# How to get at-home over-the-counter COVID-19 test for free?

*Starting January 15, 2022, most people with a health plan can go **online**, or to a **pharmacy** or **store** to purchase an at-home over-the-counter COVID-19 diagnostic test authorized by the FDA at **no cost**.

*This applies whether you purchased your health plan on your own or whether you get health insurance through your job.

*The test will either be free directly at the point of sale, if your health plan provides for direct coverage, or by reimbursement if you are charged for your test.

*As of March 2022, individuals are also eligible to order additional tests from the federal government. Visit **www.covid.gov/tests** to order free at-home testing kits for your household.

*For more information please see: https://www.cms.gov/how-to-get-your-at-home-OTC-COVID-19-test-for-free

# Nursing Home Visitation

*On March 10, 2022, CMS issues updated guidance for visitation in nursing homes during the COVID-19 public health emergency.

*Visitation can be conducted through different means based on a facility's structure and residents' needs, such as in resident rooms, dedicated visitation spaces, and outdoors.

*Regardless of how visits are conducted, core principles and best practices of COVID-19 infection prevention should be adhered.

*Nursing Homes should be familiar with QSO-20-39-NH.

Thank you
