

2-8-22

Dear Elected Leaders –

There is no emergency! And there has not been an emergency here in CT or the USA for a long time.

Did you listen to the recent Town Hall interview hosted by Kim Fiorello with the renowned Dr. Harvey Risch? He tells it like it is – there is no emergency, the mandates must be ended immediately, and the vaccine program should be stopped.

Dr. Paul Alexander cites over 150 studies that show no benefit for masks and multitudes of problems and risk. The most recent study published in JAMA claims that the average IQ lost for children over the pandemic with masks for children is 22 points – this is horrendous!

We were pleased to hear that Governor Ned Lamont said he will let go of the mask mandate on Feb 28th; however, we all know that this is a bait-and-switch action when he is still trying to extend his emergency powers. If he can extend emergency powers (over 20 states in America are “done” with the emergency, and more counting every day), the masks could become codified law. This would be a travesty. CT will be lost.

Please VOTE NO on extending Governor Lamont’s emergency powers. And please VOTE NO on codifying any of his emergency orders. Let’s get back to a real democratic government and enough of this tyranny!
