2022 Bill Tracking

By: Jessica Callahan, Associate Analyst Matthew H. Frame, Legislative Analyst II July 12, 2022 | 2022-R-0140

Connecticut General Assembly Office of Legislative Research Stephanie A. D'Ambrose, Director

Notice to Readers

This report identifies bills considered during the General Assembly's 2022 regular session whose content or concepts were incorporated into other legislation, under different bill numbers, that the legislature passed.

It lists bills that were, at a minimum, fully drafted and had a public hearing but whose substance, in part or in whole, was enacted as a public act through separate legislation. The report includes those acts that (1) borrowed specific content from another bill or (2) addressed similar concepts using language that did not exactly match that of the other bill.

The content or concepts of one bill are generally carried forward into another by (1) a committee amending or substituting the language of an existing bill or creating a new bill that uses language from a previous bill and then favorably reporting the bill or (2) the House or Senate adopting an amendment containing language from a bill that otherwise failed to move forward.

During this session, the content or concepts originating in 166 bills were incorporated into other legislation that was enacted in 36 public acts and one special act.

Table 1 organizes the bills by the committee of origin, lists them in numerical order based on the bill number, identifies the relevant public acts, and briefly summarizes the final content in the acts. (Please note that Table 1 does not include committees that did not have any bills that are the subject of this report.) Table 2 lists all the bills in numerical order. In many instances, the bills and acts are broken out by specific section numbers. Consequently, some bills have multiple entries.
