

Summary: Autism Spectrum Disorder (ASD) Services Level of Care (LOC) Guidelines

Attached are six LOC Guidelines for the review of the Operations Subcommittee of the Connecticut Behavioral Health Partnership Oversight Council (BHPOC):

- Comprehensive Diagnostic Evaluation
- Behavior Assessment
- Treatment Plan Development
- Program Book Development
- Treatment Services
- Observation and Direction

Included is also a summary of the BHPOC review process for purposes of informing the ASD treatment providers who may be attending Operations Subcommittee on January 5, 2018.

They will likely be more familiar with what is described in these guidelines as many of them have been requesting authorizations for this level of care for quite a while.

The guidelines have been revised a few times as a result of much provider input and feedback.

Members of the Beacon Health Options ASD team will be available at Operations to answer any questions members of the Subcommittee or providers might have.

Please review in advance of the Operations Committee on January 5, 2018.

Thank you.
