

Behavioral Health Utilization for Continuously Enrolled Medicaid Members for CY 2018 - 2019 by Gender, Age, Race, and Ethnicity per 1,000 Members

Step 1: Identify total population by race, ethnicity, gender, age group, and ZIP code

- Identify all members that were continuously Medicaid enrolled for CY 2018 2019
- Excluded members that were dually enrolled at any point during this time period as well as members that had limited benefit packages.
- Excluded TEMP members
- Calculated age at the mid-point (as of December 31, 2018)
- Demographic variables are as of most recent (i.e., no history table for demographics)
- Only included members with a valid Connecticut ZIP (i.e., prefix is 06 and mapped to our internal reference table)
- This resulted in n=571,947

Step 2: Identify BH utilizer population by race, ethnicity, gender, age group and ZIP code

- Of those members identified, how members had a behavioral health claim in the same time period
- Included only paid claims with amount paid greater than \$0.
- We identify a behavioral health claim meeting any one of the following criteria:
 - A primary behavioral health diagnosis on the claim
 - o A prior U authorization number (i.e., CTBHP authorization number)

• Selected behavioral health procedure codes, revenue center codes, place of service codes and provider type and specialty codes that are specifically behavioral health and do not have a medical equivalency

• This resulted in n=229,670

NOTE: For ZIP code breakdown by race, ZIP Code must have at least 100 members by race (i.e., denominator by ZIP Code and Race must at least be 100)

DRAFT Data Produced June 18, 2020. Ad-hoc requested by Bill Halsey. Developed by Chris Bory.

Behavioral Health Utilization for Continuously Enrolled Medicaid Members for CY 2018 - 2019 by ZIP Code per 1,000 Members
