**Testimony in Support of LCO #373: "An Act Concerning the Sustainability of Connecticut's Transportation Infrastructure"**

Dear Chairmen Sen. Leone and Rep. Lemar, Vice-Chairs Sen. Bergstein and Rep. Simms, Ranking Members Sen. Martin and Rep. Devlin, and Distinguished Members of the Transportation Committee,

I am a resident of Glastonbury, Connecticut, and I am submitting testimony in support of LCO #373: "An Act Concerning the Sustainability of Connecticut's Transportation Infrastructure"

All up and down the East coast cars and trucks must pay tolls. LCO #373 does NOT include cars, and there is a bond covenant in the bill to make sure this doesn't happen. By requiring trucks to pay tolls Connecticut will receive revenue that will go toward our transportation infrastructure, something sorely needed. I believe this is a much better way to pay for infrastructure as opposed to the Republican plan calling for bond funds.

I urge the committee to vote Yes for LCO #373.  
Thank you.

Sincerely,  
Nancy Goodwin
