

Greetings -

I am writing to express my sincere and deep concern for the people of our state and request our legislators to please listen to the majority voice by **lifting Governor Lamont's Emergency Orders.**

I have worked in the healthcare industry for more than 30 years and see first-hand the harm the lockdown and mask mandate have done, especially to our children. Masks in particular have not demonstrated any significant benefit - they have actually shown tremendous harm. I encourage you to seek out quality research on this subject...studies to support them on a wide-scale and/or as a long-term solution simply do not exist.

One area of GREAT concern is the current situation with **college students**. Are you aware that MOST of the public colleges in CT are mandating the vaccines and boosters? How is this possible when the state has already removed this requirement for state workers? This age group is not at serious risk of disease or hospitalization so this must be addressed immediately. There is an abundance of research indicating not only is natural immunity robust (yet ignored), this mandate is potentially harmful and is possibly deadly based on emerging data on the potential of myocarditis and many other health issues. The benefits vs. risk is simply NOT THERE.

Please work with the colleges/universities to remove this mandate ASAP.

I am including several links of recent/related articles and research for your review. I have an abundance of additional research articles, so please contact me if you'd like to receive them or have any questions on the information provided.

Overview and meta-analysis of the effects of the lockdown:

It is time to end the Emergency Orders in CT.

With respect,

CONCERNED PARENT in Bristol CT
