**RE: OPPOSED TO CONTINUATION OF EMERGENCY DECLARATIONS AND LIMITED  
EXECUTIVE ORDERS**

TO WHOM IT MAY CONCERN:

**This charade of NED LAMONT's has to END NOW.**

The fact that Lamont hasn't been investigated by the ethics committee for these past dealing (namely, but not limited to the state contract where I have heard testimony from a state representative that Lamont chose a testing company associated with his wife's businesses at a **LOSS TO THE STATE**. And then the deal with GENEDX?) is **OUTRAGEOUS!**

All the evidence I am seeing is painting a potential conspiracy from the federal and state level, and pharmaceuticals and other companies driving policy agenda effectively making the state **ONE BIG PRIVATE INTEREST**, where the fundamental notion of a medical license has become MOOT. How can any person without a medical license dictate to another to undergo a medical procedure not only without disclosing risks, but without knowing an individual's medical history? They can't legally! How can he continue to muzzle our children knowingly abusing them without consequence? But the labyrinth of lies and dirty dealings are unraveling very very fast.

Ned Lamont has seemingly abused his position as our leader and is not capable of executing his duties effectively. I would request not only an end to the executive Emergency Declaration but also would encourage that **ARTICLES OF IMPEACHMENT** begin to be prepared, unless he is wise enough to resign before all the lies show up on the news.

Most imminently, additionally, the damages that have affected real people are aggregating very fast, and the state is at risk for great, grave liabilities for Lamonts questionable policies and business dealings. And any other party that has coordinated any of his potential questionable dealings shall also be held accountable for same.

Regards,

Caitlin Hayes, Esq
