

Operations Subcommittee

January 8, 2016

Overview

Operations Committee Requests:

1. Counts of Medicaid Adults served by Hospital-Based and Non-Hospital-Based Clinics
2. Discussion: Geo-Mapping to show where Patients are Served by Provider Type (Hospital vs. BH Clinic)
3. Discussion: Data to Identify Underserved Populations by Geo-Mapping

Members Served by Hospital- and Non- Hospital-Based Behavioral Health Clinics

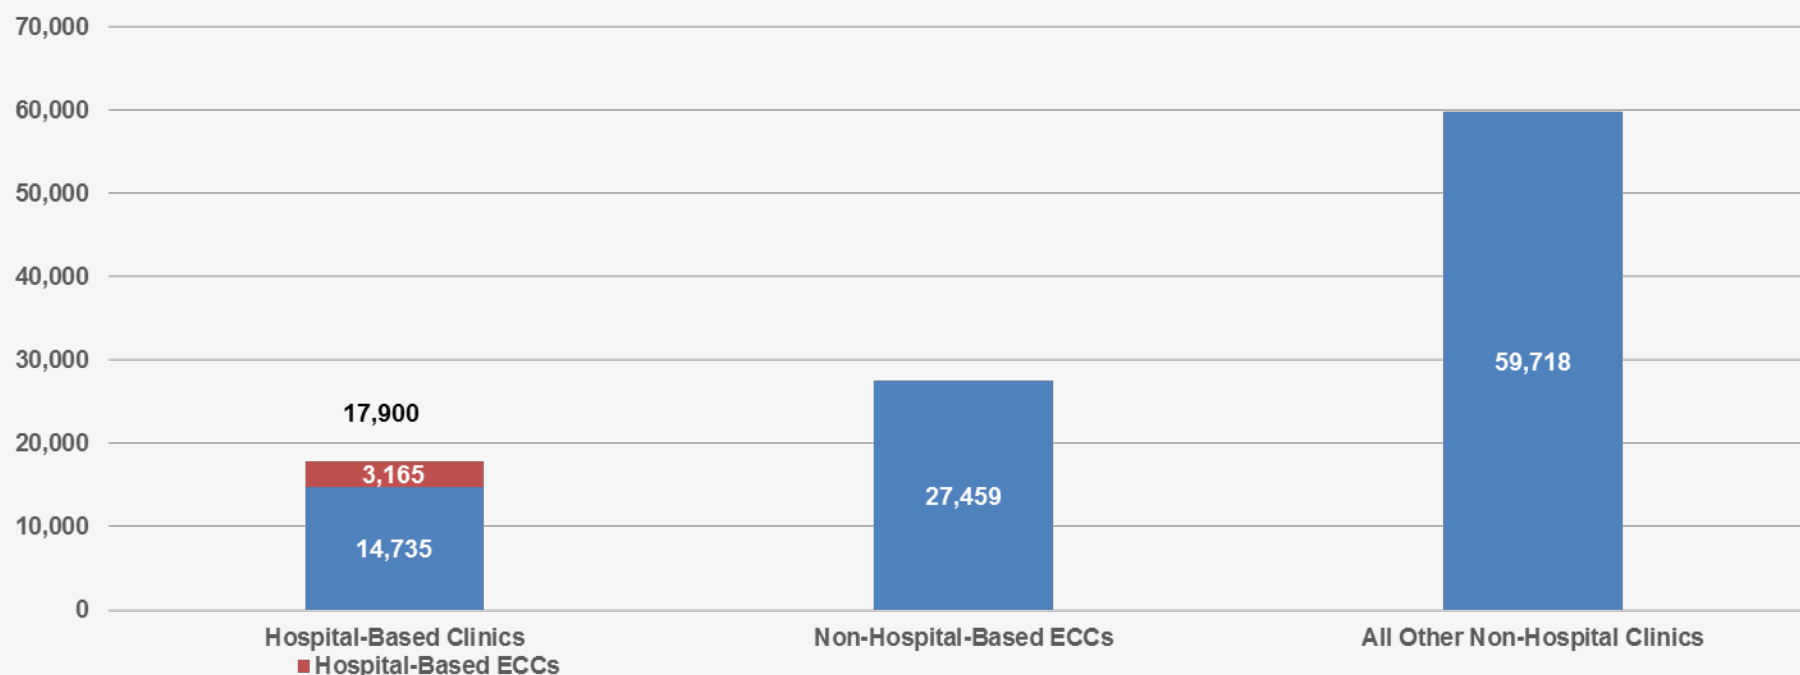

Methodology

Counts of Medicaid Adults served by Hospital-Based and Non-Hospital-Based Clinics

- Adults 18+
- Data Source: CY 2014 Outpatient Services Authorizations
- Service Types:
 - Hospital-Based Clinics: Includes Non-ECC Hospital-Based Clinics and Enhanced Care Clinics (ECCs) that are hospital-based
 - ECCs: Non-Hospital-based
 - All Other Clinics/Facilities providing Outpatient Services:
 - Category includes Non-Hospital-Based Clinics, Methadone Clinics, FQHCs, School-Based Clinics, etc.

Counts of Adult Outpatient Services

Count of Unique Adults Served by Each Outpatient Service Type
2014

Of the 57 Hospital-Based Clinic sites, 15 (26.3%) are located in Region 5.

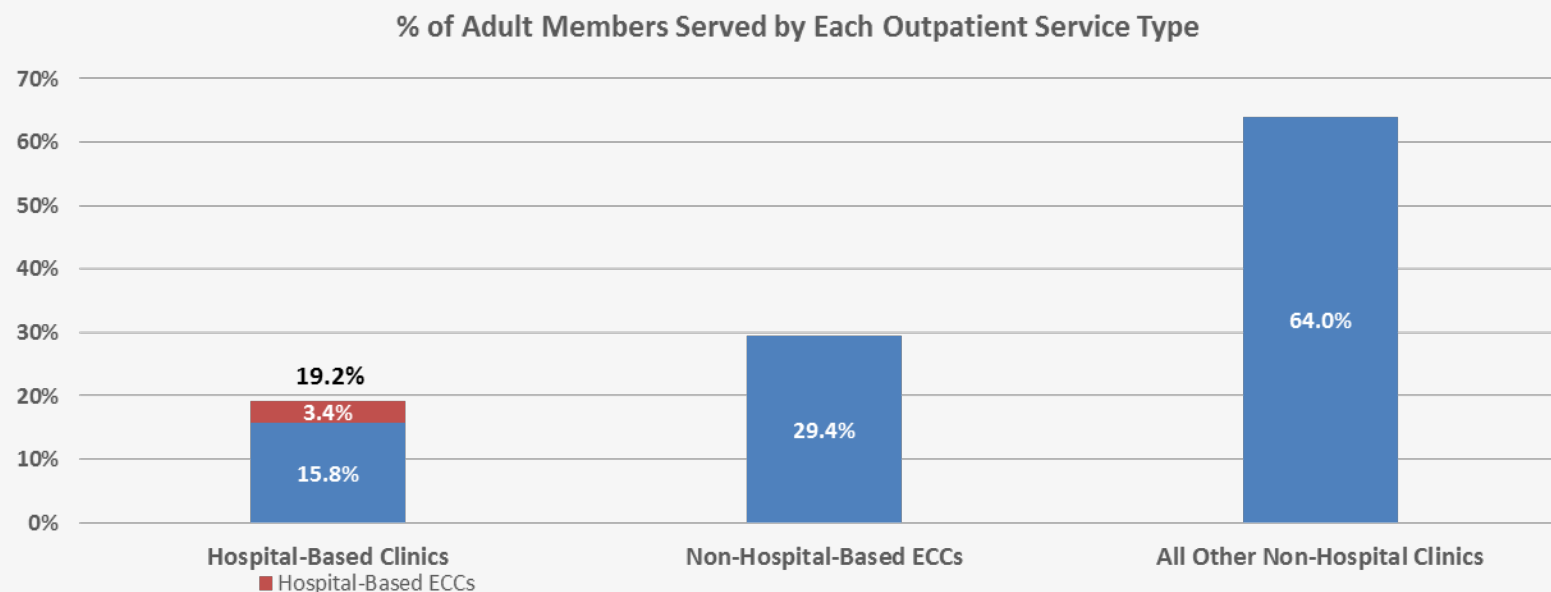

Please Note:

- Hospital-Based Clinic counts include Hospital-Based ECC counts
- There are “data integrity” issues: E.g., instances of clinics categorized as both Hospital and Non-Hospital-Based.

HARTFORD HOSPITAL	CBHP002134	HARTFORD HOSPITAL- CHILD ECC	VCB007160	008020366	BOTH	BOTH
-------------------	------------	------------------------------	-----------	-----------	------	------

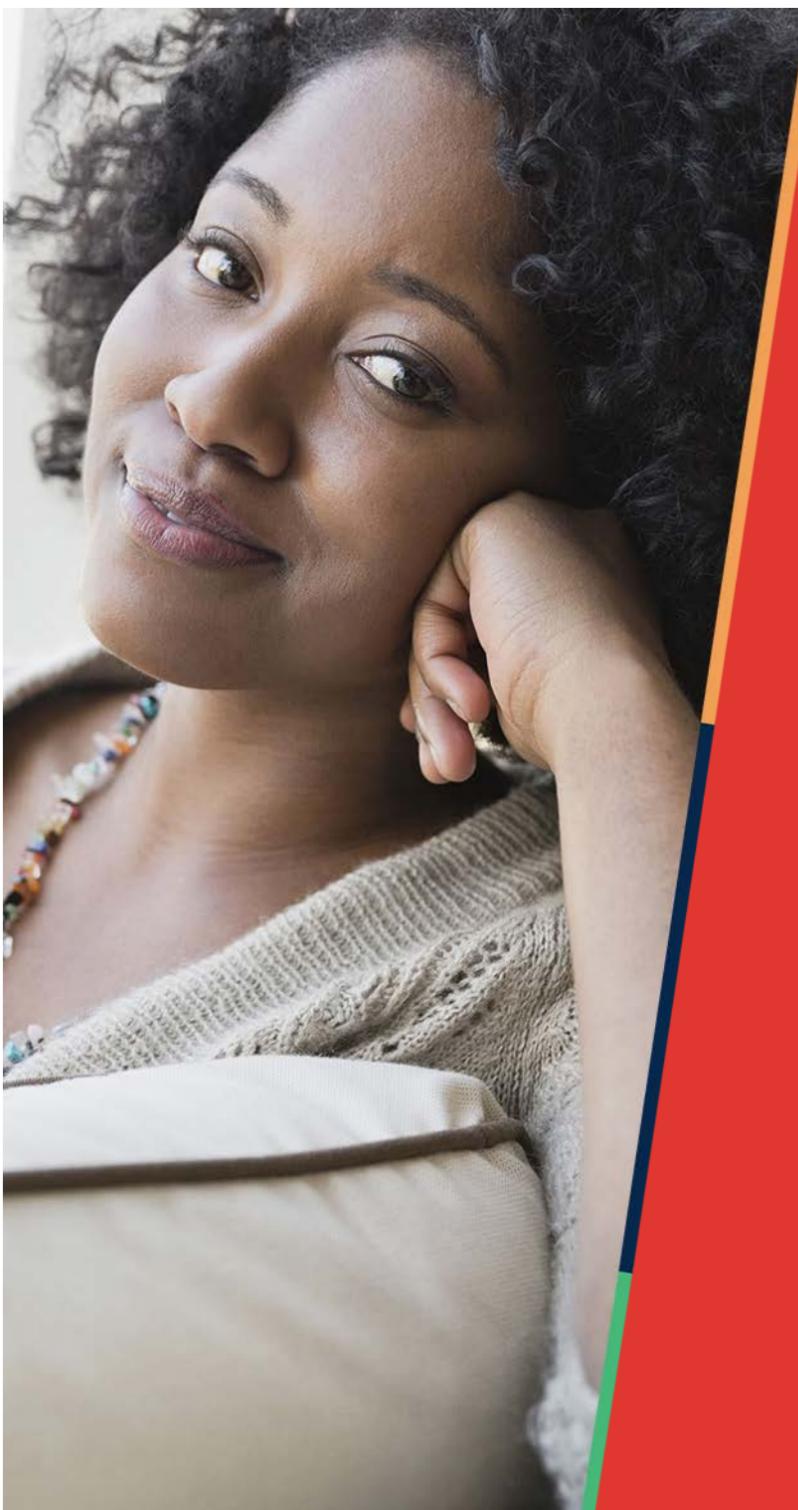

- Counts are of “unique” members within each service category but not across categories. For example, the same member may use the services of a Hospital-Based ECC and a Non-Hospital Clinic; that member would be counted once in each category.

% of Adult Outpatient Services by Service Type

Hospital-Based Clinics accounted for 19.2% of outpatient services by adult members

Please Note: Percentages will not add to 100% as members are duplicated between service types

**Discussion: Geo-
Mapping to show
where Patients are
Served by Provider
Type (Hospital vs. BH
Clinic)**

Discussion: Data to Identify Underserved Populations by Geo-Mapping

Thank you
