

The Toll Bill reveals that Connecticut government is *Communism by a Thousand Cuts*. Our legislature is a Democrat politburo which controls a population, not of free citizens, but units of collateral for bonding and bonding and bonding now and forever. Our earned income, and that of our unborn descendants, is promised to financial tyrants and the pension and benefit society by whom the tyrants are held hostage.

But the Toll Bill is a valuable diagnostic tool. It makes visible the toxic infection eating our liberty since Weicker's Revenge Income Tax, the Lottery snare, and the Fool's Errand of finding 8% returns on ponzi public pension funds.

Tyranny has a long history and it always lurks at a subacute level before it destroys the host population or reaches that point "*when in the course of human events*" true leaders rise to defend Liberty, again.
