Connecticut General Assembly - Testimony in Opposition LCO-373

I am writing about the prospect of adding tolls in Connecticut. I am against this proposal for a number of reasons:

- This bill will allow an unelected body of appointees to determine toll rates and increases
- Does not rule out tolls on automobiles
- Does not have any financial details, especially about how this will affect our state overall
- It is the wrong direction for our state and our budget problems

Thank you for your attention to my concerns.

Sincerely,

Joseph R. Pulaski
