

good evening,

As a ct resident living in Canterbury, these executive orders don't need to be extended, we have flattened the curve, months ago, residents and grown adults should have choice whether or not to wear masks, the unfortunate part of this thing is, cause the governor can't or won't actually "mandate ", cause he knows he will get sued, which i actually will be retaining a attorney if these executive orders are continued if they are extended!!! Also why isn't the governor talking about how the cdc isn't recommending both masks and travel quarantine anymore??? You can't pick and choose what recommendations you are going to use to keep sheep scared!!! As a business owner, this craziness needs to stop, maybe in the beginning, these measures were needed but we don't need them anymore, you are killing people's businesses and don't care one bit, good luck when plaintiffs find that federal judge that hasn't been paid off and rules against the governor and state of ct, cause when that opens the door, expect a ton of lawsuits!!!!

Geoffrey Joyal
