

It is long past time to make masks optional in schools. There is no more hiding that keeping children in masks is all about political gain. Masking is tied to allocation of funds to schools in compliance with mask mandates. these mandates have been imposed despite the irrefutable harm caused to thousands of children.

My own children have suffered the following, in no particular order, from prolonged mask wearing in school:

Constant fatigue, chest pain, bacterial infections, facial rashes, daily headaches, nausea, vision issues and eye pain, regressed speech, nightmares, anxiety and increased illness.

Two of my children have been unlawfully denied medical mask exemptions by the city of Stamford.

The residents of CT have had enough. I've never seen this many democrats switching their political affiliation. Nothing is more important than our children.

#MASKCHOICENOW

Thank you,
Ayelet Steinberg
