

Lamont has destroyed Connecticut politics with these executive orders. He killed the political process as we know it and replaced democracy and its process with handpicked business friends to make decisions for all of us without representation. The executive orders need to end! The state Political leaders have been too quiet for too long. If these orders are extended what's the point of voting? What's the point of democracy if the governor can do whatever he wants without the voters having any type of say in anything? No recourse at all. The curve was flattened. It's time to go back to life again.
