

Coordination of Care
1/31/07

Parking Lot- issues that the committee would like to return to/ address at a later date.

- 1) Pharmacy- Communication between the patient, pharmacist, MCO and provider has to go smoothly in order for prescriptions to be filled in a timely manner. How is this communication working? Where are the breakdowns?
- 2) How many patients do not get their temporary supply because they are no longer HUSKY eligible?
- 3) How do we track that transportation is working?
