

Dear Representative/Legislator

My family and I have been Connecticut residents for over 14 years. End the Emergency Powers! I urge you to vote NO on each individual executive order and not to bundle them together into one vote. It's your job to pass legislation and not allow the Governor to abuse his powers with executive orders. We have not been fooled by Lamont's announcement yesterday that masks will be a local decision as of [Feb 28th](#). What happened to the 15th? Is this just to buy time in order for a new variant to be announced? Lamont's announcement does not mean he cannot just implement another emergency whenever he feels like it. The executive orders must end. We want our medical freedoms back. We want our religious exemption back and we do not want any further mandates. That includes vaccine mandates or trying to add the Covid vaccine to the required vaccine schedule for schools. This vaccine only provides some immunity and only briefly. You can still contract Covid, spread Covid and even die from Covid if you're vaccinated and boosted, so there is no reason to mandate a vaccine that does not work. Children have almost zero risk of dying from Covid and if they have already had Covid, they now have a natural immunity which is far superior to what the experimental vaccine provides. There have also been more vaccine injuries and deaths from this vaccine than from all past vaccines combined. Where there is risk, there must be choice. It is clear that this virus will become another seasonal flu and we should treat it as such. Give us back our medical freedoms, our religious exemptions and stop all mandates. There is no emergency and we need to begin to heal the division and heal our children from the unnecessary restrictions that have been imposed on them.

Thank you
