal plant and DAS Pump House. DAS has released consultant advertisements for a New CAS Plant Feasibility Study as well a Design-Build Agreement for a new plant. The new plant feasibility study is underway and the consultant selection process is ongoing for the design-build project.

Additionally, at the Judicial Branch's request CAS has continued with the planning and design for an extension of the chilled water lines from Oak Street to the Superior Court building at 101 Lafayette Street, Hartford. It is anticipated that this will save Judicial from having to make a financial outlay for as new chiller and provide them the reliability and savings that CAS supplies. This project is expected to go out for bid in April-May 2016. The engineering firm of RMF, Inc. has been selected for the design of the expansion of the heated and chilled water pipelines to service the State Office Building and the Judicial Branch Facilities on Washington and Lafayette Streets. The contract has been approved by all the required approval bodies and the design process is underway.

# Exterior renovations and improvements, including installation of air conditioning, to the State Office Building (SOB) in Hartford (\$22,000,000 unallocated)

#### Background:

The 2013 bond act updated the authorization language related to this project to include alterations to the entire building rather than just the exterior of the building. It also added the parking facilities to the project.

In 2014, the State selected an architectural firm to perform a pre-design study, including building and site programming, conceptual planning, project parameters, meetings with various stakeholders such as the Bushnell, I-Quilt, the City of Hartford and the neighborhood, and the local business community, for input on design and considerations.

The architectural firm's study was completed and delivered to DAS and the Office of Policy and Management in January 2015. The study included recommendations for improvements to the building inclusive of cost estimates.

#### Update:

In 2015, the architectural firm completed the schematic design phase and has progressed into the design development phase of their commission. It is on schedule to complete the design development phase and transition into the construction document phase of their commission prior to the close of this fiscal year. Expenditures to date the total expenditures associated with BI-2B-381 (State Office Building Renovations) are \$998,670 pre-design study and \$2,056,750 for architectural services.

#### **DAS Infrastructure Repairs and Improvements**

| Act Reference                     | Amount \$   |
|-----------------------------------|-------------|
| PA 11-57, § 2(e)(3)               | 296,410     |
| PA 11-57, § 21(d)(2) <sup>1</sup> | 105,849     |
| PA 13-239, § 2(c)(3)              | 19,985,128  |
| PA 13-239, § 21(c)(2)             | 25,000,000  |
| PA 15-1, § 2(f)(2)                | 25,000,000  |
| TOTAL                             | 120,360,387 |

#### Unallocated Balances as of December 31, 2015.

The DAS Infrastructure Repairs and Improvements program provides for improvements to existing state buildings. Please see Appendix A for a list of planned project allocations to be financed from the current available authorizations. This list is based on the DAS Facilities Improvement Plan 2016 to 2018, which has identified over \$200,000,000 in needed infrastructure improvements projects.

In addition, this fund includes monies provided for DAS to pursue the Hartford Building Acquisition project. The Hartford Building Acquisition Project refers to the acquisition, renovation and fit-out of properties at 50-55 Farmington Avenue, 450 Columbus Boulevard and the Morgan Street Parking Garage. All of the funds associated the Hartford Building Acquisition Project have been allocated.

#### Asbestos Program

This account provides funding on an as-needed, lump-sum basis for the state's on-going program to remove or encapsulate asbestos in state-owned buildings. The agency generally receives two allocations per fiscal year so that when it encounters asbestos in a building repair or renovation project, it can select a vendor from the list of pre-approved contractors to do the abatement.

- Norwalk Community College Phase III
- Gross Technical High School
- DEEP Harkness Memorial Park Carriage House
- Rocky Neck Pavilion
- CCSU Willard and Diloretto
- 10 Clinton Street
- Numerous minor-emergency abatement projects across various facilities
- Numerous hazmat surveys for DCS projects

#### Alterations and improvements in compliance with ADA (\$3,250,000 unallocated)

#### Background:

Connecticut has a legal responsibility to ensure that state facilities, programs and services under are compliant with the Americans with Disabilities Act (ADA).

In 2013 DAS asked executive branch agencies to conduct self-evaluations of their facilities, programs and services and provide DAS with information concerning practical barriers or obstacles to access of their facilities. Of the 37 agencies that replied, most reported substantial compliance with the ADA; however, it was clear that there is much room for improvement. A copy of the full report generated from that survey is available at: <u>http://das.ct.gov/images/1090/CTDASADAReport.pdf</u>

#### Update:

DAS contracted with an on-call consulting firm to work with state agencies to conduct self-evaluations and develop capital improvement project plans to improve accessibility accommodations at state facilities. In 2015, DAS expended over \$600,000 for the design and implementation of various improvements at state facilities.

A list of planned projects to be financed from the current unallocated ADA Compliance bond funds is attached as Appendix B. This list identifies over **\$3,170,000** in needed stand-alone ADA Compliance improvements projects.

# **HIPAA (Health Insurance Portability and Accountability Act) Compliance** (\$2,652,975 unallocated)

The federal HIPAA Security Measures require the state to: (1) ensure the confidentiality, integrity, and availability of all electronic protected health information ("ePHI") that it creates, receives, maintains, or transmits; (2) protect against any reasonably anticipated threats or hazards to the security or integrity of this information; (3) protect against any reasonably anticipated uses or disclosures of such information that are not permitted or required under law; and (4) ensure that the state workforce complies with these security measures. Failure to comply with the federal mandates exposes the state to liability should its systems be breached and ePHI is compromised, as well as stiff penalties outlined in federal law. Eleven agencies (DAS, DMHAS, DCF, DDS, UConn Health Center, DSS, DPH, DVA, TRB, UCONN, and DOC) are subject to HIPAA requirements.

The Bond Commission released funding to DAS for HIPAA compliance in the spring of 2013 for federally mandated, cyclical Risk Analysis on Covered Entities, Risk Analysis based IT security controls gap remediation, and continued federally-required HIPAA training and policy updates. Because HIPAA is a continuing federal mandate, compliance is an ongoing activity that is continually re-evaluated. As such it is important that unallocated HIPAA funds remain in place to enable the state to comply with federal laws as necessary controls are put in place and/or modified; as systems evolve or change and new systems come online; and as new state and Federal mandates are implemented.

The evolving need to maintain acceptable controls is most recently evidenced by the fact that four agencies – DSS, DMHAS, DVA, and DOC - are now operating or are in the process of implementing new, state of the art, Electronic Health Record systems. By moving to these newer systems, the State of Connecticut must now comply with Health and Human Services' HITECH regulations.

DAS continues to work with OPM to release funds as needed. Please see Appendix C for a list of HIPAA projects.

#### **Fire Training Schools**

Appendix D summarizes the project location, costs, bond authorizations and status of the Fire Training Schools.

#### APPENDIX A

# DAS Infrastructure Repairs and Improvements

| Project Name  | Design<br>Cost \$ | Design<br>Date | Construction<br>Cost \$ |

## Appendix C

### Office of Policy and Management

### Agency Authorizations Status Report

#### **Agency Programs**

**Capital Equipment Purchase Fund (CEPF)** – The Capital Equipment Purchase Fund (CEPF) is authorized by CGS Sec. 4a-9 and has been used for the purchase of equipment with a useful life of at least 5 years. It is financed through the sale of General Obligation bonds and administered by the Office of Policy and Management. The table below shows the amount of CEPF funding available to agencies in FY 16:

| State Agency  | FY 16 \$   |
|---|------------|
| Office of the State Comptroller                           | 400,000    |
| Office of Government Accountability                       | 212,000    |
| Department of Revenue Services                            | 2,000,000  |
| Department of Veterans' Affairs                           | 550,000    |
| Department of Administrative Services                     | 3,000,000  |
| Department of Emergency Services and Public<br>Protection | 4,251,000  |
| Military Department                                       | 200,000    |
| Department of Consumer Protection                         | 240,000    |
| Department of Labor                                       | 99,000     |
| Commission on Human Rights and Opportunities              | 58,000     |
| Agricultural Experiment Station                           | 200,000    |
| Department of Energy and Environmental Protection         | 1,600,000  |
| Department of Economic and Community Development          | 40,000     |
| Department of Public Health                               | 300,000    |
| Office of the Chief Medical Examiner                      | 250,000    |
| Department of Developmental Services                      | 1,800,000  |
| Department of Mental Health and Addiction Services        | 2,000,000  |
| Department of Social Services                             | 3,000,000  |
| Department of Correction                                  | 4,000,000  |
| Department of Children and Families                       | 2,000,000  |
| Judicial Department                                       | 1,300,000  |
| Public Defender Services Commission                       | 800,000    |
| Division of Criminal Justice                              | 900,000    |
| Department of Education                                   | 800,000    |
| TOTAL   | 30,000,000 |

#### FY 16 Capital Equipment Purchase Fund Resources by Agency

**Information Technology Capital Investment Program** – This program is a six-year plan to update and consolidate the state's information technology (IT) infrastructure. Currently, state agencies use a variety of decentralized IT systems that are generally incompatible and outdated, which prevents the agencies from communicating efficiently and effectively with other agencies. The table below summarizes actual and projected allocations for those projects planned or approved through February, 2016.

| Fiscal Year | Amount \$   |
|-------------|-------------|
| 2013        | 16,159,815  |
| 2014        | 35,496,455  |
| 2015        | 29,129,040  |
| 2016        | 93,096,066  |
| 2017        | 48,038,824  |
| 2018        | 895,700     |
| TOTAL       | 222,815,900 |

#### IT Capital Investment Program Projected and Actual Allocations

See Appendix C-2 for a list of Information Technology Capital Investment Program projects.

*Background:* OPM evaluates agency IT projects based on the following priorities:

- 1. Make state government more user-friendly and efficient for citizens, businesses and municipalities when transacting business with the state, including areas related to obtaining permits, licenses, paying taxes or accessing services;
- 2. Make information about services and state government more available and easy to find on-line;
- 3. Implement efficient, modern business practices that result in clear and identifiable cost savings and service delivery improvements for state agencies;
- 4. Increase transparency for policy makers and the public regarding costs, effectiveness and service outcomes within and across state agencies;
- 5. Reduce the cost to the state for the implementation, use and management of technology systems through shared services, applications and hardware across agency boundaries and by other means;
- 6. Implement systems needed to support health-care reform, manage costs and improve outcomes related to the state's health and human service programs; and
- 7. Ensure the appropriate level of confidentiality, integrity and availability of the state's electronic or digital data information resources in order to provide an environment in which the state's user community can safely conduct state business.

**Criminal Justice Information Sharing System (CJIS)** – The funds will be used to continue development of the Connecticut Information Sharing System (CISS) in compliance with PA 08-01.

*Background:* CISS provides the ability to electronically share offender information within Connecticut's criminal justice community. CISS will take data input from criminal justice databases and make it searchable to law enforcement and justice officials with the proper security clearance and credentials. This information includes data capture of offender violations, as well as the retrieval of judicial, criminal offender, and DMV information. Data can be in text, audio, video, and graphical format. Connecticut's criminal justice community consists of eleven criminal justice agencies with over 23,000 staff members and utilizes fiftytwo information systems to support its business needs. Approximately five hundred and eighty-three unique transactions are specified in CISS. Phase I will address forty-six of these.

The CISS environment will be accessible by three methods: the State of Connecticut's Public Safety Data Network, the State of Connecticut's internal network, and the CISS Community Portal. All three have multiple levels of security to ensure compliance with FBI CJIS Security Policy 5.4.

*Project Update*: The State submitted its request to the FBI for CJIS to be deemed a non-criminal justice agency that can receive and transmit FBI data. The request to the FBI included a Management Control Agreement developed by the CJIS Steering Group identifying CJIS as a non-criminal justice agency and the CSO as the officer charged with controlling and monitoring FBI data within the CISS application. Also, and significantly, the State included a Statement of Understanding outlining CISS' governing principles. The FBI approved the CISS application in June, 2015. This is a significant accomplishment which will allow the CISS project to meet the envisioned value to its stakeholders.

From the beginning of 2015, CJIS has made significant progress with the CISS project including the FBI's approval of the CISS Overview Document and its Statement of Understanding (SOU) outlining CISS' governing principles. CJIS is now actively working with Xerox and the stakeholder agencies on all nine CISS Search and Workflow Releases with significant progress.

The Racial Profiling Project, the Offender Based Tracking System (OBTS) and the Connecticut Impaired Driver Records Information System (CIDRIS) are in production and maintenance mode. OBTS and CIDRIS will be replaced by functionality in the new CISS system.

Search Release 1, which consists of Paperless Re-Arrest Warrant Network (PRAWN), Offender Based Information System (OBIS), and Portal User Interface, has undergone System Test and User Acceptance Testing (UAT), with Production scheduled for February 26, 2016. Concurrently, Workflow Release 2 (Uniform Arrest Report (UAR) and Misdemeanor Summons Notices) is also in System Test, and is expected to go in to production in the first quarter of 2016. Change Control #62, which is a re-alignment of the release schedule, has been instituted. The change control will support the extension of the schedule for Release 4, which is Requirements Gathering, without changing the overall project date.

The CJIS Help Desk has been working on the infrastructure of the Learning Management System (LMS) that will provide training and assistance with user provisioning and CISS certification. Training will begin just prior to deployment of Release 1. The development of the

CISS User Authorization Request (CUAR) will facilitate user training and Global Federated Identity and Privilege Management (GFIPM) search capabilities for all users.

Progress was made on local police department connectivity, with 81 police departments having purchased routers for the CISS project. The routers will connect their Records Management Systems (RMS) and access for search capabilities to CISS. Of the 81 departments, 69 departments are connected to the state network. There are 22 police departments selected to connect to CISS for Search Release 1.

CJIS had worked with the Department of Administrative Services (DAS) on a contract with KT International, Inc. and the Capitol Region Council of Governments (CRCOG) in regard to CRCOG member agencies' shared RMS system (CT: CHIEF) connecting to CISS. This connection will allow CT: CHIEF to send the Uniform Arrest Reports and attachments for the CISS workflows. This contract was signed and work is continuing to connect the two systems.

CJIS is also working with Accucom (formerly known as Hunt) as the second RMS vendor to connect to CISS. This connection will also allow Accucom to send Uniform Arrest Reports and attachments for the CISS workflows. The purpose is to connect all RMS vendors in the state to CISS so that the current paper-based workflows are replaced over time by the new CISS electronic workflows.

The Governing Board also approved that CJIS enter into a Memorandum of Understanding (MOU) between CRCOG and the Wethersfield Police Department to host the CT: CHIEF Pilot Program within the CJIS environment.

The CJIS Executive Director position was vacated in March, 2015. A Search Committee was formed, which prepared and posted notices of the vacancy, received applications, and identified and interviewed viable candidates for the CJIS Executive Director position. It is anticipated that a decision will be made soon.

In July 2015, the CJIS Governing Board entered into a MOU between the Office of Policy and Management (OPM) and the Department of Emergency Services and Public Protection (DESPP) regarding the provision of administrative support to the Governing Board. The Administrative MOU transferred the management of human resources including payroll, benefits, purchase orders and invoices from OPM to DESPP.

In November 2015, the Governing Board approved CJIS moving forward with an Operational MOU between OPM, DESPP, and the CJIS Governing Board regarding the authority, roles, responsibilities, design, implementation, operation and maintenance of CJIS in support of C.G.S. Sec. 54-142s. The Operational MOU creates efficiency in the delivery of a wide range of criminal justice systems while retaining autonomy and authority of the Governing Board.

Qualis, the health check vendor for the CJIS project, has produced two health check reports in the last six months. These reports, which were compiled in September and December, are the culmination of surveys and on-site interviews with agencies, the CJIS Project Management Office (PMO) and Xerox for the purpose of offering an objective assessment of how well the project is performing.

The quarterly Health Check Report released in September reflected a slight drop in scores for the Stakeholder Agencies and Xerox, while the CJIS Project Management Office (PMO) score reflected a slight increase. The overall project scores for that quarter decreased from 2.69 to 2.68. Although not statistically significant, the scores were reported as surprisingly stable for a project of such magnitude.

See Appendix C-3 for a diagram that shows CISS databases and the governmental agencies that will use the system.

**CORE Results-Based Accountability** – The funds will be used to finance the implementation of new web-based business intelligence (BI) software that provides advanced analytic and reporting capabilities. The BI software being developed within Core-CT also provides capabilities for data modeling, trend analysis and forecasting, which enhance transparency and accountability in State budgeting and spending. The goal of this initiative is for the BI tool to become the central repository of human resource, payroll, and financial information in Core-CT. The idea is that this new analytical and reporting system will eventually replace the current Core-CT EPM query tool.

*Project Update:* The ongoing project is in its second phase. This phase will introduce the BI tool to state agencies that currently utilize the project costing module in Core-CT. The analytics being rolled out in phase 2 include project analytics (Project Costing and Customer Contracts) and supply chain analytics (Inventory) and will provide agencies with project-based metrics, alerts, dashboards, and reports. This will allow agencies to monitor and analyze important project-based data and make timely, informed decisions at all levels of the organization. The funds also support change management that includes job aids and training for end users.

Future milestones for the project include a rollout of external systems (e.g., non-Core-CT data) integration with BI and a statewide rollout of BI to all executive branch agencies by May 2017.

**CORE Higher Education System Consolidation** – CORE-CT is the State's Human Resources Management System that provides integrated human resources, payroll, and financial functions for most state agencies. The Board of Regents for Higher Education (BOR) and the University of Connecticut (UConn) currently only use CORE-CT for some functions; this bond authorization is for the integration of BHE and UConn Human Resource Management Systems into CORE-CT.

In regard to the \$10 million amount, \$5 million continues to be for the purpose of funding the initial examination, planning expenses and implementation expenses necessary for UConn and the Board of Regents to utilize the Core-CT system as per section 22 of PA 11-48 and CGS 10a-9b. As a first step the Board of Regents successfully transitioned coding from old accounts used before their reorganization to new accounts that represent the new organization. The next phase will focus on analysis needed to convert their systems to CORE-CT, beginning with a business process analysis, fit-gap analysis and then software conversion work.

The remaining \$5 million is to be utilized to bring the University of Connecticut fully into Core-CT related to their human resources and payroll systems and to ensure the reporting of the university's expenditures in Core-CT. Implementation work is currently underway, with an implementation date of July 1, 2016 for the University to use Core-CT as its human resources and payroll system.

**Benchmarking Systems** – This project is for the development of state and local benchmarking systems for municipalities and school districts. The development of a Uniform Chart of Accounts (UCOA)<sup>1</sup> to standardize the classification and reporting of financial data among all municipalities and school districts will facilitate these benchmarking systems. Municipal and education financial data transmitted to the State by municipalities and school districts in accordance with the UCOA will be retained in their respective municipal and education data warehouses allowing for more accurate comparisons and benchmarking of the costs of programs and services provided by these educational entities and municipalities. OPM is working with the State Department of Education (SDE), an external consultant, municipalities, and school districts to develop the benchmarking systems.

*Background:* PA 12-116, The Education Reform Act, authorizes SDE to develop and implement a chart of accounts to be used at the school and district level. For the fiscal year ending June 30, 2015, and each subsequent fiscal year, local boards of education are to implement a uniform system of accounting by completing and filing annual financial reports with the SDE using the chart of accounts that was developed with these bond funds. Similarly, PA 13-247 authorizes OPM to develop and implement a UCOA to be used at the municipal level. Municipalities are to implement a uniform system of accounting by using the UCOA to complete and file annual financial reports with OPM by June 30, 2015.

The benchmarking project to date is comprised of the following four phases:

<u>Phase 1</u>. Received a State Bond Commission (SBC) allocation of \$450,000 in December 2012 and the work for this phase was completed in March 2014. Under Phase 1, OPM and SDE worked with municipalities, local boards of education, the Connecticut Conference of Municipalities, the Council of Small Towns and other municipal and education stakeholders to develop the UCOA and its related education and municipal accounting manuals that provide guidance on reporting in accordance with the UCOA.

OPM's consultant for the project, Blum Shapiro, was directed to identify a mechanism that would meet the State's municipal and education financial information benchmarking needs without significantly altering the underlying financial accounting systems of municipalities and local boards of education, from which such information would ultimately be derived. The mapping approach was determined to be the best approach that would meet this objective.

<sup>&</sup>lt;sup>1</sup>A chart of accounts is a table for an accounting system that contains the numerical codes with the explanations that identify the ledger accounts.

<u>Phase 2</u>. Received a SBC allocation of \$1.8 million in February 2014. This phase of the project primarily focused on software development for the benchmarking system, which included designing and developing the mapping tool for capturing the financial information. This mapping tool is used to report and capture both the municipal and education financial data that currently resides in the underlying financial accounting systems of municipalities and local boards of education.

Sensitive education data will continue to be captured, stored and reported in SDE EdSight database to ensure that student data is securely maintained, including certain nonfinancial education data obtained through web based forms to be developed by Blum Shapiro. SDE will maintain its own database for the school financial data reported by educational entities and will benchmark both the financial and nonfinancial school data.

Phase 2 included a PILOT program overseen by SDE, whereby SDE initiated tests for capturing information and reporting under the PILOT Program. SDE and Blum Shapiro worked with ten educational entities to test and map information from their local financial accounting systems to the education UCOA at a relatively detailed level in order to identify and resolve any issues that may occur when mapping on a more large scale basis. For the municipal data, there was no PILOT program to test the data. Mapping and benchmarking is being done on a phased stage by stage basis, whereby municipal financial data will be mapped and benchmarked in the initial stage at a high-level, to be followed by mapping and benchmarking at more detailed information levels in subsequent stages. The initial municipal mapping began in calendar year 2014, with the mapping of municipal financial information at a high level, including expenditures by functions. This high-level approach is considered low risk and tantamount to a PILOT. OPM and Blum Shapiro worked with those municipalities whose financial accounting systems did not allow for high-level mapping in order to manually capture their financial data.

<u>Phase 3</u>. Received a SBC allocation of \$2.5 million in March of 2015 for work under this phase of the project. Blum Shapiro, having worked with SDE to successfully resolve the issues encountered in the PILOT program under Phase 2, mapped the FY 2013-14 education financial information obtained from the local accounting systems of each school district to the education UCOA by school location at a relatively detailed level during calendar year 2015.

Having completed high-level mapping of FY 2012-13 municipal financial data to the municipal UCOA in Phase 2, Blum Shapiro for Phase 3 conducted more detailed mapping of FY 2013-14 municipal financial data from their local financial accounting systems to the UCOA in calendar year 2015. The Phase 2 high level mapping that was previously conducted, included the mapping of municipal expenditures from the local chart of accounts of municipalities to the UCOA by municipal functions (general government, public safety, public works, etc.). In Phase 3 expenditure mapping occurred at a more detailed level with the mapping of departmental groupings within their respective UCOA municipal functions (i.e. public safety function – police department, fire department, etc.). In addition, salaries and employee benefits identified from the local accounting systems of municipalities were mapped to their UCOA major objects counterpart in the UCOA.

For those municipalities and educational entities whose financial accounting systems did not allow for mapping, Blum Shapiro worked with these entities to complete and submit data entry forms previously developed by Blum Shapiro to allow for manual data entries of the financial information.

OPM and Blum Shapiro worked to develop an interactive reporting and benchmarking tool that will provide revenue and expenditure information from each town, and allow geographical and population-based groupings of municipalities based upon the mapping and manual entries made of the FY 2013-14 municipal financial information. Selected non-financial information regarding each town will also be provided to allow for comparisons. OPM plans to use this data for its own reporting and to make the underlying data available for municipalities, researchers and citizens to do their own analysis. The tool is expected to be available on a dedicated website in the first half of calendar year 2016.

Blum Shapiro will provide training to selected personnel from each town on using the mapping tool to transmit financial information from their accounting systems to the mapping tool and to conduct the mapping of their local chart of accounts to the UCOA on an annual basis, as necessary. This training is to begin in March of calendar year 2016.

<u>Phase 4</u>. Received a SBC allocation of \$1,245,000 in January of 2016 for the anticipated completion of the State and Local Benchmarking Systems project. Work for this phase of the project will begin in the first quarter of calendar year 2016. For Phase 4, Blum Shapiro, as directed by SDE, will meet with each school district to obtain feedback on the FY 2014 financial data that was mapped and provided to each educational entity for review under Phase 3. Blum Shapiro will work with each educational entity who have indicated the need for corrections to their respective maps. Once reviewed and corrected (if necessary) the mapped education financial information will be uploaded in the mapping tool and available to SDE to transmit into the SDE data warehouse. Blum Shapiro will also collect and map FY 2015 financial information from each educational entity by school location in a similar manner as the collecting and mapping of the FY 2014 financial information that occurred under Phase 3. Blum Shapiro shall also provide training of school district personnel on electronically submitting their financial information into the mapping tool and on the mapping of their financial data in order to report in accordance with the UCOA.

In this phase, OPM and Blum Shapiro will work with municipalities to allow them to access and use the mapping tool to transmit their financial data from their underlying accounting systems and to map their local chart of accounts data to the UCOA as necessary. Municipalities having undergone training on using the mapping tool for uploading and mapping their financial data will be requested to map their financial information to the UCOA. With the mapping that occurred previously in phases 2 and 3, it is anticipated that there will be less of an effort needed on the part of municipalities whose local chart of accounts have been previously mapped to the UCOA as opposed to municipalities whose data were never mapped. OPM will

also direct Blum Shapiro to assist municipalities that encounter difficulties with mapping their financial data or whose data cannot be mapped.

The State and Local Benchmarking System will continue to be maintained by Blum Shapiro and the Consultant will update the system for FY 2015 financial information mapped or transmitted through manual data entry.

**Urban Act** – Urban Action Grants are discretionary grants to municipalities that (1) are economically distressed as defined by statute, (2) public investment communities or (3) urban centers under the State's Plan of Conservation and Development. Eligible projects include economic development, transit, recreation, solid waste disposal, housing, day care, elderly centers, emergency shelters, historic preservation and various urban development projects.

**Small Town Economic Assistance Program (STEAP)** – STEAP funds economic development, community conservation and quality of life projects for localities that are ineligible to receive Urban Action bonds. Localities may receive up to \$500,000 per year if: (1) they are not designated as a distressed municipality or a public investment community and (2) the State Plan of Conservation and Development does not show them as having a regional center.

See Appendix C-3 for grant-in-aid awarded in FY 15.

**Local Capital Improvement Program (LoCIP)** – LoCIP is an entitlement program for municipalities that provides General Obligation bond funds for eligible projects, as defined in statute. Annual distributions of new funds are deposited to municipal accounts administered by the Office of Policy and Management (OPM) on March 1st of each year. Towns may choose to expend the funds on a series of smaller projects or allow them to accumulate over a period of time for one large project.

**Grants-in-aid to Towns for Municipal Projects and Purposes** – PA 15-1 June Special Session requires these funds to be expended for the same purposes for which Town Aid Road grants may be used. However, PA 15-1 June Special Session also allows towns to apply for a waiver from this requirement, and use these funds (and Town Aid Road grants) for other capital purposes. Eight municipalities, one borough and three fire districts requested and were granted this waiver in FY 16.

See Appendix C-4 for the town-by-town list of FY 16 and FY 17 grants-in-aid.

**Intertown Capital Equipment (ICE) Purchasing Incentive Program** – This program was established by PA 11-57 to allow groups of two or more towns to apply for grants of a percentage of the cost of certain shared equipment or vehicles. The program was amended by Public Act 15-170 to increase the percentage of funding and the maximum grant award. Each grant shall be either (1) 60% per cent of the total acquisition cost of such equipment or vehicle, or (2) 80%, if one of the towns is a Distressed Municipality, Public Investment Community (PIC), or Targeted Investment Community (TIC), to a maximum of \$375,000.

See Appendix C-5 for a list of grants-in-aid funded to date under this program.

**Comprehensive Statewide Water Plan** - Public Act 14-163 requires the Water Planning Council (WPC) to produce a Comprehensive Statewide Water Plan (Plan) for presentation to the Connecticut General Assembly by January 1, 2018. Section 4 of this Public Act makes OPM the contracting agent for the WPC. Last year's Bond Bill provided \$ 500,000 in FY 2016 and \$500,000 in FY 2017 to hire consultants to help develop the Plan.

**Responsible Growth Incentive Fund** – Section 13(a)(2) of PA 07-7 (June Special Session) established the Responsible Growth Incentive Fund for the purpose of providing grants-in-aid and other financing for regionally-supported local projects that leverage past and future planned state investments in infrastructure and facilities, particularly for projects that promote compact, mixed-use development around public transportation stations and municipal centers. OPM plans to use funding from Section 13(a)(2) of PA 07-7 (June Special Session) and Section 13(a)(2) of Public Act 15-1 (June Special Session), in conjunction with the transit-oriented development (TOD) and pre-development funds, to award grants under the Responsible Growth and TOD Grant Program. The RFA for this grant program resulted in 45 applications totaling \$56,292,976. Applications are currently under review.

**Transit-oriented Development and Predevelopment Activities** – The funds will be used to provide assistance to municipalities, housing authorities and other entities interested in advancing transit-oriented development around the state's transit corridors (New Haven-Hartford-Springfield Rail, Shoreline East, New Haven Line and Branch Lines, and CT Fastrak<sup>2</sup>), as well as to make housing and infrastructure improvements near transit stations. The uses may include:

- Predevelopment activities, such as environmental inspections, geotechnical studies, market studies, architectural and engineering design, real estate appraisals, and associated legal services.
- Providing assistance for site control and/or acquisition, or to carry out housing or infrastructure improvement projects and other needs identified in communities along the state's transit systems.

OPM has indicated that it will administer the program and coordinate all transit-oriented development (TOD) activities among the various state agencies. OPM will determine the unmet need for TOD in communities along the state's transit corridors by speaking with municipalities, developers and other interested parties and using this information to establish: (1) eligibility criteria for applicants and projects, (2) a cap on the amount of funding and (3) the process by which applications will be evaluated and prioritized.

<sup>&</sup>lt;sup>2</sup>CT Fastrak is the 9.4-mile bus rapid transit system between New Britain and Hartford. Construction began in May 2012. It is scheduled to open for passenger service in early 2015.

*Background:* The State Bond Commission allocated \$1 million in March 2014 to create the Transit-oriented Development Predevelopment Fund. The fund is managed by the Local Initiative Support Corporation, which is a national nonprofit that helps provide financial, policy and management assistance for economic and community development initiatives. The fund is intended to leverage \$13 million in non-state funds, in addition to \$1 million from the Connecticut Housing Finance Authority. Most recently, OPM issued an RFA for TOD planning grants, and awarded \$1.5 million to 11 communities across the state.

See Appendix C-6 for a list of FY 15 TOD planning grants funded through Section 2(d) of Public Act 14-98.

Applications are currently under review for the Responsible Growth and TOD Grant Program using remaining funds from Section 2(d) of Public Act 14-98, and Section 2(d)(3) of Public Act 15-1, in conjunction with responsible growth incentive funds. The RFA for this program resulted in 45 application totaling \$56,292,976.

**Nonprofit Collaboration Incentive Grant Program.** C.G.S. 4-124v established a Nonprofit Collaboration Incentive Grant Program. The purpose of the program is to provide grants for one-time infrastructure costs to implement consolidations of program and services resulting from the collaboration of two or more nonprofit organizations. The goal of the program is to improve efficiency and effectiveness of services through collaborative efforts between and among nonprofit providers providing services in Connecticut. Project areas include: facility improvements, including energy conservation projects, equipment, transportation, and technology projects.

See Appendix C-7 for a list of projects that have been funded to date under this program.

**Grants-in-aid to Private, Non-profit Health and Human Service Organizations** – The funds are used for grants to private, non-profit health and human service organizations to expedite service delivery and to address health, safety and accessibility issues with respect to health and human services provided by nonprofit providers.

The non-profit grant program is administered in accordance with Section 13 of Public Act 13-239, which allocated \$20 million and then was amended by Section 87 of Public Act 14-98 to allocate an additional \$50 million. The non-profit grant program is to be funded by proceeds from State General Obligation Bonds.

Below is a list types of projects types that were accepted:

- Facility alterations, renovations, improvement, additions, new construction and land purchase associated with new construction or additions;
- Health, safety and compliance with Americans with Disabilities Act;
- Energy conservation, improvements or projects;

- Information technology projects, including encryption or client confidentiality systems;
- Technology that promotes client independence;
- Purchase of vehicles;
- Acquisition and upgrades to electronic health or medical records and other health information technology systems; and
- Converting use of property to address mutually agreed to state agency service needs

Currently, there are 265 projects funded worth \$37,542,465. See Appendix C-8 for the FY 14 and FY 15 list of grant-in-aid recipients.

### Appendix C-2

## Information Technology Capital Investment Planned and Active Projects

| Agency   | Project Title  | Description   | Amount \$    |
|--|--|---|--------------|
| Board of<br>Regents for<br>Higher<br>Education | CT Education Academy   | Charter Oak State College/CT Distance Learning<br>Consortium along with Central Connecticut State<br>University, the Department of Administrative Services<br>(DAS), and the Bureau of Rehabilitation Services (BRS) and<br>the Governor's Executive Committee for LEAN initiatives<br>requests capital funding for the creation of the <i>CT</i><br><i>Education Academy</i> , a State Employee centric educational<br>environment which will provide an anywhere, anytime<br>online "university" delivering academic training,<br>registration and help desk services, and learning outcome<br>assessments to the State Workforce. This project will<br>coordinate training in a more efficient and cost effective<br>manner.                   | \$1,857,615  |
| Department of<br>Administrative<br>Services    | Regulations<br>Modernization For The<br>State Of Connecticut | Currently, the publication of state regulations is<br>completely paper based. The project shall encompass the<br>efforts in developing a website for making the regulations<br>of Connecticut available online to the public. The website<br>shall incorporate the regulations making process<br>consisting of various authorized governing bodies who<br>decide on the proposed regulations, and a history of<br>actions representing the process in the form of a<br>regulations making record.   | \$1,758,583  |
| Department of<br>Administrative<br>Services    | Establish Enterprise<br>Unified<br>Communications            | Establish Enterprise Class Unified Communications for the<br>State of CT, with all prerequisites satisfied at major<br>facilities. From an homogenous experience on the<br>desktop, laptop, mobile device or web client, state<br>employees will have all the standard UC tools: telephone<br>integration (soft and desktop), IM, Presence, email, fax<br>from desktop, video point to point and video<br>conferencing and collaborative document sharing. At the<br>management level, the system will provide greater<br>flexibility for communications processing, allowing<br>emergency failover to multiple locations and virtual tools<br>at homes. The overall costs of telephones, video<br>conferencing and data network will be reduced. | \$10,648,872 |

| Department of<br>Administrative<br>Services | Enterprise Content<br>Management (ECM)<br>Service Development          | Enterprise Content Management (ECM) Service<br>Development and Infrastructure Enhancements including<br>Enterprise Records Retention, Redaction, Backup and<br>Recovery software, and System Monitoring software.  | \$5,388,291 |
|---|--|--|-------------|
| Department of<br>Administrative<br>Services | Enterprise Licensing<br>Management System<br>(ELMS) Replacement<br>RFP | The primary objective of this project is to position the<br>enterprise licensing agencies to select a replacement<br>ELMS Solution. This replacement decision will be based on<br>a solution that better meets the long-term enterprise<br>ELMS functions for issuing, maintaining, enforcement, and<br>monitoring licenses. The ELMS product evaluation<br>objectives will be broad with emphasis on a user-friendly<br>and efficient licensing process, while providing additional<br>features and services through the online portal. The<br>technology options for these types of solutions are<br>evolving rapidly. The state desires to assess the<br>marketplace for more efficient and cost effective options. | \$265,000   |
| Department of<br>Children and<br>Families   | SACWIS Replacement<br>Project - Planning<br>Phase                      | DCF's <u>SACWIS Replacement Project – Planning Phase</u> , will<br>replace DCF's current child welfare case management and<br>reporting system. The current system has been in<br>operation for 20 years and has been found to not be<br>federally compliant and in need of replacement. The<br>Department will need to engage in a planning phase to<br>create a statement of work and receive federal approval<br>for the project, allowing for federal reimbursement.   | \$3,110,000 |
| Department of<br>Correction                 | Department of<br>Correction Health<br>Portal - DOC HP                  | The Department of Correction (DOC) is proposing to<br>create a Department of Correction Health Portal (DOC-HP)<br>which will provide an electronic health record to facilitate<br>the care of the nearly 17,000 inmate patients within the<br>agency's facilities also to serve as a mechanism to link the<br>agency's healthcare system to the various state agencies,<br>outside community agencies, and external hospitals and<br>clinics involved in the healthcare of DOC's patients.   | \$8,050,000 |
| Department of<br>Correction                 | DOC OMIS   | The DOC OMIS project will replace the existing set of<br>complex, fragmented, duplicative and outdated systems<br>with a comprehensive, modern and fully integrated<br>system to support all CTDOC institutions (Jails and<br>Prisons), Board of Parole and Pardons, and the Division of<br>Community Supervision and to provide DOC offender data<br>for consumption by other law enforcement entities<br>(municipal, state and federal) and constituents   | \$4,375,000 |

| Department of<br>Developmental<br>Services                         | DDS Home and<br>Community Based<br>Management System    | DDS needs to modernize its current application<br>environment to create a new automated, integrated<br>information system that reflects the current DDS business<br>workflow and processes. DDS is working with the<br>Department of Social Services (DSS) to submit a proposal<br>to the Centers for Medicare and Medicaid Services (CMS)<br>for enhanced funding under their Advance Planning<br>Document process to accomplish this. The resulting<br>solution must meet the CMS Seven Technical Conditions<br>and Standards which include modularity and scalability of<br>application development for enterprise wide solutions   | \$2,825,906 |
|--|---|--|-------------|
| Department of<br>Developmental<br>Services                         | DDS Quality of Services<br>Review Transformation        | Department of Developmental Services, Quality of Services Review electronic application redesign.  | \$363,180   |
| Department of<br>Economic and<br>Community<br>Development          | Lean-Driven IT<br>Revitalization Project -<br>Plateau 1 | Information Technology (IT) revitalization centers on the development of a hybrid IT environment consisting of on premise, BEST-hosted, and Windows Azure platform applications. The Agency's central processing environment consisting of its business, document management, and customer relationship management (CRM) systems may reside in house or in a cloud supported by either BEST or Microsoft (i.e., Windows Azure). This environment will be the foundation for support of for all of DECD's work.   | \$1,770,000 |
| Department of<br>Emergency<br>Services and<br>Public<br>Protection | Special Licensing and<br>Firearms                       | In the wake of the Newtown shootings, the demand for<br>firearm permits, gun sale authorizations and associated<br>background checks has increased by about 25%. In<br>addition to this increase in demand, there is a continuing<br>expectation that background checks are performed as<br>carefully as possible. Unfortunately, the current<br>information system at the State Police that manages gun<br>sale authorizations, gun permits, and associated<br>background checks for the entire state is old and has very<br>limited e-government (online self-service) capabilities.<br>The current project seeks to upgrade this information<br>system and provide additional e-government services so<br>that State Police staff can manage the additional volume<br>of permits and ensure that the utmost care is taken in<br>properly vetting each gun sale authorization and permit<br>application. | \$556,820   |

| Department of<br>Emergency<br>Services and<br>Public<br>Protection | Criminal History<br>Modernization Project           | The current project seeks to modernize Connecticut's CCH, re-architecting the application and underlying database so that it can meet the current and future needs of the criminal justice community and private citizens in our state. In rebuilding CCH with modern technology, we will be able to provide real-time rap-back notifications to various subscribing agencies; online payments and online requests for background checks integrated into the CCH; fluid integration with other important information sharing systems, including the Connecticut On-Line Law Enforcement Communications Teleprocessing (COLLECT, the state's gateway to NCIC/NLETS), the Connecticut Information Sharing System; and technology that can more adequately address the growing backlog of background checks in our state. | \$2,011,060 |
|--|---|--|-------------|
| Department of<br>Emergency<br>Services and<br>Public<br>Protection | AFIS/Cogent   | The current project seeks to modernize Connecticut's<br>Automated Fingerprint Identification System (AFIS),<br>replacing the current, aging system with a new, state of<br>the art Automated Biometric Identification System (ABIS),<br>so that it can meet the current and future needs of the<br>criminal justice community and private citizens in our<br>state.  | \$5,088,086 |
| Department of<br>Energy and<br>Environmental<br>Protection         | DEEP Enterprise Online<br>Case Management<br>System | DEEP's enterprise-wide online case management system<br>will create a public online, paperless interface to conduct<br>the business of licensing, permitting and registration of<br>activities that are under DEEP jurisdiction.   | \$7,950,000 |
| Department of<br>Energy and<br>Environmental<br>Protection         | DEEP Enterprise Data<br>Management                  | The DEEP data management program will integrate<br>critical data systems and develop a data warehouse to<br>provide one common source for all DEEP data.   | \$2,500,000 |

| Department of<br>Energy and<br>Environmental<br>Protection | DEEP Document<br>Repository Automation   | The DEEP Document Repository Automation Project will<br>replace an extensive paper document repository,<br>regularly used by both the public and agency staff, with a<br>comprehensive digital repository that will be available<br>online to DEEP staff, and to the public at no charge,<br>together with appropriate search tools, confidentiality<br>protocols, automated document management tools, and<br>day-forward procedures designed to reduce the need for<br>DEEP and the entities it regulates to produce paper<br>documents in the first place.  | \$4,000,000 |
|--|--|--|-------------|
| Department of<br>Motor Vehicles                            | DMV, DESPP, DOI Real<br>Time Insurance<br>Verification Project                                       | Real time insurance verification for all Connecticut<br>registered vehicles – Currently law enforcement officers,<br>DMV employees and others rely on insurance cards or<br>Acord filings to prove a vehicle has the required<br>insurance. These can be easily forged or outdated, e.g.<br>the policy was cancelled after the card was issued but<br>before the expiration date on the card. This project will<br>establish a system that will allow insurance coverage to<br>be verified on line in real time. This project will also<br>benefit motorists who have insurance but have neglected<br>to put their current insurance card in their vehicle.  | \$900,000   |
| Department of<br>Public Health                             | Modernization of the<br>Sexually Transmitted<br>Diseases Database to a<br>web-enabled<br>application | The goal of this project is to transition sexually<br>transmitted disease (STD) data from the current outdated<br>desktop installed DOS-based stand alone database into<br>the modern web-enabled application (CTEDSS) Maven<br>system that is being used to support other infectious<br>disease data and case management by the Department of<br>Public Health (DPH). This transition will allow us to<br>modernize the STD database, add additional functionality<br>needed to meet expanding program needs such as case<br>follow-up and tracking, add the ability for external users<br>such as field-based staff, local health departments and<br>healthcare providers to access the data remotely, and add<br>the federally mandated capability for electronic<br>laboratory reporting | \$2,524,806 |

| Department of<br>Public Health              | Electronic Vital<br>Records Registration<br>System - Module<br>Integration Project | The electronic vital records registration system module<br>intergration project is proposed to add three software<br>modules to the EVRR/Birth/Core registration system to<br>complete the intergration of the comperhensive vital<br>registration system at the Department of Public Health.<br>The modules to be added into the system are for Death,<br>Fetal Death and issuance (point of sale).  | \$1,685,715  |
|---|--|---|--------------|
| Department of<br>Rehabilitation<br>Services | Integrated Consumer<br>Service and Reporting<br>System                             | The Department of Rehabilitation Services (DORS) proposes to implement a Case Management System to support the unique business needs of the agency and its underlying programs. This system would optimize the communication and workflow between the programs of this recently consolidated Department. It would also provide caseload management tools and capabilities to programs presently unsupported by any technology. The primary project goals include: enhanced data management and reporting, uniform and streamlined fiscal processing, and promotion of data sharing between agency programs. Additional short term project goals include increased and efficient public access to services through enabling consumers to initiate the process of referring themselves to specific programs. Longer term goals could include using this same system and approach as a model for other state Social/Human Services Departments with multiple programs and funding sources. | \$3,255,798  |
| Department of<br>Revenue<br>Services        | Enterprise Content<br>Management   | The Department of Revenue Services (DRS) has embarked<br>on an Enterprise Content Management (ECM) initiative<br>that will provide (1) scanning and imaging, (2) FileNet<br>conversion and (3) document management. The<br>deliverables for ECM scanning and imaging will replace<br>existing outdated and obsolete remittance and data entry<br>equipment and enable streamlined processes.  | \$10,865,000 |
| Department of<br>Social Services            | ConneCT Project  | The DSS ConneCT program will modernize the agency's existing infrastructure with the implementation of a Modernization of Client Service Delivery (MCSD) solution utilizing three (3) specific technologies: Internet-based Client Access and Web Services, Document Scanning and Work Flow Management, and Interactive Voice Response (IVR) and Call Center Services. These technologies will be integrated with our existing eligibility legacy system known as EMS. These functionalities will increase the efficiency and effectiveness in how DSS serves its customers.  | \$7,648,853  |

| Department of<br>Social Services  | Health Information<br>Exchange/Integrated<br>Eligibility (IE) | The Department of Social Services Integrated Eligibility<br>System project will replace the Department's existing 24<br>year old Eligibility Management System (EMS). The<br>integrated eligibility platform, once designed, developed<br>and implemented, will provide a seamless eligibility and<br>enrollment process for Medicaid, CHIP and the CTHIX, and<br>will ultimately be used to determine eligibility for other<br>social service programs (e.g., SNAP, TFA). Specifically, the<br>planned integrated eligibility function will initially address<br>federal requirements for eligibility determinations for<br>advance premium tax credits and reduced cost sharing<br>through the Exchange, MAGI-based eligibility for<br>Medicaid, complete individual responsibility exemption<br>determinations, and coordinate enrollment. | \$33,507,119 |
|-----------------------------------|---|---|--------------|
| Department of<br>Social Services  | Balancing Incentive<br>Program (BIP)                          | The Balancing Incentive Program – Automation of Long<br>Term Services and Supports No Wrong Door and Universal<br>Assessment (BIP Project) will streamline the process<br>through which individuals who need Long Term Services<br>and Supports (LTSS) apply for and receive those services,<br>resulting in improved access to community-based, as<br>opposed to, nursing facility care. LTSS are services and<br>supports that help people with functional limitations care<br>for themselves, providing help with things like bathing,<br>dressing, eating, preparing meals, managing medications,<br>walking, housework, and managing finances.   | \$1,114,726  |
| Department of<br>Transportation   | DOT Telephone System<br>Replacement                           | The primary telephone switch (PBX) for the DOT<br>Newington Headquarters is more than 20 years old and is<br>past end of life. The system is no longer supportable due<br>to the age of the hardware and the outdated software. At<br>the same time, the cabling within the main building is too<br>old to support new PBX technology and high-bandwidth<br>geospatial applications. This project will replace the old<br>cables as well as the current telephone system with new<br>technology that will provide numerous benefits to the<br>agency.   | \$1,900,000  |
| Department of<br>Veterans Affairs | Electronic Medical<br>Record                                  | To implement an Electronic Medical Records (EMR)<br>Patients Management System from the point of<br>admission, patient care plan, patient care records,<br>scheduling, prescription drugs, patient billing, VA per<br>diem and Medicare/Medicaid billing, to include case<br>management and reporting – the enterprise solution will<br>need to meet the federal requirement for<br>billing/reimbursement and to be in compliance with all<br>Federal Regulation and HIPPA compliance requirements.   | \$818,956    |

|   | <b>DDDC</b>   |  | 40.001.000  |
|---|---|--|-------------|
| Division of<br>Public<br>Defenders      | DPDS Capabilities<br>Improvement Program  | The project will ensure the success of the Connecticut<br>Information Sharing System (CISS) efforts at DPDS and<br>address the following critical issues: (a) the lack of the<br>dedicated Case Management System that meets the<br>needs of adults as well as juvenile clients; (b) the difficult<br>access to key information and information sources; (c) the<br>lack of standardized Attorney and Staff information tools;<br>(d) the lack of integrated information; (e) the lack of<br>mobile access to information; and (f) the excessive<br>reliance on paper files.   | \$3,834,250 |
| Office of Early<br>Childhood            | Connecticut's Early<br>Childhood Information<br>System and Quality<br>Rating and<br>Improvement<br>System.TQRIS | To meet PA 11-181, two distinct information systems<br>need to be built: an Early Childhood Information System<br>(ECIS) and a Quality Rating and Improvement System<br>(QRIS). The ECIS is an operational transactional system<br>used for child case management and answering advanced<br>policy-related questions. The QRIS is a system used to<br>track early care and education program- and provider-<br>level data, as well as to provide the public with<br>information about the quality of available early care and<br>education programs  | \$6,000,000 |
| Department of<br>Consumer<br>Protection | Mobile Technology -<br>Initial Inspection<br>Efficiency<br>Enhancement  | This project is the digitalization of all initial inspections by<br>performing data entry and storage directly into the<br>enterprise system at the initial inspection site. These<br>enhancements would eliminate re-entering data, improve<br>data analysis, expedite approval times for registrants, and<br>permit employees to spend more time on mission-critical<br>tasks. The citizens and businesses of Connecticut would<br>be better served by the increased efficiency of the digital<br>inspection process. Businesses will be able to provide<br>their services to the public by having their appropriate<br>credential approved in a much timelier manner. | \$78,000    |
| Department of<br>Labor                  | Mobile Technology -<br>Wage and Workplace<br>Mobile Computing<br>(WWMC)   | Use of laptops, Air / MiFi Cards and VPN keys to allow field staff to work independent of office constraints and perform investigations and data entry outside of the office.  | \$75,000    |
| Department of<br>Public Health          | Mobile Technology -<br>Medical Facility<br>Complaints Website,<br>Automation and<br>Document Storage            | Medical Facility Complaints Website, Automation and<br>Document Storage project will eliminate a paper laden,<br>manual process and replace it with a website, mobile<br>computing and an automated electronic filing system that<br>will better serve the people of the State of Connecticut,<br>save time and money.   | \$97,407    |
| Department of<br>Revenue<br>Services    | Mobile Technology -<br>Mobile Revenue<br>Collection   | Project will eliminate a paper laden, manual process and<br>replace it with a website, mobile computing and an<br>automated electronic filing system that will better serve<br>the people of the State of Connecticut, save time and<br>money.   | \$79,275    |

|   | 1   |  | 1           |
|---|---|--|-------------|
| Office of the<br>Chief Medical<br>Examiner                  | Mobile Technology -<br>Medical Examiner<br>Forensic Field<br>Investigation                          | Acquisition of hardware (toughbooks) in an effort to make<br>field operations mobile, faster, secured/encrypted, and<br>more reliable to integrate with current software<br>applications used by Case Manager system at OCME.  | \$70,000    |
| Department of<br>Public Health                              | Local Health Annual<br>Report   | The goal of this project is to update the local health<br>annual report in order for the Department of Public<br>Health (DPH) to ensure that the LHDs, that are eligible to<br>receive per capita funding, are meeting the statutory<br>requirements to receive the funds.   | \$74,880    |
| Department of<br>Consumer<br>Protection                     | Enhancements to the<br>Connecticut<br>Prescription<br>Monitoring and<br>Reporting System<br>(CPMRS) | Enhancing the Connecticut Prescription Monitoring and<br>Reporting System (CPMRS)to more effectively identify<br>medication abuse, misuse and overprescribing patterns by<br>adding more functionality and automating many of the<br>highly labor intensive manually function within the<br>system   | \$200,255   |
| Department of<br>Labor                                      | Unemployment<br>Insurance (UI)<br>Revitalization  | The purpose of the UI Revitalization project is to replace<br>CTDOL's aging legacy systems with a robust, integrated,<br>accountable and accessible UI Tax and Benefits system<br>that serves the needs of Connecticut's claimants and<br>employers in a customer-centric environment where they<br>realize more conveniences and time savings, agency staff<br>are highly skilled and motivated, and UI tax and benefits<br>operations are streamlined and efficient.   | \$1,255,000 |
| Department of<br>Social Services                            | Husky Family Coverage   | Under the budget as approved by the General Assembly,<br>the Department of Social Services and Access Heath<br>Connecticut (AHCT) have been requested to modify the<br>existing, shared Integrated Medicaid Eligibility system to<br>allow for proposed revisions to Medicaid/Qualified Health<br>Plan (QHP) coverage for certain HUSKY A adults. For those<br>HUSKY A adults with incomes over 150% of the federal<br>poverty level (effectively 155% after consideration of the<br>5% income disregard), Medicaid will no longer provide<br>coverage, and these individuals will transition to federally<br>subsidized coverage under QHP's offered by AHCT. Those<br>with earned income, however, are subject to a 12 month<br>transitional coverage extension. Pregnant women above<br>155% FPL are exempt from this change. | \$469,770   |
| Department of<br>Mental Health<br>and Addiction<br>Services | Scheduling and<br>Timekeeping System  | Scheduling and Timekeeping System Requirements Phase   | \$35,000    |

| Department o<br>Banking | f DOB IT Major<br>Application Planning &<br>Integration Support                        | The Department of Banking (DOB) would like to secure<br>the services of an outside IT consultant to assist with its<br>planning and integration of a major IT upgrade which will<br>permit the agency to meet its demanding strategic plan,<br>and ensure the on-going operations of the Department.<br>First, the consultant will be provided with the DOB<br>strategic plan and a meeting with each division director<br>will be scheduled to explain the strategic plan and get a<br>better understanding of our IT needs. An improved IT<br>system is needed to handle the ever increasing volumes<br>and complexity of our work. Second, the consultant will<br>provide a plan outlining the most cost effective and<br>efficient components to be incorporated into the process<br>of obtaining a new IT system for use by the DOB. This is<br>expected to take 3 months. Third, the plan that is<br>developed will be implemented over the ensuing 12-15<br>months. | \$160,000   |
|-------------------------|--|--|-------------|
| Secretary o<br>State    | f Election Infrastructure:<br>Improving Voter<br>Service at Polling<br>Places          | The purpose of the project is to improve the efficiency of<br>the voter check-in process and to enhance the voting<br>experience for persons with disabilities.  | \$4,550,000 |
| Secretary o<br>State    | f Post-Election Audit  | The project will alleviate the burden on towns randomly selected to perform post-election audits.  | \$100,000   |
| Secretary o<br>State    | f Election Infrastructure:<br>Improving Speed of<br>Reporting Results                  | The purpose of the projects is to modernize and improve<br>speed and accuracy in reporting election results. Memory<br>cards will be removed from the tabulator machines and<br>the data contained therein will be uploaded into a online<br>system to report results.   | \$2,100,000 |
| Department o<br>Labor   | f CT State Information<br>Data Exchange System<br>(SIDES)                              | In order to determine individual's eligibility for<br>unemployment benefits, information must be obtained<br>from the claimant and the employer. Currently this<br>requires notices and questionnaires to be mailed to the<br>parties and their responses mailed or faxed back. CT SIDES<br>will allow employer separation information to be<br>requested and received electronically.   | \$372,758   |
| Department o<br>Labor   | f Unemployment<br>Insurance<br>Reemployment and<br>Eligibility Assessments<br>(UI REA) | CTDOL plans to implement UI REA in three distinct phases.<br>During each phase, the agency's UI mainframe system will<br>perform the automated selection and scheduling of<br>claimants, generate notification letters and provide for<br>manual rescheduling and federal reporting data<br>collection.  | \$293,184   |

| Office of<br>Protection and<br>Advocacy       | OPA Central Registry<br>Abuse Investigation<br>Database -<br>Requirements                    | Project PACRAID will overhaul and replace several limited<br>outmoded databases with one programmatic/forensic<br>investigative case management information system<br>overseen by The Office of Protection and Advocacy.  | \$90,000     |
|---|--|---|--------------|
| Department of<br>Revenue<br>Services          | DRS IT Modernization<br>Project Business Case<br>Development<br>(Requirements)               | This project will enable the Department of Revenue<br>Services (DRS) to secure the services of an outside IT<br>Consultant to assist with the development of a business<br>case for a future IT solution. It will identify IT and business<br>solutions that will maintain and enhance DRS's ability to<br>collect and administer Connecticut taxes and revenue.<br>DRS seeks an independent, highly experienced third-party<br>consultant to develop a sensible and comprehensive tax<br>system modernization business case and roadmap. This<br>project will utilize the information gathered from its<br>ongoing IT Modernization Project. | \$300,000    |
| University of<br>Connecticut<br>Health Center | Integrated Electronic<br>Medical Record  | To implement an Integrated EMR that provides the health<br>information technology to enable UConn Health to<br>achieve full compliance with federal and state<br>requirements, supports our clinical staff in providing safe,<br>quality patient care, supports our clinical research and<br>education missions, and allows for clinical collaborations<br>both within our organization and with the greater<br>community for patients we serve   | \$41,000,000 |
| Department of<br>Administrative<br>Services   | Office of the Claims<br>Commissioner -<br>Electronic Filing and<br>Case Management<br>System | Implement software for the Office of the Claims<br>Commissioner that allows for electronic filing and tracking<br>of cases.   | \$70,000     |
| Office of Policy<br>and<br>Management         | IT Business<br>Requirements and<br>Strategic Planning  | Support state agencies Information Technology strategic planning and development of business requirements.  | \$572,491    |
| Office of Policy<br>and<br>Management         | Lean program for the<br>DHMAS Scheduling<br>and Timekeeping<br>System project                | Implementation of the LEAN program to support the DHMAS Timekeeping System project  | \$4,000      |
| Office of Policy<br>and<br>Management         | Lean program for the<br>DAS / BEST E-Licensing<br>project                                    | Implementation of the LEAN program to support the DAS<br>/ BEST E-Licensing project, DHMAS Timekeeping System<br>project  | \$4,000      |
| Office of Policy<br>and<br>Management                      | State-wide health<br>information exchange   | Authorization for the development and maintenance of a state-wide health information exchange including the purchase of software and related equipment.   | \$30,000,000  |
|--|---|---|---------------|
| Department of<br>Energy and<br>Environmental<br>Protection | VOIP (Voice over IP<br>telephony)<br>implementation at<br>DEEP                                | VOIP (Voice over IP telephony) implementation at DEEP headquarters and major satellite offices.   | \$1,500,000   |
| Office of Policy<br>and<br>Management                      | Grants management<br>system   | The Criminal Justice Policy and Planning Division of OPM<br>(OPM/CJPPD) is purchasing a Lifecycle Grants<br>Management Solution (LC-GMS) that encompasses<br>beginning to end management and administration of<br>grant programs, sub-recipient grant projects and/or<br>contracts in a workflow driven, scalable, user<br>configurable, secure, enterprise capable system. | \$421,244     |
| Office of State<br>Comptroller                             | STATE EMPLOYEES<br>RETIREMENT SYSTEM<br>(SERS) REPLACEMENT<br>PROJECT -<br>Requirements Phase | This project will replace the current State Employee<br>Retirement System (SERS) with the PeopleSoft Pension<br>Administration Module   | \$2,000,000   |
| Department of<br>Administrative<br>Services                | Enterprise Licensing  | Enterprise credential management (eLicensing) is used<br>today by multiple agencies (DPH, DCP, SOTS, DOAG). This<br>project will complete current rollout activities to<br>maximize current product implementation. This project<br>will also reexamine agency business requirements to<br>determine best long term system options.   | \$270,000     |
| TOTAL  |   |   | \$222,815,900 |

| Coventry, South Windsor, Tolland  | E-government technology equipment   | 31,207    |
| Glastonbury and Hebron  | Grounds maintenance equipment   | 36,809    |
| Burlington and Farmington   | Dispatch system servers   | 9,424     |
| Burlington and Canton   | Paving box <sup>3</sup>   | Withdrawn |
| TOTAL   |   | 77,440    |
|   |   |           |
| 2015 Grants-in-Aid  |   |           |
| Ansonia and Derby   | Shared truck  | 14,939    |
| Coventry, South Windsor, Tolland  | Computer equipment  | 34,193    |
| Coventry and Mansfield  | Catch basin cleaner   | 80,299    |
| Lyme and Old Lyme   | Patrol boat and accessories   | 3,389     |
| New Haven and Woodbridge  | Chassis and dump trailer  | 89,500    |

<sup>&</sup>lt;sup>3</sup> A paving box or drag box paver is hooked to the back of the dump truck and the asphalt is dumped into the box. This paving technique is used to pre-level potholes or deep cracks on roads, and as a patchwork asphalt maintenance <u>tool</u>. The machine does not have the control for precise paving jobs; it is mainly used to overlay material on existing asphalt roads.
