

Hi - my name is Erin coyle and I am

A mom of a 5 and 7 year old boys . Please it's time to let these kids have a normal childhood and school experience. It's no longer an emergency. Why are the least vulnerable still masking to make adults feel safe . Look at other states , science doesn't change over town or state lines . I'm also a business owner and have experienced first hand the politics of all of this . It's been two years ! I am begging you ! Please let people make their own decisions for their kids . If any teacher is nervous then they can wear an n95. If as a hairstylist I can see 10 people a day unmasked then why can't teachers see the same kids everyday ? These teachers unions have been tyrannical in their requests . Thanks Erin Coyle
