

To CT Legislature,

I am writing to urge you to vote NO on extending Lamont's executive orders. I have been a middle school and high school science teacher for 15 years and the science is clear: Masks do NOT work. Masks can NOT control aerosolized viral spread. I am beyond disheartened at what fearful adults are doing to children: continuing to restrict their breathing, preventing them from seeing facial expressions, and stifling their ability to communicate. This is highly disturbing and downright abusive. Enough is enough already. STOP THE MANDATES!

Sincerely,

Margaret Lynch
