

Dear Members of Public Health Committee:

Thank you for your service to the residents of this state. We are parents of three children in elementary school. We have been so proud to live in a state with great leaders.

The circumstances surrounding the pandemic are no longer an 'emergency'. The time has come for the separation of powers to go back into effect in government—which is required by the Constitution. That's why we believe the Governor's emergency powers should not be extended. We would like our elected legislators to represent us regarding any mitigation efforts concernig COVID and the pandemic, or anything else.

Sincerely,  
Norm and Freda Roberts
